The Secretary is limited in the exercise of this authority only by the rule of estoppel where the application of the corrected interpretation of law threatens to work a serious injustice and if the public's interest would not be unduly damaged by the imposition of estoppel.

Effect of Oct. 4, 1976, Solicitor's Opinion M-36888. M-36888 (Supp. II) (Mar. 9, 1977) 84 I.D. 171

In determining the amount of royalty due to the United States from an oil and gas lease, it is proper for the Geological Survey to use a base value which includes both the purchase price paid for the natural gas plus any additional sum paid by the purchaser of the gas to the seller as consideration for the purchase of gas.

Amoco Production Co., 29 IBLA 234 (Mar. 25, 1977)

The royalty provisions of a State lease validated under sec. 6 of the Outer Continental Shelf Lands Act will govern the determination of the royalty due to the United States.

The royalty provisions on a State of Louisiana 1942 lease form subsequently validated under sec. 6 of the Outer Continental Shelf Lands Act provide either for (1) delivery of royalty oil in kind to the lessor free of expense with delivery understood as being made when the oil has been received by the first purchaser or, (2) at the option of the lessee, payment of the value of the oil, with certain express disallowances, including no deduction for transportation charges. Constructive delivery of in-kind royalty must be authorized and accepted by the lessor to constitute a payment of royalty. The delivery-in-kind provision does not authorize the lessee to act as agent of the United States, and is not applicable where the lessee has not notified Geological Survey of any purported constructive delivery of oil to the first purchaser and Survey has not accepted such constructive delivery. Therefore, the second provision is applicable which expressly precludes deductions of transportation costs.

Superior Oil Co., 31 IBLA 127 (June 30, 1977)

Congress has provided that failure to pay annual rental timely for an oil and gas lease shall cause the lease to terminate automatically by operation of law under 30 U.S.C. § 188(b) (1970). An oil and gas lease is not deemed to have terminated for failure to pay rental timely where, because of misleading communications from the Geological Survey and the Bureau of Land Management, it appeared the lease was in a royalty status and the lessee did not have reason to know that the rental was due.

Davis Oil Co., et al., 33 IBLA 53 (Nov. 25, 1977)

Where a unit agreement provides that royalty on production shall be paid at the rate set forth in the individual lease terms, and the lease provides that no royalty shall be due on gas used for production purposes, it is proper to deduct the amount of gas used for production purposes on a lease from the gross allocation of gas to that lease before making the computation of royalty due to the United States.

Amoco Production Co. (On Reconsideration), 35 IBLA 43 (May 9, 1978)

An oil and gas lease issued for a primary term of 10 years on which there is no production will expire by its own terms where the lessee has not commenced drilling operations on the leasehold at the end of the term, and payment of compensatory royalty will not extend the lease where there has been no showing that the leasehold is subject to drainage from wells on an adjoining property.

Bell Resources, Inc., 38 IBLA 330 (Dec. 19, 1978)

An oil and gas lease issued for a primary term of 10 years and extended for 2 years by drilling cannot be extended further by payment of compensatory royalty where there is no showing that the leasehold is suffering drainage from an adjoining tract, and no compensatory royalty has been assessed by the district supervisor under 30 CFR 221.21(c).

Chaparral Resources, Inc., 39 IBLA 269 (Feb. 15, 1979)

A request for refund of excess payments under 43 U.S.C. § 1339 (1970) must be made as the limitation in the statute provides, within 2 years from the date such payments are actually made.

Phillips Petroleum Co., 39 IBLA 393 (Mar. 2, 1979)

Where the holder of an oil and gas lease on the Outer Continental Shelf has filed a suit in a Federal district court to recover certain royalties paid under his lease, the Board of Land Appeals will affirm a decision of the Director, Geological Survey, holding in abeyance the lessee's request for a refund while the suit is pending.

Tenneco Oil Co., 41 IBLA 195 (June 22, 1979)

STIPULATIONS

As a condition precedent to the issuance of an oil and gas lease, the Department of the Interior may require an applicant to accept a reasonable surface management stipulation for the protection of wildlife and watershed values.

Richard E. Cullen, 18 IBLA 414 (Feb. 10, 1975)

Where the Forest Service suggests a stipulation barring any occupancy and use of the surface as a condition precedent to the issuance of an oil and gas lease for public lands in a national forest, based only on the fact that the land is in an "inventoried roadless area," and where later the Forest Service agrees to a revised stipulation, the Bureau of Land Management decision to the extent it required the execution and filing of the "Roadless Area" stipulation will be set aside and the case remanded to the Bureau for submission of the substitute stipulation to the offeror for execution and filing.

James A. Krumhansl, 19 IBLA 56 (Feb. 21, 1975)

Where the Forest Service requests a stipulation effectively barring any occupancy or use of the surface as a condition precedent to the issuance of an oil and gas lease for lands in a national forest, based on the fact that the land is in an "inventoried roadless area," and where the Forest Service later substitutes a less restrictive stipulation, a Bureau of Land Management decision requiring the execution and filing of the roadless area stipulation will be vacated and the case will be remanded to the Bureau for submission of the substitute stipulation to the offeror for execution and filing.

Benjamin T. Franklin, 19 IBLA 94 (Mar. 4, 1975)

Where an application to lease land under the jurisdiction of another agency is rejected because of objections by that agency, and where on appeal that agency subsequently agrees to lease the land subject to certain special stipulations, such stipulations will be submitted to the offeror for execution.

Shell Oil Co., 20 IBLA 282 (May 27, 1975)

Where the Forest Service requests imposition of a stipulation effectively barring any occupancy or use of the surface as a condition precedent to the issuance of an oil and gas lease for lands in a national forest, the case will be set aside and remanded for consideration of a less stringent stipulation which the Forest Service has agreed to in other cases arising in the same and other national forests in Utah.

G. W. Anderson, 21 IBLA 328 (Aug. 14, 1975)

The execution of special stipulations as a condition precedent to issuance of oil and gas leases for land located in a national forest may be required at the discretion of the Secretary of the Interior in order to protect environmental and other land use values. The need for the stipulation should be clear and the stipulation should be a reasonable means to the intended purpose. The Forest Service's recommended stipulations will be carefully considered by the Department, but the final authority for oil and gas leasing on public domain land rests in this Department.

Earl R. Wilson, 21 IBLA 392 (Aug. 27, 1975)

Where the reasons given for rejection of an oil and gas lease offer are that several archaeological sites, possibly other such archaeological sites, and scenic values of certain lands might be endangered by oil and gas development, but the field report relied upon does not delineate the archaeological sites and fails to describe the scenic values that would be affected, the decision may be set aside and the case remanded for further investigation to determine if oil and gas

leasing could be allowed with protective stipulations, or, if not, to substantiate the basis for rejection.

Phillip S. Mahoney, 22 IBLA 136 (Sept. 26, 1975)

On appeal from decision(s) rejecting oil and gas lease offer(s) insofar as they include land(s) within a lava flow under consideration for primitive or natural area status, when the Bureau of Land Management indicates that it is willing to lease some of the land(s) under a no-surface-occupancy stipulation, and the offeror(s) indicate they would accept such a stipulation for all the land(s) at issue, the decision(s) will be set aside and the case(s) remanded for consideration of issuance of lease(s) containing no-surface-occupancy stipulation(s) on the land(s) in the lava flow.

Houston Oil and Minerals Corp., Leland A. Hodges (Trustee), 22 IBLA 172 (Sept. 30, 1975)

Leland A. Hodges (Trustee), 23 IBLA 142 (Dec. 22, 1975)

The Secretary of the Interior may require execution of special stipulations reasonably designed to protect identifiable resource values as a condition precedent to issuance of an oil and gas lease. Stipulations proposed by the Forest Service will be carefully considered by this Department, but the final decision for oil and gas leasing on public domain land rests with this Department. A "no surface occupancy" stipulation proposed in order to protect a recreation area cannot stand if it might preclude surface occupancy unreasonably beyond the boundaries of the recreation area.

Beverley Lasrich, 22 IBLA 202 (Oct. 15, 1975)

It is well established that the execution of appropriate special stipulations as a condition precedent to the issuance of oil and gas leases may be required at the discretion of the Secretary of the Interior in order to protect environmental, recreational and other land use values.

While "no surface occupancy" stipulations should be of sufficient efficacy to protect the environment, no lease should issue with stipulations so restrictive that the use of the land for any purpose associated with the production of oil and gas is totally precluded.

The financial burden of complying with protective stipulations in oil and gas leases is the sole responsibility of the lessee.

Bill J. Maddox, 24 IBLA 147 (Mar. 10, 1976)

The financial burden of complying with stipulations included in an oil and gas lease is the sole responsibility of the lessee.

Duncan Miller, 24 IBLA 203 (Mar. 19, 1976)

A decision rejecting an oil and gas lease offer because the State Office wishes to reconsider whether a lease should issue subject to a no surface occupancy stipulation will be set aside and the case remanded for the Bureau of Land Management, in the exercise of its delegated discretion to lease public lands for oil and gas, to determine whether in the light of *Chevron Oil Co.*, 24 IBLA 159 (1976), it wishes to issue a lease subject to a no surface occupancy stipulation, or whether

OIL AND GAS LEASES--Continued

STIPULATIONS--Continued

it still wishes to make the subject land not available for leasing at this time, which is within its authority.

Milan S. Parulak, 24 IBLA 278 (Mar. 30, 1976)

The execution of special stipulations as a condition precedent to the issuance of an oil and gas lease may be required at the discretion of the Secretary of the Interior in order to protect environmental, recreational and other land use values. In each case the need for the stipulation should be clear and the means to accomplish the intended purpose should be reasonable.

Cartridge Syndicate, 25 IBLA 57 (May 20, 1976)

An applicant for an oil and gas lease may be required to accept stipulations designed for the protection of the land and its resources in the public interest as a condition precedent to issuance of a lease where the stipulation does not unreasonably interfere with the rights conferred by an oil and gas lease. A stipulation requiring lessee, at his own expense, to make an inventory of archaeological and historical sites on those areas of the leased lands which he proposes to enter for purposes of exploration or drilling and to agree to reasonable conditions of use designed to protect any valuable sites or objects disclosed by the inventory is reasonable and will be upheld.

W. E. Haley, 25 IBLA 311 (June 29, 1976)

C. C. Hughes, 27 IBLA 38 (Sept. 22, 1976)

The Secretary of the Interior may require an oil and gas lease applicant to accept stipulations reasonably designed to protect environmental and other land use values as a condition precedent to the issuance of a lease. Where a Bureau of Land Management district-wide environmental analysis record establishes the likelihood that significant archaeological values are prevalent in the district and may be found in the land embraced by leases in that district, a special protective stipulation is not unreasonable solely because no archaeological values have yet been discovered in the lands in the lease offer.

Oil and gas lessees must bear the expenses occasioned by compliance with stipulations for the protection of the environment and other land use values.

A stipulation requiring an oil and gas lessee to provide a certified statement by an archaeologist concerning the existence of archaeological values on lands to be disturbed by the lessee does not constitute an unlawful delegation of authority because the purpose of the statement is to notify an authorized officer of the Department who retains the authority to determine whether the archaeological data are significant and whether such data are being or may be irrevocably lost or destroyed.

Cecil A. Walker, Alan C. F. Dille, 26 IBLA 71 (July 9, 1976)

The Secretary of the Interior may require execution of special stipulations reasonably designed to protect environmental and other land use values as a condition precedent to the issuance of an oil and gas lease. But where a State Office of the Bureau of Land Management seeks to impose a "no surface occupancy" stipulation, the most stringent of stipulations, without showing that it has considered less stringent stipulations, the decisions will be set aside. Where the stated basis for the imposition of the stipulation is the threat of oil and gas activities to automobile racing, the decision will be set aside particularly where the lease offers include land primarily outside the boundaries of the racing grounds withdrawal.

Vern K. Jones et al., 26 IBLA 165 (Aug. 4, 1976)

Where the transmittal of an appeal to the Board of Land Appeals is accompanied by the request of the State Director that the case be remanded because the special stipulation which accompanied the decision from which the appeal was taken was not the correct one, the case is remanded for further consideration by the Bureau of Land Management, and the Board of Land Appeals does not pass on the reasonableness of either stipulation.

A A Minerals Corp., 27 IBLA 1 (Sept. 17, 1976)

Applicants for oil and gas leases may be required to accept a stipulation as reasonable and in the public interest and in accord with national and departmental policy, which stipulation requires lessees to engage the services of a qualified professional archaeologist to conduct a survey of the areas to be disturbed for evidences of archaeological or historic sites or materials with the cost to be borne by the lessees, but such archaeologist is not required to work only under the authority of a current Antiquities Act permit.

General Crude Oil Co., 28 IBLA 214 (Dec. 10, 1976)
83 I.D. 666

The Secretary of the Interior may require an offeror for a noncompetitive oil and gas lease to accept stipulations reasonably designed to protect environmental and other land use values as a condition precedent to issuance of a lease. A stipulation requiring lessee, at his own expense, to make an inventory of archaeological and historical sites on those areas of the leased lands which he proposes to enter for purposes of exploration or drilling and to agree to reasonable conditions of use designed to protect any valuable sites or objects disclosed by the inventory is reasonable and will be upheld.

Milan S. Parulak, 30 IBLA 220 (May 26, 1977)

The Secretary of the Interior may require offerors for noncompetitive oil and gas leases to accept stipulations reasonably designed to protect environmental and other land use values prior to the issuance of the leases. A stipulation which may require the lessee, at his own expense, to make an inventory of all archaeological, paleontological, and historical sites on those areas of the lease which he proposes to enter for exploration or drilling, and to accept reasonable conditions of use for the protection of such sites and artifacts and which requires the lessee to bear the cost of salvaging all objects of antiquity, is reasonable and will be upheld.

Milan S. Parulak, 31 IBLA 69 (June 23, 1977)

Duncan Miller, 32 IBLA 322 (Oct. 3, 1977)

Although the Bureau of Land Management may require such special stipulations as are necessary for the protection of the lands embraced in any lease, proposed special stipulations must be supported by valid reasons which will be weighed by this Department with due regard for the public interest. It is the Bureau's responsibility to impose stipulations which are necessary, appropriate and reasonably related to oil and gas activities, and a

OIL AND GAS LEASES--Continued

STIPULATIONS--Continued

stipulation which would forbid the lessee to occupy the surface must be set aside on appeal where BLM fails to provide adequate justification for its imposition and fails to show that it has considered less stringent stipulations.

Nova B. Henderson, 31 IBLA 217 (July 6, 1977)

The Secretary of the Interior may in his discretion reject any offer to lease public lands for oil and gas upon a proper determination that leasing would not be in the public interest, even though the land applied for is not withdrawn from leasing under the Mineral Leasing Act. Where part of the lands applied for are in the Bonneville Salt Flats, and the Bureau of Land Management determines that oil and gas leasing activities are not compatible with the primary management objective to prevent irreparable damage to a significant resource, rejection of the lease offers or the requirement of execution of surface occupancy stipulations will be affirmed.

Vern K. Jones et al., Eadran E. Hartley, 33 IBLA 74 (Dec. 6, 1977)

The Bureau of Land Management may require the execution of special stipulations, including a no-surface-occupancy stipulation, to protect environmental and other land use values, as a condition for issuing an oil and gas lease. Where the Bureau of Land Management, in a decision requiring a no-surface-occupancy stipulation along a proposed wild and scenic river corridor, has considered all information available to it, has adequately weighed the factors involved, and the appellant has not shown sufficient reason to change the result, the decision will be upheld.

Cuesta Petroleum Co., 33 IBLA 116 (Dec. 16, 1977)

Dean W. Powell, 37 IBLA 387 (Nov. 6, 1978)

Where, rather than delay action on an oil and gas lease offer pending a wilderness review and management decision pursuant to sec. 603 of the Federal Land Policy and Management Act, the Bureau of Land Management proposes to issue the lease immediately subject to a "no surface occupancy" stipulation under the apparently mistaken impression that the applicant had so requested, the decision will be set aside and action on the lease offer will be deferred until a final decision can be made.

Dell K. Hatch and Amoco Production Co., 33 IBLA 138 (Dec. 19, 1977)

The Bureau of Land Management may require the execution of special stipulations, including a no-surface occupancy stipulation, to protect environmental and other land use values, as a condition for issuing an oil and gas lease. Where the Bureau of Land Management, in a decision requiring a no-surface-occupancy stipulation in a scenic area, has considered all information available to it, has adequately weighed the factors involved, and the appellant has not shown sufficient reason to change the result, the decision will be upheld.

Robert L. Healy, 35 IBLA 66 (May 12, 1978)

OIL AND GAS LEASES--Continued

STIPULATIONS--Continued

A stipulation prohibiting drilling and storage of oil on a portion of an oil and gas lease of 160 acres in order to protect an area of a river which is in a study section of the Wild and Scenic Rivers Act is reasonable, without consideration of other factors, where it leaves three-quarters of the lease open to regular activity.

Duncan Miller, 35 IBLA 108 (May 15, 1978)

Upon a determination that a stipulation, which was not expressly made applicable to a parcel of land in the Notice of Availability, should be applied to an oil and gas lease, the State Office should inform the offeror of its intent to apply the stipulation. The application of such a stipulation is reviewable under 43 CFR 4.410.

Duncan Miller (On Reconsideration), 39 IBLA 312 (Feb. 23, 1979)

The Bureau of Land Management may require the execution of special stipulations to protect environmental and other land use values when deciding to issue a lease.

Robert E. Kunkel, 41 IBLA 77 (May 31, 1979)

Where the surface administering agency proposes stipulations to protect the wilderness potential of National Forest lands from oil and gas operations, additional stipulations to that end are not to be imposed by the Bureau of Land Management, absent a compelling showing of need therefor.

Robert Schulein, 41 IBLA 253 (June 28, 1979)

Robert Schulein, 42 IBLA 56 (July 31, 1979)

Where Bureau of Land Management requests within 30 days the execution of special stipulations prepared by the Forest Service for acquired lands embraced in a noncompetitive oil and gas lease offer, filed over-the-counter, it may properly reject the lease offer when the special stipulations are not executed and submitted within the 30 days.

Hansen Brothers, 42 IBLA 40 (July 31, 1979)

Where the land embraced in a proposed oil and gas lease, to be issued subsequent to the enactment of the Federal Land Policy and Management Act of 1976, 43 U.S.C. § 1701 (1976), has been identified as having wilderness characteristics and is being reviewed for possible preservation as wilderness pursuant to sec. 603 of that Act, it is proper for the Bureau of Land Management to require the execution of a special stipulation providing that consent to oil and gas operations will not be given if it is determined that such operations will impair the land's wilderness characteristics.

Where the land embraced in a proposed oil and gas lease has been identified as having wilderness characteristics and is being reviewed for possible preservation as wilderness pursuant to sec. 603 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. § 1782 (1976), it is proper for the Bureau of Land Management to require the execution of a special stipulation providing that oil and gas operations are subject to regulation where the obvious aim is protecting the wilderness values inherent in the land.

Reserve Oil, Inc., et al., 42 IBLA 190 (Aug. 22, 1979)

OIL AND GAS LEASES--Continued

STIPULATIONS--Continued

It is not improper for BLM to require an oil and gas lease offeror to sign a stipulation which provides that the lease will be subject to regulations promulgated by the Department of Energy relating to those areas specified in sec. 302 of the Department of Energy Organization Act of 1977, even though the offeror as lessee would be bound to follow the law and regulations if he did not sign the stipulation, as the stipulation merely serves the purpose of informing him that the statute and regulations will apply.

James M. Chudnow, 42 IBLA 307 (Aug. 29, 1979)

Where BLM's decision to reject a noncompetitive lease offer is based upon a report that the findings and conclusions contained in the Management Framework Plan (MFP) for the area show that acceptance of the offer would not be in the public interest because the lease would threaten valuable wildlife, archaeological, paleontological, scenic, and recreation values, and it is subsequently revealed that the report relied upon misstated the contents of the MFP, which actually made provision for mineral leasing subject to certain protective stipulations, the decision will be reversed and remanded with instructions to issue the lease with appropriate and reasonable stipulations.

James O. Breene, Jr. (On Reconsideration), 42 IBLA 395 (Sept. 11, 1979)

A decision rejecting an oil and gas lease offer because it would result in undue degradation of the environment will be set aside where the record does not clearly support the conclusion reached by BLM.

John M. Lebfrom, 43 IBLA 67 (Sept. 19, 1979)

Departmental regulations 43 CFR Subpart 3109 and 43 CFR 3120.2-3, and sec. 603 of the Federal Land Policy and Management Act of 1976 provide ample authority for the Bureau of Land Management to require oil and gas lessees to agree to wilderness protection stipulations.

Where the notice of a competitive oil and gas lease sale clearly provided that the lease would be subject to stipulations, by making a bid, the offeror was bound to accept the stipulations.

Palmer Oil and Gas Co., 43 IBLA 115 (Sept. 24, 1979)

Although the Bureau of Land Management may require such special stipulations as are necessary for the protection of the lands embraced in any lease, on appeal such special stipulations must be supported by valid reasons which will be weighed by the Department with due regard for the public interest, and where the stipulation and reason therefore does not appear in the record, the record must be augmented on remand.

James M. Chudnow, 43 IBLA 375 (Oct. 31, 1979)

The Bureau of Land Management has authority to require the execution of special stipulations to protect environmental and other land use values for lands where those values are present. Oil and gas offers should not be rejected because of the asserted presence of environmental or other values, without prior consideration being given to the feasibility of stipulations to protect such values.

David H. Yates, 44 IBLA 121 (Nov. 27, 1979)

OIL AND GAS LEASES--Continued

STIPULATIONS--Continued

The Bureau of Land Management, on behalf of the Secretary of the Interior, may condition issuance of a lease on the execution of a no surface occupancy stipulation where on appeal the record shows that the Bureau has adequately considered the factors involved and the stipulation is a reasonable means to accomplish proper Departmental purposes.

R. E. Shillander, 44 IBLA 216 (Dec. 11, 1979)

SUSPENSIONS

A regulatory change in the definition of the phrase "primary term" of an oil and gas lease is not an order or consent of the Secretary of the Interior to suspend operations under an oil and gas lease.

Inexco Oil Co., 20 IBLA 134 (May 5, 1975)

Where an oil and gas lessee appeals from a decision of an Oil and Gas Supervisor's determination that additional royalties are due to the Government, and simultaneously files a request for suspension of the ruling, which is granted by the Geological Survey "until further notice," prejudgment interest continues to accrue during the period of the suspension. This conclusion is premised on the doctrine that interest is compensation for delay in payment.

Atlantic Richfield Co., 21 IBLA 98 (June 30, 1975)
82 I.D. 316

Applications by lessees for relief of producing requirements must be made to the appropriate Regional Oil and Gas Supervisor of the Geological Survey. No suspension of operations and production is authorized in the absence of a well capable of production on the leasehold, except when the Secretary directs a suspension in the interest of conservation.

Duncan Miller, 21 IBLA 361 (Aug. 25, 1975)

A nonproducing oil and gas lease expires and may not be retroactively suspended when there is no suspension application pending at the time of expiration. The filing of an application for permit to drill and Geological Survey's delay in acting on the application do not create a de facto suspension of the lease.

Jones-O'Brien, Inc., 1 SEC. 13 (Apr. 21, 1978)
85 I.D. 89

The Department of the Interior is not authorized to suspend an expired noncompetitive oil and gas lease so as to revive and extend the lease term unless an application therefor was filed before the expiration of the lease.

Burton Hancock, 40 IBLA 1 (Mar. 6, 1979)

The provision in a unit agreement allowing suspension of production requirements for unavoidable delays does not supplant the lessee's responsibility to comply with the procedure set out in the regulation for obtaining a suspension. A written application for suspension must be filed in triplicate with the area oil and gas supervisor prior to the expiration of the leases.

Suspension of production requirements for leases on which there are no wells capable of producing in paying quantities must be approved by the Secretary; this

OIL AND GAS LEASES--Continued

SUSPENSIONS--Continued

authority is not delegated to other officers below the Secretarial level.

American Resources Management Corp., 40 IBLA 195 (Apr. 5, 1979)

There is no authority to suspend an oil and gas lease terminated by operation of law for failure to pay the annual rental on or before the anniversary date of the lease where no application for suspension was filed before the lease terminated.

Tenneco Oil Co., Cordillera Corp., 44 IBLA 171 (Nov. 30, 1979)

TERMINATION

Oil and gas leases terminate by operation of law if the annual rental payment is not actually received in the proper office by the close of the business day.

E. J. Harvey, Jr., 19 IBLA 230 (Mar. 25, 1975)

An oil and gas lease is automatically terminated by operation of law where an unsigned rental check is tendered prior to the anniversary date of the lease but is not signed and returned until after the anniversary date.

Richard S. Bowman, 19 IBLA 261 (Mar. 31, 1975)

An oil and gas lease terminated by operation of law for failure to pay the annual rentals on time may be reinstated where the lessee's delay in making payment was due to his seeking clarification of an illegible notice of payment sent by the Bureau of Land Management, and his action demonstrates his reliance on the notice.

Joseph E. Sieger, 20 IBLA 206 (May 8, 1975)

When an oil and gas lease, extended beyond the primary term because of production, no longer has a well capable of producing oil or gas in paying quantities, the lease terminates by operation of law if within 60 days after cessation of production no approved reworking or drilling operations are begun on the lease.

Estate of Anna Aronow, 20 IBLA 364 (June 11, 1975)

Under the provisions of 43 CFR 3107.2-1(b)(2) (1973) an oil and gas lease which had been committed to a unit and extended as a result of production occurring within that unit, is not within its primary term but rather is held by production. Therefore, the diligent drilling extension provision of 43 CFR 3107.2-3 is not available as a method of further extension since that provision is limited to leases in their primary term.

Tenneco Oil Co., Sun Oil Co., 21 IBLA 130 (July 14, 1975)

OIL AND GAS LEASES--Continued

TERMINATION--Continued

Before relief may be granted to the lessee of a terminated oil and gas lease, he must comply with the prerequisites set forth in 30 U.S.C. § 188 (1970). The Secretary has no authority to waive such statutory prerequisites.

Reliance upon receipt of a courtesy notice can neither prevent the lease from terminating by operation of law nor serve to justify a failure to pay the lease rental timely.

Advice or information received over the telephone from personnel of the Bureau of Land Management does not constitute a "bill or decision rendered by" the Department under 30 U.S.C. § 188(b) (1970).

Only when a lessee has made a deficient rental payment on or before the anniversary date of an oil and gas lease will a Notice of Deficiency be sent. If no payment at all is made, the lease will not qualify for consideration under the exceptions to automatic termination set forth in 30 U.S.C. § 188(b) (1970).

A Notice of Termination is sent to the lessee of a terminated oil and gas lease only if he has tendered payment of the rental within 20 days after the anniversary date.

C. J. Iverson, 21 IBLA 312 (Aug. 14, 1975) 82 I.D. 386

Where a lessee fails to pay the annual rental on or before the anniversary date, and where the lessee knew, or should have known, that the payment was due, estoppel will not operate to relieve the lessee of the consequent automatic termination of the lease.

The Polumbus Corp., 22 IBLA 270 (Oct. 30, 1975)

Where the deficiency in rental paid on or before the anniversary date of a lease is nominal and a notice of deficiency is sent to the lessee, the lease terminates by operation of law when the balance is not paid within 15 days from receipt of the notice or until the anniversary date, whichever is later.

No petition for reinstatement of an oil and gas lease terminated by operation of law, 30 U.S.C. § 188(c) (1970), may be entertained if the full amount of rental due was not paid within 20 days after the anniversary date of the lease.

Joseph Francis, 22 IBLA 277 (Oct. 30, 1975)

An oil and gas lease in a unit area will be held to have been extended by diligent drilling on the anniversary date even though the lease was not properly committed to the unit, where the parties in interest and the Department had assumed that the land was properly committed and there are no intervening rights to the leasehold.

Woods Petroleum Corp., 23 IBLA 12 (Nov. 25, 1975)

A petition for reinstatement of an oil and gas lease which has expired by operation of law for failure to make payment of the annual rentals on time will be denied where the petition is filed with the appropriate office more than 15 days after receipt of notification of termination of the lease.

Where the advance rental check is received within 20 days after the anniversary date, the Bureau may deposit said check in an "unearned" account in order to preserve the right of the lessee to petition for reinstatement of the terminated lease and to safeguard the

OIL AND GAS LEASES--Continued

TERMINATION--Continued

check, create a record of the payment, and bring it under accounting control. This does not signify acceptance of the payment, or indicate that the lease has not terminated, or create an estoppel against the Government.

John J. Nordhoff, Dean Kirk, 24 IBLA 73 (Feb. 26, 1976)

An oil and gas lease terminated by operation of law for failure to pay the advance rental timely will be reinstated when the lessee shows that its failure to pay the rental on or before the anniversary date was justifiable.

Great Basins Petroleum Co., 24 IBLA 117 (Mar. 1, 1976)

An oil and gas lease which has terminated by operation of law for failure to pay the annual rental on or before the due date may not be reinstated unless, among other things, payment has been tendered at the proper office within 20 days of the anniversary date.

Merlin E. Huston, C. D. Sharpe, 24 IBLA 269 (Mar. 29, 1976)

A. E. White et al., 28 IBLA 91 (Nov. 12, 1976)

Beatrice G. Wood, 42 IBLA 141 (Aug. 16, 1979)

Denial of a request for approval of an assignment of an interest in an oil and gas lease is proper where (1) the lease had terminated by operation of law pursuant to 30 U.S.C. § 188(b) (1970) for failure to make timely payment of rental, and where (2) the assignor is a stranger to the lease, and the record is devoid of any assignment from the lessees of record to the assignor.

Albert DiDivilio, Jr., Gennaro J. Grande and Jeremy V. Cohen, 26 IBLA 169 (Aug. 4, 1976)

The lessee of an oil and gas lease, issued after Sept. 2, 1960, which has reached the end of its primary term, must submit the rental for the first year of an anticipated extended term under 30 U.S.C. § 226(e) (1970), on or before the regular anniversary date of the lease. Failure to submit the rental timely will result in the automatic termination of the lease by operation of law under 30 U.S.C. § 188(b) (1970). Unless the lessee can show that he is entitled to reinstatement of his lease under 30 U.S.C. § 188(c) (1970), he cannot obtain the extension.

The provisions of 30 U.S.C. §§ 188(b) and (c) (1970), and decisions of the Board discussing those provisions, are generally applicable to both competitive and noncompetitive oil and gas leases on which there is no well capable of producing oil or gas in paying quantities.

"Cancellation" and "termination." The "cancellation" and the "termination" of oil and gas leases are separate, distinct concepts. Cancellation requires a specific act by the Department authorized by various statutes. Termination under 30 U.S.C. § 188(b) (1970), is automatic, occurring by operation of law when the lessee fails to pay his rental timely.

Oil Resources, Inc., 28 IBLA 394 (Feb. 7, 1977)
84 I.D. 91

OIL AND GAS LEASES--Continued

TERMINATION--Continued

Where the fact that a bank improperly dishonored a check drawn thereon is not corroborated by an official of the bank until after the State Office issued its decision adverse to oil and gas lessee, the decision will be set aside and the case remanded for further consideration in light of the bank's admission of error.

Gretchen Capital, Ltd., 29 IBLA 247 (Mar. 25, 1977)

Reliance upon receipt of a courtesy notice can neither prevent the lease from terminating by operation of law nor serve to justify a failure to pay the lease rental timely.

Energy Resources, Inc., 30 IBLA 11 (Apr. 8, 1977)

When an oil and gas lease is in royalty status and acreage containing the well is segregated into a new lease by approval of an assignment, the nonproductive base lease does not terminate for failure to pay rental timely if the Bureau of Land Management does not inform the lessee of the segregation until after the anniversary date of the lease.

Odessa Natural Corp., 30 IBLA 28 (Apr. 11, 1977)

An oil and gas lease is extended by operation of law for 2 years beyond the expiration of its primary term when actual drilling operations were commenced on the lease (or for the lease under a unit plan) prior to the expiration of the primary term and such operations are being diligently prosecuted on the expiration date, even though the lease may also have production at that time.

Rio Blanco Natural Gas Co., 30 IBLA 191 (May 19, 1977)
84 I.D. 196

The lessee of an acquired lands oil and gas lease issued after Sept. 2, 1960, which has reached the end of its primary term, must submit the rental for the first year of an anticipated extended term under 30 U.S.C. § 226(e) (1970), on or before the regular anniversary date of the lease. Failure to submit the rental timely will result in the automatic termination of the lease by operation of law under 30 U.S.C. § 188(b) (1970). Unless the lessee can show that he is entitled to reinstatement of his lease under 30 U.S.C. § 188(c) (1970), the lease must be deemed to have terminated at the end of its stated term.

Shell Oil Co., 30 IBLA 290 (June 1, 1977)

The Board of Land Appeals will entertain and grant a motion by the Bureau of Land Management to remand an oil and gas lease case on appeal to the Board from a decision holding the lease had terminated and denying a petition to reinstate the lease, where BLM discovered, while the case was on appeal, that its decision was predicated on an erroneous factual basis in that annual rental for the lease had actually been paid on time, but the check had been misplaced by BLM and was later found.

Kathryn J. Ealing, 31 IBLA 1 (June 15, 1977)

OIL AND GAS LEASES--Continued

TERMINATION--Continued

A prerequisite of the reinstatement process is the tender of payment within 20 days of the anniversary date which protects the right of the lessee to petition for reinstatement. The check is then deposited in an unearned account to create a record of it, and bring it under accounting control, however, depositing of the check does not create an estoppel against the Government.

Adolph F. Mazatori, 31 IBLA 39 (June 21, 1977)

An oil and gas lease in its extended term by reason of production terminates by operation of law when it is determined that the lease no longer has a well capable of production in paying quantities and no reworking or drilling operations are begun within 60 days after cessation of production. In this situation the lessee is not entitled to written notice and 60 days to place the well in a producing status.

Upon a determination that production has ceased on an oil and gas lease in its extended term by reason of such production because the well on the lease is no longer capable of production in paying quantities, the lessees of record are entitled to notice and an opportunity to request a hearing on the issue of the productive capacity of the well where they have presented evidence raising an issue of fact regarding the status of the well.

Universal Resources Corp., et al., 31 IBLA 61 (June 23, 1977)

Where it is alleged that a bank erroneously dishonored a check drawn thereon, and an official of the bank admits that the payment was refused by mistake, the error of the bank will not vitiate the otherwise proper payment of rent.

Pauline V. Trigg, John H. Trigg, 31 IBLA 296 (July 22, 1977)

Congress has provided that failure to pay annual rental timely for an oil and gas lease shall cause the lease to terminate automatically by operation of law under 30 U.S.C. § 188(b) (1970). An oil and gas lease is not deemed to have terminated for failure to pay rental timely where, because of misleading communications from the Geological Survey and the Bureau of Land Management, it appeared the lease was in a royalty status and the lessee did not have reason to know that the rental was due.

Savio Oil Co., et al., 33 IBLA 53 (Nov. 25, 1977)

The standards of reasonable diligence and justifiable delay govern reinstatement of oil and gas leases as well as geothermal leases, and principles established in oil and gas lease reinstatement cases generally govern cases involving reinstatement of geothermal leases as well.

Gaye E. Jenkins, 33 IBLA 135 (Dec. 19, 1977)

An oil and gas lease which is in rental status terminates when the annual advance rental is not properly received in the State Office by the anniversary date of the lease.

Julia Holmes, 33 IBLA 231 (Dec. 28, 1977)

A check tendered prior to the due date of an oil and gas lease annual rental payment, which is properly dishonored by the drawee bank, does not constitute timely payment. But where return of the check results from a confirmed bank error, subsequent collection and payment of the check relates back to the time of the original tender, and payment is timely.

Fireline Petroleum Corp., 34 IBLA 73 (Feb. 22, 1978)
85 I.D. 30

A nonproducing oil and gas lease expires and may not be retroactively suspended when there is no suspension application pending at the time of expiration. The filing of an application for permit to drill and Geological Survey's delay in acting on the application do not create a de facto suspension of the lease.

Jones-O'Brien, Inc., 1 SEC. 13 (Apr. 21, 1978)
85 I.D. 89

An oil and gas lease committed to a unit agreement expires at the end of its primary term if there is then no well capable of production of oil or gas in paying quantities within it or any lease committed to the unit, and there are no other statutory reasons for extending it.

Where the State Office determines that an oil and gas lease committed to a unit has expired at the end of its primary term because there is not within it or the unit a well capable of production in paying quantities, the lessee is entitled to notice and an opportunity for a hearing on that issue where it has presented evidence that raises an issue of fact regarding the status of wells in the unit.

Manhattan Resources, Inc., 34 IBLA 346 (Apr. 28, 1978)

It is the responsibility of a lessee to see that any payment tendered for annual rental under an oil and gas lease is so identified that the appropriate State office can credit the payment to the proper lease account. However, where an appellant demonstrates that the rental money was received timely by the appropriate State Office, and the evidence indicates that the lessee subsequently gave timely and proper instructions as to its application, the lease is properly deemed to have not terminated.

Pacific Transmission Supply Co., 35 IBLA 263 (June 2, 1978)

An oil and gas lease terminates automatically by operation of law for failure to pay rental timely when the rental check, although timely received by the appropriate BLM office, is not honored by the bank on which it is drawn. However, if a lessee provides adequate evidence, such as an admission by a bank official, that the bank erroneously dishonored the check, the error of the bank may not vitiate the otherwise proper payment of rental to BLM.

Don C. Wiley, 35 IBLA 302 (June 2, 1978)

Absent an affirmative billing error by BLM, a Federal oil and gas lessee is entitled to a Notice of Deficiency in regard to advance rental only where such lessee has made timely payment of the lease rental and the payment tendered is deficient by not more than $10 or 5 percent of the total amount due, whichever is greater.

Reliance upon receipt of a courtesy notice can neither prevent the lease from terminating by operation of law nor serve to justify a failure to pay the full lease rental in a timely manner.

A purported assignment of an oil and gas lease does not relieve the lessee of record of the responsibility to make timely payment of all rentals until such assignment is formally approved by BLM.

Great Basins Petroleum Co., 36 IBLA 42 (June 30, 1978)

In the absence of joint lessees establishing the existence of a prior agreement that a particular lessee was responsible for payment of the oil and gas lease rental, the failure of the joint lessees to pay the rental timely is a joint failure and the joint lessees must each satisfy the reinstatement requirements of 30 U.S.C. § 188(c) (1976). In the absence of reasonable diligence, the lease cannot be reinstated unless each joint lessee can show that he has a justifiable excuse for failing to pay the rental timely.

Frederick C. Farrington, George M. Boffman, 36 IBLA 70 (June 30, 1978)

The automatic termination provision in sec. 31 of the Mineral Leasing Act, *as amended*, does not apply to a situation where, due to other contingencies, additional rental may become due on a date other than the anniversary date of a lease.

American Resources Management Corp., 36 IBLA 157 (July 31, 1978)

An oil and gas lease is extended by operation of law for 2 years beyond the expiration of its primary term when actual drilling operations were commenced on the lease (or for the lease under a unit plan) prior to the expiration of the primary term and such operations are being diligently prosecuted on the expiration date.

Shell Oil Co., 36 IBLA 253 (Aug. 15, 1978)

An oil and gas lease expires at the end of its primary term where there has not been compliance with any of the provisions of the Mineral Leasing Act under which a further extension of the lease may be granted.

Erna M. Groth, 37 IBLA 224 (Oct. 16, 1978)

A noncompetitive oil and gas lease on which there is no well capable of production in paying quantities terminates by operation of law and not by the action of any official if the annual rental is not paid on or before the due date. Submission of a rental check without identifying the lease number precluded the Bureau of Land Management from accepting the check as payment for the lease, and a lease is properly held to terminate in the absence of a timely identified payment of the rental.

An oil and gas lease terminated by operation of law for failure to pay rental timely may be reinstated only where, among other things, it is shown that the failure to pay the rental timely was either justifiable or not due to a lack of reasonable diligence. Mailing a properly identified rental check after the due date does not constitute reasonable diligence, nor is there justification for the late payment because an unidentified

check was received by BLM prior to the due date but returned for identification of the account to be credited.

S. Delos Champaign, 37 IBLA 377 (Nov. 6, 1978)

"Payment." A noncompetitive oil and gas lease on which there is no well capable of production in paying quantities terminates by operation of law for failure to pay the annual rental on or before the due date. A check for rental does not constitute payment until it is received at the proper office.

The applicable statute limits the authority of the Department of the Interior in reinstating leases only to those situations where it is shown that the failure to pay the rental timely was either justifiable or not due to a lack of reasonable diligence. Reasonable diligence normally requires sending or delivering payment to the proper office sufficiently in advance of the anniversary date to account for normal delays in the collection, transmittal, and delivery of the payment. Late payment of the rental is justifiable only where failure to make timely payment is the result of causes beyond the control of the lessee, and simple inadvertence in mailing the payment to the wrong office does not justify failure to send timely payment to the proper office.

Gretchen Capital, Ltd., 37 IBLA 392 (Nov. 8, 1978)

"Reasonable diligence." Where an oil and gas rental check bearing the due date of the lease is submitted a few days in advance thereof, but the check is returned by the Bureau of Land Management and thereupon a new check is promptly submitted, even if it could be considered that the lease had terminated, it would be eligible for reinstatement under 30 U.S.C. § 188(c) (1976) because there has been reasonable diligence on the part of lessee.

Lillie Belle Higgins, 38 IBLA 254 (Dec. 8, 1978)

Where checks submitted in payment of annual rental on oil and gas leases are returned by the drawee bank as uncollectible because they are postdated, and there has been no bank error, no tender or payment of annual rental has been made. In the absence of any other payment prior to the anniversary date, the leases terminate automatically by operation of law.

Benjamin T. Franklin, 38 IBLA 291 (Dec. 18, 1978)

Upon failure of a lessee to pay rental on or before the anniversary date of the lease, for any lease on which there is no well capable of producing oil or gas in paying quantities, the lease automatically terminates by operation of law.

A lessee may be entitled to reinstatement of the lease if it is shown, among other things, that reasonable diligence was exercised in mailing the payment, or that the delay in remitting the rental is justifiable. Where a lessee is unable to make the requisite showing, a petition for reinstatement is properly denied.

Reasonable diligence generally requires mailing the rental payment sufficiently in advance of the anniversary or due date to account for normal delays in collection, transmittal, and delivery of the mail. Mailing the rental payment 1 day before or on the anniversary date of the lease does not constitute reasonable diligence.

A lack of diligence may be justifiable if it is demonstrated that at or near the anniversary date there existed sufficiently extenuating circumstances outside the lessee's control which affected his or her actions

OIL AND GAS LEASES--Continued

TERMINATION--Continued

in paying the rental fee. Instances of simple forgetfulness, inadvertence, ignorance of the regulations, reliance on BLM courtesy notices, and similar occurrences do not excuse diligence.

Ronald C. and Mary A. Hill, 38 IBLA 315 (Dec. 19, 1978)

An oil and gas lease issued for a primary term of 10 years on which there is no production will expire by its own terms where the lessee has not commenced drilling operations on the leasehold at the end of the term, and payment of compensatory royalty will not extend the lease where there has been no showing that the leasehold is subject to drainage from wells on an adjoining property.

Webb Resources, Inc., 38 IBLA 330 (Dec. 19, 1978)

An oil and gas lease issued for a primary term of 10 years and extended for 2 years by drilling cannot be extended further by payment of compensatory royalty where there is no showing that the leasehold is suffering drainage from an adjoining tract, and no compensatory royalty has been assessed by the district supervisor under 30 CFR 221.21(c).

Chaparral Resources, Inc., 39 IBLA 269 (Feb. 15, 1979)

A noncompetitive oil and gas lease cannot be extended beyond the end of its primary term by commitment to an approved unit agreement where no actual drilling has been commenced anywhere within the unit on the date the lease is due to expire.

Burton Hancock, 40 IBLA 1 (Mar. 6, 1979)

Upon failure of a lessee to pay rental on or before the anniversary date of the lease, for any lease on which there is no well capable of producing oil or gas in paying quantities, the lease automatically terminates by operation of law.

A lessee may be entitled to reinstatement of the lease if it is shown, among other things, that reasonable diligence was exercised in mailing the payment, or that the delay in remitting the rental is justifiable. Where a lessee is unable to make the requisite showing, a petition for reinstatement is properly denied.

Reasonable diligence generally requires mailing the rental payment sufficiently in advance of the anniversary or due date to account for normal delays in collection, transmittal, and delivery of the mail. This board has repeatedly held that reasonable diligence has not been exercised where a rental payment is posted at a time that one could not assume delivery before the statutory terminal date of the lease.

Lack of diligence may be justifiable if it is demonstrated that at or near the anniversary date there existed sufficiently extenuating circumstances outside the lessee's control which affected his or her actions in paying the rental fee.

Bernard W. Crowe, 40 IBLA 114 (Mar. 27, 1979)

OIL AND GAS LEASES--Continued

TERMINATION--Continued

Although deficiencies in an application for assignment of an oil and gas lease may be timely cured, 30 U.S.C. § 187a (1976) specifies the time when an assignment is effective, and no assignment can be approved for a terminated oil and gas lease.

Upon failure of a lessee to pay full rental on or before the anniversary date of a lease, for any lease on which there is no well capable of producing oil or gas in paying quantities, the lease automatically terminates by operation of law, despite a partial payment submitted on the basis of a partial relinquishment which is not yet effective.

Even if it were true that termination of an oil and gas lease was in part the result of Bureau of Land Management's failure to act timely on an assignment application, there is no authority either to withhold the effect of termination under 30 U.S.C. § 188(b) (1976) or to reinstate the lease under sec. 188(c), where there has been no payment of the full rental within 20 days after termination.

Reichhold Energy Corp., 40 IBLA 134 (Mar. 29, 1979)

A lease terminated automatically for untimely payment of annual rental may be reinstated only upon proof that reasonable diligence was exercised, or that the lack of diligence was justified. In the absence of such proof, a petition for reinstatement is properly denied.

Reasonable diligence ordinarily requires mailing the payment sufficiently in advance of the anniversary date to account for normal delays in the collection, transmittal, and delivery of the mail.

Untimely payment of the annual rental may be justified if proximately caused by extenuating circumstances outside the lessee's control which occurred at or near the anniversary date of the lease.

Estate of Kenneth F. Kramer, 40 IBLA 147 (Mar. 29, 1979)

An oil and gas lease which is in its extended term because of production terminates when production ceases unless pursuant to 30 U.S.C. § 226(f) (1976): (1) reworking or drilling operations are begun within 60 days after cessation and are continued with reasonable diligence until production resumes; (2) the Secretary has ordered or consented to suspension of operations or production; or (3) for lands on which there is a well capable of production, the lessee places the well in producing status at least within 60 days of receipt of notice to do so.

Where production has ceased on an oil and gas lease extended by production, and the record is unclear whether the conditions prescribed by 30 U.S.C. § 226(f) (1976) precluding termination of the lease have occurred, the case will be remanded to the Bureau of Land Management to reconsider with the Geological Survey if the lease has terminated, including a determination whether the lessee began reworking or drilling operations within 60 days after cessation of production and diligently prosecuted such operations before attaining production as asserted by him on appeal. A hearing should be held, if necessary, to resolve disputed facts.

Vern H. Holinder and Julienne J. Holinder, 40 IBLA 164 (Apr. 3, 1979)

OIL AND GAS LEASES--Continued

TERMINATION--Continued

The provision in a unit agreement allowing suspension of production requirements for unavoidable delays does not supplant the lessee's responsibility to comply with the procedure set out in the regulation for obtaining a suspension. A written application for suspension must be filed in triplicate with the area oil and gas supervisor prior to the expiration of the leases.

Suspension of production requirements for leases on which there are no wells capable of producing in paying quantities must be approved by the Secretary; this authority is not delegated to other officers below the Secretarial level.

Where the Geological Survey, in making its decision, has reviewed the same information submitted on appeal to the Board of Land Appeals to show that there was a well capable of producing oil or gas in paying quantities on the date the lease expired, and there are no disputed facts, but only a dispute on the proper application of the law to those facts and legal interpretations, a hearing is not warranted in the case.

"A well capable of producing oil or gas in paying quantities." The provision in 30 U.S.C. § 226(f) (1976) referring to a well capable of producing oil or gas in paying quantities refers to a well which is actually in physical condition to produce a sufficient quantity of oil or gas to yield a reasonable profit over and above the costs of operating the well and marketing the product. A satisfactory test of a well to establish its capability as of the termination date is necessary. Evidence which only supports inferences is not sufficient, nor is a showing only of a potential prospect for profitable operation at some future time.

American Resources Management Corp., 40 IBLA 195 (Apr. 5, 1979)

An oil and gas lease issued on July 1, 1951, is not controlled by P.L. 83-555, effective July 29, 1954, and the lease therefore does not terminate automatically by operation of law if annual rental is not paid timely, as this law does not apply retroactively to the lease in the absence of written notice from the lessees that they have elected to subject their lease to this law. Rather, the mineral leasing law in effect prior to July 29, 1954, controls, under which the lessees' failure to pay annual rental subjects the lease to cancellation only after BLM gives them 30 days' notice of their failure to pay the rental timely. BLM's decision canceling such lease will be vacated where it did not give the lessees the required notice.

Allied Chemical Corp. et al., 40 IBLA 272 (Apr. 18, 1979)

An oil and gas lessee may be entitled to reinstatement of the lease if it is shown, among other things, that reasonable diligence was exercised in mailing the payment, or that the delay in remitting the rental is justifiable. Where a lessee is unable to make the requisite showing, a petition for reinstatement is properly denied.

John A. Steele, Jr., 41 IBLA 49 (May 29, 1979)

An oil and gas lease which is in its extended term because of production terminates when production ceases unless pursuant to 30 U.S.C. § 226(f) (1976): (1) reworking or drilling operations are begun within 60 days after cessation and are continued with reasonable diligence until production resumes; (2) the Secretary has ordered or consented to suspension of operations or production; or (3) for lands on which there is a well capable of production, the lessee places the well in producing status at least within 60 days of receipt of notice to do so.

John S. Feher, 41 IBLA 191 (June 22, 1979)

A hearing is properly ordered where there exist issues of fact the resolution of which will determine whether an oil and gas lease concluding its primary term was converted from rental status to royalty status. Appellant shall have the burden of proof to establish by a preponderance of the evidence (a) that the Dolezal-Government #1 well was capable of producing oil and gas in paying quantities on Oct. 31, 1978, or (b) that there was a discovery of oil or gas in paying quantities on lease W 15891 on Oct. 31, 1978. If either (or both) of these propositions is established, the subject lease was not subject to automatic termination by law for failure to make timely rental payment.

Coronado Oil Co., 42 IBLA 235 (Aug. 22, 1979)

An oil and gas lease on which there is no well capable of producing oil and gas in paying quantities automatically terminates if the lessee fails to pay the annual rental on or before the anniversary date of the lease. A terminated lease can be reinstated only if, among other requirements, the lessee shows his failure to pay on time was either justifiable or not due to a lack of reasonable diligence.

Victor Holz, 42 IBLA 284 (Aug. 27, 1979)

Where the failure to pay rental on or before the anniversary date of a lease is attributable to a breakdown in mailing procedures within the parent company of the lessee, neither reasonable diligence nor justification is shown to support a petition for reinstatement.

The Secretary may reinstate a lease terminated by operation of law for failure to pay on or before the anniversary date the full amount of rental due where it is shown to the satisfaction of the Secretary that such failure was either justifiable or not due to a lack of reasonable diligence on the part of the lessee. 30 U.S.C. § 188(c) (1976). Reasonable diligence normally requires sending or delivering payments sufficiently in advance of the anniversary date to account for normal delays in the collection, transmittal, and delivery of the payment. 43 CFR 3108.2-1(c)(2) (1977).

Fuel Resources Development Co., 43 IBLA 19 (Sept. 11, 1979)

An oil and gas lease on which there is no well capable of production terminates by operation of law if the annual rental payment is not actually received by the Bureau of Land Management State Office on or before the anniversary date.

Annie Mae Buckley, 44 IBLA 99 (Nov. 20, 1979)

An oil and gas lease in its extended term because of the termination of an approved unit plan to which it was committed, on which lease there is no well capable of production in paying quantities, terminates automatically by operation of law where the annual rental is not paid on or before the anniversary date of the

OIL AND GAS LEASES--Continued

TERMINATION--Continued

lease. The pendency of an appeal regarding the termination date of the extension does not excuse the failure to maintain the lease in good standing by timely payment of the annual rental.

There is no authority to suspend an oil and gas lease terminated by operation of law for failure to pay the annual rental on or before the anniversary date of the lease where no application for suspension was filed before the lease terminated.

Tenneco Oil Co., Cordillera Corp., 44 IBLA 171 (Nov. 30, 1979)

An oil and gas lease on which there is no well capable of producing oil or gas in paying quantities will automatically terminate on the anniversary date of the lease upon failure of lessee to pay the minimum annual rental, despite a partial payment submitted on the basis of a partial relinquishment, which was ineffective because not filed by the record title holder pursuant to 43 CFR 3108.1, and despite issuance of a Bureau of Land Management decision subsequent to the anniversary date confirming a decreased annual rental.

D. J. Bradshaw, 44 IBLA 181 (Nov. 30, 1979)

A lessee may be entitled to reinstatement of the lease if it is shown, among other things, that reasonable diligence was exercised in mailing the payment, or that the delay in remitting the rental is justifiable. Where a lessee is unable to make the requisite showing, a petition for reinstatement is properly denied.

Reasonable diligence generally requires mailing the rental payment sufficiently in advance of the anniversary or due date to account for normal delays in collection, transmittal, and delivery of the mail. Mailing the rental payment 2 days before the anniversary date of the lease does not constitute reasonable diligence.

A lack of diligence may be justifiable if it is demonstrated that at or near the anniversary date there existed sufficiently extenuating circumstances outside the lessee's control which affected his or her actions in paying the rental fee. A lessee's suffering severe, incapacitating injuries during the month before the anniversary date of the lease may constitute proximate cause sufficient to justify late payment of the rental and to warrant reinstatement of the lease.

Norman C. Stroiak, 44 IBLA 188 (Nov. 30, 1979)

A notice of appeal from Geological Survey's failure to approve a communitization agreement must be filed within 30 days after appellant is served with the decision thereof or the doctrine of administrative finality generally bars consideration of the same issue in a later appeal.

Where approval of a communitization agreement has been denied, and other authorization is not present, production from an oil and gas lease within a State spacing unit cannot be attributed to another Federal lease, and absent production that lease expires at the end of its term.

Gulf Oil Corp., 44 IBLA 292 (Dec. 26, 1979)

OIL AND GAS LEASES--Continued

TWENTY-YEAR LEASES

Where a 20-year oil and gas lease, committed to an approved unit agreement prior to the end of its initial term in 1962 and thereby extended beyond the original term, is eliminated from the unit agreement in 1972 and its term is automatically extended for 2 years and so long thereafter as oil or gas is produced in paying quantities, such a lease is not eligible for further 10-year renewals and an application for such a renewal filed in 1974 is properly rejected.

Marathon Oil Co., Chevron Oil Co., 19 IBLA 1 (Feb. 20, 1975)

A 10-year renewal of a 20-year oil and gas lease expires by its own terms where no timely application for further renewal is made by the lessee. Such lease is not held by production and terminates automatically on its final anniversary date notwithstanding the existence of a producing well on the leasehold.

Peacock Oil Co., Inc., Twin Arrow, Inc., 29 IBLA 74 (Feb. 23, 1977)

A 10-year renewal of a 20-year oil and gas lease expires by its own terms where no timely application for further renewal is made by the lessee, pursuant to 43 CFR 3107.8-2; however, the language of the regulation is permissive and a delay in filing a renewal application may be excused in the presence of special circumstances.

Peacock Oil Co., Inc., Twin Arrow, Inc., 30 IBLA 103 (May 2, 1977)

A 20-year oil and gas lease which has been renewed for successive 10-year periods, and which at the time of expiration of a 10-year period is committed to an approved unit plan of development, is not entitled to another 10-year renewal, but is extended pursuant to 30 U.S.C. § 226(j) (1976).

Anne Burnett Tandy et al., 33 IBLA 106 (Dec. 16, 1977)

Texaco, Inc., 33 IBLA 296 (Jan. 10, 1978)

Texaco, Inc., 40 IBLA 294 (Apr. 27, 1979)

To obtain a renewal of a 20-year oil and gas lease the lessee should file an application for renewal at least 90 days prior to the expiration of the lease term. However, this requirement is permissive and a delay in filing the application may be excused in the presence of special circumstances.

Homestake Oil and Gas Co., 40 IBLA 262 (Apr. 16, 1979)

UNIT AND COOPERATIVE AGREEMENTS

Where a 20-year oil and gas lease, committed to an approved unit agreement prior to the end of its initial term in 1962 and thereby extended beyond the original term, is eliminated from the unit agreement in 1972 and its term is automatically extended for 2 years and so long thereafter as oil or gas is produced in paying quantities, such a lease is not eligible for further 10-year renewals and an application for such a renewal filed in 1974 is properly rejected.

Marathon Oil Co., Chevron Oil Co., 19 IBLA 1 (Feb. 20, 1975)

An oil and gas lease in a unit area will be held to have been extended by diligent drilling on the anniversary date even though the lease was not properly committed to the unit, where the parties in interest and the Department had assumed that the land was properly committed and there are no intervening rights to the leasehold.

Woods Petroleum Corp., 23 IBLA 12 (Nov. 25, 1975)

"Area covered by unit plan" and "Lands committed and not committed to unit plan." When an oil and gas lease is committed to a cooperative or unit plan of development or operation approved by the Secretary, and when such plan unitizes less than all horizons or depths of said lease, the "area covered" by the plan consists only of the unitized depths or horizons and excludes any depths or horizons not unitized. Such a lease necessarily "embraces lands that are in part within and in part outside of the area covered by such plan" and must be "segregated into separate leases as to the lands committed and the lands not committed." "Lands committed" can only refer to all unitized depths or horizons; "lands not committed" refers to all non-unitized depths. 30 U.S.C. § 226(j) (1970).

Amoco Production Co., 24 IBLA 227 (Mar. 24, 1976)

In order to support extension of an oil and gas lease on the basis of production within a pre-existing unit to which the lease was not previously committed, the lessee must reach an agreement with the parties to the unit agreement and the unit operating agreement in accordance with the procedures for subsequent joinder outlined therein and submit evidence of such agreement for approval of the Oil and Gas Supervisor, United States Geological Survey, prior to expiration of the lease. The mere sending of notice by the lessee to the Bureau of Land Management announcing his intention to commit his lease to an existing unit agreement is not sufficient.

Duncan Miller, 25 IBLA 125 (June 7, 1976)

Unleased Federal lands ordinarily are not committed to unit agreements unless by a specific action of a duly authorized officer of the Department, and a tract of such land is not committed to a unit agreement in spite of the fact that the tract is included in the area described in sec. 2 of the agreement as the unit area, is shown on the map attached to the agreement as Exhibit A to be within the boundaries of the unit area, and is shown on Exhibit B of the agreement as being unleased Federal land.

High Crest Oils, Inc. (now Tricentrol United States, Inc., Through Change of Name), 29 IBLA 97 (Feb. 23, 1977)

A Bureau of Land Management decision extending the lease term of an oil and gas lease for 2 years following the termination of the unit agreement of which the lease was a part is premature, where the lessee has appealed the Geological Survey's determination of the effective date of termination of the unit agreement. The Bureau of Land Management decision will be set aside and the case remanded to await the final outcome of the lessee's appeal of the Geological Survey determination.

Tenneco Oil Co., 29 IBLA 157 (Mar. 7, 1977)

A determination of an Area Oil and Gas Supervisor, Geological Survey, that a subsequent joinder could not effectuate commitment of an oil and gas lease to a unit agreement prior to expiration of the lease is properly set aside by the Director, Geological Survey, as not being within the authority of the Area Oil and Gas Supervisor to determine.

An oil and gas lessee, who files the necessary subsequent joinder documents with the Area Oil and Gas Supervisor, Geological Survey, in accordance with the subsequent joinder procedures outlined in the unit agreement, will have his lease committed to the unit as of the date of filing with the Area Oil and Gas Supervisor for the purpose of extension of the lease on the basis of production within the unit. However, the commitment does not become effective for determining the benefits and obligations under the unit agreement, as to the parties to the agreement, until the first day of the month following the filing.

Bruce Anderson, 30 IBLA 179 (May 19, 1977)

An oil and gas lease is extended by operation of law for 2 years beyond the expiration of its primary term when actual drilling operations were commenced on the lease (or for the lease under a unit plan) prior to the expiration of the primary term and such operations are being diligently prosecuted on the expiration date, even though the lease may also have production at that time.

Rio Blanco Natural Gas Co., 30 IBLA 191 (May 19, 1977) 84 I.D. 198

By the terms of the mineral leasing laws, unit agreement, and by regulation, unitized oil and gas leases issued after Sept. 2, 1960, which reach the end of a 2-year extended term by drilling expire by operation of law if there is not production of oil or gas in paying quantities within the unit at that time.

The U.S. Geological Survey is the technical expert of the Department of the Interior in matters concerning geologic evaluations. The Bureau of Land Management is entitled to rely on mineral determinations of Survey, such as qualification of a test well as a discovery well defined by a unit agreement, in the absence of a clear and definite showing of error.

Corrine Grace, 30 IBLA 296 (June 1, 1977)

A 20-year oil and gas lease which has been renewed for successive 10-year periods, and which at the time of expiration of a 10-year period is committed to an approved unit plan of development, is not entitled to another 10-year renewal, but is extended pursuant to 30 U.S.C. § 226(j) (1976).

Anne Burnett Tandy et al., 33 IBLA 106 (Dec. 16, 1977)

Texaco, Inc., 33 IBLA 296 (Jan. 10, 1978)

Texaco, Inc., 40 IBLA 294 (Apr. 27, 1979)

An oil and gas lease committed to a unit agreement expires at the end of its primary term if there is then no well capable of production of oil or gas in paying quantities within it or any lease committed to the unit, and there are no other statutory reasons for extending it.

Where the State Office determines that an oil and gas lease committed to a unit has expired at the end of its primary term because there is not within it or the unit

UNIT AND COOPERATIVE AGREEMENTS--Continued

a well capable of production in paying quantities, the lessee is entitled to notice and an opportunity for a hearing on that issue where it has presented evidence that raises an issue of fact regarding the status of wells in the unit.

Manhattan Resources, Inc., 34 IBLA 346 (Apr. 26, 1978)

The amendment to 30 U.S.C. § 226(j) (1970) by the Mineral Leasing Act Amendments of 1960 does not require segregation into separate leases of any lease committed before July 29, 1954, to a unit agreement which covers land within and land outside the area covered by the plan.

Where a unit agreement provides that royalty on production shall be paid at the rate set forth in the individual lease terms, and the lease provides that no royalty shall be due on gas used for production purposes, it is proper to deduct the amount of gas used for production purposes on a lease from the gross allocation of gas to that lease before making the computation of royalty due to the United States.

Amoco Production Co. (On Reconsideration), 35 IBLA 43 (May 9, 1978)

Where only a portion of an oil and gas lease is committed to an approved unit agreement sec. 17(j) of the Mineral Leasing Act, *as amended*, mandates the segregation of the noncommitted lands into a separate lease.

American Resources Management Corp., 36 IBLA 157 (July 31, 1978)

Before issuance of a competitive oil and gas lease for land within the area of an approved unit agreement, it is proper to require the successful bidder to file evidence that he has entered into an agreement with the unit operator for development of the land in the lease under the terms and provisions of the approved unit agreement or to file a statement giving satisfactory reasons for failure to enter such agreement.

Where high bidder for a competitive oil and gas lease within the area of an approved unit agreement fails to file evidence showing joinder to the unit agreement or to submit satisfactory reasons for failure to enter into agreement with the unit operator, it is proper to reject his bid and to refund the bonus payment tendered with the bid.

Gordon H. Barrows, 36 IBLA 160 (July 31, 1978)

An oil and gas lease is extended by operation of law for 2 years beyond the expiration of its primary term when actual drilling operations were commenced on the lease (or for the lease under a unit plan) prior to the expiration of the primary term and such operations are being diligently prosecuted on the expiration date.

A unitized oil and gas lease is entitled to an extension for 2 years where production testing operations are being conducted on the unit well on the expiration date of the lease. Such testing qualifies as "actual drilling operations" as defined by 43 CFR 3107.2-1 which includes not only the physical drilling of a well, but the testing, completing, or equipping of such well for production of oil or gas.

Shell Oil Co., 36 IBLA 253 (Aug. 15, 1978)

OIL AND GAS LEASES--Continued

UNIT AND COOPERATIVE AGREEMENTS--Continued

Where a Federal oil and gas lessee commits a portion of his lease to a proposed unit agreement, thereafter assigns all that committed portion to another, which assignment is approved, and subsequently the proposed unit is approved by the Geological Survey, the lessee is not entitled to a 2-year extension under 30 U.S.C. § 226(j) (1970), for the retained portion of the lease.

E. M. Tully, 37 IBLA 62 (Sept. 18, 1978)

A noncompetitive oil and gas lease cannot be extended beyond the end of its primary term by commitment to an approved unit agreement where no actual drilling has been commenced anywhere within the unit on the date the lease is due to expire.

Burton Hancock, 40 IBLA 1 (Mar. 6, 1979)

It is not proper to deny a creditable request for approval of unavoidable delay time under sec. 16 of the Santa Ynez Unit Agreement, even though the Geological Survey considers the unit agreement extended by diligent drilling operations.

Exxon Co., U.S.A., 41 IBLA 118 (June 13, 1979)

"Paying Quantities." The term "paying quantities," used in the Brady (Deep) Unit Agreement to determine whether or not a participating area of a unit should include additional tracts where the existence of hydrocarbons in paying quantities is disputed, refers to cost of drilling and production plus a reasonable profit.

The U.S. Geological Survey is the technical expert of the Department in matters concerning geologic evaluation of oil and gas lease production, and the Secretary is entitled to rely on the Survey's determinations, as to the extent of the participating area of a unit, absent a clear showing of error.

Amoco Production Co., 41 IBLA 348 (July 11, 1979)

An oil and gas lease is properly extended for 2 years pursuant to 30 U.S.C. § 226(e) (1976) and 43 CFR 3107.2-3 where prior to the expiration of the primary term of the lease, the lease is committed to an approved cooperative unit or plan and actual drilling operations are being conducted on behalf of the lease within the unit plan. For the purpose of qualifying for the extension, the determinative date of approval of the unit agreement is the effective date of the approved agreement rather than the actual date it is signed by U.S. Geological Survey.

Integrity Oil and Gas Co., 42 IBLA 222 (Aug. 22, 1979)

Where Geological Survey and one of two parties to a compulsory unitization of two outer continental shelf oil and gas leases request a remand of a Survey decision for further consideration, and certain issues raised on appeal would appropriately be better first considered by Survey, the case will be remanded to Survey. In the circumstances, a request to stay implementation of Survey's prior decision may be granted by the Board unless and until Survey acts upon the request when it reconsiders the case.

Sun Oil Co., 42 IBLA 254 (Aug. 23, 1979)

OIL AND GAS LEASES--Continued

UNIT AND COOPERATIVE AGREEMENTS--Continued

Where the U.S. Geological Survey has determined from available geologic and other data that a participating area of 1,000 acres is the proper size for a producing well under an approved unit agreement, this Board may rely upon reports of the Survey setting forth the conclusions reached without examining the technical data upon which the reports were based.

A determination by the U.S. Geological Survey that certain land is within the participating area of a producing oil or gas well established pursuant to an approved unit agreement will not be set aside where it is not arbitrary or capricious and is supported by competent evidence, and the appellant has not demonstrated by a clear and definite showing that the determination was in error.

Margaret D. Okie et al., 43 IBLA 326 (Oct. 29, 1979)

WELL CAPABLE OF PRODUCTION

An oil and gas lease on which there is no well capable of production in paying quantities will terminate by operation of law if the annual rental payments are not submitted on or before the anniversary date. A well capable of production in paying quantities on the anniversary date is one which can actually produce enough oil to exceed the cost of its extraction. Neither the production of water nor the production of meager quantities of oil, albeit with hopes for paying production at some time in the future, constitute production in paying quantities on the anniversary date of the lease.

The Polumbus Corp., 22 IBLA 270 (Oct. 30, 1975)

An oil and gas lease will expire by operation of law at the end of its primary term unless oil or gas is being produced in paying quantities at that time or actual drilling operations were commenced prior to the end of the primary term and are being diligently prosecuted, thereby entitling the lessee to an extension of the lease. A once productive well which ceases its productive capability during the initial term will not prevent expiration of the lease.

Bajac Industries, Inc., 26 IBLA 202 (Aug. 11, 1976)

An oil and gas lease in its extended term by reason of production terminates by operation of law when it is determined that the lease no longer has a well capable of production in paying quantities and no reworking or drilling operations are begun within 60 days after cessation of production. In this situation the lessee is not entitled to written notice and 60 days to place the well in a producing status.

Upon a determination that production has ceased on an oil and gas lease in its extended term by reason of such production because the well on the lease is no longer capable of production in paying quantities, the lessees of record are entitled to notice and an opportunity to request a hearing on the issue of the productive capacity of the well where they have presented evidence raising an issue of fact regarding the status of the well.

Universal Resources Corp. et al., 31 IBLA 61 (June 23, 1977)

OIL AND GAS LEASES--Continued

WELL CAPABLE OF PRODUCTION--Continued

An oil and gas lease committed to a unit agreement expires at the end of its primary term if there is then no well capable of production of oil or gas in paying quantities within it or any lease committed to the unit, and there are no other statutory reasons for extending it.

Where the State Office determines that an oil and gas lease committed to a unit has expired at the end of its primary term because there is not within it or the unit a well capable of production in paying quantities, the lessee is entitled to notice and an opportunity for a hearing on that issue where it has presented evidence that raises an issue of fact regarding the status of wells in the unit.

Manhattan Resources, Inc., 34 IBLA 306 (Apr. 26, 1978)

An oil and gas lease which is in its extended term because of production terminates when production ceases unless pursuant to 30 U.S.C. § 226(f) (1976): (1) reworking or drilling operations are begun within 60 days after cessation and are continued with reasonable diligence until production resumes; (2) the Secretary has ordered or consented to suspension of operations or production; or (3) for lands on which there is a well capable of production, the lessee places the well in producing status at least within 60 days of receipt of notice to do so.

Vern H. Bolinder and Julienne J. Bolinder, 40 IBLA 164 (Apr. 3, 1979)

John S. Pehar, 41 IBLA 191 (June 22, 1979)

Suspension of production requirements for leases on which there are no wells capable of producing in paying quantities must be approved by the Secretary; this authority is not delegated to other officers below the Secretarial level.

Where the Geological Survey, in making its decision, has reviewed the same information submitted on appeal to the Board of Land Appeals to show that there was a well capable of producing oil or gas in paying quantities on the date the lease expired, and there are no disputed facts, but only a dispute on the proper application of the law to those facts and legal interpretations, a hearing is not warranted in the case.

"A well capable of producing oil or gas in paying quantities." The provision in 30 U.S.C. § 226(f) (1976) referring to a well capable of producing oil or gas in paying quantities refers to a well which is actually in physical condition to produce a sufficient quantity of oil or gas to yield a reasonable profit over and above the costs of operating the well and marketing the product. A satisfactory test of a well to establish its capability as of the termination date is necessary. Evidence which only supports inferences is not sufficient, nor is a showing only of a potential prospect for profitable operation at some future time.

American Resources Management Corp., 40 IBLA 195 (Apr. 5, 1979)

A hearing is properly ordered where there exist issues of fact the resolution of which will determine whether an oil and gas lease concluding its primary term was converted from rental status to royalty status. Appellant shall have the burden of proof to establish by a preponderance of the evidence (a) that the Dolezal-Government #1 well was capable of producing oil and gas in paying quantities on Oct. 31, 1978, or (b) that there was a discovery of oil or gas in paying quantities on lease W 15891 on Oct. 31, 1978. If either (or both) of these propositions is established, the subject

OIL AND GAS LEASES--Continued

WELL CAPABLE OF PRODUCTION--Continued

lease was not subject to automatic termination by law for failure to make timely rental payment.

Coronado Oil Co., 42 IBLA 235 (Aug. 22, 1979)

OIL SHALE

WITHDRAWALS

A decision of the Bureau of Land Management rejecting a Native allotment application because the land is within an oil shale withdrawal will be set aside and remanded for further consideration where the Secretary of the Interior has directed the Geological Survey to review its mineral classifications in Alaska and the applicant requests an opportunity to present evidence to dispute the classification.

Raymond Paneak, 19 IBLA 68 (Feb. 25, 1975)

Once the U.S. Geological Survey has classified certain lands as containing deposits of oil shale, those lands are considered to be withdrawn by Executive Order No. 5327. In order to challenge such a classification, a clear showing of error is required.

An application for a phosphate prospecting permit is properly rejected upon a determination that lands applied for are withdrawn as oil shale lands by Executive Order No. 5327.

Thomas E. Gaynor, 21 IBLA 178 (July 25, 1975)

An application for a phosphate prospecting permit is properly rejected when the lands applied for have been classified as containing deposits of oil shale. The lands are thereby subjected to the withdrawal from leasing and other disposal imposed by Executive Order No. 5327. Rejection of the application is required even though the application was filed prior to the oil shale classification and withdrawal.

Thomas E. Gaynor, 24 IBLA 320 (Apr. 20, 1976)

Oil shale withdrawals administered by the Department of the Interior have reserved water rights for the purposes of investigation, examination and classification of those lands. Water is not reserved for actual oil shale development.

Federal Water Rights of the National Park Service, Fish and Wildlife Service, Bureau of Reclamation and the Bureau of Land Management, M-36914 (June 25, 1979)
86 I.D. 553

OREGON AND CALIFORNIA RAILROAD AND RECONVEYED COOS BAY GRANT LANDS

GENERALLY

There are no reserved water rights on the revested Oregon and California Railroad lands and the Coos Bay Wagon Road lands, the "O&C" lands.

OREGON AND CALIFORNIA RAILROAD AND RECONVEYED COOS BAY GRANT LANDS--Continued

GENERALLY--Continued

FLPMA, the Taylor Grazing Act, the O&C Act, and other statutes permit the United States to appropriate water for the diverse purposes found in the various statutes.

Federal Water Rights of the National Park Service, Fish and Wildlife Service, Bureau of Reclamation and the Bureau of Land Management, M-36914 (June 25, 1979)
86 I.D. 553

SUSTAINED YIELD UNITS

Where one objects to the Bureau of Land Management's decision to offer a certain tract of timber for sale on the grounds that an environmental impact statement for the single planned timber sale has not been prepared and that such a sale would violate the sustained yield provisions of the O&C Act of Aug. 28, 1937, 43 U.S.C. § 1181a (1970), the Bureau decision will be upheld when the objecting party fails to provide any evidence to support its contentions and a program environmental impact statement for the sustained yield unit which includes the parcel in question is in the process of being prepared.

Headwaters, 33 IBLA 91 (Dec. 16, 1977)

TIMBER SALES

A proposed Federal timber sale does not violate the principle of multiple use embodied in the Federal Land Policy and Management Act of 1976, 43 U.S.C. § 1701 (1976), where it involves Oregon and California revested land committed by the Act of Aug. 28, 1937, 43 U.S.C. § 1181a (1976), to dominant use management for commercial forestry.

Elaine Mikels et al., 44 IBLA 51 (Nov. 19, 1979)

OUTER CONTINENTAL SHELF LANDS ACT

(*See also* Oil and Gas Leases--if included in this Index.)

GENERALLY

In interpreting provisions of State leases which have been validated under sec. 6 of the Outer Continental Shelf Lands Act, 43 U.S.C. § 1335 (1970), the Department will give great weight to judicial and administrative interpretations rendered by officials of that State. Where, however, there is a conflict of opinion between State officials as to the proper interpretation of a provision of a State lease, the Department of the Interior will independently interpret that section, applying the general rules of contract construction.

Ocean Drilling & Exploration Co., Chevron Oil Co., 21 IBLA 137 (July 15, 1975)

In order to constitute a clear and definite offer, a bid for an outer continental shelf oil and gas lease must adequately identify the tract which is the subject of the bid.

It is not the responsibility of Bureau of Land Management employees to decipher ambiguous bids for outer continental shelf oil and gas leases in order to save the bidder from the consequences of his own negligence. A bid which was apparently intended for one tract and contains data appropriate for that tract, but identifies a different tract as the subject of the bid, is

OUTER CONTINENTAL SHELF LANDS ACT--Continued

GENERALLY--Continued

properly considered, and rejected as too low, for the identified tract.

A rejected bid in an outer continental shelf oil and gas lease sale may be reconsidered and accepted when it is in the public interest to do so. The essential elements in allowing such a reconsideration are the fairness and impartiality of the sale toward all bidders. In a situation where a bid was initially rejected as too low for the tract identified in the bid and the bidder immediately requests reconsideration because he intended to bid for a different tract, where the tract number stated in the bid corresponds to the block number of the intended tract, where all other relevant data in the bid corresponds to the intended tract and only to the intended tract, and where no other person submitted a bid for the intended tract, it is proper to reconsider the bid to determine if it is in the public interest to accept the bid for the intended tract.

Alaska Oil and Minerals Corp., 29 IBLA 224
(Mar. 23, 1977) 84 I.D. 114

OIL AND GAS LEASES

"Production." "Production" as used in all Federal oil and gas leases includes all oil and gas withdrawn from a reservoir.

In the absence of a specific statutory bar, such as is found in secs. 18 and 19 of the Mineral Leasing Act of 1920, royalty is due in the "amount or value" of all production from a Federal oil and gas lease, including vented and flared gas and gas or oil leaked, spilled or used in producing operations.

An assessment greater than the normal royalty charge may be required for oil and gas that are wasted.

Response to Feb. 17, 1976, Request from the General Accounting Office: Interpretation of Mineral Leasing Act of 1920, and Outer Continental Shelf Lands Act Royalty Clause, M-36888 (Oct. 4, 1976) 84 I.D. 54

"Production." Oil or gas that is wasted is in a category by itself, distinctly separable from "production," when it is oil or gas that is lost on the surface or in the subsurface through the negligence of the lessee, *i.e.*, without the specific sanction of the supervisor.

The loss through waste to the lessor compensable under 30 CFR 250.20 is either the royalty or the full value and the choice between them is a matter which is committed to the sound exercise of the supervisor's discretion.

Computation of Moneys Due the United States on Oil and Gas Lost as a Result of Pennzoil's Blowout, M-36888 (Supp.) (Jan. 19, 1977) 84 I.D. 64

The interpretation of the Mineral Leasing Act of 1920 set forth in the Oct. 4, 1976, *Solicitor's Opinion* (M-36888) is compelled by the statute.

Terms of an oil and gas lease inconsistent with the statute are equally as invalid as a regulation which operates to create a rule out of harmony with the statute.

A lessee gains no rights through a lease which could not be bestowed lawfully, since regulations or lease terms inconsistent with the statute are invalid.

OUTER CONTINENTAL SHELF LANDS ACT--Continued

OIL AND GAS LEASES--Continued

The involuntary invalidation of a lease term does not amount to *pro tanto* cancellation of the lease.

The Oct. 4, 1976, *Solicitor's Opinion* (M-36888), in effect, found that the Secretary, by permitting exemptions from royalty requirements for oil and gas used for production purposes or unavoidably lost, was alienating the royalty interest of the United States on certain leases without authority to do so.

Court cases indicate that it is in the Secretary's discretion to apply the corrected interpretation of the statutes in the collection of additional royalty retroactively or prospectively based on equitable considerations.

The Secretary is limited in the exercise of this authority only by the rule of estoppel where the application of the corrected interpretation of law threatens to work a serious injustice and if the public's interest would not be unduly damaged by the imposition of estoppel.

Effect of Oct. 4, 1976, Solicitor's Opinion M-36888, M-36888 (Supp. II) (Mar. 9, 1977) 84 I.D. 171

The Department of the Interior has the authority to issue orders to oil and gas lessees to protect all of the natural resources of the Continental Shelf. An order which requires lessees to shut in wells during welding or burning operations will be sustained on appeal as not being arbitrary or unjustified where the record shows that a number of companies had followed the practice even when it was not required, where the order is not so prohibitive as to effect a *pro tanto* cancellation of the lease, and where departures from the order may be granted in certain situations.

Exxon Corp., 36 IBLA 185 (Aug. 1, 1978) 85 I.D. 347

A request for refund of excess payments under 43 U.S.C. § 1339 (1970) must be made as the limitation in the statute provides, within 2 years from the date such payments are actually made.

Phillips Petroleum Co., 39 IBLA 393 (Mar. 2, 1979)

It is not proper to deny a creditable request for approval of unavoidable delay time under sec. 16 of the Santa Ynez Unit Agreement, even though the Geological Survey considers the unit agreement extended by diligent drilling operations.

Exxon Co., U.S.A., 41 IBLA 118 (June 13, 1979)

Where the holder of an oil and gas lease on the Outer Continental Shelf has filed a suit in a Federal district court to recover certain royalties paid under his lease, the Board of Land Appeals will affirm a decision of the Director, Geological Survey, holding in abeyance the lessee's request for a refund while the suit is pending.

Tenneco Oil Co., 41 IBLA 195 (June 22, 1979)

OPERATING PROCEDURES

The Department of the Interior has the authority to issue orders to oil and gas lessees to protect all of the natural resources of the Continental Shelf. An order which requires lessees to shut in wells during welding or burning operations will be sustained on appeal as not being arbitrary or unjustified where the record

OUTER CONTINENTAL SHELF LANDS ACT--Continued

OPERATING PROCEDURES--Continued

shows that a number of companies had followed the practice even when it was not required, where the order is not so prohibitive as to effect a *pro tanto* cancellation of the lease, and where departures from the order may be granted in certain situations.

Exxon Corp., 36 IBLA 185 (Aug. 1, 1978)   85 I.D. 347

REFUNDS

A request for refund of excess payments under 43 U.S.C. § 1339 (1970) must be made as the limitation in the statute provides, within 2 years from the date such payments are actually made.

Phillips Petroleum Co., 39 IBLA 393 (Mar. 2, 1979)

STATE LEASES

Generally

In interpreting provisions of State leases which have been validated under sec. 6 of the Outer Continental Shelf Lands Act, 43 U.S.C. § 1335 (1970), the Department will give great weight to judicial and administrative interpretations rendered by officials of that State. Where, however, there is a conflict of opinion between State officials as to the proper interpretation of a provision of a State lease, the Department of the Interior will independently interpret that section, applying the general rules of contract construction.

The provisions of those leases issued by the State of Louisiana on the 1948 lease form and which have been validated under sec. 6 of the Outer Continental Shelf Lands Act do not prohibit the allowance by the Oil and Gas Supervisor of a reasonable deduction of barging transportation costs from the field to the point of the first market for the production from the lease.

Ocean Drilling & Exploration Co., Chevron Oil Co., 21 IBLA 137 (July 15, 1975)

Leases issued by the State of Texas for offshore oil and gas deposits which have been validated under sec. 6 of the Outer Continental Shelf Lands Act do not prohibit, for royalty purposes, allowance by the Geological Survey of a reasonable deduction of barging transportation costs for crude oil production from the field to the point of the first market onshore.

C & K Petroleum, Inc., 27 IBLA 15 (Sept. 17, 1976)

The royalty provisions of a State lease validated under sec. 6 of the Outer Continental Shelf Lands Act will govern the determination of the royalty due to the United States.

The royalty provisions on a State of Louisiana 1942 lease form subsequently validated under sec. 6 of the Outer Continental Shelf Lands Act provide either for (1) delivery of royalty oil in kind to the lessor free of expense with delivery understood as being made when the oil has been received by the first purchaser or, (2) at the option of the lessee, payment of the value of the oil, with certain express disallowances, including no deduction for transportation charges. Constructive delivery of in-kind royalty must be authorized and accepted by the lessor to constitute a payment of royalty. The delivery-in-kind provision does not authorize the lessee to act as agent of the United

OUTER CONTINENTAL SHELF LANDS ACT--Continued

STATE LEASES--Continued

Generally--Continued

States, and is not applicable where the lessee has not notified Geological Survey of any purported constructive delivery of oil to the first purchaser and Survey has not accepted such constructive delivery. Therefore, the second provision is applicable which expressly precludes deductions of transportation costs.

Superior Oil Co., 31 IBLA 127 (June 30, 1977)

UNIT PLANS

Where Geological Survey and one of two parties to a compulsory unitization of two outer continental shelf oil and gas leases request a remand of a Survey decision for further consideration, and certain issues raised on appeal would appropriately be better first considered by Survey, the case will be remanded to Survey. In the circumstances, a request to stay implementation of Survey's prior decision may be granted by the Board unless and until Survey acts upon the request when it reconsiders the case.

Sun Oil Co., 42 IBLA 254 (Aug. 23, 1979)

PATENTS OF PUBLIC LANDS

GENERALLY

The Recreation and Public Purposes Act, and the pertinent regulations thereunder, require that a grantee of land under the Act must develop the land in accordance with the specified uses proposed in the patent application within a reasonable time following the date of issuance of patent.

Failure over a 17- or 18-year period to develop land patented under the Recreation and Public Purposes Act in accordance with the specified uses proposed in the patent application and set out in the patent is a violation of the condition in the patent which provides that if the lands are devoted to a use other than that for which they were conveyed title shall revert to the United States.

Clark County School District, 18 IBLA 289 (Jan. 6, 1975)   82 I.D. 1

City of Monte Vista, Colorado, 22 IBLA 107 (Sept. 22, 1975)

Sec. 6(b) of the Alaska Statehood Act does not require that patents issued to the State include a proviso that the conveyed lands are vacant, unappropriated, and unreserved, and do not affect any valid existing claim, location or entry under the laws of the United States. The Department assures compliance with this provision by excluding from selection all lands noted on its records as being appropriated and reserved, or subject to valid existing interests, and by requiring that adequate notice be given to all other persons claiming an interest in the selected land. The Department can then receive objections to the issuance of a patent and can render a determination as to the availability of the selected lands.

Richard W. Rowe, Daniel Gaudiane, 20 IBLA 59 (Apr. 24, 1975)   82 I.D. 174

Title to a numbered school section which is surveyed on or after July 11, 1956, and on which there is outstanding at the time of such survey a mineral lease entered into by the United States, is granted to the State, and the State shall succeed to the position of the United States as lessor under such lease.

State of Utah, 22 IBLA 44 (Sept. 15, 1975)

The Recreation and Public Purposes Act, and the regulations thereunder, do not authorize additional payment for the issuance of a supplemental patent (which voids an earlier patent's reversionary provision) as an alternative to forfeiture for noncompliance with the Act's provision that land patented under the Act only be used for an established or definitely proposed public project within a reasonable time following issuance of patent. The Department can alienate interests in public lands only within the limits authorized by law; therefore, issuance of a supplemental patent which eliminates the Act's mandatory reversionary provision is impermissible.

The Department of the Interior is not estopped from denying the legality of a payment in lieu of forfeiture provision inserted in a Recreation and Public Purposes Act patent when such denial works no serious injustice against the patentee and implementation of the provision would harm the public interest by divesting the Government of all jurisdiction over the patented land, thus, precluding enforcement of the Recreation and Public Purposes Act requirement that lands patented under the Act be devoted to a definitely proposed project for the benefit of the public.

Okanogan County Public Utility, District No. 1, Washington, 22 IBLA 342 (Nov. 14, 1975)

An application for patent to school lands in place, pursuant to 43 U.S.C. § 871a (1970), which requests an exclusion of the right-of-way granted under the Act of July 1, 1862, *as amended*, July 2, 1864, must be rejected. Such a patent must be issued "subject to" the right-of-way.

State of Wyoming, 27 IBLA 137 (Sept. 29, 1976)
83 I.D. 364

In the absence of legislation by Congress, a patent from the United States does not convey an implied easement by way of necessity across public land.

Sun Studs, Inc., 27 IBLA 278 (Oct. 26, 1976)
83 I.D. 518

A grantee's failure to develop for an unreasonable period of time (over 19 years) lands patented under the Recreation and Public Purposes Act constitutes a violation of the reversionary clause in the patent which states that if the lands are devoted to a use other than that for which they were conveyed title shall revert to the United States.

Clark County, Nevada, 28 IBLA 210 (Dec. 8, 1976)

The Secretary of the Interior is not authorized to issue a patent to a mining claim until the requirements of the law have been met.

United States v. Fred and Eileen Garner, 30 IBLA 42 (Apr. 18, 1977)

In determining what land is conveyed under patents or grants of public land bordering a meandered watercourse, the general rule is that the waterline itself, not the meander line, constitutes the boundary. There is an exception where the meander line may constitute the boundary between lands omitted from the survey and the watercourse if fraud or gross error is shown in the survey. This exception is only applicable to limit the boundary of the surveyed lots on the side of the watercourse where the omitted land is shown. It does not apply to a lot on the opposite side of the watercourse from the omitted land so as to pass title to the omitted land with title to the lot on the opposite side. The waterline would remain the actual boundary of that lot.

Mable M. Farlow, 30 IBLA 320 (June 7, 1977) 84 I.D. 276

Where an entryman has mistakenly applied for and received a patent on one parcel of land which was not the land he actually occupied, he is not entitled to receive a patent on the land actually occupied by virtue of the fact that the statutes of limitation on the issuance and cancellation of patents has run.

Roland and Marie Oswald, 35 IBLA 79 (May 12, 1978)

Issuance of a certificate of allotment vests full title to the parcel concerned in the allottee, notwithstanding the fact that the Department retains the right to approve a subsequent sale of the parcel by the allottee.

State of Alaska, 35 IBLA 140 (May 22, 1978)

"An Act granting public lands to the town of Silverton, Colorado, for public park purposes" (43 Stat. 980, Feb. 25, 1925).

The above Act and the patent issued in accordance therewith require that the lands granted be used for public park purposes only, and the town's attempt to lease a portion of the lands for the construction of camper sites does not violate the Act and patent since the use of a limited part of the patented land for camper sites is consistent with recreational and public park purposes.

Town of Silverton, 35 IBLA 183 (May 23, 1978)
85 I.D. 140

Where a patent has been issued under the Recreation and Public Purposes Act of June 14, 1926, *as amended*, 43 U.S.C. § 869 *et seq*. (1970), pursuant to a plan of development, and that plan is modified with the consent of the Bureau of Land Management, the failure to comply with the original plan is excused.

The issuance of a patent creates a presumption that all requisite steps and requirements of law and Departmental regulations have been satisfied.

Even if there were a mistake in the issuance of a patent, such mistake would justify this Department in recommending to the Attorney General that suit be commenced to cancel the patent only where: (1) the Government has an interest in the remedy by reason of its interest in the land; (2) the interest of some party to whom the Government is under obligation has suffered by reason of the patent; (3) the duty of the Government to the people so requires or (4) significant equitable considerations are involved.

Where more than 6 years have passed after the issuance of a patent, suit by the United States to vacate and annul the patent cannot be sustained, 43 U.S.C. § 1166

PATENTS OF PUBLIC LANDS--Continued

GENERALLY--Continued

(1970), absent a positive showing of fraud practiced upon the United States.

R. E. Baldwin, 37 IBLA 215 (Oct. 12, 1978)

A grantee's transfer of the property and its subsequent use for a purpose (big game guiding service) other than the one described in the patent (mission parsonage and chapel) without consent of Department of the Interior triggers reversion of the land to the United States.

Roberta Thompson and Richard Lee Burnham, 38 IBLA 333 (Dec. 20, 1978)

An appeal from a decision denying a protest against the issuance of a patent must be dismissed if the patent has been issued, because the Department has no jurisdiction to act further in the matter.

Because issuance of a patent removes the land from Departmental jurisdiction, it is not proper to issue that patent simultaneously with dismissal of a protest against the patent application because such action deprives the protester of his right to review and precludes compliance with 43 U.S.C.A. § 1701(a)(5) (West Supp. 1978) which mandates objective administrative review of initial decisions.

Matanuska-Susitna Borough, Inc., 38 IBLA 382 (Dec. 29, 1978)

An entryman may not take advantage of sec. 7 of the Act of Mar. 3, 1891, entitling an entryman to a patent after 2 years from date of issuance of a receiver's receipt when there is no pending contest or protest against the validity of the entry, where he has not shown that preconditions of the Act have been met, *i.e.*, making the final payments required.

United States v. Jack Zemry Boyd, Jr., 39 IBLA 321 (Feb. 27, 1979)

Mere nonuse of land patented under the Recreation and Public Purposes Act is not equivalent to a devotion of the land to an unauthorized use and, of itself, will not cause the title to revert to the United States.

A patent which names as the grantee a fictional, nonexistent person or corporation is a nullity and ineffective for all purposes, and where the invalidity appears by reference to any matter of which judicial notice may be taken, the patent is null and void on its face, and no recourse to a court is necessary to procure its cancellation.

Where the grantee of land under the Recreation and Public Purposes Act enters into an executory contract to convey an interest in a portion of the land to another, who then undertakes to perform his obligation to enter the land and improve it without prior Departmental approval, this constitutes an attempt on the part of the patentee to make an unauthorized transfer of title or control, and title to the entire tract reverts to the United States.

Sky Pilots of Alaska, Inc., 40 IBLA 355 (May 14, 1979)

PATENTS OF PUBLIC LANDS--Continued

GENERALLY--Continued

A decision holding that a tract of land has reverted to the United States must be affirmed where the land was patented to a municipality under authority of a special statute which expressly provided that the town shall not have the right to sell or convey any part thereof and that if the land shall not be used as public park it shall revert to the United States, and where the record shows that the municipality conveyed two small parcels to the State and has never used the remainder for park purposes in the intervening 60 years since the patent issued.

City of Okanogan, Washington, State of Washington, 41 IBLA 98 (June 4, 1979)

A decision by the Bureau of Land Management canceling fee simple patents issued to Indians and simultaneously issuing new Indian trust patents is not subject to review by the Board of Land Appeals, which has no jurisdiction in the matter, where the decision was made at the direction of the Assistant Secretary for Indian Affairs.

Blue Star, Inc., Atomic Western, Inc., Fremont Energy Corp., Ivor Adair, 41 IBLA 333 (July 11, 1979)

AMENDMENTS

An application for the amendment of a patent is properly rejected where the record contains insufficient evidence to show that the entryman entered lands not intended by him as his entry, and where the record fails to show what precaution to avoid error was taken by the entryman at the time of making the original entry, if in fact he intended to enter other lands.

Domenico Tussio et ux., 24 IBLA 141 (Mar. 8, 1976)

The execution of an application for patent to a mining claim by an attorney in fact for the claimant, at a time when the claimant himself is both resident of and physically within the land district in which the mining claim is located, is unauthorized, and such an application is invalid. The defect cannot be cured by an amendment signed by the claimant.

Floyd R. Bleak, 26 IBLA 378 (Sept. 9, 1976)

Prior to the enactment of sec. 316 of the Federal Land Policy and Management Act of 1976, the Secretary of the Interior's authority to correct patents could not be exercised to divest the Government's title to land that was withdrawn or reserved at the time of the mistaken entry. Whether sec. 316 authorizes amendment of a patent in such situations is to be determined in the first instance by the BLM.

Roland and Marie Oswald, 35 IBLA 79 (May 12, 1978)

EFFECT

The Department of the Interior has neither jurisdiction over nor authority to issue oil and gas leases for lands patented to the State of Alaska.

Richard W. Rowe, Daniel Gaudiane, 20 IBLA 59 (Apr. 24, 1975) 82 I.D. 174

PATENTS OF PUBLIC LANDS--Continued

EFFECT--Continued

Although a patent issued pursuant to an Alaska State selection may have been issued by mistake, it vested title in the State and removed from the jurisdiction of this Department the right to inquire into and consider all disputed questions of fact as well as rights in the land.

Thomas Albert, 20 IBLA 338 (June 11, 1975)

Even if a patent issued to a homestead entryman by mistake or inadvertence, it vested title in the patentee and removed from the jurisdiction of this Department the right to decide all disputed questions of fact as well as rights to land.

Basille Jackson, 21 IBLA 54 (June 18, 1975)

Remedy for errors of law, as well as for mistakes of fact, in the issue of a patent to land within the jurisdiction of the Department is a direct proceeding by a bill in equity to correct them.

Administrative Appeal of Ruth Pinto Lewis v. Superintendent of the Eastern Navajo Agency, 4 IBIA 147 (Oct. 3, 1975) 82 I.D. 521

A patent issued under authority of law vests title in the patentee and removes the land from the jurisdiction of the Interior Department.

Nadja Davis Gamble, 23 IBLA 128 (Dec. 23, 1975)

The Bureau of Land Management has the authority to impose a stipulation on an oil and gas lease covering reserved minerals on patented lands, which would require archaeological investigation and excavations by lessee.

General Crude Oil Co., 28 IBLA 214 (Dec. 10, 1976) 83 I.D. 666

The effect of the issuance of a patent, even if issued by mistake or inadvertence, is to transfer the legal title from the United States and to remove from the jurisdiction of the Department consideration of all disputed questions concerning rights to the land.

Bernie M. Rogers, 29 IBLA 192 (Mar. 18, 1977)

State of Alaska, 35 IBLA 140 (May 22, 1978)

H. B. Baldwin, 37 IBLA 215 (Oct. 12, 1978)

Albert A. Cushing, Jr., 41 IBLA 41 (May 29, 1979)

Berthlyn Jane Baker, 41 IBLA 239 (June 27, 1979)

Where both an original survey prior to the issuance of a patent and a dependent resurvey after issuance indicate that a homestead patent has issued on land within a national forest, the patent is invalid notwithstanding that the Federal Government may not by means of a second survey affect property rights acquired under an official survey.

Where land on which a valid settlement has been made and maintained according to the law under which it was made, was excepted from the effect of the withdrawal or reservation, occupancy of the land prior to reservation or withdrawal is insufficient to show exception where no filing has been made on the prior occupancy and the prior occupancy was not for homestead purposes.

Roland and Marie Oswald, 35 IBLA 79 (May 12, 1978)

The effect of the issuance of a patent is to transfer the legal title from the United States and to remove from the jurisdiction of the Department consideration of all disputed questions concerning rights to the land.

Federal-American Partners, 37 IBLA 330 (Oct. 26, 1978)

A patent which names as the grantee a fictional, nonexistent person or corporation is a nullity and ineffective for all purposes, and where the invalidity appears by reference to any matter of which judicial notice may be taken, the patent is null and void on its face, and no recourse to a court is necessary to procure its cancellation.

Sky Pilots of Alaska, Inc., 40 IBLA 355 (May 14, 1979)

RESERVATIONS

Sec. 6(i) of the Alaska Statehood Act provides that grants of mineral lands to the State are made upon the condition that all subsequent State conveyances of the mineral lands shall be subject to and contain a reservation to the State of all the minerals in the lands so conveyed. The Act does not require that Federal patents to the State include a proviso to the above effect, rather, it is subsequent State conveyances which must contain a reservation for minerals.

Richard W. Bowe, Daniel Gaudiane, 20 IBLA 59 (Apr. 24, 1975) 82 I.D. 174

In a patent to public domain land, a reservation for ditches and canals constructed by authority of the United States, pursuant to the Act of Aug. 30, 1890, need not be modified by a reference to the Act of Sept. 2, 1964, *as amended*, 43 U.S.C. § 945a (1970).

Heirs of Carrie Bethel, 29 IBLA 210 (Mar. 22, 1977)

As to gravel, interpretations of the mineral reservation in patents issued by the United States under the Stock-Raising Homestead Act, 43 U.S.C. § 299 (1970), must be consistent with the established rule that land grants are to be construed favorably to the Government, that nothing passes except what is conveyed in clear language, and that if there are doubts they are resolved for the Government, not against it.

In determining whether gravel is included in a mineral reservation in a patent issued under the Stock-Raising Homestead Act, 43 U.S.C. § 299 (1970), the interpretation of the reservation must take into account the intended use for which the land was conveyed and those uses which the Government intended to reserve.

A patent of land under the Stock-Raising Homestead Act, 43 U.S.C. § 291 *et seq.* (1970), was not generally intended to give the grantee the right to use the land for mineral development and mineral development was to proceed only under the mineral laws.

"*Ejusdem generis*." The *ejusdem generis* rule of construction may not be invoked to exclude gravel from the scope of a reservation of "all the coal and other minerals" in patents issued under the Stock-Raising Homestead Act, 43 U.S.C. § 299 (1970), because this rule

PATENTS OF PUBLIC LANDS--Continued

RESERVATIONS--Continued

of construction can only be effectively applied where there is a series of specific terms which define a class so that one may construe a general term by reference to that class.

Sec. 9 of the Stock-Raising Homestead Act, 43 U.S.C. § 299 (1970), contemplates the Department of the Interior retaining continuing jurisdiction and administration of mineral deposits reserved by that Act.

"Public lands." Under 43 CFR 9239.0-7 which defines a trespass, the term "public lands" includes mineral deposits reserved under the Stock-Raising Homestead Act, 43 U.S.C. § 299 (1970).

The declaration in the Surface Resources Act, 30 U.S.C. § 611 (1970), that no deposit of common varieties of gravel shall be deemed a valuable mineral deposit within the meaning of the mining laws, was not intended to operate as a conveyance, to holders of patents, of any minerals reserved under the Stock-Raising Homestead Act, 43 U.S.C. § 299 (1970).

Gravel in a valuable deposit is a mineral reserved to the United States in patents issued under the Stock-Raising Homestead Act, 43 U.S.C. § 299 (1970).

Western Nuclear, Inc., 35 IBLA 146 (May 22, 1978)
85 I.D. 129

Unsurveyed fast lands, formed by accretion to public land or to lands patented with an oil and gas reservation, riparian to a navigable river and lying within the meander lines of that navigable river, as recorded on the official plat, may be leased provided that a proper offer is received and the other relevant conditions precedent to leasing are met.

Federal law determines the legal characterization of accretions, avulsions, and relictions to land riparian to navigable bodies of water, where title to the land or reserved interests in the land remains in the United States.

David A. Provinse, 35 IBLA 221 (May 26, 1978)
85 I.D. 154

United States is not subject to a defense of laches in an action to enforce a public right. Thus, where BLM took approximately 2 years to declare reversion to United States of title to land patented with reversionary clause under Recreation and Public Purposes Act, appellants may find no relief in equitable doctrine of laches.

Roberta Thompson and Richard Lee Burnham, 38 IBLA 333 (Dec. 20, 1978)

SUITS TO CANCEL

Although a patent issued pursuant to an Alaska State selection may have been issued by mistake, it vested title in the State and removed from the jurisdiction of this Department the right to inquire into and consider all disputed questions of fact as well as rights in the land.

Thomas Albert, 20 IBLA 338 (June 11, 1975)

PATENTS OF PUBLIC LANDS--Continued

SUITS TO CANCEL--Continued

Even if a patent issued to a homestead entryman by mistake or inadvertence, it vested title in the patentee and removed from the jurisdiction of this Department the right to decide all disputed questions of fact as well as rights to land.

Basille Jackson, 21 IBLA 54 (June 18, 1975)

The issuance of a patent creates a presumption that all requisite steps and requirements of law and Departmental regulations have been satisfied.

Even if there were a mistake in the issuance of a patent, such mistake would justify this Department in recommending to the Attorney General that suit be commenced to cancel the patent only where: (1) the Government has an interest in the remedy by reason of its interest in the land; (2) the interest of some party to whom the Government is under obligation has suffered by reason of the patent; (3) the duty of the Government to the people so requires or (4) significant equitable considerations are involved.

Where more than 6 years have passed after the issuance of a patent, suit by the United States to vacate and annul the patent cannot be sustained, 43 U.S.C. § 1166 (1970), absent a positive showing of fraud practiced upon the United States.

H. E. Baldwin, 37 IBLA 215 (Oct. 12, 1978)

United States is not subject to a defense of laches in an action to enforce a public right. Roberta Thompson and Richard Lee Burnham, 38 IBLA 333 (Dec. 20, 1978)

A patent which names as the grantee a fictional, nonexistent person or corporation is a nullity and ineffective for all purposes, and where the invalidity appears by reference to any matter of which judicial notice may be taken, the patent is null and void on its face, and no recourse to a court is necessary to procure its cancellation.

Sky Pilots of Alaska, Inc., 40 IBLA 355 (May 14, 1979)

PAYMENTS
(See also Accounts--if included in this Index.)

GENERALLY

The authorized officer may not deem an oil and gas rental payment to have been timely filed, pursuant to 43 CFR 1821.2-2(g) if it is received at the State Office when it is not open to the public, even though the payment is presented on the last day in which payment can be made. Such payment is deemed to have been made on the day and hour the office is next open to business, as provided in 43 CFR 1821.2-2(d).

It is proper to deny a petition for reinstatement of an oil and gas lease terminated for failure to pay rental on time as required by sec. 31 of the Mineral Leasing Act of 1920, as amended, 30 U.S.C. § 188(b) (1970), where 20 minutes before the State Office closes to the public on the last day on which rental can be paid, petitioner instructs by telephone an agent who lives in the vicinity of the State Office to make the payment

PAYMENTS--Continued

GENERALLY--Continued

and the agent who alleges she was delayed by traffic and security measures makes payment after the office is closed to the public. In such circumstances the petitioner has not shown that his failure to pay the rental on or before the anniversary date of the lease was justifiable or not due to a lack of reasonable diligence.

Bob Burch, 32 IBLA 93 (Sept. 12, 1977)

Where an oil and gas lease is canceled in part because it was erroneously issued as to that part, there is no authority for the Department to pay to the lessee unrealized anticipated profits or to refund the rental for the portion of the lands retained in the lease. By signing the simultaneous oil and gas drawing card, the offeror agreed to accept a lease for those portions of the tract found by BLM to be available for leasing.

Paul M. Temple, 33 IBLA 98 (Dec. 16, 1977)

Rental payment which arrives at a BLM State Office after normal business hours, as set out in 43 CFR 1821-1(a) and (d), is properly recorded by BLM as received at 10 a.m. the next business day, *per* 43 CFR 1821.2-2(d).

Robert L. Wheeler, 33 IBLA 321 (Jan. 23, 1978)

Payment of the annual rental on an oil and gas lease is not made until a proper form of remittance is received by the appropriate office of the Bureau of Land Management.

Lloyd M. and Adelheid A. Patterson, 34 IBLA 68 (Feb. 22, 1978)

A check tendered prior to the due date of an oil and gas lease annual rental payment, which is properly dishonored by the drawee bank, does not constitute timely payment. But where return of the check results from a confirmed bank error, subsequent collection and payment of the check relates back to the time of the original tender, and payment is timely.

Annual rental payments on oil and gas leases are sent to depositories designated by the Secretary of the Treasury if their location permits the deposit to be hand carried; otherwise, the deposits are mailed to the Denver Branch of the Kansas City Federal Reserve Bank. Washington, D.C., offices of the Bureau of Land Management may send deposits to the Cash Division of the Treasury Department. All checks drawn on foreign banks or foreign branches of United States banks must be sent for deposit to the Cash Division of the Treasury Department.

An oil and gas lease rental payment check returned to the Bureau of Land Management because a Federal Reserve Bank will not accept for collection checks drawn on foreign banks, but which could be collected through the Cash Division of the Treasury Department and would be honored by the drawee bank, is not "uncollectible."

Pipeline Petroleum Corp., 34 IBLA 73 (Feb. 22, 1978)
85 I.D. 70

PAYMENTS--Continued

GENERALLY--Continued

"Payment." Placing a check for annual rental for oil and gas leases in the mails does not constitute "payment" of annual rental. Rather, the lessee must cause the rental to be received by the office administering his leases, and, until such time as it is received, no "payment" of annual rental has occurred. Accordingly, where a check is mailed prior to the due date but does not arrive until more than 20 days after this due date, no "payment" was made prior to that time, so that the lease automatically terminated by operation of law, and the Department is without authority to consider a petition for reinstatement of the lease.

"Tender." Placing a check for annual rental for oil and gas leases in the mails does not constitute a tender of payment of annual rental, within the meaning of 43 CFR 3108.2-1(c). Rather, a lessee makes a tender of payment only when he submits payment to the BLM office administering his leases, and when BLM has the opportunity either to receive or decline it. Accordingly, placing rental in the mails does not constitute a tender of payment which would allow the Department to consider the merits of a petition for reinstatement of an oil and gas lease terminated for failure to make timely payment of annual rental.

Mobil Oil Corp., 35 IBLA 265 (June 2, 1978)

A rental check for an oil and gas offer need not be signed necessarily by the offeror.

Lillian Sweet, 37 IBLA 25 (Sept. 14, 1978)

A noncompetitive oil and gas lease on which there is no well capable of production in paying quantities terminates by operation of law and not by the action of any official if the annual rental is not paid on or before the due date. Submission of a rental check without identifying the lease number precluded the Bureau of Land Management from accepting the check as payment for the lease, and a lease is properly held to terminate in the absence of a timely identified payment of the rental.

S. Delos Chassaign, 37 IBLA 377 (Nov. 6, 1978)

"Payment." A noncompetitive oil and gas lease on which there is no well capable of production in paying quantities terminates by operation of law for failure to pay the annual rental on or before the due date. A check for rental does not constitute payment until it is received at the proper office.

Gretchen Capital, Ltd., 37 IBLA 392 (Nov. 8, 1978)

"Reasonable diligence." Where an oil and gas rental check bearing the due date of the lease is submitted a few days in advance thereof, but the check is returned by the Bureau of Land Management and thereupon a new check is promptly submitted, even if it could be considered that the lease had terminated, it would be eligible for reinstatement under 30 U.S.C. § 188(c) (1976) because there has been reasonable diligence on the part of lessee.

Lillie Belle Higgins, 38 IBLA 254 (Dec. 8, 1978)

PAYMENTS--Continued

GENERALLY--Continued

Where checks submitted in payment of annual rental on oil and gas leases are returned by the drawee bank as uncollectible because they are postdated, and there has been no bank error, no tender or payment of annual rental has been made. In the absence of any other payment prior to the anniversary date, the leases terminate automatically by operation of law.

An oil and gas lessee who submits payment of annual rentals with checks postdated by 15 days is not reasonably diligent in attempting to make payment thereof. So doing with the expectation that negotiation of the checks will not be delayed past the anniversary date unreasonably anticipates either that BLM will withhold processing the checks until they become valid or that the drawee bank will honor them despite the postdating.

Benjamin T. Franklin, 38 IBLA 291 (Dec. 14, 1978)

Where an offer is drawn No. 1 for a tract consisting of 39.97 acres, BLM requests payment specifically of $40 advance rental, and the offeror remits $39.97 within the 15-day period spelled out in 43 CFR 3112.4-1, the submittal of $39.97 does not constitute satisfactory payment within the ambit of that regulation.

Milton Knoll, 38 IBLA 319 (Dec. 19, 1978)

BLM does not waive its right to declare a lease expired by cashing an advance annual rental check and placing funds in an unearned account.

Richard P. Smoot, 39 IBLA 1 (Jan. 8, 1979)

Where an offer is drawn No. 1 in a simultaneous oil and gas lease drawing and the offeror is notified by BLM that the rental due is $1,955, the offer will be disqualified under 43 CFR 3112.4-1 when the offeror submits a check for $1,954 within the time required, but fails to submit the $1 deficiency within the allowed time.

C. Panos, 42 IBLA 326 (Aug. 30, 1979)

Timely tender of a check which, when presented, is dishonored properly by the bank on which it is drawn does not constitute timely payment.

Caroline L. Hunt, 43 IBLA 314 (Oct. 22, 1979)

A check is a valid form of remittance for payment of an oil and gas lease filing fee and advance rental. However, it is subject to collection and final payment without cost to the Government. Where a check is returned from a bank as uncollectible, generally, the check cannot be considered as a proper tender of payment.

A check returned from a bank may be considered a tender of payment where the return of the check is shown to have resulted from a confirmed bank error, and the subsequent collection and payment of the check relates back to the time it was originally tendered to BLM. If an oil and gas lease has been canceled and applications rejected because checks have been returned from a bank and the appellant shows bank error, the case is remanded for further consideration.

Jose V. Lim, 44 IBLA 96 (Nov. 20, 1979)

PAYMENTS--Continued

REFUNDS

Where an oil and gas lease is canceled in part because it was erroneously issued as to that part, there is no authority for the Department to pay to the lessee unrealized anticipated profits or to refund the rental for the portion of the lands retained in the lease. By signing the simultaneous oil and gas drawing card, the offeror agreed to accept a lease for those portions of the tract found by BLM to be available for leasing.

Paul W. Temple, 33 IBLA 98 (Dec. 16, 1977)

PHOSPHATE LEASES AND PERMITS

GENERALLY

It is proper to include environmental protection stipulations in a phosphate lease even though the stipulations apply to privately owned surface lands overlying the federally reserved mineral estate under lease or to privately owned lands used in conjunction with the lease.

Cominco American, Inc., 26 IBLA 329 (Sept. 1, 1976)

LEASES

In determining whether a permittee is entitled to a preference right lease the Secretary must consider all legal and economic conditions affecting the proposed operation of the lease as of the time of the determination, including the applicable statutory minimum production royalty rate. A preference right lease must provide for a production royalty rate in conformity with the statutory minimum rate applicable at the time of issuance.

Reduction of Production Royalties Below Statutory Minimum Rates, M-36920 (Dec. 11, 1979) 87 I.D. 69 (1980)

PERMITS

An application for a phosphate prospecting permit is properly rejected upon a determination that lands applied for are withdrawn as oil shale lands by Executive Order No. 5327.

Thomas E. Gaynor, 21 IBLA 178 (July 29, 1975)

The filing of a phosphate prospecting permit application creates no vested rights in the applicant, and the application must be rejected if the land described therein is determined to be subject to the competitive leasing provisions of the Mineral Leasing Act. Rejection is required even if the application was filed prior to the ascertainment of the extent or workability of the phosphate bed underlying the applied for land, which finding requires competitive leasing of the land.

Applications for phosphate prospecting permits are properly rejected by the Bureau of Land Management upon the basis of a determination by the Geological Survey that the lands applied for contain workable deposits of phosphate thus making the lands subject to the leasing provisions rather than the prospecting provisions of the Mineral Leasing Act. A review of the technical data relied upon by the Geological Survey in making its determination is not required where no evidence is submitted on appeal demonstrating error in that determination.

William E. Martin, 24 IBLA 271 (Mar. 30, 1976)

PHOSPHATE LEASES AND PERMITS--Continued

PERMITS--Continued

An application for a phosphate prospecting permit is properly rejected when the lands applied for have been classified as containing deposits of oil shale. The lands are thereby subjected to the withdrawal from leasing and other disposal imposed by Executive Order No. 5327. Rejection of the application is required even though the application was filed prior to the oil shale classification and withdrawal.

Thomas E. Gaynor, 24 IBLA 320 (Apr. 20, 1976)

When deciding whether issuance of a phosphate prospecting permit is appropriate, the Bureau of Land Management is entitled to rely on the reasoned opinion of Geological Survey as its technical expert. A mineral determination made by Geological Survey will not be disturbed in the absence of a clear and definite showing of error. However, when Survey later changes its own determination, the case will be remanded for further consideration.

Philip Shaiman, 25 IBLA 177 (June 14, 1976)

A prospecting permit for phosphate cannot be issued for land subject to a claim. If a prospecting permit for phosphate purports to cover land subject to a mining claim, it is invalid as to that land. Consequently, in demonstrating a discovery of a valuable deposit of phosphate in land subject to a prospecting permit, the permittee must exclude any phosphate in land covered by a mining claim.

The Effect of Mining Claims on Secretarial Authority to Issue Prospecting Permits for Coal and Phosphate, M-36893 (Aug. 2, 1977) 84 I.D. 442

A prospecting permit which embraces land which is not "unclaimed" and "undeveloped" is a nullity and void as a conveyance of any interest in that land. Land in a mining claim remains "unclaimed" land for the purposes of M-36893 so long as the claim is not validated by discovery of a valuable locatable mineral deposit at the date of permit issuance. Surface disturbing mineral activities, associated with delineation of a mineral ore body which could reasonably be expected to disclose knowledge of an area's coal potential constitute development. The bona fide purchaser provisions of sec. 27(h)(2) of the Mineral Leasing Act do not apply to permits which embrace land that is claimed or developed.

The BLM should presume the validity of mining claims or the development of mineral leases disclosed by abstracts submitted by the preference right lease applicant, and allow the applicant to pursue the remedy of private contests or, failing that, issue a notice of intent to reject the lease application where claims or development are shown, and allow the preference right lease applicant the opportunity to show, on the record, the invalidity of the claims, or lack of development, or both.

Effect and Implementation of Solicitor's Opinion M-36893 on "Unclaimed, Undeveloped," M-36893 (Supp.) (Nov. 19, 1979) 86 I.D. 627

RENTALS

The Bureau of Land Management is authorized by regulation 43 CFR 3524.1-4(a)(2)(i) to impose a reasonable bonus per acre as a condition to modifying a phosphate lease by adding land to it noncompetitively.

Cominco American, Inc., 26 IBLA 329 (Sept. 1, 1976)

PHOSPHATE LEASES AND PERMITS--Continued

ROYALTIES

In determining whether a permittee is entitled to a preference right lease the Secretary must consider all legal and economic conditions affecting the proposed operation of the lease as of the time of the determination, including the applicable statutory minimum production royalty rate. A preference right lease must provide for a production royalty rate in conformity with the statutory minimum rate applicable at the time of issuance.

Reduction of Production Royalties Below Statutory Minimum Rates, M-36920 (Dec. 11, 1979) 87 I.D. 69 (1980)

POTASSIUM LEASES AND PERMITS

GENERALLY

"Other related products." "Other associated deposits." When sodium or potassium brines are covered by leases conveying the exclusive right to mine and dispose of sodium compounds and other related products or potassium compounds and other associated deposits, the leases convey the exclusive rights to all minerals dissolved in the brine, including lithium.

"Leasing Act minerals." The Multiple Mineral Development Act, 30 U.S.C. § 524 (1970), reserved all Leasing Act minerals to the United States, and no rights to deposits of Leasing Act minerals are open to location under the mining laws under 30 U.S.C. § 525 (1970). "Leasing Act minerals" is defined as "all minerals which, upon Aug. 13, 1954, are provided in the mineral leasing laws to be disposed of thereunder." 30 U.S.C. § 530 (1970). Because leases for sodium, potassium, and "other related products" are authorized pursuant to 30 U.S.C. §§ 262, 282 (1970), "other related products" along with sodium and potassium fall within the category of Leasing Act minerals which include lithium which is dissolved in a sodium or potassium brine.

Foote Mineral Co., 34 IBLA 285 (Apr. 17, 1978)
85 I.D. 171

LEASES

In determining whether a permittee is entitled to a preference right lease the Secretary must consider all legal and economic conditions affecting the proposed operation of the lease as of the time of the determination, including the applicable statutory minimum production royalty rate. A preference right lease must provide for a production royalty rate in conformity with the statutory minimum rate applicable at the time of issuance.

Reduction of Production Royalties Below Statutory Minimum Rates, M-36920 (Dec. 11, 1979) 87 I.D. 69 (1980)

ROYALTIES

"Gross value at the point of shipment to market." The royalty rate for products mined and disposed of under sodium and potassium leases must be imposed on the "gross value of the sodium (or potassium) compounds and other related products at the point of shipment to market," which means the gross value of a refined product for sale in an established market, and in general, no deductions may be allowed for costs incurred in developing a product to a marketable condition except for the price of reagents which are chemically combined with the product sold from the lease.

Foote Mineral Co., 34 IBLA 285 (Apr. 17, 1978)
85 I.D. 171

POTASSIUM LEASES AND PERMITS--Continued

ROYALTIES--Continued

In determining whether a permittee is entitled to a preference right lease the Secretary must consider all legal and economic conditions affecting the proposed operation of the lease as of the time of the determination, including the applicable statutory minimum production royalty rate. A preference right lease must provide for a production royalty rate in conformity with the statutory minimum rate applicable at the time of issuance.

Reduction of Production Royalties Below Statutory Minimum Rates, M-36920 (Dec. 11, 1979) 87 I.D. 69 (1980)

POWER

FEDERAL POWER COMMISSION

The inclusion of lands belonging to the United States in a proposed power project pursuant to sec 24 of the Federal Power Act of 1920, 16 U.S.C. § 818 (1970), has the effect of reserving or withdrawing those lands from entry, location, or other disposal under the public land laws of the United States until otherwise directed by the Federal Power Commission or by Congress and until the withdrawal is revoked by the Secretary of the Interior.

State of Alaska, 20 IBLA 341 (June 11, 1975)

POWERSITE LANDS

Where prior to 1920 a powersite withdrawal was created by executive order under authority of the Act of June 25, 1910, the withdrawn land remained open to the location of mining claims for metalliferous minerals until passage of the Federal Power Act of June 10, 1920, which closed powersites to all entry, location or disposal. Any mining claim located thereafter on powersite lands is void ab initio unless the land has been restored to such entry in accordance with sec. 24 of the Federal Power Act or the location of the claim has been made in accordance with the Act of Aug. 11, 1955, 30 U.S.C. § 621 (1970). The latter Act did not operate retroactively to validate void claims.

Henry Stagnaro, 31 IBLA 357 (July 25, 1977)

A mining claim located prior to Aug. 11, 1955, on lands withdrawn for a powersite is null and void ab initio. The passage of the Mining Claims Rights Restoration Act of Aug. 11, 1955, 30 U.S.C. § 621 (1976), did not give life to void claims which had been located on withdrawn lands prior to the date of the Act.

United States v. Elbert Gassaway, 43 IBLA 382 (Oct. 31, 1979)

PRACTICE BEFORE THE DEPARTMENT

(*See also* Rules of Practice--if included in this Index.)

GENERALLY

An appellant may adopt arguments prepared by another person and submit them as his or her own statement of reasons so long as appellant acts in good faith and the statement is relevant to the issues on appeal.

Alice M. Hardy, 44 IBLA 5 (Nov. 6, 1979)

PRACTICE BEFORE THE DEPARTMENT--Continued

PERSONS QUALIFIED TO PRACTICE

An appeal filed for an appellant by an attorney-in-fact who is not himself qualified to practice before the Department under 43 CFR 1.3 is subject to summary dismissal.

Haruyuki Yamane et al., 19 IBLA 320 (Apr. 7, 1975)

An appeal brought by a person who does not fall within any of the categories of persons authorized by regulation to practice before the Department is subject to to dismissal.

Pierce and Schlinger, 22 IBLA 396 (Nov. 24, 1975)

An individual not otherwise entitled to practice before the Department who is a full-time employee of two affiliated corporations may represent the corporations before the Department on the basis of the regulation (predicated upon statutory authority), which provides that an officer or a full-time employee of a corporation is qualified to practice before the Department on behalf of the corporation with respect to a particular matter.

Final Decision of the Solicitor in the Matter of the Eligibility of Mr. James R. Kyper to Represent Eastern Associated Coal Corporation and Affinity Mining Company Before the Department of the Interior, M-36883 (Feb. 9, 1976) 83 I.D. 131

Qualifications to practice before the Department of the Interior are prescribed by regulations. Where an appeal is brought by a person who does not appear to fall within any of the categories of persons authorized to practice, the appeal is subject to dismissal.

W. Duane Kennedy, 24 IBLA 152 (Mar. 10, 1976)

Where, in a quasi-judicial Departmental proceeding, an individual entered an appearance as attorney for a party to the action, and it was subsequently revealed that he was not qualified to practice before the Department under any of the provisions of 43 CFR 1.3, the presiding administrative law judge properly refused to continue to recognize his appearance or to permit his to continue to conduct the case in a representative capacity.

United States v. John Gayanich, 36 IBLA 111 (July 14, 1978)

Where contestees in a mining claim contest file a timely answer to the contest complaint, this answer is efficacious as to any other contestees who are members of his family if it appears on the face of the answer that they wish to retain their interests, if any, in the claims, as the contestees who answered may be regarded as having done so on their family members' behalf. In these circumstances, these other contestees are properly regarded as having answered the complaint, absent any manifestation of a contrary intent.

United States v. Jerry Brock et al., 39 IBLA 146 (Jan. 29, 1979)

PRACTICE BEFORE THE DEPARTMENT--Continued

PERSONS QUALIFIED TO PRACTICE--Continued

The Department has determined that an official of the Bureau of Indian Affairs is not entitled to represent a Native allotment applicant in an appeal to the Board of Land Appeals. However, where the case involves the propriety of proofs submitted by the Bureau of Indian Affairs in behalf of a deceased Native allotment applicant, that issue may be resolved.

Ernest L. Olson, Jr. (Deceased), 41 IBLA 179 (June 22, 1979)

The Department has determined that an official of the Bureau of Indian Affairs is not entitled to represent a Native allotment applicant in an appeal to the Board of Land Appeals. However, where the partial rejection of an Alaska Native allotment application turns on the resolution of a factual issue, the case will be remanded to BLM so that heirs or claimants to the estate of the deceased applicant may be afforded notice and opportunity for hearing.

Unknown Heirs of Nigley Kelly, 41 IBLA 387 (July 24, 1979)

PRESIDENT OF THE UNITED STATES

The President had nonstatutory authority to withdraw public land in addition to authority conferred upon him by Pickett Act, as amended, 43 U.S.C. §§ 141, 142 (1970). Such nonstatutory authority was not limited by terms of 43 U.S.C. § 142 (1970) providing that withdrawn lands shall remain open to location for metalliferous minerals.

Because of the President's delegation of his nonstatutory withdrawal authority to the Secretary of the Interior by E.O. 10355, the Secretary was endowed with sufficient authority to withdraw lands in issue without reliance upon secs. 17(d)(1) and 17(d)(2) of Alaska Native Claims Settlement Act. Thus, distinctions between those two sections are not herein dispositive of question of Secretary's authority to withdraw lands in PLO 5250.

Harry H. Wilson, 35 IBLA 349 (June 19, 1978)

PRIVACY ACT

Where it does not appear that the notice required by sec. 7(b) of the Privacy Act of 1974 regarding the disclosure of a social security number was given, an oil and gas lease offer on a drawing card filed in a simultaneous drawing procedure should not be considered defective solely because the applicant omitted designating the social security number on the card as provided thereon.

Harry Reich, 26 IBLA 123 (Sept. 30, 1976)
83 I.D. 507

Richard Lovatt, 28 IBLA 244 (Dec. 10, 1976)

PRIVATE EXCHANGES

GENERALLY

Prior to issuance of a patent an exchange application is nothing more than a proposal under which no contract right arises and no equitable title vests. The Bureau of Land Management has discretion to reject an exchange application where it is determined that the public interest would not be served by the proposed exchange.

Siesta Investments, Inc., 28 IBLA 118 (Nov. 15, 1976)

The appraised values of offered and selected lands in a land exchange application made pursuant to the Federal Land Policy and Management Act of 1976 are properly determined where such values are set in accordance with the Uniform Appraisal Standards for Federal Land Acquisitions.

Prior to issuance of a patent, an exchange application is nothing more than a proposal under which no contract right arises and no equitable title vests.

Paul Kellerblock, 38 IBLA 160 (Dec. 5, 1978)

The Act of Mar. 20, 1922, authorized exchanges for the purpose of consolidating national forest lands, if two criteria were satisfied: (1) the public interest would be benefited thereby; and (2) the proffered lands were chiefly valuable for national forest purposes.

Petro Leasco, Inc., 42 IBLA 345 (Aug. 31, 1979)

PUBLIC INTEREST

The Act of Mar. 20, 1922, authorized exchanges for the purpose of consolidating national forest lands, if two criteria were satisfied: (1) the public interest would be benefited thereby; and (2) the proffered lands were chiefly valuable for national forest purposes.

Petro Leasco, Inc., 42 IBLA 345 (Aug. 31, 1979)

Under the Federal Land Policy and Management Act of 1976, 43 U.S.C. § 1716(a) (1976), the Bureau of Land Management may reject an application to exchange public lands for private lands as not in the public interest in order to protect a significant waterfowl habitat.

Staley Anderson, 44 IBLA 58 (Nov. 20, 1979)

PUBLIC LANDS
(See also Accretion, Avulsion, Boundaries, Reliction, Surveys of Public Lands--if included in this Index.)

GENERALLY

A survey of a previously unsurveyed portion of an island, proved to have been in existence in 1876 when an original survey was conducted in the area, is proper and shall be officially filed where the record shows that the plat of survey reflects the true location of the island on the surface of the earth and was conducted in accordance with both the Manual of Survey Instructions and the special instructions for this conditional survey.

Chester H. Ferguson et al., 20 IBLA 224 (May 13, 1975)

PUBLIC LANDS--Continued

GENERALLY--Continued

The survey of an offshore island without the use of
18.6-year mean high tide data, which governs boundary
disputes between private upland and tideland owners,
is proper; the 18.6-year lunar cycle tide data does
not govern meander lines established in public land
surveys.

Meander of an offshore island is ordinarily based on a
mean high tide determined by the vegetative line upon
the soil in accordance with the Bureau of Land Manage-
ment's Manual of Surveying Instructions.

The meandering of the public land of an offshore island
is properly based on a mean high tide line established
at the vegetative line upon the soil, in accordance
with the provisions of the Bureau of Land Management's
Manual of Surveying Instructions, and a protest against
the filing of a plat of survey based on such a mean
high tide line is properly rejected.

The United States is not estopped to assert title to,
survey, or deny the swamp and overflowed character of
public lands constituting offshore islands in Florida
either by Departmental inaction on the State's swamp-
land application, or by inclusion of the islands in a
swampland selection list, or by the survey protestants'
adverse chain of title and claims of occupancy and use.

The Secretary of the Interior is authorized and under
a duty to determine what lands are public lands and to
survey such lands. Neither the Acts admitting Florida
into the Union, nor the Reconstruction Act of Mar. 2,
1867, divested the Secretary of the Interior of that
authority regarding islands in the State of Florida,
nor divested the United States of title to any public
lands in the State.

Virgil Lopez et al., 21 IBLA 33 (June 17, 1975)

Where land had been conveyed to the United States pur-
suant to the Act of June 4, 1897, ch. 2, 30 Stat. 11,
36, as a base for forest lieu selection rights, and a
purported color of title claim was initiated at a time
when the land had not been opened to the operation of
the public land laws, the color of title claim is not
cognizable as valid under 43 U.S.C. § 1068 (1970).

Estate of John C. Brinton, 25 IBLA 283 (June 28, 1976)

Title to an island omitted from the original survey but
existing at that time in a nonnavigable river remains
in the United States and is subject to survey despite
the disappearance of the channel separating the island
from the lots which were formerly riparian.

R. A. Mikelson, 26 IBLA 1 (July 6, 1976)

Lands which have been designated by the Act of Aug. 13,
1949, as public domain are not leasable under the Min-
eral Leasing Act for Acquired Lands or Reorganization
Plan No. 3 of 1946, even though they may have been ac-
quired lands prior to the Act of Aug. 13, 1949. A
prospecting permit for uranium on such lands will be
denied.

John R. Meadows, 30 IBLA 14 (Apr. 4, 1977)

The Secretary of the Interior may cause to be made such
resurveys or retracements of the rectangular system of
surveys of public lands as he may deem essential to
mark the boundaries of the remaining public lands.

Frank Lujan, 30 IBLA 95 (Apr. 29, 1977)

PUBLIC LANDS--Continued

GENERALLY--Continued

Under the Supremacy Clause, U.S. Const., art. VI, cl. 2,
Federal laws, including Federal grazing regulations,
override conflicting State laws with respect to public
lands.

Bureau of Land Management v. Ross Babcock, 32 IBLA 174
84 I.D. 475
(Sept. 15, 1977)

Colvin Cattle Co., Inc., 39 IBLA 176 (Jan. 30, 1979)

A geothermal lease application is properly rejected to
the extent that it includes land which has been recon-
veyed to the United States but which has only been
opened to applications under the nonmineral public
land laws.

Chevron Oil Co., 32 IBLA 275 (Sept. 27, 1977)

Where the Secretary has declined to exercise his juris-
diction, a decision rendered by this Board is final for
the Department. Hence, statements by BLM and arguments
of the Solicitor, while valuable to the Board, are not
binding upon the Board.

H. B. Delasco, Inc., et al., 39 IBLA 194 (Feb. 7, 1979)

Federal title to land may be lost by erosion, and land
which has become submerged under water is no longer
subject to disposition under the Alaska Native Allot-
ment Act. The fact that an Alaska Native may have
used, occupied, and filed an application for such land
when it was dry does not prevent the loss of Federal
title to that land by erosion. Neither the Alaska
Statehood Act nor the Submerged Lands Act prevents the
passage of title to such land to the State.

Frank Hulland, 41 IBLA 207 (June 27, 1979) 86 I.D. 342

ADMINISTRATION

The Bureau of Land Management, in the exercise of its
discretionary power to issue special land use permits,
may establish special fee assessments for off-road ve-
hicle (ORV) events.

Walt's Racing Ass'n, 38 IBLA 359 (Jan. 30, 1979)

The administrative treatment of land as reservation
land under the jurisdiction of the Bureau of Indian
Affairs for many purposes is not dispositive of the
status of the land in the face of clear legislation
demonstrating that it was absolutely ceded, even with-
out conflicting administrative treatment of the lands
as public domain or under the jurisdiction of the
Reclamation Service. The Department has the authority
to resolve disputes and correct errors in the status of
lands within its jurisdiction.

Title to Certain Land Within the Boundaries of the Fort
Yuma Indian Reservation as Established by the Executive
Order of Jan. 9, 1884, M-36886 (Jan. 18, 1977)
84 I.D. 1

Sec. 9 of the Stock-Raising Homestead Act, 43 U.S.C.
§ 299 (1970), contemplates the Department of the
Interior retaining continuing jurisdiction and admin-
istration of mineral deposits reserved by that Act.

"Public lands." Under 43 CFR 9239.0-7 which defines
a trespass, the term "public lands" includes mineral

PUBLIC LANDS--Continued

ADMINISTRATION--Continued

deposits reserved under the Stock-Raising Homestead Act, 43 U.S.C. § 299 (1970).

Western Nuclear, Inc., 35 IBLA 146 (May 22, 1978)
85 I.D. 129

APPRAISALS

Where a decision fixes a small tract rental derived from an appraisal report which does not comport with Departmental standards, the decision will be set aside and the case remanded for a new appraisal to establish the fair rental value.

Junction Oil Co., Inc., 21 IBLA 78 (June 25, 1975)

Department of the Interior policy requires that, in most circumstances, full value be received by the Government in any sale of public land.

A notification to a small tract lessee, which was authorized by a memorandum of the Director, Bureau of Land Management, dated Oct. 19, 1955, and approved by the Secretary of the Interior on Nov. 9, 1955, that the lessee could purchase the tract under lease without constructing the improvements required in the option to purchase clause of the lease, if he paid the appraised price shown on the lease within a set time, was an offer to sell the tract by the United States, and exercise of the option by the lessee created a binding contract. Where issuance of the patent was delayed for years because of the contest of a conflicting mining claim, reappraisal to determine changed value since that time is not permissible because there was a binding contract under special authority.

Abraham Epstein, 24 IBLA 195 (Mar. 19, 1976)

CLASSIFICATION

It is proper to reject applications for desert land entries filed for lands which have been classified by the Secretary, pursuant to the petition classification procedure set forth in 43 CFR subpart 2450, as unsuitable for desert land entry and, therefore, are not open for disposition under the desert land laws. The decision of the Secretary is the final Departmental action and the applicants cannot have a review on the merits of an appeal from the subsequent decision rejecting their applications.

Guy A. Martin, Ada E. Martin, 26 IBLA 254 (Aug. 18, 1976)

The statement by the BLM State Office that appellant's petition-application is regular on its face is merely a preliminary determination the application will be considered and the process will be set in motion to classify the land. The decision to classify land for a certain purpose is discretionary with the Secretary of the Interior.

Arthur R. Wallace, 30 IBLA 239 (May 31, 1977)

A petition-application for a homestead entry outside of Alaska requires classification of the land, confers no rights upon an applicant and must be rejected because the Federal Land Policy and Management Act repealed the homestead laws effective on the date of the Act as to lands outside Alaska.

Daniel A. Anderson, 31 IBLA 162 (July 1, 1977)

PUBLIC LANDS--Continued

CLASSIFICATION--Continued

When lands have been classified under a final order of the Secretary of the Interior as being unsuitable for disposal under the desert land laws, a desert land entry petition-application will not be allowed.

Bulce Van Tassel, 33 IBLA 221 (Dec. 22, 1977)

Where the Secretary by appropriate notice in the *Federal Register* has classified certain lands for multiple use management and such lands are segregated from desert land entry, and the classification has not been terminated by either a reclassification or publication in *Federal Register* of termination of classification, BLM properly denied petition-application for desert land entry.

Paul R. Jenkins, 39 IBLA 141 (Jan. 29, 1979)

Melvin V. Frandsen, Mary C. Frandsen, 43 IBLA 130 (Sept. 26, 1979)

Lands segregated on the public records by a proposed withdrawal posted Apr. 6, 1973, or a Recreational and Public Purposes Classification filed Nov. 13, 1956, were not available for the location of mining claims, and claims thereafter located are null and void ab initio.

Neither a Recreation and Public Purposes Act classification nor a withdrawal is a rule or regulation within the ambit of the Secretarial policy of Apr. 27, 1971, which provides for utilization of the public participation procedures of 5 U.S.C. § 553 (1976).

Mining claims purportedly located on land not available for such location confer no property right upon the locator, and may be declared null and void ab initio without a hearing under 5 U.S.C. § 554 *et seq.* (1976).

Delmer McLean et al., 40 IBLA 38 (Mar. 15, 1979)

DISPOSALS OF

Generally

The Recreation and Public Purposes Act, and the pertinent regulations thereunder, require that a grantee of land under the Act must develop the land in accordance with the specified uses proposed in the patent application within a reasonable time following the date of issuance of patent.

Failure over a 17- or 18-year period to develop land patented under the Recreation and Public Purposes Act in accordance with the specified uses proposed in the patent application and set out in the patent is a violation of the condition in the patent which provides that if the lands are devoted to a use other than that for which they were conveyed title shall revert to the United States.

Clark County School District, 18 IBLA 289 (Jan. 6, 1975)
82 I.D. 1

City of Monte Vista, Colorado, 22 IBLA 107 (Sept. 22, 1975)

A patent of land from the United States conveys only land which is surveyed, and when the surveyors have carried a survey only to a certain line, a grantee may not successfully challenge the correctness of their

PUBLIC LANDS--Continued

DISPOSALS OF--Continued

Generally--Continued

action or claim land beyond that line under a patent issued in accordance with that survey.

Chester H. Ferguson et al., 20 IBLA 224 (May 13, 1975)

The Recreation and Public Purposes Act, and the regulations thereunder, do not authorize additional payment for the issuance of a supplemental patent (which voids an earlier patent's reversionary provision) as an alternative to forfeiture for noncompliance with the Act's provision that land patented under the Act only be used for an established or definitely proposed pub- lic project within a reasonable time following issuance of patent. The Department can alienate interests in public lands only within the limits authorized by law; therefore, issuance of a supplemental patent which eliminates the Act's mandatory reversionary provision is impermissible.

The Department of the Interior is not estopped from denying the legality of a payment in lieu of forfeiture provision inserted in a Recreation and Public Purposes Act patent when such denial works no serious injustice against the patentee and implementation of the provision would harm the public interest by divesting the Government of all jurisdiction over the patented land, thus, precluding enforcement of the Recreation and Pub- lic Purposes Act requirement that lands patented under the Act be devoted to a definitely proposed project for the benefit of the public.

Okanogan County Public Utility, District No. 1, Washington, 22 IBLA 342 (Nov. 14, 1975)

Where land had been conveyed to the United States pursuant to the Act of June 4, 1897, ch. 2, 30 Stat. 11, 36, as a base for forest lieu selection rights, and a purported color of title claim was initiated at a time when the land had not been opened to the operation of the public land laws, the color of title claim is not cognizable as valid under 43 U.S.C. § 1068 (1970).

Estate of John C. Brinton, 25 IBLA 283 (June 28, 1976)

"An Act granting public lands to the town of Silverton, Colorado, for public park purposes" (43 Stat. 980, Feb. 25, 1925).

The above Act and the patent issued in accordance therewith require that the lands granted be used for public park purposes only, and the town's attempt to lease a portion of the lands for the construction of camper sites does not violate the Act and patent since the use of a limited part of the patented land for camper sites is consistent with recreational and public park purposes.

Town of Silverton, 35 IBLA 183 (May 23, 1978)
85 I.D. 140

An error in omitting to survey an island in a navigable stream does not divest the United States of title or interpose any obstacle to surveying it at a later time. An island within the public domain in a navigable stream and actually in existence both at the time of the survey of the banks of the stream and also upon the admission to the Union of the State within which it is situated remains the property of the United States. Even though omitted from survey, such land does not become part of the fractional subdivisions on the opposite banks of the stream.

Public lands owned by the United States cannot be subjected to taxation by the State in which they are located. When Congress has prescribed the conditions upon which portions of the public domain may be alienated and has provided that upon fulfillment of certain conditions the United States shall issue patent, the land becomes taxable only after the applicant has fulfilled all conditions precedent to such conveyance. Payment of taxes to a State for Federal land does not afford the taxpayer any rights against the United States, unless specifically provided by a Federal statute.

Joseph Tomalino, August Sobotka, 42 IBLA 117 (Aug. 16, 1979)

JURISDICTION OVER

Where BLM has issued a clear list giving a State title to lands selected as indemnity for lost school lands but erroneously reserving to the United States geothermal rights to these selected lands, these geothermal rights are still within the power of the United States to dispose of, and the Department still exercises jurisdiction over them, so that the Board of Land Appeals may correct BLM's error by ordering that these rights be given to the State by deleting the reservation thereof in the clear list.

State of California, 33 IBLA 160 (Dec. 20, 1977)

Federal law determines the legal characterization of accretions, avulsions, and relictions to land riparian to navigable bodies of water, where title to the land or reserved interests in the land remains in the United States.

David A. Provinse, 35 IBLA 221 (May 26, 1978)
85 I.D. 154

LEASES AND PERMITS

The issuance of a public airport lease on national resource lands lies within the discretion of the Secretary of the Interior. The Department may require an applicant for a public airport lease to accept special stipulations in order to protect the environmental quality of the land, so long as the stipulations are not inconsistent with other reasonable requirements of the Bureau of Land Management or Federal Aviation Administration.

A. H. Brothers, 19 IBLA 104 (Mar. 7, 1975)

The issuance of a public airport lease on the public domain lies within the discretion of the Secretary of the Interior. A decision rejecting an airport lease application in the exercise of that discretion will be affirmed when, even though the Board differs in its opinion of the importance of some of the factors recited as grounds for the rejection, the record shows the decision to be a reasoned analysis of the factors involved, and no sufficient basis to disturb the decision is shown.

Boulder City Aero Club, Inc., 21 IBLA 343 (Aug. 18, 1975)

Where the holder of mineral leases in the Lake Mead National Recreation Area fails to mine and produce minerals within the time prescribed by the lease for reasons not beyond the control of the lessee, the leases are not in good standing and therefore are not subject to renewal.

It is a proper exercise of discretion to refuse to renew mineral leases in the Lake Mead National Recreation Area where the lessee failed to commence mining and produce minerals as required by regulation and by the terms of the lease for reasons which were attributable to the lessee.

Apache Oro Co., 22 IBLA 331 (Nov. 11, 1975)

It would not be improper to issue a free use permit to a qualified applicant for land included in, and segregated by, an airport lease application where the airport lease applicant is a governmental entity and it consents to the issuance of the free use permit and such issuance is consistent with the public interest.

Good Roads District No. 1, 25 IBLA 123 (June 7, 1976)

The National Park Service is not an "executive department, independent establishment or instrumentality" within the meaning of 43 CFR 3501.2-6. The Department is therefore not bound by the granting or withholding of consent by the Service for a mineral lease on National Park Service lands.

Rilite Aggregate Co., 26 IBLA 197 (Aug. 11, 1976)

Where the State Office, following a recommendation of the National Park Service rejects an application for an oil and gas lease in the Lake Mead National Recreation Area on the basis of a general environmental review of the consequences of oil and gas leasing in the Recreation Area, but which does not specifically show that the lands involved are of a particular value in the Recreation Area as a whole and that leasing subject to stipulations will not suffice to protect the recreation and other values of the land, the case will be remanded for a particular application of the environmental review to that land.

Robert P. Wahl, Howard Yee, 28 IBLA 305 (Jan. 13, 1977)

Lands which have been designated by the Act of Aug. 13, 1949, as public domain are not leasable under the Mineral Leasing Act for Acquired Lands or Reorganization Plan No. 3 of 1946, even though they may have been acquired lands prior to the Act of Aug. 13, 1949. A prospecting permit for uranium on such lands will be denied.

John R. Meadows, 30 IBLA 14 (Apr. 4, 1977)

Under 30 U.S.C. § 262 (1970), a valuable deposit of sodium must be leased competitively even though the Geological Survey determination that lands are so known may have been made subsequent to appellant's filing of its application.

Permian Mud Service, Inc., 31 IBLA 150 (June 30, 1977)
84 I.D. 342

Until such time as the Department promulgates regulations, policy guidelines or criteria implementing sec. 302 of the Federal Land Policy and Management Act of 1976, the Bureau of Land Management may properly defer action on the proposed creation of an estate in Federal land thereunder.

Irene L. Berger, 31 IBLA 389 (Aug. 19, 1977)

Unsurveyed fast lands, formed by accretion to public land or to lands patented with an oil and gas reservation, riparian to a navigable river and lying within the meander lines of that navigable river, as recorded on the official plat, may be leased provided that a proper offer is received and the other relevant conditions precedent to leasing are met.

The boundary of an oil and gas lease covering lands riparian to a navigable river is the meander line indicated on the official plat of survey and not the waterline. Thus, lands accreted to the leased lands may be separately leased.

David A. Provinse, 35 IBLA 221 (May 26, 1978)
85 I.D. 154

Where, at the end of its term, a mineral lease affecting lands within the Lake Mead Recreation Area is not in good standing, an application for renewal thereof for an additional 5 years is properly denied. Where the lessee fails to develop the lease property diligently during the term of the lease and does not fall within an exception to this requirement, the lease is not in good standing and may not be extended.

Audrine G. Knight, 36 IBLA 53 (June 30, 1978)

Where the State Office, following recommendations of the National Park Service, rejects applications for oil and gas leases under the "excepted areas" provisions of 43 CFR 3111.1-3(e)(4), and where it appears that large portions of the applied-for lands do not fall within such areas, the case will be remanded with instructions to reconsider whether the leasing of lands not in excepted areas would be appropriate.

E. L. Percell, 37 IBLA 272 (Oct. 20, 1978)

E. L. Percell, 40 IBLA 126 (Mar. 26, 1979)

That part of a decision rejecting a headquarters site purchase application which requires the applicant to remove his improvements from the site within 90 days may be set aside and the case remanded to the Alaska State Office to determine whether a temporary use permit can be granted authorizing continued use of the improvements.

Rene F. Lamoureux d/b/a Frenchy Lamoureux, 39 IBLA 36 (Jan. 15, 1979)

RIPARIAN RIGHTS

An oil and gas lease offer for less than 640 acres of land is properly rejected when the application fails to include adjoining, unsurveyed, nonnavigable riverbed lands which were available for leasing at the time the offer was filed.

John E. Williams, 18 IBLA 354 (Jan. 16, 1975)

PUBLIC LANDS--Continued

RIPARIAN RIGHTS--Continued

Generally, the meander line is not to be treated as a
boundary and when the United States conveys a tract
of land by patent referring to an official plat which
shows the tract to be bordering on a navigable body of
water, the patent conveys all the land to the water
line. However, there are three situations in which
meander lines will serve as the boundary of a convey-
ance or grant, rather than a water body: namely, where
there is (1) fraud or (2) gross error shown in the sur-
vey, or (3) where the facts and circumstances disclose
an intention to limit a grant or conveyance to the ac-
tual traverse lines.

Chester W. Ferguson et al., 20 IBLA 224 (May 13, 1975)

Title to an island omitted from the original survey but
existing at that time in a nonnavigable river remains
in the United States and is subject to survey despite
the disappearance of the channel separating the island
from the lots which were formerly riparian.

D. A. Mikelson, 26 IBLA 1 (July 6, 1976)

The acceptance by a State of other lands as indemnity
for lands lying within the meander line of a nonnaviga-
ble lake adjacent to the granted upland school section,
was a relinquishment of any interest in the adjacent
land underlying the lake as an incident to the grant of
the school section to the extent such land lies within
the linear boundaries of the school section, and pre-
cludes the assertion of a State claim to such lands.

State of Montana, 28 IBLA 124 (Nov. 16, 1976)

In determining what land is conveyed under patents or
grants of public land bordering a meandered watercourse,
the general rule is that the waterline itself, not the
meander line, constitutes the boundary. There is an
exception where the meander line may constitute the
boundary between lands omitted from the survey and the
watercourse if fraud or gross error is shown in the
survey. This exception is only applicable to limit the
boundary of the surveyed lots on the side of the water-
course where the omitted land is shown. It does not
apply to a lot on the opposite side of the watercourse
from the omitted land so as to pass title to the omit-
ted land with title to the lot on the opposite side.
The waterline would remain the actual boundary of that
lot.

Mable M. Farlow, 30 IBLA 320 (June 7, 1977) 84 I.D. 276

Unsurveyed fast lands, formed by accretion to public
land or to lands patented with an oil and gas reserva-
tion, riparian to a navigable river and lying within
the meander lines of that navigable river, as recorded
on the official plat, may be leased provided that a
proper offer is received and the other relevant condi-
tions precedent to leasing are met.

Federal law determines the legal characterization of
accretions, avulsions, and relictions to land riparian
to navigable bodies of water, where title to the land
or reserved interests in the land remains in the United
States.

Federal law follows the common law in distinguishing
between accretion and avulsion. Accretion is the
gradual and imperceptible addition of land to adjacent
riparian land. Title to accreted lands inures to the
uplands owner. Avulsion is the sudden perceptible
shifting of the course of a river or stream. In the
case of avulsion, title to the avulsed land is not lost

PUBLIC LANDS--Continued

RIPARIAN RIGHTS--Continued

by its former owner nor does it accrue to the owner of
what was formerly the opposite bank.

David A. Provinse, 35 IBLA 221 (May 26, 1978)
85 I.D. 154

SPECIAL USE PERMITS

Issuance of a special use permit is clearly discretion-
ary, and the Bureau of Land Management may reject an
application in part for a permit for commercial river
running where an evaluation of the Bureau's river man-
agement program for the Green River shows that the
total passenger days applied for will exceed the river
carrying capacity and would be inconsistent with the
Bureau's objectives and program for environmental pro-
tection of the river area.

Canco Tours, Inc., 20 IBLA 216 (May 8, 1975)

The issuance of a special land-use permit is discre-
tionary, and the Bureau of Land Management may reject
a special land-use permit application when the proposed
use would adversely affect the public interest, and may
offer, in the alternative, a permit providing for use
consonant with proper management of national resource
lands.

Jerry Tecklin, Leonard Brackett, 20 IBLA 306 (May 30,
1975)

The issuance of a special land use permit by the Bureau
of Land Management is clearly discretionary, but the
Bureau may not issue a permit when the provisions of
existing laws may be invoked to provide for the pro-
posed use. However, if a withdrawal of the lands in
issue precludes the invocation of such provisions, a
permit may be granted if consistent with the public in-
terest. Where the land has been withdrawn by Executive
Order No. 6206 of July 16, 1933, for the protection of
the water supply of the City of Los Angeles, and the
City objects to the issuance of a permit for agricul-
tural purposes, but does not show why it objects, the
case will be remanded to develop the facts and for fur-
ther appropriate consideration.

Edward L. Butterworth, 23 IBLA 136 (Dec. 23, 1975)

Issuance of special land use permits is discretionary,
and it is proper to reject an application for such a
permit if the use for which the application is made is
inconsistent with the objectives of the Bureau of Land
Management and programs for public use of the land.

Ronald J. Laughlin, d/b/a Riverside Resort & Casino,
25 IBLA 41 (May 12, 1976)

A petition for reconsideration of a decision of the
Board of Land Appeals which affirmed the rejection of
a special land use permit application will not result
in the modification of the earlier decision where that
rejection is based upon rational grounds and is consis-
tent with the objectives of the Bureau of Land Manage-
ment and programs for public use of the land.

*Ronald J. Laughlin (d/b/a Riverside Resort & Casino)
(On Reconsideration)*, 26 IBLA 154 (Aug. 2, 1976)

PUBLIC LANDS--Continued

SPECIAL USE PERMITS--Continued

The issuance of a special land use permit by the Bureau of Land Management is discretionary, but the Bureau may not issue a permit when the provisions of existing laws may be invoked by the applicant to provide for the proposed use.

A special land use permit may be issued for land being used in trespass for a limited time during pendency of negotiations seeking to effect a land exchange whereby the land occupied in trespass may be patented.

Alfred Gaiser, 26 IBLA 313 (Aug. 30, 1976)

Where the declared administrative policy is to refuse permission for geophysical exploration on lands controlled by sec. 17(d)(1) of the Alaska Native Claims Settlement Act and the subject lands are under consideration for possible inclusion in the national forest system, a decision refusing such permission will be affirmed.

Shell Oil Co., 28 IBLA 378 (Feb. 4, 1977)

A special use permit for commercial passenger carrying river-trip operations may be denied renewal for non-use or reduced for incomplete use over a 2-year period and only use during the crucial high season may be counted in determining usage if the permit so provides. However, where the program is recent and permittees are not fully familiar with its operations, and all the requirements for maintaining the permit are not immediately apparent, a permittee may be given some leeway before his permit is denied renewal.

Wilderness River Outfitters and Trail Expeditions, Inc., 30 IBLA 148 (May 16, 1977)

A special recreation use permit for commercial boat operations may be denied renewal for nonuse over a 2-year period of any allocated passenger days under a properly noticed "use or lose" policy. However, where the permit program is relatively recent and administrative techniques are not fully reliable, and where the appellant documents on appeal some use of its allocation during the 2-year period, the permit should not be denied renewal under the "use or lose" policy.

Canyoneers, Inc., 30 IBLA 354 (June 9, 1977)

Under the Federal Land Policy and Management Act of 1976 and interim guidelines issued pursuant thereto, special use permit applications for access roads over public land are properly processed as right-of-way applications. 43 U.S.C. § 1761. The Bureau of Land Management correctly denies such an application where it has determined, in conformance with the Act and interim guidelines, that an access road would neither be in the public interest nor facilitate land management policy.

Edwin L. Rumpf, Jr., 31 IBLA 367 (Aug. 1, 1977)

The issuance of a special use permit is discretionary, and the Bureau of Land Management properly exercises that discretion where it denies permits for three of four ORV events on the ground that lack of funds, time, and manpower would impede processing of applications and preclude preparation of the requisite environmental analysis records.

Baja Motor Sports, 32 IBLA 142 (Sept. 12, 1977)

PUBLIC LANDS--Continued

SPECIAL USE PERMITS--Continued

The issuance of a use permit is discretionary, and BLM may reject an application for such a permit where Bureau studies indicate that the uses proposed are inconsistent with the agency's objectives for the lands involved.

Applications for rights-of-way on public lands pending on Oct. 21, 1976, are to be considered as filed under the Federal Land Policy and Management Act of 1976.

Arnold E. Bedell, 37 IBLA 22 (Sept. 12, 1978)

A special land use permit is revocable in the discretion of the authorized officer at anytime upon notice to the permittee. Such permit is properly canceled when a millsite claimant, having located a claim on the same land included in the permit, requests revocation of the permit in order to facilitate construction on tailings pond expansion necessary to meet Federal and State requirements.

U.S. Energy Corp., 38 IBLA 110 (Nov. 20, 1978)

That part of a decision rejecting a headquarters site purchase application which requires the applicant to remove his improvements from the site within 90 days may be set aside and the case remanded to the Alaska State Office to determine whether a temporary use permit can be granted authorizing continued use of the improvements.

Rene E. Lamoureux d/b/a Frenchy Lamoureux, 39 IBLA 36 (Jan. 15, 1979)

Where an application for a special use permit is not filed until more than 10 months after a deadline for doing so imposed by BLM, it is properly rejected.

Where a permittee is not familiar with an unpublished BLM policy to the effect that the tardy filing of an application for permit renewal in 1978 makes the permittee a "new" applicant in 1979 and, as such, ineligible to receive a permit, BLM's decision enforcing this policy and rejecting the permittee's 1979 application will be reversed.

Outdoor Adventure River Specialists, Inc., 41 IBLA 132 (June 14, 1979)

The issuance of special use permits is discretionary and BLM may properly reject a permit application if the use identified is inconsistent with BLM's objectives, responsibilities and programs for managing the public lands. BLM may propose alternatives or impose restrictions or stipulations in order to issue a permit consistent with its responsibilities.

Southern California Motorcycle Club, Inc., Sierra Club, 42 IBLA 164 (Aug. 17, 1979)

PUBLIC RECORDS
(*See also* Administrative Procedure, Confidential Information--if included in this Index.)

The notation on land office records of a noncompetitive oil and gas lease application does not prevent the State of Alaska from selecting the land pursuant to the Alaska Statehood Act.

Yukon Services, Inc., 22 IBLA 220 (Oct. 15, 1975)

PUBLIC RECORDS--Continued

The notation on public records of the Bureau of Land Management of a request for withdrawal has a segregative effect on land included in a mining location, so that in a contest proceeding, the claimants must show that they had made a discovery of a valuable mineral deposit before the time of posting of the withdrawal application.

United States v. John L. Maley and James P. Pagel, 29 IBLA 201 (Mar. 22, 1977)

Where material involving a prior mineral reservation on acquired lands is first submitted on appeal, and the effect of a State statute and State court decree is in issue, it is appropriate to remand the case to the BLM State Office for further consideration.

A. M. Henderson, 30 IBLA 8 (Apr. 4, 1977)

Where a mining claim is located on lands a. a time when the official records of the Bureau of Land Management showed such lands to be subject to a proposed withdrawal from operation of the mining laws, that mining claim is null and void ab initio.

Jack D. Capon et al., 30 IBLA 112 (May 2, 1977)

Publication in the *Federal Register* of a notice of proposed classification pursuant to 43 CFR 2461.2 will segregate the affected land to the extent indicated in the notice.

United States v. R. E. Rodgers and Barbara J. Rodgers, 32 IBLA 77 (Sept. 2, 1977)

Land is segregated from entry under the mining laws when a proposed withdrawal of the lands from mineral entry is noted on the official records of the Bureau of Land Management and a mining claim located after that time is null and void ab initio.

William J. Smith, Sr., et al., 33 IBLA 47 (Nov. 25, 1977)

Public lands owned by the United States cannot be subjected to taxation by the State in which they are located. When Congress has prescribed the conditions upon which portions of the public domain may be alienated and has provided that upon fulfillment of certain conditions the United States shall issue patent, the land becomes taxable only after the applicant has fulfilled all conditions precedent to such conveyance. Payment of taxes to a State for Federal land does not afford the taxpayer any rights against the United States, unless specifically provided by a Federal statute.

Joseph Tomalino, August Sokotka, 42 IBLA 117 (Aug. 16, 1979)

PUBLIC SALES

GENERALLY

A public sale application, filed pursuant to the Unintentional Trespass Act of Sept. 26, 1968, 43 U.S.C. §§ 1431-1435 (1970), and 43 CFR Part 2785 (1971), embracing lands which the records show to be withdrawn by Public Land Order No. 5490 on Feb. 12, 1975, and

PUBLIC SALES--Continued

GENERALLY--Continued

withdrawn under the Wild and Scenic Rivers Act on Oct. 2, 1968, is properly rejected.

T. E. Markham, 24 IBLA 5 (Feb. 4, 1976)

Department of the Interior policy requires that, in most circumstances, full value be received by the Government in any sale of public land.

Abraham Epstein, 24 IBLA 195 (Mar. 19, 1976)

The Secretary of the Interior has complete discretion to determine whether the surface of public land reported as valuable for any leasable mineral should be disposed of and a nonmineral application may be allowed only if it is determined by the proper officer with the concurrence of the Director, Geological Survey, that the disposal of the lands under the nonmineral application will not unreasonably interefere with current or contemplated operations under the Mineral Leasing Act.

A determination by the United States Geological Survey that certain lands under a public sale application are valuable for various leasable minerals will not be disturbed in the absence of a clear showing by the applicant that such determination was improperly made.

The Peabody Coal Co., 26 IBLA 127 (July 30, 1976)

Where the Bureau of Land Management rejects a public sale application based on a determination by Geological Survey that certain lands encompassed by a public sale application contain workable coal deposits and Geological Survey's conclusion that the exercise of surface rights will unreasonably interfere with operations under the mineral leasing law, the case will be remanded for further consideration when the bare conclusion of the Geological Survey is unsupported by any facts and where there is a lack of evidence in the record to support such conclusion.

Edward E. Swartz, 27 IBLA 308 (Oct. 29, 1976)

Although the Federal Land Policy and Management Act, 43 U.S.C.A. § 1701 *et seq.* (West Supp. 1977), repealed the Isolated Tract Act, 43 U.S.C. § 1171 (1970), where a public sale was held prior to Oct. 21, 1976, with the decision to hold the sale fully supported by land use plans, and there is an explicit finding that disposal criteria of the Federal Land Policy and Management Act have been met, final certificate and patent may be issued to the highest preference right bidder pursuant to 43 CFR 2711.4 *et seq.*

L. A. Gillette, 33 IBLA 182 (Dec. 21, 1977)

It is a proper exercise of discretion under the Federal Land Policy and Management Act of 1976 for the Bureau of Land Management to refuse to process and to reject applications for public sale pending on the date of the Act, even though it will continue to process bids and preference right applications for a sale held prior to the Act.

United Park City Mines Co., 33 IBLA 358 (Jan. 18, 1978)

PUBLIC SALES--Continued

GENERALLY--Continued

A determination by the United States Geological Survey that certain lands in an application for sale under the Unintentional Trespass Act, 43 U.S.C. §§ 1431-1435 (1970), are underlain with coal, and that sale of the surface rights would interfere with the operation of the Mineral Leasing Act of 1920, will not be disturbed in the absence of a clear showing by the applicant that the determination was improperly made.

Mace Cox, 38 IBLA 340 (Dec. 20, 1978)

APPLICATIONS

A public sale application, filed pursuant to the Unintentional Trespass Act of Sept. 26, 1968, 43 U.S.C. §§ 1431-1435 (1970), and 43 CFR Part 2705 (1971), embracing lands which the records show to be withdrawn by Public Land Order No. 5490 on Feb. 12, 1975, and withdrawn under the Wild and Scenic Rivers Act on Oct. 2, 1968, is properly rejected.

T. E. Markham, 24 IBLA 5 (Feb. 4, 1976)

A determination by the United States Geological Survey that certain lands under a public sale application are valuable for various leasable minerals will not be disturbed in the absence of a clear showing by the applicant that such determination was improperly made.

The Kemmerer Coal Co., 26 IBLA 127 (July 30, 1976)

Where the Bureau of Land Management rejects a public sale application based on a determination by Geological Survey that certain lands encompassed by a public sale application contain workable coal deposits and Geological Survey's conclusion that the exercise of surface rights will unreasonably interfere with operations under the mineral leasing law, the case will be remanded for further consideration when the bare conclusion of the Geological Survey is unsupported by any facts and where there is a lack of evidence in the record to support such conclusion.

Edward H. Swartz, 27 IBLA 308 (Oct. 29, 1976)

An application to purchase public land filed pursuant to the Unintentional Trespass Act, 43 U.S.C. §§ 1431-1435 (1970), is properly rejected as to two of the three tracts sought when the Geological Survey reports that such lands are underlain with coal; that a coal company holds coal prospecting permits for such lands and intends to mine the coal if leases issue; and that exercise of surface rights would unreasonably interfere with operations under the Mineral Leasing Act of 1920. In addition, the public interest dictates rejection of the application as to such tracts because conveyance of the surface rights could allow the surface owner, pursuant to the Wyoming Environmental Quality Act of 1973, to prevent strip mining of the underlying coal by withholding his consent to mine.

Edward H. Swartz, 31 IBLA 210 (July 6, 1977)

A decision to return an application for a public sale constitutes an action adverse to the applicant by an officer of the Bureau of Land Management and is thus appealable to the Board of Land Appeals under 43 CFR 4.410.

United Park City Mines Co., 33 IBLA 358 (Jan. 10, 1978)

PUBLIC SALES--Continued

APPLICATIONS--Continued

BLM has discretion to reject public sale applications pursuant to R.S. 2455, repealed by the Federal Land Policy and Management Act of 1976, effective Oct. 21, 1976, where the sale has not been held by this date. The filing of a public sale application creates no rights under sec. 701(a) of FLPMA which prevent BLM from exercising its discretion to dismiss the application.

Suzanne A. Halliday, 34 IBLA 219 (Mar. 27, 1978)

An application to purchase public land filed pursuant to the Unintentional Trespass Act, 43 U.S.C. §§ 1431-1435 (1970), is properly rejected when the Geological Survey reports that such lands are underlain with coal, and that exercise of surface rights would unreasonably interfere with operations under the Mineral Leasing Act of 1920. In addition, the public interest dictates rejection of the application because conveyance of the surface rights could allow the surface owner, pursuant to the Surface Mining Control and Reclamation Act of 1977, to prevent strip mining of the underlying coal by withholding his consent to mine.

A determination by the United States Geological Survey that certain lands in an application for sale under the Unintentional Trespass Act, 43 U.S.C. §§ 1431-1435 (1970), are underlain with coal, and that sale of the surface rights would interfere with the operation of the Mineral Leasing Act of 1920, will not be disturbed in the absence of a clear showing by the applicant that the determination was improperly made.

Mace Cox, 38 IBLA 340 (Dec. 20, 1978)

PREFERENCE RIGHTS

A contiguous landowner loses his preference right to purchase land offered at public sale when he fails to submit his preference right bid within the 30-day period provided by regulation; the Government's failure to return the check which accompanied his unsuccessful bid during this period, and his reliance on assurances it had been returned, do not excuse noncompliance with the preference right regulation, 43 CFR 2711.4(b)(1).

Basil E. Twist, 19 IBLA 75 (Feb. 26, 1975)

An assertion of a preference right to purchase public land offered for public sale pursuant to the Unintentional Trespass Act of Sept. 26, 1968 (43 U.S.C. §§ 1431-1435 (1970)), is properly rejected when the applicant fails to submit satisfactory evidence of his ownership of contiguous lands within the time specified by the authorized officer as provided by regulation.

Yost Cattle Co., 24 IBLA 347 (Apr. 23, 1976)

As between two preference right applicants for land offered at public sale under the Isolated Tract Act, 43 U.S.C. § 1171 (1970), departmental regulation 43 CFR 2711.4(b)(2) continues in effect pursuant to 43 U.S.C.A. §§ 1713, 1740 (West Supp. 1977) and is strictly construed with regard to the deadline for making the required showing of fee title to contiguous land.

L. A. Gillette, 33 IBLA 182 (Dec. 21, 1977)

PUBLIC SALES--Continued

SALES UNDER SPECIAL STATUTES

A contiguous landowner loses his preference right to purchase land offered at public sale when he fails to submit his preference right bid within the 30-day period provided by regulation; the Government's failure to return the check which accompanied his unsuccessful bid during this period, and his reliance on assurances it had been returned, do not excuse noncompliance with the preference right regulation, 43 CFR 2711.4(b)(1).

Basil B. Twist, 19 IBLA 75 (Feb. 26, 1975)

A public sale application, filed pursuant to the Unintentional Trespass Act of Sept. 26, 1968, 43 U.S.C. §§ 1431-1435 (1970), and 43 CFR Part 2785 (1971), embracing lands which the records show to be withdrawn by Public Land Order No. 5490 on Feb. 12, 1975, and withdrawn under the Wild and Scenic Rivers Act on Oct. 2, 1968, is properly rejected.

T. R. Markham, 24 IBLA 5 (Feb. 4, 1976)

An assertion of a preference right to purchase public land offered for public sale pursuant to the Unintentional Trespass Act of Sept. 26, 1968 (43 U.S.C. §§ 1431-1435 (1970)), is properly rejected when the applicant fails to submit satisfactory evidence of his ownership of contiguous lands within the time specified by the authorized officer as provided by regulation.

Rose Cattle Co., 24 IBLA 367 (Apr. 23, 1976)

An application to purchase public land filed pursuant to the Unintentional Trespass Act, 43 U.S.C. §§ 1431-1435 (1970), is properly rejected as to two of the three tracts sought when the Geological Survey reports that such lands are underlain with coal; that a coal company holds coal prospecting permits for such lands and intends to mine the coal if leases issue; and that exercise of surface rights would unreasonably interfere with operations under the Mineral Leasing Act of 1920. In addition, the public interest dictates rejection of the application as to such tracts because conveyance of the surface rights could allow the surface owner, pursuant to the Wyoming Environmental Quality Act of 1973, to prevent strip mining of the underlying coal by withholding his consent to mine.

Edward H. Swartz, 31 IBLA 210 (July 6, 1977)

An application to purchase public land filed pursuant to the Unintentional Trespass Act, 43 U.S.C. §§ 1431-1435 (1970), is properly rejected when the Geological Survey reports that such lands are underlain with coal, and that exercise of surface rights would unreasonably interfere with operations under the Mineral Leasing Act of 1920. In addition, the public interest dictates rejection of the application because conveyance of the surface rights could allow the surface owner, pursuant to the Surface Mining Control and Reclamation Act of 1977, to prevent strip mining of the underlying coal by withholding his consent to mine.

Pace Cox, 38 IBLA 340 (Dec. 20, 1978)

RAILROAD GRANT LANDS

To establish the mineral character of railroad grant lands under the Act of July 1, 1862, 12 Stat. 489, as *amended* by the Act of July 2, 1864, 13 Stat. 356, it must be shown that known conditions--which may include geological conditions, discoveries of minerals in adjacent land and other observable external conditions upon which prudent and experienced men are known to be accustomed to act--are such as reasonably to engender the belief that the land contains mineral of such quality and quantity as to render its extraction profitable and justify expenditures to that end.

In a hearing on a patent application filed under the Transportation Act of 1940, 49 U.S.C. § 65(b) (1970), the Government has the obligation of making a prima facie case of mineral character between the date the railroad line was definitely located and the date of purchase, whereupon the applicant has the burden of establishing nonmineral character by a preponderance of the evidence.

Land included in an application under sec. 321(b) of the Transportation Act of 1940 is properly determined to be mineral in character between the date the railroad line was definitely located and the date of purchase where the land was covered by mining claims, evidence of extensive and successful mining on adjacent lands was established, and the subject land had similar surface geologic conditions when compared with the surface mineralization on adjacent lands having valuable mineral deposits.

Where land applied for pursuant to sec. 321(b) of the Transportation Act of 1940 was mineral in character between the date the railroad line was definitely located and the date of purchase from the railroad company, and the purchaser was chargeable with actual or constructive notice of that fact, the purchaser was not an innocent purchaser for value.

Southern Pacific Co., Heirs of George H. Bedshire, 20 IBLA 365 (June 12, 1975)

Legal title, although not record title, to granted lands passes to a railroad under a railroad land grant act upon the filing of a map of definite location of the railroad and such title is subject to divestiture by adverse possession under State laws prior to the issuance of patent to the granted lands.

Where land within the primary limits of a railroad land grant is excluded or reserved by the terms of the granting act, the adverse possession of one who asserts only that he has satisfied the statute of limitations of a particular State will not divest the United States of its title or invest the adverse possessor with any interest in the land.

Where land within the primary limits of a railroad land grant is not excluded or reserved by the terms of the granting act, the statute operates to vest title in the railroad at the time the railroad qualifies to receive it. It is a grant *in praesenti*, regardless of whether the United States has issued its patent or certificate.

Lands known to be mineral in character (except for coal or iron) at the time of definite location of a railroad are excluded from the grant of place lands to the railroad even though the lands may later lose their mineral character.

The period for determination by the Department of the Interior whether public land included within the primary limits of a legislative grant-in-aid of the construction of a railroad which excepts mineral land is mineral in character extends to the time of issuance of patent to the railroad company.

Where the purchaser from the railroad of unpatented land believed at the time of his purchase that the land was mineral, and there was physical evidence of its mineral character, or if conditions were such that the purchaser should have known then that the land was excepted from the grant to the railroad, he was not a purchaser in good faith within the "innocent purchaser" proviso of sec. 321(b) of the Transportation Act of 1940.

When the Department of the Interior finds that public land within the place limits of a legislative grant-in-aid of the construction of a railroad was mineral in character and the railroad company challenges such finding, a hearing should be granted at which the Department has the obligation of making a prima facie case of mineral character, whereupon the company has the burden of establishing nonmineral character by a preponderance of the evidence.

Southern Pacific Transportation Co., Jay R. Fogal; Lloyd D. Hayes (Intervenor), 23 IBLA 232 (Jan. 9, 1976)
83 I.D. 1

Although the grants of a right-of-way to a railroad under sec. 2 of the Act of July 1, 1862, and of title to odd-numbered sections of land under sec. 3 of that Act were grants *in praesenti* the railroad's interest in the right-of-way land stems solely from sec. 2. There is no difference in its interest in portions of the right-of-way land which cross even-numbered sections of land and in portions which cross odd-numbered sections. Minerals underlying the right-of-way were reserved to the United States in both instances.

Brown W. Cannon, Jr., et al. 24 IBLA 166 (Mar. 16, 1976)
83 I.D. 80

The Secretary of the Interior does not have authority under the Right-of-Way Oil and Gas Leasing Act of May 21, 1930, 30 U.S.C. § 301 *et seq.* (1970), to dispose of deposits of oil and gas underlying a railroad right-of-way granted pursuant to the Act of Mar. 3, 1875, when the lands traversed by the right-of-way were later patented under the Act of Apr. 24, 1820, without any reservation for minerals. In such case, title to the mineral estate was included within the grant to the patentee.

Amerada Hess Corp., 24 IBLA 360 (Apr. 27, 1976)
83 I.D. 194

A railroad right-of-way, granted under the Act of July 1, 1862, 12 Stat. 489, *as amended*, by Act of July 2, 1864, 13 Stat. 356, crossing a school section, does not constitute lands "otherwise disposed of by the United States" within the ambit of the school indemnity statutes. Therefore a rejection of an indemnity selection application, offering such base, is proper.

State of Wyoming, 27 IBLA 137 (Sept. 29, 1976)
83 I.D. 364

Pursuant to sec. 321(b) of the Transportation Act of 1940, 49 U.S.C. § 65(b) (1970), patent may be issued for grant lands sold by the railroad if either (1) the land was not mineral in character between the time of the alleged grant to the railroad and the time of the sale or (2) although the land was mineral in character the purchaser was not, at the time of sale, chargeable with actual or constructive notice of that fact.

To establish the mineral character of railroad grant lands under the Act of July 1, 1862 (12 Stat. 489), *as amended*, it must be shown that known conditions--which may include geological conditions, discoveries of minerals in adjacent land and other observable external conditions upon which prudent and experienced men are known to be accustomed to act--on the critical date are such as reasonably to engender the belief that the land contains mineral of such quality and in such quantity as to render its extraction profitable and justify expenditures to that end.

When the Department of the Interior finds that public land within the place limits of a grant to a railroad under the Act of July 1, 1862, *as amended*, was mineral in character and the railroad company, filing for patent on behalf of an alleged bona fide purchaser from it, challenges such finding, a hearing should be granted at which the Department has the obligation of making a prima facie case of mineral character, whereupon the company has the burden of establishing nonmineral character by a preponderance of the evidence, and the bona fides of the purchaser.

Southern Pacific Transportation Co., 32 IBLA 218 (Sept. 19, 1977)

Sec. 321(b) of the Transportation Act of 1940, 49 U.S.C. § 65(b) (1970), authorizes, rather than mandates, the issuance of patents to innocent purchasers for value of lands which did not pass to a railroad under a statutory grant because of their mineral character, the rights of any such innocent purchaser being dependent upon the conditions and limitations of the Act of Mar. 3, 1887, 43 U.S.C. § 898 (1970).

Where land has long been devoted to a particular public purpose such as inclusion in a forest reserve, laches may bar an application filed pursuant to the Transportation Act of 1940, 49 U.S.C. § 65(b) (1970) and 43 U.S.C. § 898 (1970), in which case a hearing need not be ordered to determine whether a railroad's purchaser was an innocent purchaser for value.

Southern Pacific Transportation Co., Donald F. Lee, Charles Sillet v. United States Forest Service, 35 IBLA 270 (June 2, 1978)

RECLAMATION HOMESTEADS

GENERALLY

No person shall be permitted to make homestead entry or settle upon lands reserved for irrigation purposes until the Secretary of the Interior establishes the unit of acreage per entry and publicly announces the availability of water for irrigation.

Richard E. Crill et al., 18 IBLA 428 (Feb. 14, 1975)

An application to make homestead entry on land embraced in a first-form reclamation withdrawal is properly rejected.

No person shall be permitted to make homestead entry or settle upon lands reserved for irrigation purposes until the Secretary of the Interior shall have established the unit of acreage per entry and publicly announced the availability of water for irrigation.

Dallas C. Coalson et al., 36 IBLA 119 (July 25, 1978)

RECLAMATION LANDS

GENERALLY

An application to make a homestead entry on land embraced in a first-form reclamation withdrawal is properly rejected.

Richard E. Crill et al., 18 IBLA 428 (Feb. 14, 1975)

RECLAMATION LANDS--Continued

GENERALLY--Continued

An application to make homestead entry on land embraced in a first-form reclamation withdrawal is properly rejected.

No person shall be permitted to make homestead entry or settle upon lands reserved for irrigation purposes until the Secretary of the Interior shall have estab- lished the unit of acreage per entry and publicly an- nounced the availability of water for irrigation.

Lewis M. Eslick, 24 IBLA 237 (Mar. 24, 1976)

Dallas C. Quelsen et al., 36 IBLA 119 (July 25, 1978)

The rejection of an application under the Act of Apr. 23, 1932, 43 U.S.C. § 154 (1970), to open lands in a reclamation withdrawal to mineral location will be affirmed when the applicant fails to submit facts to show the basis for his knowledge or belief that the lands contain valuable mineral deposits. Merely to state the lands contain such deposits is not sufficient.

Joe Ashburn, 27 IBLA 227 (Oct. 12, 1976)

Sec. 25 of the Act of Apr. 21, 1904, which authorized the application of the Reclamation Act of 1902 to the Yuma Indian Reservation, did not repeal by implication sec. 17 of the Act of Aug. 15, 1894, which provided for the cession, reclamation and allotment of the Reserva- tion, and is in no way inconsistent with the 1894 Act.

Title to Certain Land Within the Boundaries of the Fort Yuma Indian Reservation as Established by the Executive Order of Jan. 9, 1884, M-36886 (Jan. 18, 1977) 84 I.D. 1

Ordinarily an application to restore lands within a reclamation withdrawal to mineral entry pursuant to the Act of Apr. 23, 1932, 43 U.S.C. § 154 (1970), will be rejected by the Bureau of Land Management where the Bureau of Reclamation recommends against restoration; however, on appeal a case may be remanded for further consideration by the appropriate agencies, including preparation of a mineral report, where it appears war- ranted by the appellant's showings and willingness to propose terms and conditions to protect the Govern- ment's interest.

G. W. Daily, 34 IBLA 176 (Mar. 14, 1978)

An application under the Act of Apr. 23, 1932, 43 U.S.C. § 154 (1970), for restoration to mineral entry and location of lands within a reclamation withdrawal will ordinarily be rejected when the Bureau of Reclamation has recommended against it, the recommendation is prem- ised upon the requirements of the public interest, and the reasons offered in support of the recommendation are cogent.

Edward J. Connolly, Jr., 34 IBLA 233 (Mar. 27, 1978)

Where lands are receiving benefits from both an SRPA loan project and an ordinary reclamation project, gen- eral reclamation law, including residency and acreage limitations, apply to those lands.

Application of the Acreage Limitation and Residency Requirements to Small Reclamation Projects Act ---- Projects, M-36904 (July 17, 1978) 85 I.D. 254

RECLAMATION LANDS--Continued

GENERALLY--Continued

Sec. 8 of the 1902 Reclamation Act, 43 U.S.C. § 372 et seq. (1976), prohibits the Bureau of Reclamation from claiming any reserved water rights for any reclamation project unless the terms of any project authorization subsequent to 1902 can fairly be read to provide for a reservation of water.

Federal Water Rights of the National Park Service, Fish and Wildlife Service, Bureau of Reclamation and the ---- Bureau of Land Management, M-36914 (June 25, 1979) 86 I.D. 553

INCLUSION AND EXCLUSION OF WITHIN IRRIGATION DISTRICT

Sec. 9(e) of the Reclamation Project Act of 1939, 43 U.S.C. § 485h(e) (1970), does not give the Secretary any independent authority for entering water service contracts for areas except as separately authorized by Congress.

Westlands Water District -- Legal Questions, M-36901 (July 31, 1978) 85 I.D. 297

IRRIGABLE LANDS

Certification that lands are irrigable is a separate and distinct process from authorizing a Bureau of Rec- lamation project and cannot be construed as authoriza- tion to serve lands in excess of those specifically authorized in the project act.

Westlands Water District -- Legal Questions, M-36901 (July 31, 1978) 85 I.D. 297

RECREATION AND PUBLIC PURPOSES ACT

The Recreation and Public Purposes Act, and the perti- nent regulations thereunder, require that a grantee of land under the Act must develop the land in accordance with the specified uses proposed in the patent appli- cation within a reasonable time following the date of issuance of patent.

Failure over a 17- or 18-year period to develop land patented under the Recreation and Public Purposes Act in accordance with the specified uses proposed in the patent application and set out in the patent is a vio- lation of the condition in the patent which provides that if the lands are devoted to a use other than that for which they were conveyed title shall revert to the United States.

Clark County School District, 18 IBLA 289 (Jan. 6, 1975) 82 I.D. 1

City of Monte Vista, Colorado, 22 IBLA 107 (Sept. 22, 1975)

The filing of a petition-application under the Recre- ation and Public Purposes Act does not segregate the land applied for or preclude consideration of later filed applications unless and until the land is finally classified for the purpose applied for under the Act.

The denial of a petition for classification and the rejection of an application under the Recreation and Public Purposes Act for a lease of lands which have been withdrawn and which are also subject to a State selection application which, under the terms of the withdrawal order, may be allowed, does not violate the tenets of due process because the disposition of the petition-application is at the discretion of the Secre- tary, and the petitioner-applicant has no vested right protected by constitutional guarantees or by the Administrative Procedure Act.

Mountaineering Club of Alaska, Inc., 19 IBLA 198 (Mar. 19, 1975)

Lands withdrawn under sec. 11 of the Alaska Native Claims Settlement Act, 43 U.S.C. § 1610 (Supp. III 1973), are withdrawn from all forms of appropriation under the public land laws, including, without limitation, the Recreation and Public Purposes Act, *as amended*, 43 U.S.C. §§ 869 to 869-3 (1970), and an application under the latter Act for such withdrawn lands is properly rejected.

Alaska Department of Fish and Game, 20 IBLA 50 (Apr. 23, 1975)

The rejection of an application for the purchase of land under the Recreation and Public Purposes Act does not violate the tenets of due process since the disposition of the application is at the discretion of the Department, and the applicant has acquired no vested right protected by the United States Constitution.

The Recreation and Public Purposes Act authorizes the Secretary, in his discretion, to sell or lease tracts of national resource lands. The proposed mode for financing the development of land applied for pursuant to the Recreation and Public Purposes Act cannot compel issuance of a patent instead of a lease if issuance of a patent would be contrary to the public interest as determined by the Secretary or his delegate. Thus, in the event the applicant has secured financial resources by promising acquisition of title to the land, the proper action is not for the Bureau of Land Management to change the applicant's tenure status in violation of the public interest, but rather for the applicant to secure alternate financing arrangements.

Board of County Commissioners, Ouray County, Colorado, 22 IBLA 182 (Oct. 7, 1975)

The Recreation and Public Purposes Act, and the regulations thereunder, do not authorize additional payment for the issuance of a supplemental patent (which voids an earlier patent's reversionary provision) as an alternative to forfeiture for noncompliance with the Act's provision that land patented under the Act only be used for an established or definitely proposed public project within a reasonable time following issuance of patent. The Department can alienate interests in public lands only within the limits authorized by law; therefore, issuance of a supplemental patent which eliminates the Act's mandatory reversionary provision is impermissible.

The Department of the Interior is not estopped from denying the legality of a payment in lieu of forfeiture provision inserted in a Recreation and Public Purposes Act patent when such denial works no serious injustice against the patentee and implementation of the provision would harm the public interest by divesting the Government of all jurisdiction over the patented land, thus, precluding enforcement of the Recreation and Public Purposes Act requirement that lands patented under the Act be devoted to a definitely proposed project for the benefit of the public.

Okanogan County Public Utility, District No. 1, Washington, 22 IBLA 342 (Nov. 14, 1975)

A grantee's failure to develop for an unreasonable period of time (over 19 years) lands patented under the Recreation and Public Purposes Act constitutes a violation of the reversionary clause in the patent which states that if the lands are devoted to a use other than that for which they were conveyed title shall revert to the United States.

Clark County, Nevada, 28 IBLA 210 (Dec. 8, 1976)

A recreation and public purposes application must be rejected for lands temporarily withdrawn for an irrigation project to benefit Indians. Such a withdrawal is effective until specifically revoked, even though it is made on a temporary basis and has been in effect for more than 50 years.

Elko County Board of County Supervisors, 29 IBLA 220 (Mar. 23, 1977)

A grantee's transfer of the property and its subsequent use for a purpose (big game guiding service) other than the one described in the patent (mission parsonage and chapel) without consent of Department of the Interior triggers reversion of the land to the United States.

United States is not subject to a defense of laches in an action to enforce a public right. Thus, where BLM took approximately 2 years to declare reversion to United States of title to land patented with reversionary clause under Recreation and Public Purposes Act, appellants may find no relief in equitable doctrine of laches.

Roberta Thompson and Richard Lee Burnham, 38 IBLA 333 (Dec. 20, 1978)

Lands segregated on the public records by a proposed withdrawal posted Apr. 6, 1973, or a Recreational and Public Purposes Classification filed Nov. 13, 1956, were not available for the location of mining claims, and claims thereafter located are null and void ab initio.

Neither a Recreation and Public Purposes Act classification nor a withdrawal is a rule or regulation within the ambit of the Secretarial policy of Apr. 27, 1971, which provides for utilization of the public participation procedures of 5 U.S.C. § 553 (1976).

Delmer McLean et al., 40 IBLA 34 (Mar. 15, 1979)

Where a lease under the Recreation and Public Purposes Act, *as amended*, 43 U.S.C. § 869 (1976), erroneously states the 1-year rental as being the rental for 5 years, and the lessee knew or had reason to know of the error, the error is a unilateral mistake, and the lease may be properly corrected to show the true rental, or the lease may be rescinded if appellant does not desire to be bound by the reformed agreement.

St. Scholastica Academy, 40 IBLA 175 (Apr. 3, 1979)

Mere nonuse of land patented under the Recreation and Public Purposes Act is not equivalent to a devotion of the land to an unauthorized use and, of itself, will not cause the title to revert to the United States.

Where the grantee of land under the Recreation and Public Purposes Act enters into an executory contract to convey an interest in a portion of the land to another, who then undertakes to perform his obligation to enter the land and improve it without prior Departmental approval, this constitutes an attempt on the part of the patentee to make an unauthorized transfer of title or

RECREATION AND PUBLIC PURPOSES ACT--Continued

control, and title to the entire tract reverts to the United States.

Sky Pilots of Alaska, Inc., 40 IBLA 355 (May 14, 1979)

A recreation and public purposes classification, issued pursuant to the Recreation Act of 1926, *as amended*, 43 U.S.C. § 869 (1976), segregates Alaskan lands from Native allotment applications until such time as the classification is revoked.

Under Secretarial Order No. 3040, it is sufficient if the 5 years' use and occupancy, required under the Native Allotment Act, is completed prior to the granting of the allotment, providing applicant either filed for his allotment or commenced use and occupancy prior to the withdrawal.

Betty J. Thompson, 43 IBLA 174 (Sept. 28, 1979)

REGULATIONS
(*See also* Administrative Procedure--if included in this Index.)

GENERALLY

The regulations pertaining to sec. 15 grazing leases provide that a corporation is a qualified applicant for a lease if it is a corporation whose controlling interest is vested in persons who are engaged in the livestock business. 43 CFR 4121.1-1(b). Where the corporate applicant itself is engaged in a livestock business such a showing is sufficient for the corporation to meet this requirement without the need for those holding a controlling interest in the corporation to make an additional showing that they are engaged in a livestock operation in their individual capacities.

Defenders of Wildlife, 19 IBLA 219 (Mar. 25, 1975)

A regulatory change in the definition of the phrase "primary term" of an oil and gas lease is not an order or consent of the Secretary of the Interior to suspend operations under an oil and gas lease.

A lessee's request that its oil and gas lease be reinstated because it relied on a regulation which has been changed is properly rejected where the lease expired by operation of law at the end of its extended term and there is no statutory authority whereby it can be reinstated.

Inexco Oil Co., 20 IBLA 134 (May 5, 1975)

A grazing lease issued in 1933 for reindeer under the Act of Mar. 4, 1927, became subject to the Reindeer Act of Sept. 1, 1937, and rules and regulations thereunder. Interpretations of the effect of grazing rights granted under the 1937 Act upon a Native allotment applicant's claim of occupancy may be applied to such a lease, if they are not to the detriment of the lessee.

A regulation pertaining to grazing permits under the Reindeer Grazing Act of 1937 allows settlement rights to be initiated while a permit issued under that Act is in existence. The policy manifest in that regulation may be followed, in the exercise of the Secretary's discretion, to permit consideration of a Native allotment applicant's occupancy of land after the 1937 Act, even though the land was covered by a reindeer grazing lease issued prior to that time under the Act of

REGULATIONS--Continued

GENERALLY--Continued

Mar. 4, 1927, and the regulation was promulgated after initiation of the occupancy.

Kristeen J. Burke, Joe N. Melovedoff, Victor Melovedoff, 20 IBLA 162 (May 5, 1975)

Where the Bureau of Land Management changes an administrative practice to thereafter refuse to accept unofficial copies of the simultaneous oil and gas lease entry card, by an order dated Mar. 26, 1975, the new practice will be given prospective application only and will not be applied retroactively to simultaneous entry cards filed during the Feb. 1975 simultaneous filing period.

V. J. Malloy, 20 IBLA 327 (June 6, 1975)

A regulation should be so clear that there is no basis for a patent applicant's noncompliance with it before it may be so interpreted as to deprive him of a statutory right to receive title to his desert land entry. If there is doubt as to the meaning and intent of a regulation, such doubt should be resolved favorably to the applicant.

Wallace S. Bingham, 21 IBLA 266 (Aug. 11, 1975) 82 I.D. 377

A motion for remand of a mining claim contest for further hearing on the grounds of prejudicial surprise, based upon Government counsel's failure to supplement interrogatory answers listing witnesses and exhibits as ordered in lieu of prehearing conference, will be denied where contestee's counsel ignored repeated offers of continuance made at various stages of the hearing.

United States v. Theresa B. Robinson, 21 IBLA 363 (Aug. 25, 1975) 82 I.D. 414

The Secretarial instruction of Oct. 18, 1973, which mandates a showing by a Native allotment applicant of 5 years of occupancy prior to a withdrawal of the land, was not required to be published as rulemaking since 5 U.S.C. § 553(a)(2) (1970) exempts from its ambit matters pertaining to public property.

Heirs of Dorothy Gordon, 22 IBLA 213 (Oct. 15, 1975)

The Secretarial guideline of Oct. 18, 1973, that a Native allotment application should be rejected when the applicant fails to show 5 years of use and occupancy prior to a withdrawal of the land: (a) is not subject to the rulemaking provisions of the Administrative Procedure Act, 5 U.S.C. § 553 (1970); and (b) is a proper exercise of the discretion vested in the Secretary by the Alaska Native Allotment Act, 43 U.S.C. §§ 270-1 to 270-3 (1970), the application of which does not violate any right of the allotment applicant.

Herman Joseph (On Reconsideration), 22 IBLA 266 (Oct. 30, 1975)

Even if it be established that a controlling regulation had been violated in previous cases, such violation does not afford a valid predicate for further violations of the regulation.

Mary Nan Spear, 25 IBLA 34 (May 5, 1976)

REGULATIONS--Continued

GENERALLY--Continued

Where the Bureau of Land Management ordered on Mar. 26, 1975, that unofficial copies of the simultaneous oil and gas lease entry card were invalid and to be rejected, that order will be given prospective application only and will not be applied retroactively to simultaneous entry cards filed during the Jan. 1975 simultaneous filing period.

Eve Reese, 25 IBLA 248 (June 22, 1976)

Simultaneous oil and gas entry cards which are sent to the wrong State Office are not considered filed in the "proper office" within the meaning of 43 CFR 1821.2-2(f), and such State Office has no jurisdiction over entry cards pursuant to 43 CFR 1821.2-1(c); therefore, the filing fees for such offers should not be retained.

James H. Scott, 25 IBLA 388 (July 6, 1976)

It is proper to afford a geothermal lease applicant the benefit of a regulation, adopted after the filing of his application, absent the impairment of third party rights and adverse impact on the interests of the United States. Where a geothermal lease regulation requires the filing of a compliance bond as a condition precedent to issuance of a lease, and that regulation is amended during the pendency of an application to require such a bond only as a condition precedent to entry on the leased lands, the holder of the application may be granted a lease under the amended requirement, if all else be regular.

Christopher A. Marks, 26 IBLA 84 (July 19, 1976)

The National Park Service is not an "executive department, independent establishment or instrumentality" within the meaning of 43 CFR 3501.2-6. The Department is therefore not bound by the granting or withholding of consent by the Service for a mineral lease on National Park Service lands.

Bilite Aggregate Co., 26 IBLA 197 (Aug. 11, 1976)

Even assuming that a BLM order has the force and effect of a regulation, it cannot be applied retroactively where there are intervening rights or the interests of the United States would be adversely affected. Where there is a No. 2 oil and gas drawing card, it constitutes an intervening right.

Beverly J. Steinbeck, 27 IBLA 249 (Oct. 18, 1976)

An oil and gas lease offer must be rejected as to lands applied for which are held in trust for Indians and are not available under the Mineral Leasing Act. Even though the minerals in these lands have been reserved to the United States, mineral development is not possible at this time because the language of the exchange act under which the lands were acquired requires further promulgation of special regulations by the Secretary as a condition precedent to such development.

Thomas D. Chace, 31 IBLA 13 (June 17, 1977)

REGULATIONS--Continued

GENERALLY--Continued

Until such time as the Department promulgates regulations, policy guidelines or criteria implementing sec. 302 of the Federal Land Policy and Management Act of 1976, the Bureau of Land Management may properly defer action on the proposed creation of an estate in Federal land thereunder.

Treva L. Berger, 31 IBLA 389 (Aug. 19, 1977)

The promulgation or revocation of a regulation is within the special authority of the Secretary of the Interior and a limited number of delegates. A regulation when promulgated is binding upon departmental officials.

The requirement in the Administrative Procedure Act, 5 U.S.C. § 553(d) (1970), that the required publication of a substantive rule be made not less than 30 days before its effective date is satisfied by publication of proposed rulemaking with a 30-day comment period, followed thereafter by final rulemaking. Minor changes in a final rule from the proposed rule do not require new proposed rulemaking.

Assuming, *arguendo*, the applicability of the rulemaking provisions of the Administrative Procedure Act, 5 U.S.C. § 553 (1970), to an amendment of 43 CFR 3103.3-2 increasing the rental rate of noncompetitive oil and gas leases, the provisions of the Act were satisfied where the proposed increase was published as proposed rulemaking on Mar. 18, 1976, to be effective July 1, 1976, and final rulemaking was published Jan. 5, 1977, changing the effective date of the rental increase to Feb. 1, 1977.

C. R. Gaither et al., 32 IBLA 106 (Sept. 12, 1977)

All persons dealing with the Government are presumed to have knowledge of duly promulgated regulations.

Verner P. Sorensen, 32 IBLA 381 (Oct. 21, 1977)

Donald H. Little, 37 IBLA 1 (Sept. 6, 1978)

Dermot S. McGlinchey, 38 IBLA 211 (Dec. 6, 1978)

Juan Munoz, 39 IBLA 72 (Jan. 24, 1979)

Charles and Pete Caress, 41 IBLA 302 (June 29, 1979)

Gary Milske, 44 IBLA 21 (Nov. 6, 1979)

Sec. 310 of the Federal Land Policy and Management Act of 1976 provides that, prior to promulgation of new regulations, the Secretary will administer the public lands under existing regulations to the extent practical. Issuance of a right-of-way permit for an electrical power transmission line prior to the promulgation of new regulations under sec. 504 of the Act is permissible under the authority in sec. 310.

The fact that various of the existing regulations in 43 CFR Part 2800, governing issuance of rights-of-way, are not wholly consistent with the Federal Land Policy Management Act of 1976 does not render invalid a BLM decision granting a right-of-way under the authority of sec. 310 of that Act.

David Smith Ranches et al. (Appellants), Colorado Ute Electric Ass'n, Inc. (Intervenor), 33 IBLA 7 (Nov. 15, 1977)

REGULATIONS--Continued

GENERALLY--Continued

The promulgation or revocation of a regulation is within the special authority of the Secretary of the Interior and a limited number of delegates. A regulation, when promulgated, is binding upon all Departmental officials.

Ronald Coulam, 35 IBLA 35 (May 8, 1978)

A past incorrect application of the law in adjudication of oil and gas lease offers is no authorization for failure to follow regulations in the case of an offer currently under adjudication.

David A. Provinse, 35 IBLA 217 (May 26, 1978)

The regulations of this Department have the force and effect of law, and are binding upon the Secretary and those who exercise his delegated authority. Where land has been included in a designated primitive area in derogation of the criteria established by regulation, the designation must be canceled as to such land.

Keith S. Bush, 36 IBLA 7 (July 12, 1978)

The regulations of this Department have the force and effect of law, and are binding upon the Secretary and those who exercise his delegated authority. An application for a right-of-way pursuant to 43 CFR 2802.1-1 which does not comply with the clear and unequivocal requirements of the regulation must be rejected.

Personnel of BLM are not required to alter, modify, or correct an application for a right-of-way in order to conform such application to the requirements of the regulation under which it was filed.

Beehive Telephone Co., Inc., 38 IBLA 80 (Nov. 9, 1978)

The regulations of this Department have the force and effect of law, and are binding upon the Secretary and those who exercise his delegated authority. A grazing lease is properly canceled where the lessee fails to pay the rental pursuant to 43 CFR 4125.1-1(h) and 4125.1-1(m)(3). The Boards of Appeal of this Department have no authority to declare a Secretary's regulation invalid.

Sombrero Ranches, Inc., 38 IBLA 327 (Dec. 19, 1978)

As an amendment to the Alaska Native Claims Settlement Act, P.L. 94-204 (89 Stat. 1145, 43 U.S.C. § 1611 (Supp. IV, 1974)), is subject to both the provisions of ANCSA and the regulations promulgated to implement ANCSA, unless such provisions or regulations conflict with, or are specifically excepted or preempted in the amendment.

Appeal of Cook Inlet Region, Inc., 3 ANCAB 111 (Dec. 27, 1978) 85 I.D. 462

The Secretary could establish general policy in right-of-way regulations which would provide specific guidelines for determining how much uncertainty about use will prevent the processing of right-of-way applications.

Federal Land Policy and Management Act's Effect on the Right-of-Way Application for the Middle Fork Reservoir on the Powder River, Wyoming, M-36900 (Jan. 12, 1979) 86 I.D. 293

REGULATIONS--Continued

GENERALLY--Continued

In view of 43 U.S.C.A. § 1752(c) (West Supp. 1976), which dictates that in certain circumstances the present grazing user shall have a right of first refusal for any new lease, 43 CFR 4110.5 (43 FR 29070), must be read *in pari materia* therewith and with 43 CFR 4130.2(e) (43 FR 29072) to be construed as a valid regulation and must be interpreted not to apply where the present grazing user desires a new lease and otherwise meets the statutory and regulatory criteria.

Harvey Sheehan and Hazel Holland Hudon, 39 IBLA 56 (Jan. 16, 1979) 86 I.D. 51

Where a mining claim is located after the enactment of the Federal Land Policy and Management Act of 1976 (Oct. 21, 1976), but before the date of promulgation of regulations implementing the statutory requirements of the Act relative to the recordation of mining claims, a regulation having retroactive effects may nonetheless be sustained in spite of such retroactivity if it is reasonable.

Albert O. Jensen, 39 IBLA 62 (Jan. 17, 1979)

Persons dealing with the Government are presumed to have knowledge of pertinent rules and regulations, regardless of their actual knowledge of what is contained in such regulations.

University of the Trees, 40 IBLA 74 (Mar. 16, 1979)

John A. Steele, Jr., 41 IBLA 49 (May 29, 1979)

All persons dealing with the Government are presumed to have knowledge of duly promulgated statutes and regulations.

Dale C. Delor, 40 IBLA 88 (Mar. 22, 1979)

A noncompetitive oil and gas lease issued for lands which, at the time of the lease application, had been posted erroneously as available for leasing but were then included in a prior lease, will be allowed to continue in effect where the first lease expired before the second lease issued and no questions of public policy or third party rights are contravened by the lease issuance.

Reed Gilmore, 40 IBLA 139 (Mar. 29, 1979)

The regulations of this Department have the force and effect of law, and are binding upon the Secretary and those who exercise his delegated authority. Where a patent application regulation requires "full, true, and complete abstracts," and the surface of the mining claim has not been patented, the processing of patent applications accompanied only by limited abstracts is properly suspended, pending compliance with the regulation. Where, however, the surface of the mining claim has been patented, *e.g.*, under the Stock-Raising Homestead Act, 43 U.S.C. §§ 291-300 (1970), the abstract generally need only reflect transactions affecting the mineral estate. A certificate of title is acceptable in lieu of an abstract in either situation.

Kerr-McGee Nuclear Corp., et al., 41 IBLA 197 (June 22, 1979)

REGULATIONS--Continued

GENERALLY--Continued

All persons dealing with the Government are presumed to have knowledge of duly promulgated regulations. Such regulations have the force and effect of law and are binding on the Department.

Fred S. Ghelarducci, 41 IBLA 277 (June 28, 1979)

Bernard E. Gencorelli, 43 IBLA 7 (Sept. 11, 1979)

The Board of Land Appeals of the Department has no authority to declare a Secretary's regulation invalid.

Tucker and Snyder Exploration, Inc., 43 IBLA 235 (Oct. 10, 1979)

The evidence of title, required by 43 CFR 3862.1-3 to be submitted in support of a mineral patent application need reflect only documents such as deeds, instruments, or actions appearing of record purporting to convey or to affect the title to each location. It is not necessary that the title data reflect in addition those deeds, instruments, or actions otherwise relating to the land in the mining claim.

Kerr-McGee Nuclear Corp. et al. (On Reconsideration), 43 IBLA 348 (Oct. 29, 1979)

In the absence of public interest considerations and intervening rights, a regulation amendment which would benefit a pending public land matter may be applied to it. However, where the application is not in compliance with the amendment, the application must fail.

R. P. Wadleigh, 44 IBLA 11 (Nov. 6, 1979)

APPLICABILITY

Regulation 43 CFR 2627.3(b)(2) requires that conflicting oil and gas lease offers filed pursuant to the Mineral Leasing Act of 1920, except for preference right applications, whether filed prior to, simultaneously with, or after the filing of an Alaska State selection, must be rejected when and if the selection is tentatively approved. The preference right referred to in the regulation does not apply to an oil and gas lease offeror who receives a priority right as the first-qualified applicant in the event the Department decides to issue a lease.

Richard W. Bowe, Daniel Gaudiane, 20 IBLA 59 (Apr. 24, 1975) 82 I.D. 174

Where applications for a right-of-way and a special land-use permit are filed in conformity with the requirements of regulations then in effect, and the regulations are amended while final action on the applications is pending, but the amended regulations are made effective at a future date, then if the right-of-way and permit are issued prior to the effective date of the amendments they will not be subject to the added requirements; but if the applications are still pending when the amendments become effective, the new regulations will govern.

Arizona Public Service Co., 20 IBLA 120 (Apr. 25, 1975)

REGULATIONS--Continued

APPLICABILITY--Continued

While 43 CFR 4.470(b) bars subsequent challenge to "matters adjudicated" in a final decision of a District Manager when no appeal of that decision is undertaken, the presence or absence of excess forage in successive growing seasons is not a matter subject to this prohibition.

Ervin J. Crowder, 20 IBLA 305 (May 30, 1975)

To the extent they do not vitiate the purposes or provisions of the Alaska Native townsite law, the provisions of the non-Native Alaska townsite law are to be applied in the disposition of Native townsite lands; in such cases, references to the Act of Mar. 3, 1891, 43 U.S.C. § 732 (1970), in the documents relating to a Native townsite are not *pro forma*, and the non-Native townsite provisions may be applied.

City of Klawock v. P. H. Andrew et al. City of Klawock v. State of Alaska, Department of Highways, 24 IBLA 85 (Feb. 25, 1976) 83 I.D. 47

A district manager's failure to hold an Advisory Board meeting on a grazing applicant's protest is mooted by a subsequent regulatory amendment terminating graziers' rights to an Advisory Board meeting on protests. In any event, the case would not be remanded for such a meeting when there is no prejudice because the applicant is foreclosed by the grazing regulations from the possibility of prevailing on his protest.

Phil J. Hillberry, 24 IBLA 283 (Mar. 31, 1976)

It is improper for the Bureau of Land Management to reject desert land applications on the basis of directives within a deleted regulation which required that such applications be rejected when the lands described therein were included within a previously filed State application for a temporary withdrawal under the Act of Mar. 15, 1910, which permits the Secretary to temporarily withdraw lands in furtherance of the purposes of the Carey Act. In the absence of a recodification of the directives in the deleted regulation, the Bureau should suspend action on all applications filed subsequent to the withdrawal application pending final action on the application for withdrawal.

Kevin D. Ellis, Sylvia D. Ellis, 24 IBLA 387 (May 3, 1976)

To the extent that the provisions of the non-Native townsite law do not vitiate the purposes of provisions of the Alaska Native townsite law, the provisions of the non-Native townsite law are to be applied in the disposition of Native townsite lands.

Leona B. Strang, 26 IBLA 144 (Aug. 2, 1976)

Even assuming that a BLM order has the force and effect of a regulation, it cannot be applied retroactively where there are intervening rights or the interests of the United States would be adversely affected. Where there is a No. 2 oil and gas drawing card, it constitutes an intervening right.

Beverly J. Steinbeck, 27 IBLA 249 (Oct. 18, 1976)

REGULATIONS--Continued

APPLICABILITY--Continued

Where a regulation is amended in a way that benefits an applicant, the Department may, in the absence of intervening rights of third parties or prejudice to the interests of the United States, apply the amendment to pending cases.

Duncan Miller, 28 IBLA 292 (Dec. 27, 1976)

Where a regulation is amended in a way that benefits an oil and gas lessee, the Department may, in the absence of intervening rights of third parties or prejudice to the interests of the United States, apply the amendment to pending cases.

Howard S. Hughes, 29 IBLA 30 (Feb. 8, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date, including leases issued pursuant to the simultaneous filing procedures, even though the lease offers were drawn with first priority prior to the specified date.

REGULATIONS--Continued

APPLICABILITY--Continued

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date, including leases to be issued pursuant to the simultaneous filing procedures where the drawing was held prior to the effective date of the rent increase, and leases to be issued for a regular over-the-counter offer where the offer was filed prior to the effective date.

Casey C. Janson et al., 30 IBLA 134 (May 12, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date, including leases to be issued to successful offerors at simultaneous drawings held prior to the effective date of the rate increase.

Melvin B. Hobgood, 30 IBLA 163 (May 18, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date, including leases issued pursuant to the simultaneous filing procedures, even though the lease offers were drawn prior to the effective date of the increase.

Marie A. Fiel et al., 30 IBLA 308 (June 6, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date, even though the lease offers were filed prior to the specified date.

Guy N. Willis, 30 IBLA 344 (June 8, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, the increased rate applies to all leases issued after that date, regardless of the date on which the offer to lease was originally submitted.

Wanda C. and William P. Scheidt, et al., 30 IBLA 346 (June 8, 1977)

William S. Schichtanz, 32 IBLA 20 (Aug. 31, 1977)

Vern K. Jones et al., Madian K. Hartley, 33 IBLA 74 (Dec. 6, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate applies to all leases issued after that date, regardless of the date the offer to lease or drawing entry card was filed.

Duncan Miller, 30 IBLA 350 (June 8, 1977)

REGULATIONS--Continued

APPLICABILITY--Continued

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date, even though the lease offer was filed prior to the date of the regulation. The imposition of the increased rate is not discriminatory as it applies to all leases issued after a certain date.

Guy N. Willis, 30 IBLA 373 (June 10, 1977)

The filing of a noncompetitive oil and gas lease offer, prior to acceptance, does not create any right to a lease or legal interest which restricts the discretionary authority of the Secretary of the Interior over lease issuance. Thus, an amended regulation raising the lease rental charge may be applied to lease offers which have been previously filed but not accepted and such action is not violative of the Fifth Amendment.

Barbara A. Joeckel, 30 IBLA 376 (June 10, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date, including leases to be issued for a regular over-the-counter offer where the offer was filed prior to the effective date.

Altex Oil Corp., 32 IBLA 18 (Aug. 31, 1977)

Altex Oil Co., 32 IBLA 44 (Sept. 2, 1977)

Altex Oil Corp., 32 IBLA 390 (Nov. 7, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date pursuant to over-the-counter offers or pursuant to the simultaneous filing procedures, even though the offers or entry cards were filed with BLM prior to the specified date.

D. R. Gaither et al., 32 IBLA 106 (Sept. 12, 1977)

The filing of an application for a noncompetitive oil and gas lease, prior to acceptance, does not create a right to a lease immune from application of a subsequently amended administrative regulation. An increased rental rate is properly applied to an oil and gas lease offer pending before the effective date of the rate change but which has not been accepted prior to that time.

Viola J. Kirkwood, 32 IBLA 199 (Sept. 16, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date, even though the lease offers were filed prior to the specified date. The filing of an application for a lease prior to its acceptance does not create a right to a lease which is immune from application of a subsequently amended administrative regulation, nor does administrative delay

REGULATIONS--Continued

APPLICABILITY--Continued

in the processing of the lease offer preclude proper application of such regulation.

Paul C. Rohlman, 32 IBLA 240 (Sept. 21, 1977)

Increased per acre rental, as directed under Jan. 5, 1977, revision of 43 CFR 3103.3-2(a), is applicable to all noncompetitive oil and gas leases issued after Feb. 1, 1977, including leases for which offers, both simultaneous and over-the-counter, were filed prior to revision of the regulation.

Duncan Miller et al., 32 IBLA 289 (Sept. 27, 1977)

The filing of an application for modification of an existing coal lease does not give rise to a vested property right. Thus, such an application qualifies as neither a valid existing right excepted from application of the acreage limit on lease modifications set by the Federal Coal Leasing Amendments Act of 1975 nor a right protected by the Fifth Amendment from application of subsequently amended statutes or regulations.

Nevada Electric Investment Co., 33 IBLA 3 (Nov. 14, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to an over-the-counter offer filed prior to the specified date.

Dean W. Rowell, 33 IBLA 30 (Nov. 22, 1977)

There is no estoppel applicable to the Department of the Interior where it has changed a clearly erroneous regulation to comport with an amendment to the oil and gas leasing laws enacted some 15 years previously. The Department is not precluded from correcting that which is "clearly erroneous."

Yates Petroleum Corp., 34 IBLA 7 (Feb. 8, 1978)

A regulation, amended in a manner that benefits a pending application for an oil and gas lease, may be applied to the pending application in the absence of intervening rights or public interest.

Repeal of regulations which prohibit leasing fractional interests to one who would own only a minority of operating rights in the leased property gives priority to an otherwise regular offer which would have had to be rejected under the former regulations, as of the effective date of the repeal, provided that no offers qualified under the former regulation have been received prior to repeal, and that the offer has not been rejected prior to repeal.

Wilfred Plomis, 34 IBLA 222 (Mar. 27, 1978)

Applications for rights-of-way on public lands pending on Oct. 21, 1976, are to be considered as applications under the Federal Land Policy and Management Act of 1976, but, to the extent practical, existing regulations will govern the administration of the public lands until new regulations are issued.

Where a regulation requiring reimbursement of certain costs incurred by the United States in the processing of right-of-way applications is promulgated, the cost

REGULATIONS--Continued

reimbursement provision is applicable to an application filed prior to and pending on the effective date of the regulation.

Continental Telephone of California, 34 IBLA 374 (May 1, 1978)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, the increased rate is applicable to leases to be issued subsequent to that date for over-the-counter offers filed prior to the effective date of the regulation.

Tipperary Oil and Gas Corp., 35 IBLA 120 (May 15, 1978)

Applications for rights-of-way on public lands pending on Oct. 22, 1976, are to be considered as applications under Title V of the Federal Land Policy and Management Act of 1976, but existing regulations will govern the administration of public lands to the extent practical until new regulations are promulgated.

Full Circle, Inc., 35 IBLA 325 (June 19, 1978)
85 I.D. 207

Donald R. Clark, C. Reinhart & Son, Inc., Hartwell Excavating Co., 39 IBLA 182 (Jan. 31, 1979)

To the extent that the provisions of the non-Native townsite law do not vitiate the purposes of provisions of the Alaska Native townsite law, the provisions of the non-Native townsite regulations may be applied in the disposition of Native townsite lands.

Nancy A. Delkittie, 35 IBLA 370 (June 23, 1978)

An oil and gas lessee is properly required to pay the higher rental prescribed by duly promulgated regulations of the Department where all or part of the lands in the lease have been included within the known geologic structure of a producing oil or gas field. However, where a discovery is made on the leased lands, at the expiration of that lease year the lease goes on a minimum royalty basis. 43 CFR 3103.3-5.

Andrew W. Brainerd, 36 IBLA 304 (Aug. 21, 1978)

A final Departmental appellate decision construing a regulation will be given immediate effect, and will not be applied with prospective effect only, unless the decision alters materially the interpretation given the regulation by earlier Departmental decisions or official published opinions, and unless the equitable benefit of the decision is not outweighed by ill effects of allowing a benefit in derogation of the regulation.

D. E. Pack (On Reconsideration), 38 IBLA 23 (Nov. 9, 1978)
85 I.D. 408

Gertrude H. D'Amico, 39 IBLA 68 (Jan. 17, 1979)

The interpretation of an existing regulation by this Board to determine its applicability to the facts at hand does not constitute rulemaking by the Board.

H. B. Delasco, Inc., et al., 39 IBLA 194 (Feb. 2, 1979)

REGULATIONS--Continued

BINDING ON THE SECRETARY

A Departmental regulation promulgated pursuant to and comporting with statutory authority has the force and effect of law. One who exercises the delegated authority of the Secretary may not disregard the plain and unambiguous provisions of a mandatory regulation so as to impose a more onerous requirement on an applicant than is prescribed by the regulation in effect.

Arizona Public Service Co., 20 IBLA 120 (Apr. 25, 1975)

The Secretary of the Interior is bound by his duly promulgated regulations, and such regulations have the force and effect of law.

Wilfred Plomis, 34 IBLA 222 (Mar. 27, 1978)

Elizabeth Pagedas (On Reconsideration), 40 IBLA 21 (Mar. 9, 1979)

St. Scholastica Academy, 40 IBLA 175 (Apr. 3, 1979)

All persons dealing with the Government are presumed to have knowledge of duly promulgated regulations. Such regulations have the force and effect of law and are binding on the Department.

Fred S. Ghelarducci, 41 IBLA 277 (June 28, 1979)

Bernard E. Gencorelli, 43 IBLA 7 (Sept. 11, 1979)

FORCE AND EFFECT AS LAW

A Departmental regulation promulgated pursuant to and comporting with statutory authority has the force and effect of law. One who exercises the delegated authority of the Secretary may not disregard the plain and unambiguous provisions of a mandatory regulation so as to impose a more onerous requirement on an applicant than is prescribed by the regulation in effect.

Arizona Public Service Co., 20 IBLA 120 (Apr. 25, 1975)

In the absence of pertinent statutory directives or regulatory criteria mandating such action, it is improper for the Bureau of Land Management to reject applications filed by a State under the Act of Mar. 15, 1910, for temporary withdrawals of lands for proposed development under the Carey Act, on the basis of the Bureau's determination that the Carey Act does not permit acceptance of a temporary withdrawal application: (1) for the establishment of residence and settlement on noncontiguous tracts of land; (2) if the acreage applied for, when added to desert land entry acreage previously patented to the State's Carey Act project proposer, exceeds the maximum 320 acres permitted to be acquired by one person under 43 U.S.C. § 212 (1970); and (3) when the preliminary plan of development submitted by the State fails to provide adequate assurance of water transmission to the proposed project. Under these circumstances, the Bureau should suspend action on the applications pending Departmental action to revise and recodify previously deleted regulations which provide guidance for the administration of the Carey Act and the Act of Mar. 15, 1910.

Idaho Department of Water Resources, 24 IBLA 314 (Apr. 20, 1976)

REGULATIONS--Continued

FORCE AND EFFECT AS LAW--Continued

It is improper for the Bureau of Land Management to reject desert land applications on the basis of directives within a deleted regulation which required that such applications be rejected when the lands described therein were included within a previously filed State application for a temporary withdrawal under the Act of Mar. 15, 1910, which permits the Secretary to temporarily withdraw lands in furtherance of the purposes of the Carey Act. In the absence of a recodification of the directives in the deleted regulation, the Bureau should suspend action on all applications filed subsequent to the withdrawal application pending final action on the application for withdrawal.

Kevin D. Ellis, Sylvia D. Ellis, 24 IBLA 387 (May 3, 1976)

In the absence of pertinent statutory directives or regulatory criteria for the processing of temporary withdrawal applications for unreserved lands filed by a State under the Act of Mar. 15, 1910, for proposed development under the Carey Act, the Bureau of Land Management should suspend consideration of the applications pending Departmental action to revise and recodify previously deleted regulations which provide guidance for the administration of the Carey Act and the Act of Mar. 15, 1910.

Idaho Department of Water Resources, 25 IBLA 27 (May 5, 1976)

Idaho Department of Water Resources, 27 IBLA 303 (Oct. 26, 1976)

The Bureau of Land Management should suspend consideration of the applications under the Carey Act pending Departmental action to revise and recodify previously deleted regulations which provide guidance for the administration of the Carey Act.

Idaho Department of Water Resources, 32 IBLA 89 (Sept. 2, 1977)

The Secretary of the Interior is bound by his duly promulgated regulations, and such regulations have the force and effect of law.

Wilfred Plomis, 34 IBLA 222 (Mar. 27, 1978)

Elizabeth Pagedas (On Reconsideration), 40 IBLA 21 (Mar. 9, 1979)

St. Scholastica Academy, 40 IBLA 175 (Apr. 3, 1979)

The Bureau of Land Management should suspend action on applications for recordable disclaimers of interest filed pursuant to sec. 315 of the Federal Land Policy and Management Act of 1976 where no regulations have been issued under which action may be taken and where there is no contrary policy directive.

Grace Cooley Coleman, Leota Ferrell, 35 IBLA 236 (May 26, 1978)

All persons dealing with the Government are presumed to have knowledge of duly promulgated regulations. Such regulations have the force and effect of law and are binding on the Department.

Fred S. Ghelarducci, 41 IBLA 277 (June 28, 1979)

Bernard E. Gencorelli, 43 IBLA 7 (Sept. 11, 1979)

REGULATIONS--Continued

INTERPRETATION

Where a desert land applicant, whose application is prior in time, appeals from a decision of the Bureau of Land Management, dismissing his protest against affording priority to a later-filed desert land application on the basis that the earlier-filed application was incomplete, the cases are properly remanded to the Bureau of Land Management for action on the respective applications, so as to avoid piecemeal adjudication.

George M. Crago, Richard L. Crago, 19 IBLA 208 (Mar. 21, 1975)

A regulation should be so clear that there is no basis for a patent applicant's noncompliance with it before it may be so interpreted as to deprive him of a statutory right to receive title to his desert land entry. If there is doubt as to the meaning and intent of a regulation, such doubt should be resolved favorably to the applicant.

Wallace S. Bingham, 21 IBLA 266 (Aug. 11, 1975)
82 I.D. 377

It is proper to afford a geothermal lease applicant the benefit of a regulation, adopted after the filing of his application, absent the impairment of third party rights and adverse impact on the interests of the United States. Where a geothermal lease regulation requires the filing of a compliance bond as a condition precedent to issuance of a lease, and that regulation is amended during the pendency of an application to require such a bond only as a condition precedent to entry on the leased lands, the holder of the application may be granted a lease under the amended requirement, if all else be regular.

Christopher A. Marks, 26 IBLA 84 (July 19, 1976)

As between two preference right applicants for land offered at public sale under the Isolated Tract Act, 43 U.S.C. § 1171 (1970), departmental regulation 43 CFR 2711.4(b)(2) continues in effect pursuant to 43 U.S.C.A. §§ 1713, 1740 (West Supp. 1977) and is strictly construed with regard to the deadline for making the required showing of fee title to contiguous land.

L. A. Gillette, 33 IBLA 182 (Dec. 21, 1977)

Arizona Revised Statutes § 37-502, which provides for damages in civil actions for trespass on State lands, does not apply to cases involving right-of-way trespass on Federal lands located in Arizona.

Mountain States Telephone & Telegraph Co., 34 IBLA 154 (Mar. 10, 1978)

Regulations should be so clear that there is no basis for an oil and gas applicant's noncompliance with them, or they should not be interpreted to deprive him of a preference right to a lease.

Where an offer for an oil and gas lease describes lands by reference only to the rectangular survey system, without reference to the fact that part of these unpatented lands are also within a mineral survey, the offer will be regarded as including the lands within the mineral survey if it is clear from the offer that the offeror so intended.

Bill J. Maddox, 34 IBLA 278 (Apr. 17, 1978)

REGULATIONS--Continued

INTERPRETATION--Continued

Although in his summary dismissal of private contest against homestead entry administrative law judge discussed issues upon which contestant had failed to submit corroborated allegations of fact along with his complaint, such action by judge did not relieve contestant of his burden of filing corroboration, despite provisions of 43 CFR 4.450-4(b) allowing judge to "raise issues in connection with deciding a contest."

Ernest C. Lamb v. Richard B. Stoffel, 36 IBLA 201 (Aug. 3, 1978)

When a married woman signs her name, "Mrs. Hal McCarthy," as offeror on a drawing entry card oil and gas lease offer, and prints her full name "Geraldine M. McCarthy" on the face of the card, the card may not be rejected because she violated no regulation by signing the offer in that manner, and she followed the instructions on the face of the card by giving her first name and initial.

Geraldine M. McCarthy, 37 IBLA 323 (Oct. 25, 1978)

In view of 43 U.S.C.A. § 1752(c) (West Supp. 1978), which dictates that in certain circumstances the present grazing user shall have a right of first refusal for any new lease, 43 CFR 4110.5 (43 FR 29070), must be read *in pari materia* therewith and with 43 CFR 4130.2(e) (43 FR 29072) to be construed as a valid regulation and must be interpreted not to apply where the present grazing user desires a new lease and otherwise meets the statutory and regulatory criteria.

Harvey Sheehan and Hazel Holland Mudon, 39 IBLA 56 (Jan. 16, 1979) 86 I.D. 51

The interpretation of an existing regulation by this Board to determine its applicability to the facts at hand does not constitute rulemaking by the Board.

H. B. Delasco, Inc., et al., 39 IBLA 194 (Feb. 2, 1979)

The maxim, *expressio unius est exclusio alterius*, will not be utilized to contradict or vary a clear expression of legislative intent.

Thomas B. Flickinger, William S. Flickinger, et al., 40 IBLA 53 (Mar. 16, 1979)

In the absence of public interest considerations and intervening rights, a regulation amendment which would benefit a pending public land matter may be applied to it. However, where the application is not in compliance with the amendment, the application must fail.

E. D. Wadleigh, 44 IBLA 11 (Nov. 6, 1979)

The regulations pertaining to the qualifications of an association as an oil and gas lease offeror (43 CFR 3102.3-1) requires, *inter alia*, separate statements setting forth citizenship and holdings only if there are members who own or control more than 10 percent of such association. If there are no members owning more than 10 percent, such statements need not be furnished.

Patrick Petroleum Co., 44 IBLA 38 (Nov. 6, 1979)

REGULATIONS--Continued

INTERPRETATION--Continued

When an offeror prints his name on the front of a drawing entry card oil and gas lease offer as "Maddox, Robert J.," and signs his name on the back of the card as "J. Robert Maddox," his usual manner of signing, the card may not be rejected because he violated no regulation by signing the offer in that manner, and he properly followed instructions on the face of the card by giving his last name first, then his first name and initial.

Robert J. Maddox, 44 IBLA 178 (Nov. 30, 1979)

PUBLICATION

Where notice of proposed rulemaking to change certain filing fees and to impose other charges has been published in the *Federal Register*, but no final rules have been published, the old schedule of fees will remain in effect until such time as the new rules are finally adopted, published and made effective.

Arizona Public Service Co., 20 IBLA 120 (Apr. 25, 1975)

Neither a Recreation and Public Purposes Act classification nor a withdrawal is a rule or regulation within the ambit of the Secretarial policy of Apr. 27, 1971, which provides for utilization of the public participation procedures of 5 U.S.C. § 553 (1976).

Delmer McLean et al., 40 IBLA 34 (Mar. 15, 1979)

VALIDITY

Where notice of proposed rulemaking to change certain filing fees and to impose other charges has been published in the *Federal Register*, but no final rules have been published, the old schedule of fees will remain in effect until such time as the new rules are finally adopted, published and made effective.

Arizona Public Service Co., 20 IBLA 120 (Apr. 25, 1975)

A regulation defining "eligible refiners" under the Act of July 13, 1946, providing for the sale of Government royalty oil or gas, as owners of existing refineries (including refineries not in operation) who qualify as a small business enterprise under the rules of the Small Business Administration and who are unable to purchase in the open market an adequate supply of crude oil to meet the needs of their existing refinery capacities, is an implementation of the Act within the ambit of the Secretary of the Interior's authority to prescribe rules and regulations.

Thunderbird Resources, Inc., 20 IBLA 248 (May 16, 1975)

The Boards of Appeal of the Department of the Interior have no authority to declare invalid a regulation of this Department.

Donald E. Jordan, 35 IBLA 290 (June 2, 1978)

In view of 43 U.S.C.A. § 1752(c) (West Supp. 1978), which dictates that in certain circumstances the present grazing user shall have a right of first refusal for any new lease, 43 CFR 4110.5 (43 FR 29070), must be read *in pari materia* therewith and with 43 CFR 4130.2(e) (43 FR 29072) to be construed as a valid regulation and must be interpreted not to apply where

REGULATIONS--Continued

VALIDITY--Continued

the present grazing user desires a new lease and otherwise meets the statutory and regulatory criteria.

Harvey Sheehan and Hazel Holland Mudon, 39 IBLA 56 (Jan. 16, 1979) 86 I.D. 51

WAIVER

Even if it be established that a controlling regulation had been violated in previous cases, such violation does not afford a valid predicate for further violations of the regulation.

Mary Nan Spear, 25 IBLA 34 (May 5, 1976)

A noncompetitive oil and gas lease applicant's failure to submit the statement of interest of the other parties in interest to the offer is not excused, nor is the Department estopped to reject such an offer, by his reliance on the Department's prior erroneous issuance of a lease to the applicant on an offer which was deficient for the same reason.

Leon M. Flanagan et al., 25 IBLA 269 (June 24, 1976)

The requirement that a bidder in a competitive oil and gas lease sale must submit one-fifth of the amount bid with his bid is mandatory and will not be waived.

Sarkeys, Inc., 26 IBLA 141 (Aug. 2, 1976)

Even if it be established that the Department had not applied in other cases regulation 43 CFR 4115.2-1(e)(8), which requires termination of grazing privileges upon loss of ownership or control of base property, such failure to apply the regulation is not authority to further disregard the regulation.

Prior recognition of grazing privileges based on licensee's erroneous statement of ownership of base property does not estop the Department from canceling the privileges when it becomes aware of the facts.

Charles Stewart, 26 IBLA 160 (Aug. 4, 1976)

Where an applicant for grazing privileges does not show the type of misconduct which would be a basis for estoppel against the Government, the provisions of 43 CFR 4115.2-1(e)(9)(i) and (e)(13)(i) cannot be waived on the basis of such misconduct.

A. D. Findlay (Appellant), Vermillion Cliff Cattle Co. (Intervenor), 29 IBLA 262 (Mar. 25, 1977)

The failure of a noncompetitive oil and gas lease offeror to complete the date on the simultaneous oil and gas drawing entry card is not excused, and the Department is not estopped to reject such an offer, by his reliance on the Department's prior erroneous issuance of a lease in acceptance of an offer which was deficient for the same reason.

Tina A. Hogan, 33 IBLA 213 (Dec. 21, 1977)

REGULATIONS--Continued

WAIVER--Continued

A past incorrect application of the law in adjudication of oil and gas lease offers is no authorization for failure to follow regulations in the case of an offer currently under adjudication.

David A. Provinse, 35 IBLA 217 (May 26, 1978)

The failure of a high bidder, in an upland competitive lease sale, to submit one-fifth of the amount bid with his bid in the proper form of remittance, may not be waived where the bidder submitted a sight draft, and thus retained control of the fund until presentment and final payment.

Mesa Petroleum Co., 37 IBLA 103 (Sept. 28, 1978)

REINSTATEMENT

GENERALLY

A petition for reinstatement of an oil and gas lease terminated for lack of timely payment of the rental is properly denied where the lessee does not show reasonable diligence in mailing the payment or a justifiable excuse for the delay in payment. The fact the courtesy rental notice did not come to the attention of the lessee until 6 days after the rental due date is not a justifiable excuse for late payment of the rental.

Levi T. Bellah, 22 IBLA 1 (Sept. 4, 1975)

A lessee who is out of town on vacation on the lease anniversary date and who mails the lease rental payment 6 days after the due date is not reasonably diligent.

Extenuating circumstances outside the control of the lessee occurring near the anniversary date of the lease may constitute justifiable cause for a late rental payment where the circumstances are the proximate cause of the failure to make timely payment. However, where appellant has delayed payment until just before the due date and has entrusted the function to an agent whose subagent neglects to make payment timely, the lack of diligence on the part of the lessee and/or his agent and/or subagent, and not the adverse circumstances confronting appellant's agent, constitute the proximate cause of the late payment and a decision denying reinstatement will be affirmed.

Lucille Lipphardt, 24 IBLA 81 (Feb. 25, 1976)

A petition for reinstatement of an oil and gas lease terminated for lack of timely payment of the rental is properly denied where the appellant does not show reasonable diligence in mailing the payment or a justifiable excuse for the delay in payment. The inadvertence or negligence of the appellant's employee does not justify late payment of the rental.

The fact that the courtesy rental notice did not come to appellant's attention until 6 days after the rental due date is not a justifiable excuse for late payment of the rental.

James Donoghue, 25 IBLA 280 (June 25, 1976)

REINSTATEMENT--Continued

GENERALLY--Continued

Reasonable diligence normally requires sending or delivering payments sufficiently in advance of the anniversary date to account for normal delays. A lessee whose payment is mailed 6 days after the due date is not reasonably diligent.

Extenuating circumstances outside the control of the lessee occurring near the anniversary date of the lease may constitute justifiable cause for a late rental payment where the circumstances are the proximate cause of the failure to make timely payment. However, where appellant has entrusted payment to an agent who becomes ill, and a subagent, who assumes the agent's responsibilities neglects to make payment timely, the illness of the agent is not the proximate cause of the late payment where no connection is made between the date of the agent's illness and the due date of the rental and a decision denying reinstatement will be affirmed.

The burden of proving that the late payment was either justifiable or not due to a lack of reasonable diligence is on the lessee, and this burden includes showing the proximity of the occurrence to the anniversary date.

Lucyann M. Cameron, 29 IBLA 141 (Mar. 4, 1977)

Reasonable diligence normally requires sending or delivering payments sufficiently in advance of the anniversary date to account for normal delays. A lessee whose payment is mailed more than 16 days after the due date is not reasonably diligent.

Energy Reserve, Inc., 30 IBLA 11 (Apr. 4, 1977)

Reasonable diligence normally requires sending or delivering payments sufficiently in advance of the anniversary date to account for normal delays. Where payment is mailed 3 days after the anniversary date and where due to a combination of trips in other vehicles, farm chores, and simple inadvertence, it was left on a car seat for 4 days, the failure to exercise reasonable diligence is not justifiable because the factor causing the delay is not one which is ordinarily outside of the control of the lessee.

Mildred M. Bernthal, Shirley M. Bernthal, 30 IBLA 18 (Apr. 7, 1977)

Reasonable diligence normally requires sending or delivering payments sufficiently in advance of the anniversary date to account for normal delays. Instances of forgetfulness, simple inadvertence or ignorance of the regulations are not covered. Where payment is mailed from Binghamton, New York, to Salt Lake City, Utah, 1 day before the anniversary date the lessee cannot be said to be reasonably diligent.

An estoppel of the Government to refuse acceptance of late rental payments is not created where in the past the BLM accepted rental payments after the anniversary date pursuant to 43 CFR 3103.3-2(e)(1) providing if the office to receive payment is closed on the anniversary date, payment will be considered timely if received on the next official working day.

Adolph F. Muratori, 31 IBLA 39 (June 21, 1977)

REINSTATEMENT--Continued

GENERALLY--Continued

Reinstatement of an oil and gas lease terminated by operation of law may be allowed only where the lessee can establish to the satisfaction of the Secretary of the Interior that the failure to make timely payment was either justifiable or not due to a lack of reasonable diligence. 30 U.S.C. § 188(c) (1970). When the only "payment" tendered timely consists of an unsigned check, it is not sufficient to satisfy the exculpatory standards of the reinstatement law and regulations.

Aubryn C. Hunsucker, 34 IBLA 316 (Apr. 24, 1978)

The burden of showing that the failure to pay annual rent for an oil and gas lease on or before the anniversary date of the lease was justifiable or not due to a lack of reasonable diligence is on the lessee. The fact that the lessee retained a leasing service which misrepresented that it would file appropriate assignment documents prior to the anniversary date does not justify late payment. Mailing of the annual rental payment on a date after it is due does not constitute reasonable diligence.

Saxe, Bacon and Bolan, P.C., 40 IBLA 5 (Mar. 6, 1979)

"Reasonable diligence." Allowing 1 day for mail delivery of an oil and gas lease rental demonstrates a lack of reasonable diligence, because reasonable diligence normally requires sending or delivering payments sufficiently in advance of the anniversary date to allow for normal delays in the collection, transmittal, and delivery of the payment.

"Justifiable." For a delay in submission of an oil and gas lease rental payment to be justifiable, lessee must show that the delay would not have occurred except for factors outside of his control.

"Justifiable excuse." The fact that a courtesy rental notice did not come to oil and gas lessee's attention until 1 day prior to rental due date is not a justifiable excuse for late payment of the rental.

Reid E. Motley, 43 IBLA 360 (Oct. 29, 1979)

RES JUDICATA

The doctrine of administrative finality, the administrative counterpart of res judicata, ordinarily bars reopening the issue of a permittee's class 1 base property qualifications resolved in a prior Departmental decision, but will not prevent modification of a decision to correct a conclusion inconsistent with the legal ruling of the case and apparently the result of an oversight as to the basis of the factual finding upon which it relies.

T. T. Cowgill et al., 19 IBLA 274 (Apr. 7, 1975)

The doctrine of res judicata will not bar an administrative proceeding to determine the validity of three unpatented mining claims where, in a previous condemnation action for the War Department's taking of a temporary exclusive easement covering the claims, the judgment of the Federal district court was limited solely to the compensation to be paid by the United States, and there was no litigation of the issue of the validity of the claims and no prior adjudication of that issue in the Department of the Interior.

The doctrine of collateral estoppel will not bar the administrative contest of the validity of three mining

RES JUDICATA--Continued

claims which were the subject of a previous condemnation action for the taking by the Government of a temporary exclusive easement over the claims, where the issue of the validity of the claims was not actually litigated and it was wholly unnecessary for the court to adjudicate that issue in rendering its judgment.

United States v. A. E. Fleming et al., 20 IBLA 83 (Apr. 24, 1975)

Where an appeal has been taken and a final Departmental decision has been reached, the principle of res judicata will operate to bar consideration of a new appeal arising from a later proceeding involving the same claim and same issues, absent compelling legal or equitable reasons for reconsideration.

Ben Cohen, Ray C. Nordstrom, 21 IBLA 330 (Aug. 18, 1975)

A judgment is not conclusive of a fact erroneously assumed when the fact was not actually litigated and determination thereof was not essential to the decision.

United States v. Bert L. Johnson, 23 IBLA 349 (Jan. 21, 1976)

A civil action in a Federal district court condemning a mining claim for a period of years for the exclusive use of the United States does not bar a subsequent contest by the Department of the Interior challenging the validity of the claim.

United States v. The American Fluorspar Group, Inc., 25 IBLA 136 (June 7, 1976)

A Federal district court jury verdict in a suit to cancel desert land patents, that the entrymen and their purchaser under an illegal executory contract did not commit fraud against the United States, does not collaterally estop this Department from adjudicating a contest grounded on the illegal executory contract against the purchaser's own entry, because the legal standard applicable in the subsequent contest is different than that in the fraud action--a desert land entry can be subject to cancellation for acts that do not constitute fraud.

United States v. Elodymae Zwang, United States v. Darrell Zwang, 26 IBLA 41 (July 9, 1976) 83 I.D. 280

Where a decision by an officer of the Department has become final, the principle of res judicata will operate to bar consideration of a new appeal arising from a later proceeding involving the same claim and same issues, absent compelling legal or equitable reasons for reconsideration.

David Loring Gamble, Darrel Houglum, 26 IBLA 249 (Aug. 18, 1976)

While the Department of the Interior does not rigidly apply the doctrine of administrative finality so as to bar any subsequent reassertion of soldier's additional homestead scrip rights which have been determined to be invalid, it is incumbent upon an applicant seeking to exercise such rights to submit compelling legal or equitable reasons for reconsideration.

Where an applicant seeks to assert a soldier's additional homestead right which has been determined to be invalid in an earlier proceeding, and does not submit compelling legal or equitable reasons for reconsideration, but merely seeks to reargue the previous determination, the attempted exercise of soldier's additional homestead rights will be rejected.

George Bodda, Jr., 27 IBLA 186 (Oct. 8, 1976)

A request to reconsider a 1968 decision by the Department rejecting final proof for a homestead entry and canceling the entry is properly rejected in the absence of a showing of "extraordinary circumstances." In the absence of compelling legal or equitable reasons for reconsideration, the principle of res judicata, and its counterpart, finality of administrative action, will operate to bar consideration of a new appeal arising from a later proceeding involving the same claim and the same issues.

Pekka K. Merikallio, 30 IBLA 157 (May 18, 1977)

Where a State swampland selection has been rejected on the ground that the land selected has been disposed of, but in fact that land was available to the State, the judgment is valid and binding until set aside. Since the Secretary has jurisdiction to determine whether the land selected is available, he has jurisdiction to decide erroneously. The erroneous decision will not be set aside where the State did not appeal and the decision has remained unchallenged for over 100 years, the State itself sold the land to a color of title applicant's predecessor, and an adverse right has intervened.

John Stuart Hunt, Sherman M. Hunt, 31 IBLA 304 (July 22, 1977) 84 I.D. 421

In order for a State to receive legal title to a swampland selection, the Secretary of the Interior or his delegate must determine that the land is swamp in character and available for disposition under the grant. An erroneous decision that selected land is unavailable because it was sold prior to the selection is valid and binding until set aside. The erroneous decision will not be set aside where the State did not appeal and the decision has remained unchallenged for over 100 years, the State itself sold the land at a tax sale to the predecessor in interest of a color of title applicant, and an adverse right, i.e., a class 2 color of title application, has intervened.

White Castle Lumber and Shingle Co., Ltd., 32 IBLA 129 (Sept. 12, 1977)

The doctrine of finality of administrative action, counterpart of res judicata, designed to achieve orderliness in the administration of public lands, bars reconsideration of a 1936 General Land Office decision, rendered according to procedures then in effect, which canceled a stock-raising homestead entry and from which no appeal was taken.

John Lynn Brough, 33 IBLA 36 (Nov. 25, 1977)

When BLM adjudicates issue and offeror does not appeal, doctrine of administrative finality, which is administrative counterpart of res judicata, generally bars consideration of new appeal arising from later proceeding involving same lease and same issue. Accordingly, BLM acted properly in dismissing appellant's protest, filed Nov. 16, 1977, against oil and gas lease annual rental adjudicated on July 27, 1977.

Wilfred Plomis, 35 IBLA 1 (May 3, 1978)

RES JUDICATA--Continued

A request to reconsider a final decision of the Department rejecting applications for homestead entry is properly rejected in the absence of a showing of extraordinary circumstances. Except where compelling legal and equitable reasons for reconsideration are shown, the principle of res judicata and its counterpart, finality of administrative action, will bar consideration of a new appeal arising from a later proceeding involving the same claim and the same issues.

Dallas C. Coalman et al., 36 IBLA 119 (July 25, 1978)

Where the Board of Land Appeals has considered an appeal and rendered a final decision holding that a particular oil and gas lease offer was not proper and must be rejected, the applicant may not thereafter appeal the matter to this Board merely because the Bureau of Land Management, in implementing the Board's decision, mistakenly advised him that he had the right to such an appeal. The matter is res judicata, and the subsequent appeal must be dismissed.

Donald W. Coyer (Appellant), Alfred L. Easterday (Appellee), 36 IBLA 181 (July 31, 1978)

Where the Board of Land Appeals has considered an appeal and rendered a final decision holding that certain coal prospecting permits have terminated and that no preference right to a coal lease is attached to any of them, an unapproved assignee of the permits may not thereafter appeal the matter to this Board following Bureau of Land Management notification to the permittees of this Board's decision. The matter is res judicata and such subsequent appeal must be dismissed, absent compelling legal or equitable considerations.

Peabody Coal Co., 36 IBLA 242 (Aug. 14, 1978)

Where the Board of Land Appeals has considered an appeal and rendered a final decision holding that a particular oil and gas lease offer may properly be rejected for the reason that title to the lands involved was uncertain, and a new lease offer for the same lands is again rejected for the same reason, the matter is res judicata, and the subsequent appeal is properly dismissed.

N. L. Industries, Inc., 37 IBLA 335 (Oct. 26, 1978)

Relitigation of the issue of discovery is barred by the principle of res judicata and its corollary, collateral estoppel, insofar as the same lands, parties, and claims are involved, absent compelling legal or equitable reasons for reconsideration.

Under principles of res judicata, a judgment is binding upon all parties to the proceedings in which it is rendered and to their privies. Privity denotes a mutual or successive relationship to the same right in property. Privity exists within the meaning of the doctrine of res judicata to bind a subsequent grantee, transferee, or lienor of property.

United States v. Leroy S. Johnson et al., 39 IBLA 337 (Feb. 28, 1979)

The principle of res judicata does not operate to bar consideration of a new Alaska Native allotment application under 43 U.S.C. §§ 270-1 through 270-3 (1970), despite previous denial of a prior application, when the initial adjudication was confined to a single issue, which issue is irrelevant under a later interpretation of the statute.

Rika Murphy, Gene H. Smagge, 42 IBLA 51 (July 31, 1979)

RES JUDICATA--Continued

A summary dismissal of a private contest against an Alaska homestead becomes a final administrative ruling on that contest when the contestant, instead of appealing the dismissal, files a second contest which must be considered an entirely new action. When a final departmental adjudication has been made, the doctrine of administrative finality, which is the administrative counterpart of the principle of res judicata, generally bars consideration of a new appeal arising from a later proceeding involving the same homestead and the same issue.

Joe O. Amberger, 43 IBLA 178 (Sept. 28, 1979)

In the absence of compelling legal and equitable reasons supporting reconsideration, the principle of res judicata, and its counterpart, finality of administrative action, will operate to bar consideration of a new appeal arising from a later proceeding involving the same claim, the same parties, and the same issues.

Western Slope Gas Co. (On Reconsideration), 43 IBLA 259 (Oct. 15, 1979)

A notice of appeal from Geological Survey's failure to approve a communitization agreement must be filed within 30 days after appellant is served with the decision thereof or the doctrine of administrative finality generally bars consideration of the same issue in a later appeal.

Gulf Oil Corp., 44 IBLA 292 (Dec. 26, 1979)

RIGHTS-OF-WAY

(*See also* Indian Lands, Outer Continental Shelf Lands Act, Reclamation Lands--if included in this Index.)

GENERALLY

Where an appraisal has followed established criteria in calculating the fair market value of rental for a right-of-way, it will be affirmed, absent a showing by positive and substantial evidence that the appraisal is in error.

Western Slope Gas Co., 21 IBLA 119 (July 14, 1975)

Where a protest against the United States entering into a compensatory royalty agreement pertaining to oil and gas underlying a railroad right-of-way pursuant to the Act of May 21, 1930, 46 Stat. 373, 30 U.S.C. § 301 *et seq.* (1970), is based upon an assertion that the protestants have title to the oil and gas under the right-of-way, the protest will be properly dismissed if it is found the United States has title to those minerals.

Brown v. Cannon, Jr., et al., 24 IBLA 166 (Mar. 16, 1976) 83 I.D. 80

Improvement of land by a road, and use of the land for access to a private inholding do not by themselves qualify the locator to purchase the land as a trade and manufacturing site.

Evelyn M. Bunch, 25 IBLA 44 (May 13, 1976)

RIGHTS-OF-WAY--Continued

GENERALLY--Continued

The Act of July 26, 1866, R.S. 2477, 43 U.S.C. § 932 (1970), grants a right-of-way for the construction of highways over public lands not reserved for public uses. Where the Bureau of Land Management closes a 400-foot haul road, formerly part of a right-of-way issued to the Oregon State Highway Department on Oregon and California revested land for a material site, without considering the implications of the statute, and appellant submits evidence showing that the road has been used by the public for many years, the decision will be set aside and the case will be remanded for a determination of whether a highway has already been established under the statute or, if not, to afford appellant an opportunity to file an application for a right-of-way under 43 CFR 2822.1-2.

Homer D. Meeds, 26 IBLA 281 (Aug. 26, 1976)
83 I.D. 315

In the absence of legislation by Congress, a patent from the United States does not convey an implied easement by way of necessity across public land.

In order to establish an easement by way of necessity, the requisite necessity must exist at the time of the conveyance. Moreover, if the necessity ceases to exist, the easement also ceases to exist. When other means of access are available, even though less convenient, a way of necessity will not be recognized or the implication becomes subject to control of other circumstances.

Sun Studs, Inc., 27 IBLA 278 (Oct. 26, 1976)
83 I.D. 518

Public land within one-quarter mile of the banks of a river designated by Act of Congress for potential addition to the national wild and scenic rivers system is withdrawn by statute from entry, sale, or other disposition under the public land laws of the United States for a designated period to allow a study of the suitability of the river for inclusion in the system and a report to Congress thereon. This withdrawal, however, does not preclude a right-of-way grant which does not involve a conveyance of title or rights leading thereto.

The Secretary has the discretionary authority to grant a right-of-way application which includes an area designated for potential addition to the national wild and scenic rivers system where it is determined to be in the public interest. In the exercise of that discretion it is appropriate to consider the suitability of the subject area for inclusion in the system, classification of the characteristics (wild, scenic, or recreational) of the river area, and whether such a land use will unreasonably interfere with the values disclosed.

Lower Valley Power & Light, Inc., 29 IBLA 107 (Feb. 23, 1977)

Where a right-of-way application has been rejected in part, an appeal therefrom should be dismissed if not filed within the period prescribed in 43 CFR 4.411.

When a right-of-way applicant fails to submit corrected maps and payment of charges within a reasonable time after notice, which notice does not prescribe a specific time therefor, but on appeal applicant explains the reasons for delay, a rejection of the application may be set aside and the case remanded.

Jerrold B. Cooley, Lucy M. Cooley, 32 IBLA 387 (Nov. 7, 1977)

RIGHTS-OF-WAY--Continued

GENERALLY--Continued

Sec. 310 of the Federal Land Policy and Management Act of 1976 provides that, prior to promulgation of new regulations, the Secretary will administer the public lands under existing regulations to the extent practical. Issuance of a right-of-way permit for an electrical power transmission line prior to the promulgation of new regulations under sec. 504 of the Act is permissible under the authority in sec. 310.

The fact that various of the existing regulations in 43 CFR Part 2800, governing issuance of rights-of-way, are not wholly consistent with the Federal Land Policy Management Act of 1976 does not render invalid a BLM decision granting a right-of-way under the authority of sec. 310 of that Act.

Sec. 505, Federal Land Policy and Management Act of 1976, does not require that preliminary planning considerations be enumerated on the face of a grant of a right-of-way.

The third party participation provision of sec. 102(a)(5), Federal Land Policy and Management Act of 1976, is entirely satisfied by a series of public hearings held prior to the grant of a power transmission right-of-way.

David Smith Sanches et al. (Appellants), Colorado Ute Electric Ass'n, Inc. (Intervenor). 33 IBLA 7 (Nov. 15, 1977)

An applicant has no right to a hearing in connection with original Federal charges for use and occupancy of a communication site, and in the absence of any specific assertion showing error in the appraisal, the appraisal will be sustained on appeal if it is properly formulated.

When a parcel of land is properly determined to have a highest and best use for communication site purposes, an annual use charge based on the fair market value of the right-of-way grant may be determined by comparison with value of the right of use for similar sites and by making whatever adjustments may be necessary because of differences in factors influencing value.

Under sec. 310 of the Federal Land Policy and Management Act of 1976, 43 U.S.C.A. § 1764(g) (West Supp. 1977), charges for rights-of-way on public lands are in general to be paid annually rather than in advance for a longer period pursuant to 43 CFR 2802.1-7(a).

XYZ Television, Inc., 33 IBLA 80 (Dec. 8, 1977)

A communication site right-of-way granted on Sept. 2, 1959, pursuant to the Act of Mar. 4, 1911, 43 U.S.C. § 961 (1970), is subject to the periodic reappraisal under the terms of the specific grant and applicable regulations then in effect, 43 CFR 244.21(b) and (f) (1954).

Second party utilization of a communication site right-of-way granted on Sept. 2, 1959, pursuant to the Act of Mar. 4, 1911, 43 U.S.C. § 961 (1970), is subject to BLM authorization under the governing regulation, 43 CFR 244.18(a) (1954).

James W. Smith, 34 IBLA 146 (Mar. 10, 1978)

RIGHTS-OF-WAY--Continued

GENERALLY--Continued

Arizona Revised Statutes § 37-502, which provides for damages in civil actions for trespass on State lands, does not apply to cases involving right-of-way trespass on Federal lands located in Arizona.

Mountain States Telephone & Telegraph Co., 34 IBLA 154 (Mar. 10, 1978)

Applications for rights-of-way on public lands pending on Oct. 21, 1976, are to be considered as applications under the Federal Land Policy and Management Act of 1976, but, to the extent practical, existing regulations will govern the administration of the public lands until new regulations are issued.

Where a regulation requiring reimbursement of certain costs incurred by the United States in the processing of right-of-way applications is promulgated, the cost reimbursement provision is applicable to an application filed prior to and pending on the effective date of the regulation.

Continental Telephone of California, 34 IBLA 274 (May 1, 1978)

An oil and gas lease offer for lands in a reservoir right-of-way is properly rejected pursuant to the Act of May 21, 1930, 30 U.S.C. §§ 301-306 (1970), and 43 CFR 3100.0-3(d)(1) which limit the right to lease deposits of oil and gas in and under rights-of-way to the owner of the right-of-way or his assignees.

Where the official records of the Bureau of Land Management show a reservoir right-of-way affecting certain land, the oil and gas therein may not be leased under the Mineral Leasing Act of 1920, 30 U.S.C. § 181 et seq. (1970). This result follows even though the reservoir right-of-way may have been issued improperly or should have been terminated.

Republic Oil & Mining Co. and Margaret V. Coombs, 35 IBLA 212 (May 26, 1978)

A request for rent-exempt status for a right-of-way granted for telephone poles and lines pursuant to the Act of Mar. 4, 1911, 43 U.S.C. § 961 (1970), is properly denied where the terms of the grant clearly state that the grant is made in consideration of periodic rental payments and contains no authorization for rent-exempt status.

"Rural Electrification Administration projects." A right-of-way holder is not excused from payment of rental under 43 CFR 2802.1-7(c), by virtue of holding an REA loan, where such holder is neither a cooperative or nonprofit organization.

Continental Telephone of the West, 35 IBLA 279 (June 2, 1978)
85 I.D. 186

Applications for rights-of-way on public lands pending on Oct. 22, 1976, are to be considered as applications under Title V of the Federal Land Policy and Management Act of 1976, but existing regulations will govern the administration of public lands to the extent practical until new regulations are promulgated.

"Fair market value." As used in 43 CFR 2802.1-7, "fair market value" of a communication site right-of-way is the amount in cash, or on terms reasonably equivalent to cash, for which in all probability the right to use

RIGHTS-OF-WAY--Continued

GENERALLY--Continued

the site would be granted by a knowledgeable owner willing but not obligated to grant to a knowledgeable user who desired but is not obligated to so use.

The comparable lease method of appraisal of microwave communication sites, which involves the comparison of comparable rental data from other leased sites with data from the subject site, is the preferred method of determining the fair market rental value of the right-of-way where there is sufficient comparable data available.

Appraisals of rights-of-way for communication sites will be upheld if no error is shown in the appraisal methods used by the Bureau of Land Management and the appellant fails to show by convincing evidence that the charges are excessive. Where an appellant has raised sufficient doubt that the Bureau properly considered the highest and best use of a right-of-way in determining comparability of other sites as a basis for the use charges, the case may be remanded for the Bureau to reconsider whether a further appraisal or adjustments in the appraised values should be made.

Where a grantee seeks renewal of a right-of-way for a communication site, the Bureau of Land Management should require an advance annual payment at the rate formerly charged until a new fair market value rate may be established by appraisal. In the absence of contrary directives, the guideline in 43 CFR 2802.1-7(e) should be applied to renewals of existing rights-of-way. Increased charges may not be imposed retroactively, but are only imposed by the authorized officer, after reasonable notice and opportunity for hearing, beginning with the next charge year after the officer's decision.

Interest may be imposed on use charges for right-of-way sites depending on considerations of fairness and equity. In the absence of contrary directives, interest may be imposed for occupancy of a site where use charges should have been imposed at the same rate as past permitted use. Also, interest may be imposed on increased charges due on an annual basis for the years prior to payment of such amount.

Full Circle, Inc., 35 IBLA 325 (June 19, 1978)
85 I.D. 207

Where, on appeal, a grantee of a right-of-way makes a substantial showing of error in the revision of the rental rate for use of the right-of-way, and where the State Office has not had an opportunity to consider the grantee's arguments, a decision dismissing a protest to the revised rental rate will be set aside and the case will be remanded in order to afford the State Office an opportunity to review its appraisal in light of the grantee's contentions.

Circle L, Inc., 36 IBLA 260 (Aug. 15, 1978)

Oil and gas under a reservoir right-of-way may not be leased under the Mineral Leasing Act of 1920, 30 U.S.C. § 181 et seq. (1970), but may only be leased to the holder of the right-of-way, his assignee, or to adjacent owners or their lessees in accordance with the Act of May 21, 1930, 30 U.S.C. § 301 (1970); therefore, offers filed under the Mineral Leasing Act for such lands are properly rejected.

Alice Hays, 36 IBLA 313 (Aug. 23, 1978)

Applications for rights-of-way on public lands pending on Oct. 21, 1976, are to be considered as filed under the Federal Land Policy and Management Act of 1976.

Arnold E. Hedell, 37 IBLA 22 (Sept. 12, 1978)

10 U.S.C. § 2669 (1976) authorized the Secretary of a military department to grant an easement for a right-of-way over land permanently withdrawn or reserved for the use of that department and other land under his control. This language was all-inclusive and permitted the Secretary of the Army to issue a revocable permit for a pipeline over land withdrawn for the use of the Army regardless of whether the withdrawal be permanent or temporary.

In the construction or interpretation of contracts, the primary purpose and guideline is the intention of the parties. A contract must be construed as a whole and the intention of the parties is to be collected from the entire instrument. Individual words and phrases must be considered in connection with the rest of the contract. Where the Army contracts with appellant to provide natural gas to certain areas and grants appellant a rental-free revocable permit to enter the "service location," for any purpose under the contract including use of the sites for installation, operation, and maintenance of the facilities, the contract can be interpreted as granting appellant a rental-free revocable permit for a right-of-way for a gas pipeline.

In construing an ambiguous contract, the conduct of the parties in relation to such contract is to be considered in determining the meaning of the contract. Where the Army contracts with appellant to provide natural gas to certain areas and the appellant constructs a pipeline pursuant to the contract, it is reasonable to interpret the contract as providing a revocable permit for a right-of-way for such pipeline.

Alaska Pipeline Co., 38 IBLA 1 (Nov. 8, 1978)

An appeal from an appraisal of a communication site right-of-way will not be accorded favorable consideration where it does not with some particularity show adequate reason for appeal and support the allegations with evidence showing error.

Valley Mobile Communications, Inc., 38 IBLA 359 (Dec. 29, 1978)

Applications for rights-of-way on public lands pending on Oct. 22, 1976, are to be considered as applications under Title V of the Federal Land Policy and Management Act of 1976, but existing regulations will govern the administration of public lands to the extent practical until new regulations are promulgated.

As used in 43 CFR 2802.1-7, "fair market value" of a communication site right-of-way is the amount in cash, or on terms reasonably equivalent to cash, for which in all probability the right to use the site would be granted by a knowledgeable owner willing but not obligated to grant to a knowledgeable user who desired but is not obligated to so use.

The comparable lease method of appraisal of microwave communication sites, which involves the comparison of comparable rental data from other leased sites with data from the subject site, is the preferred method of determining the fair market rental value of the right-of-way where there is sufficient comparable data available.

Appraisals of rights-of-way for communication sites will be upheld if no error is shown in the appraisal methods used by the Bureau of Land Management and the

appellant fails to show by convincing evidence that the charges are excessive. Where an appellant has raised sufficient doubt that the Bureau properly considered the highest and best use of a right-of-way in determining comparability of other sites as a basis for the use charges, the case may be remanded for the Bureau to reconsider whether a further appraisal or adjustments in the appraised values should be made.

Where a grantee seeks renewal of a right-of-way for a communication site, the Bureau of Land Management should require an advance annual payment at the rate formerly charged until a new fair market value rate may be established by appraisal. In the absence of contrary directives, the guideline in 43 CFR 2802.1-7(e) should be applied to renewals of existing rights-of-way. Increased charges may not be imposed retroactively, but may be only imposed by the authorized officer, after reasonable notice and opportunity for hearing, beginning with the next charge year after the officer's decision.

Interest may be imposed on use charges for right-of-way sites depending on considerations of fairness and equity. In the absence of contrary directives, interest may be imposed for occupancy of a site where use charges should have been imposed at the same rate as past permitted use. Also, interest may be imposed on increased charges for the period commencing with the date from which increased charges are established.

Where, on appeal, application for renewal of communication site rights-of-way was approved subject to condition of a lump-sum payment of an increased rental without a hearing, the decisions below will be set aside and the cases remanded for hearing and for other revisions consistent with principles enunciated in Board decisions to be followed in renewal of communication site rights-of-way and in setting increases in the amount of rental for such sites.

Donald B. Clark, C. Reinhart & Son, Inc., Hartwell Excavating Co., 39 IBLA 182 (Jan. 31, 1979)

Pending applications for rights-of-way filed under the Acts of Feb. 15, 1901, and Mar. 4, 1911, shall be considered as applications under the Federal Land Policy and Management Act of 1976.

The granting of a right-of-way under FLPMA and the superseded Acts of Feb. 15, 1901, and Mar. 4, 1911, is within the Secretary's discretion and neither the filing of the application nor the existence of improvements earns appellant a right to the right-of-way. No rights vest in the applicant until the grant is approved by the Secretary. An application for a right-of-way is properly rejected where the land is in an interim conveyance to a Native Corporation.

"Public lands." Land within an interim conveyance to a Native Corporation is no longer "public land" under the Federal Land Policy and Management Act nor subject to Bureau of Land Management jurisdiction to issue rights-of-way under that Act.

New England Fish Co., 42 IBLA 200 (Aug. 22, 1979)

Where, in connection with a communication site right-of-way, BLM requests an applicant to submit copies of FCC licenses and such applicant indicates a willingness to comply, the case is properly remanded for further processing.

Donald B. Clark, 44 IBLA 130 (Nov. 27, 1979)

RIGHTS-OF-WAY--Continued

GENERALLY--Continued

The grant of a right-of-way over Federal land for a pipeline or other linear project is a Federal undertaking which requires the authorizing agency to comply with sec. 106 of the National Historic Preservation Act, as implemented by 36 CFR Part 800.

The Extent to Which the National Historic Preservation Act Requires Cultural Resources to be Identified and Considered in the Grant of a Federal Right-of-Way, M-36917 (Dec. 6, 1979) 87 I.D. 27 (1980)

ACT OF MARCH 3, 1875

The Secretary of the Interior does not have authority under the Right-of-Way Oil and Gas Leasing Act of May 21, 1930, 30 U.S.C. § 301 *et seq*. (1970), to dispose of deposits of oil and gas underlying a railroad right-of-way granted pursuant to the Act of Mar. 3, 1875, when the lands traversed by the right-of-way were later patented under the Act of Apr. 24, 1820, without any reservation for minerals. In such case, title to the mineral estate was included within the grant to the patentee.

Amerada Hess Corp., 24 IBLA 360 (Apr. 27, 1976) 83 I.D. 194

ACT OF MARCH 3, 1891

The Department of the Interior may condition approval of right-of-way applications filed pursuant to the Act of Mar. 3, 1891, by requiring acceptance of conditions for the protection of the public interest so long as such conditions are neither inconsistent with nor tend to unreasonably burden the proposed right-of-way projects.

Grindstone Butte Project, 24 IBLA 49 (Feb. 23, 1976)

The grantee of a right-of-way for irrigation or drainage purposes may not fence the right-of-way unless it is necessary to protect the grantee's use. Where the necessity of protecting an irrigation reservoir from incursion by cattle did not appear on the record, and the fence was not so located as to serve that purpose, fencing the reservoir constituted a trespass.

Joe Stewart, 33 IBLA 225 (Dec. 28, 1977)

ACT OF JANUARY 21, 1895

A decision by the Bureau of Land Management rejecting a logging road right-of-way application as not in the public interest will be affirmed in the absence of sufficient reasons to the contrary.

Sun Studs, Inc., 27 IBLA 278 (Oct. 26, 1976) 83 I.D. 518

Although a right-of-way granted under the Act of Jan. 21, 1895, was previously subject to cancellation by the authorized officer for non-use pursuant to 43 CFR 2802.2-3, the Federal Land Policy and Management Act of 1976 provides that suspension or termination of a right-of-way requires an appropriate administrative proceeding pursuant to 5 U.S.C. § 554 (1970), except where the right-of-way provides by its terms that it will terminate in such event.

RIGHTS-OF-WAY--Continued

ACT OF JANUARY 21, 1895--Continued

A right-of-way issued pursuant to the Act of Jan. 21, 1895, gives the holder thereof an exclusive right of user.

Western Aggregates of Mineral & Rock, Inc., 34 IBLA 164 (Mar. 14, 1978)

ACT OF FEBRUARY 15, 1901

It is not necessary to reject an application filed pursuant to the Act of Feb. 15, 1901, for a right-of-way in an area adjacent to but outside of the boundaries of an area designated as a potential addition to the Wild and Scenic Rivers System, unless it is determined that the project would invade the area or diminish the scenic, recreational, and fish and wildlife values present within the potential wild, scenic, or recreational river area, or there are other justifiable grounds for rejection.

Van Bistmann, 25 IBLA 171 (June 14, 1976)

A decision of the Bureau of Land Management, made in the exercise of its discretion, to reject a right-of-way application pursuant to the Act of Feb. 15, 1901, will be affirmed when the record shows the decision to be a reasoned analysis of the factors involved made in due regard for the public interest, and no sufficient reason to disturb the decision is shown.

Jack M. Vaughan, Judith L. Vaughan, 25 IBLA 301 (June 28, 1976)

A right-of-way granted pursuant to the Act of Feb. 15, 1901, may, in the discretion of the Secretary of the Interior, be canceled for either abandonment or nonuse; the holder of the right-of-way may be required to restore the area.

H. L. Townsend, 26 IBLA 175 (Aug. 6, 1976)

Under 43 CFR 2802.1-7(e), which provides that charges for a right-of-way on public lands may be revised after notice and an opportunity for hearing, it is improper to increase such charges without following the prescribed procedure.

Paradise Oil, Water and Land Development, Inc., 26 IBLA 374 (Sept. 8, 1976)

A right-of-way issued pursuant to the Act of Feb. 15, 1901, for the construction, maintenance, and operation of a water tank site, water pipeline, and an access road is properly canceled where the permittee has not completed construction within 5 years from the date of the grant.

Neil J. Cummins, 32 IBLA 384 (Nov. 3, 1977)

Approval of a domestic water pipeline right-of-way application filed under the Act of Feb. 15, 1901, is within the discretion of the Secretary of the Interior. Approval of such an application remains a discretionary matter under the Federal Land Policy and Management Act of 1976, 43 U.S.C.A. §§ 1761-1771 (West Supp. 1977).

Neither an application for a right-of-way nor the building of a pipeline on public land without prior authorization earns an applicant a right to a right-of-way under these statutes.

A decision rejecting an application for a domestic water pipeline right-of-way will be affirmed when the record shows the decision to be a reasoned analysis of the factors involved made in due regard for the public interest, and no sufficient reason to disturb the decision is shown.

Stanley S. Leach, Roxanna M. Leach, 35 IBLA 53 (May 9, 1978)

The Act of Feb. 15, 1901, 43 U.S.C. § 959 (1970), was repealed by sec. 706 of the Federal Land Policy and Management Act of 1976 (FLPMA), 90 Stat. 2793, and any use or occupancy of public land granted subsequent to the effective date of FLPMA, Oct. 21, 1976, must be issued under authority of that Act. In authorizing the Secretary to grant rights-of-way, FLPMA provides that the Secretary shall require the applicant to submit certain information relating to the right-of-way, and a State Office notice enumerating such requirements is consistent with FLPMA.

William J. Colman, 40 IBLA 180 (Apr. 3, 1979)

Pending applications for rights-of-way filed under the Acts of Feb. 15, 1901, and Mar. 4, 1911, shall be considered as applications under the Federal Land Policy and Management Act of 1976.

New England Fish Co., 42 IBLA 200 (Aug. 22, 1979)

ACT OF MARCH 4, 1911

Under 43 CFR 2802.1-7(e), which provides that charges for use and occupancy of a communication site on public lands may be revised after notice and an opportunity for hearing, it is improper to increase such charges without following the prescribed procedure.

Following a hearing under 43 CFR 2802.1-7, a decision increasing the charges for use and occupancy of a communication site is in error to the extent that the decision is based upon unspecified evidence not in the record and not made known to the user, and the decision must be set aside.

Under 602 DM 1.3, standards for evaluating easements granted by the Department are set forth in Interagency Land Acquisition Conference, *Uniform Appraisal Standards for Federal Land Acquisitions*.

"Fair market value." As used in 43 CFR 2802.1-7, "fair market value" of a communication site right-of-way is the amount in cash, or on terms reasonably equivalent to cash, for which in all probability the right to use the site would be granted by a knowledgeable owner willing but not obligated to grant to a knowledgeable user who desired but is not obligated to so use.

The comparable lease method of appraisal of microwave communication sites, which involves the comparison of comparable rental data from other leased sites with data from the subject site, is a proper method of determining the fair market value of such site where there is sufficient comparable data available.

Under 43 CFR 2802.1-7(e), a revision of charges for use and occupancy of a microwave communication site should be based upon the physical condition of the right-of-way at the time the user properly commenced occupancy of the site or at time of grant thereof, whichever was

earlier, with value adjusted to present value in that condition.

"Highest and best use." As to the improver of a communication site during the term of his grant, a determination that the highest and best use of property is for communications purposes must be based on evidence showing it is so reasonably likely the site would be chosen for use as a communication site in the absence of improvements made by the improver that the suitability of the land for communications purposes would affect its general market value.

"Before and after rule." In reappraisal of a communication site, the before and after rule is applied by determining the market value of the Government tract including the site at the time of reappraisal, excluding any enhancement to or diminution from the site project, and subtracting therefrom the market value of the remaining Government property interest, including enhancement or diminution from the project.

In the absence of better evidence of comparable leases, the "before and after" method should be employed in appraisals of communication sites under 43 CFR 2802.1-7.

In a case where a substantial increase is proposed in charges for a communication site under 43 CFR 2802.1-7(e), the required hearing should be conducted in accordance with the accepted concepts of due process.

American Telephone and Telegraph Co., et al., 25 IBLA 341 (June 30, 1976)

Under 43 U.S.C. § 961 (1970) and 43 CFR 2802.1-7(e), an applicant has no right to a hearing in connection with original charges for use and occupancy of a communication site, and a hearing pursuant to a request under 43 CFR 4.415 will not be granted where applicant fails to make specific allegations or offer specific proof to show in what factors a Departmental appraisal is in error.

Without convincing evidence that charges prescribed under 43 U.S.C. § 961 (1970) and 43 CFR 2802.1-7 for use and occupancy of a communication site are excessive, charges properly prescribed by an authorized officer will be sustained on appeal.

Departmental regulation 43 CFR 2802.1-7 contemplates that a charge will be initially established for the entire term of the grant of a communication site right-of-way.

Mountain States Telephone and Telegraph Co., 26 IBLA 393 (Sept. 16, 1976) 83 I.D. 332

A right-of-way for a communication site for which application was made under the Act of Mar. 4, 1911, shall conform to the provisions of the Federal Land Policy and Management Act of 1976, sec. 510, 90 Stat. 2743, 2782, when application for grant was pending on Oct. 21, 1976.

Where the current fair rental value of a right-of-way has been determined in accordance with accepted appraisal procedures, and the permittee contends that the rental is excessive, the burden is upon the lessee to prove by positive, substantial evidence that the appraisal is in error. Where the lessee fails to do so, the appraisal will stand.

Four States Television, Inc., 32 IBLA 205 (Sept. 19, 1977)

RIGHTS-OF-WAY--Continued

ACT OF MARCH 4, 1911--Continued

Under 43 CFR 2802.1-7(e), the charge for a right-of-way on public lands may be revised upon compliance with procedural requirements at any time 5 years or more from the date when the rate was initially established.

XYZ Television, Inc., 32 IBLA 317 (Sept. 30, 1977)

Where there are multiple users on the same communications site each user is individually responsible for the fair market rental value computed as of the time of the initiation of use, and such rental value determined for the site may not be prorated among different users.

The notice and opportunity for hearing envisaged by 43 CFR 2802.1-7(e) requires at a minimum that the lessee be provided with a copy of the appraisal report, that he be permitted to appear before the decisionmaker, that the decisionmaker not be the person who made or approved the appraisal, and that adequate records of the hearing conducted pursuant to the regulations be maintained.

Circle L, Inc., 36 IBLA 260 (Aug. 15, 1978)

Where there are multiple users on the same communication site each user is individually responsible for the fair market rental value of his authorized use.

The notice and opportunity for hearing envisaged by 43 CFR 2802.1-7(e) requires at a minimum that the lessee be provided with a copy of the appraisal report, that he be permitted to appear before the decisionmaker, that the decisionmaker not be the person who made or approved the appraisal, and that adequate records of the hearing conducted pursuant to the regulations be maintained.

Donald R. Clark, C. Reinhart & Son, Inc., Hartwell Excavating Co., 39 IBLA 182 (Jan. 31, 1979)

Pending applications for rights-of-way filed under the Acts of Feb. 15, 1901, and Mar. 4, 1911, shall be considered as applications under the Federal Land Policy and Management Act of 1976.

New England Fish Co., 42 IBLA 200 (Aug. 22, 1979)

ACT OF FEBRUARY 25, 1920

Where an appraisal has followed established criteria in calculating the fair market value of rental for a right-of-way, it will be affirmed, absent a showing by positive and substantial evidence that the appraisal is in error.

Western Slope Gas Co., 21 IBLA 119 (July 14, 1975)

APPLICATIONS

Where an appraisal has followed established criteria in calculating the fair market value of rental for a right-of-way, it will be affirmed, absent a showing by positive and substantial evidence that the appraisal is in error.

Western Slope Gas Co., 21 IBLA 119 (July 14, 1975)

RIGHTS-OF-WAY--Continued

APPLICATIONS--Continued

A Bureau of Land Management decision rejecting an application under the Act of Feb. 15, 1901, for a domestic water pipeline right-of-way will be sustained where it was made in due regard for the public interest.

Hazel E. Kincaid, 25 IBLA 257 (June 23, 1976)

A decision of the Bureau of Land Management, made in the exercise of its discretion, to reject a right-of-way application pursuant to the Act of Feb. 15, 1901, will be affirmed when the record shows the decision to be a reasoned analysis of the factors involved made in due regard for the public interest, and no sufficient reason to disturb the decision is shown.

Jack M. Vaughan, Judith L. Vaughan, 25 IBLA 303 (June 28, 1976)

The Act of July 26, 1866, R.S. 2477, 43 U.S.C. § 932 (1970), grants a right-of-way for the construction of highways over public lands not reserved for public uses. Where the Bureau of Land Management closes a 400-foot haul road, formerly part of a right-of-way issued to the Oregon State Highway Department on Oregon and California revested land for a material site, without considering the implications of the statute, and appellant submits evidence showing that the road has been used by the public for many years, the decision will be set aside and the case will be remanded for a determination of whether a highway has already been established under the statute or, if not, to afford appellant an opportunity to file an application for a right-of-way under 43 CFR 2822.1-2.

Homer D. Meeds, 26 IBLA 281 (Aug. 26, 1976) 83 I.D. 315

A decision by the Bureau of Land Management rejecting a logging road right-of-way application as not in the public interest will be affirmed in the absence of sufficient reasons to the contrary.

Sun Studs, Inc., 27 IBLA 278 (Oct. 26, 1976) 83 I.D. 518

Under existing regulations, no amended right-of-way application need be filed in connection with a change in the broadcast frequency of a microwave communications station where such change does not require any deviation from the location of a prior subsisting right-of-way grant.

American Telephone and Telegraph Co., 32 IBLA 336 (Oct. 18, 1977)

When considering an application for determination of right-of-way privileges, the Department of the Interior has no power to determine questions of control and appropriation of water rights between private parties which is a matter of State law. An application for a water pipeline right-of-way will not be approved where the applicant has no existing right to the water which he proposes to convey.

Executive Order No. 107 of Apr. 17, 1926, withdrew from appropriation all waterholes on public lands, and a purported right to appropriate water from the spring that postdates the withdrawal is without effect.

Pursuant to the Act of Feb. 15, 1901, repealed by sec. 706(a) of the Act of Oct. 21, 1976 (90 Stat. 2743, 2793), the Department had discretionary authority to permit the use of a right-of-way across public lands

RIGHTS-OF-WAY--Continued

APPLICATIONS--Continued

to supply water for domestic purposes; however, a right-of-way application for such use was properly rejected where approval of the grant would be contrary to the public interest.

Broken H. Ranch Co., 33 IBLA 386 (Jan. 26, 1978)

Approval of a domestic water pipeline right-of-way application filed under the Act of Feb. 15, 1901, is within the discretion of the Secretary of the Interior. Approval of such an application remains a discretionary matter under the Federal Land Policy and Management Act of 1976, 43 U.S.C.A. §§ 1761-1771 (West Supp. 1977). Neither an application for a right-of-way nor the building of a pipeline on public land without prior authorization earns an applicant a right to a right-of-way under these statutes.

A decision rejecting an application for a domestic water pipeline right-of-way will be affirmed when the record shows the decision to be a reasoned analysis of the factors involved made in due regard for the public interest, and no sufficient reason to disturb the decision is shown.

It is appropriate for the Bureau of Land Management to reject a right-of-way application for a pipeline to convey water from a spring on public lands to private lands where it has determined that the overall effect of granting similar applications in a given area would be adverse to the public interest and allowance of one application might establish a precedent contrary to the public interest.

Stanley S. Leach, Roxanna M. Leach, 35 IBLA 53 (May 9, 1978)

Applications for rights-of-way on public lands pending on Oct. 21, 1976, are to be considered as filed under the Federal Land Policy and Management Act of 1976.

Arnold E. Hedell, 37 IBLA 22 (Sept. 12, 1978)

Applications for rights-of-way for oil and gas pipelines, or amendments thereto which were pending at the time of the passage of the Trans-Alaska Pipeline Authorization Act of Nov. 16, 1973, 87 Stat. 579, amending sec. 28 of the Mineral Leasing Act, 30 U.S.C. § 185 (1976), may only be granted pursuant to the provisions of that Act.

Alaska Pipeline Co., 38 IBLA 1 (Nov. 8, 1978)

The regulations of this Department have the force and effect of law, and are binding upon the Secretary and those who exercise his delegated authority. An application for a right-of-way pursuant to 43 CFR 2802.1-1 which does not comply with the clear and unequivocal requirements of the regulation must be rejected.

Personnel of BLM are not required to alter, modify, or correct an application for a right-of-way in order to conform such application to the requirements of the regulation under which it was filed.

Beehive Telephone Co., Inc., 38 IBLA 80 (Nov. 9, 1978)

RIGHTS-OF-WAY--Continued

APPLICATIONS--Continued

Given the specific facts presented by the right-of-way application, where the use of a large percentage (71% - 89%) of the reservoir water is not known, the Secretary cannot make an "informed decision" on the application, as required by Title V of the Federal Land Policy and Management Act of 1976, 90 Stat. 2743 (Oct. 21, 1976), 43 U.S.C. § 1761 et seq. (1976) (FLPMA), and therefore may not proceed to consider the application.

The apparent discretion granted to the Secretary in sec. 1761 of FLPMA which states that the Secretary shall require such information "which he deems necessary" to grant a right-of-way must be interpreted in light of sec. 1764's specific mandate to submit a plan of operation, sec. 1765's specific mandate to include protective terms and conditions, and Congress reference to "the use, or intended use" of the right-of-way. Therefore, information about the intended use--as opposed to possible uses--of the water is necessary to the Secretary's decision whether to grant the application, under the circumstances presented by this case.

The Secretary could establish general policy in right-of-way regulations which would provide specific guidelines for determining how much uncertainty about use will prevent the processing of right-of-way applications.

Federal Land Policy and Management Act's Effect on the Right-of-Way Application for the Middle Fork Reservoir on the Powder River, Wyoming, M-36900 (Jan. 12, 1979) 86 I.D. 293

Under the Federal Land Policy and Management Act of 1976, approval for a right-of-way for a timber access road is discretionary. A decision by BLM rejecting such an application will be affirmed when the record shows the decision to be a reasoned analysis of the factors involved, made with due regard for the public interest.

Lowell Durham, 40 IBLA 209 (Apr. 10, 1979)

Pending applications for rights-of-way filed under the Acts of Feb. 15, 1901, and Mar. 4, 1911, shall be considered as applications under the Federal Land Policy and Management Act of 1976.

New England Fish Co., 42 IBLA 200 (Aug. 22, 1979)

CANCELLATION

Sec. 108 of Title 23, United States Code, does not require a State to file with the Department of the Interior proof of construction or utilization of a material site right-of-way issued pursuant to the Federal Aid Highway Act.

The "Secretary" referred to in that section is the Secretary of Transportation, and administration of that provision is a function of the Department of Transportation. Therefore, an apparent failure of compliance by the State does not mandate summary cancellation of the right-of-way by the Department of the Interior.

The Bureau of Land Management in granting a material site right-of-way pursuant to 23 U.S.C. § 317 (1970), may impose special terms and conditions which are not incompatible with the Act or the public interest, and a failure on the part of the grantee to comply will make the right-of-way subject to cancellation.

Where a regulation recites that a right-of-way "shall be subject to cancellation" for violation of its terms and conditions, the authorized officer is invested with

RIGHTS-OF-WAY--Continued

CANCELLATION--Continued

the discretion to cancel or not, depending upon the circumstances.

State of Alaska, Department of Highways, 20 IBLA 261 (May 19, 1975) 82 I.D. 242

A right-of-way granted pursuant to the Act of Feb. 15, 1901, may, in the discretion of the Secretary of the Interior, be canceled for either abandonment or nonuse; the holder of the right-of-way may be required to restore the area.

H. L. Townsend, 26 IBLA 175 (Aug. 6, 1976)

A right-of-way issued pursuant to the Act of Feb. 15, 1901, for the construction, maintenance, and operation of a water tank site, water pipeline, and access road is properly canceled where the permittee has not completed construction within 5 years from the date of the grant.

Neil J. Cummins, 32 IBLA 384 (Nov. 3, 1977)

Although a right-of-way granted under the Act of Jan. 21, 1895, was previously subject to cancellation by the authorized officer for non-use pursuant to 43 CFR 2802.2-3, the Federal Land Policy and Management Act of 1976 provides that suspension or termination of a right-of-way requires an appropriate administrative proceeding pursuant to 5 U.S.C. § 554 (1970), except where the right-of-way provides by its terms that it will terminate in such event.

Western Aggregates of Mineral & Rock, Inc., 34 IBLA 164 (Mar. 14, 1978)

CONDITIONS AND LIMITATIONS

The Bureau of Land Management in granting a material site right-of-way pursuant to 23 U.S.C. § 317 (1970), may impose special terms and conditions which are not incompatible with the Act or the public interest, and a failure on the part of the grantee to comply will make the right-of-way subject to cancellation.

State of Alaska, Department of Highways, 20 IBLA 261 (May 19, 1975) 82 I.D. 242

The Department of the Interior may condition approval of right-of-way applications filed pursuant to the Act of Mar. 3, 1891, by requiring acceptance of conditions for the protection of the public interest so long as such conditions are neither inconsistent with nor tend to unreasonably burden the proposed right-of-way projects.

Grindstone Butte Project, 24 IBLA 49 (Feb. 23, 1976)

The Secretary could establish general policy in right-of-way regulations which would provide specific guidelines for determining how much uncertainty about use will prevent the processing of right-of-way applications.

Federal Land Policy and Management Act's Effect on the Right-of-Way Application for the Middle Fork Reservoir on the Powder River, Wyoming, M-36900 (Jan. 12, 1979) 86 I.D. 293

RIGHTS-OF-WAY--Continued

CONDITIONS AND LIMITATIONS--Continued

The grant of a right-of-way to cross Federal land for a proposed pipeline which is neither Federally authorized nor funded is an "undertaking" within the meaning of the National Historic Preservation Act, *as amended*, 80 Stat. 915, 16 U.S.C. § 470 *et seq.* (1976). However, construction of segments of the pipeline which do not cross Federal land, and which are neither Federally licensed nor funded, is not an "undertaking" under that Act, and the provisions of that Act do not apply to such segments.

The Department of the Interior may condition approval of a right-of-way application for the construction of a gas pipeline by requiring acceptance of conditions for the protection of the public interest so long as such conditions are neither inconsistent with nor tend to unreasonably burden the proposed right-of-way.

Western Slope Gas Co., 40 IBLA 280 (Apr. 18, 1979)

Sec. 106 of the National Historic Preservation Act requires an agency granting a right-of-way over Federal lands for a pipeline or other linear project to (1) identify potentially affected cultural resources; (2) consult regarding such effect with the Advisory Council on Historic Preservation; and (3) to consider these cultural resources in making or denying the grant. A rule of reason applies as to the scope of the lands to be inventoried, and the degree of effort required.

The grant of a right-of-way over Federal land for a pipeline or other linear project is a Federal undertaking which requires the authorizing agency to comply with sec. 106 of the National Historic Preservation Act, as implemented by 36 CFR Part 800.

Sec. 106 of the National Historic Preservation Act requires an agency granting a right-of-way over Federal lands for a pipeline or other linear project to identify and consider cultural resources on non-Federal lands affected by construction activities on Federal lands.

Sec. 106 of the National Historic Preservation Act requires an agency granting a right-of-way over Federal lands for a pipeline or other linear project to identify and consider cultural resources on non-Federal lands which may foreseeably be affected by the grant of the right-of-way. A rule of reason applies in determining the extent of non-Federal lands on which cultural resources are to be identified, and the degree of effort required. 36 CFR 800.4(a).

In the grant of a right-of-way over Federal lands for a pipeline or other linear project, the scope of lands to which the requirements of sec. 106 of the National Historic Preservation Act apply may be analogous to the scope of lands to be considered pursuant to sec. 102 of the National Environmental Policy Act.

The Extent to Which the National Historic Preservation Act Requires Cultural Resources to be Identified and Considered in the Grant of a Federal Right-of-Way, M-36917 (Dec. 6, 1979) 87 I.D. 27 (1980)

FEDERAL HIGHWAY ACT

Sec. 108 of Title 23, United States Code, does not require a State to file with the Department of the Interior proof of construction or utilization of a material site right-of-way issued pursuant to the Federal Aid Highway Act.

The "Secretary" referred to in that section is the Secretary of Transportation, and administration of that

RIGHTS-OF-WAY--Continued

FEDERAL HIGHWAY ACT--Continued

provision is a function of the Department of Transportation. Therefore, an apparent failure of compliance by the State does not mandate summary cancellation of the right-of-way by the Department of the Interior.

The Bureau of Land Management in granting a material site right-of-way pursuant to 23 U.S.C. § 317 (1970), may impose special terms and conditions which are not incompatible with the Act or the public interest, and a failure on the part of the grantee to comply will make the right-of-way subject to cancellation.

State of Alaska, Department of Highways, 20 IBLA 261 (May 19, 1975) 82 I.D. 242

FEDERAL LAND POLICY AND MANAGEMENT ACT OF 1976

A right-of-way for a communication site for which application was made under the Act of Mar. 4, 1911, shall conform to the provisions of the Federal Land Policy and Management Act of 1976, sec. 510, 90 Stat. 2743, 2782, when application for grant was pending on Oct. 21, 1976.

Where the current fair rental value of a right-of-way has been determined in accordance with accepted appraisal procedures, and the permittee contends that the rental is excessive, the burden is upon the lessee to prove by positive, substantial evidence that the appraisal is in error. Where the lessee fails to do so, the appraisal will stand.

Four States Television, Inc., 32 IBLA 205 (Sept. 19, 1977)

Sec. 503 of the Federal Land Policy and Management Act of 1976 gives the Secretary discretionary authority with respect to issuance of rights-of-way. It would not be in public interest to grant appellant right-of-way because of inadequate water flow in Shoshone River and because of potential interference with planning for a modification of Buffalo Bill Dam. A decision by BLM, made in exercise of its discretion, to reject a water pipeline right-of-way application will be affirmed when the record shows the decision to be a reasoned analysis of factors involved made in due regard for public interest, and no sufficient reason to disturb decision is shown.

Broken H Ranch Co., 34 IBLA 182 (Mar. 21, 1978)

Approval of a domestic water pipeline right-of-way application filed under the Act of Feb. 15, 1901, is within the discretion of the Secretary of the Interior. Approval of such an application remains a discretionary matter under the Federal Land Policy and Management Act of 1976, 43 U.S.C.A. §§ 1761-1771 (West Supp. 1977). Neither an application for a right-of-way nor the building of a pipeline on public land without prior authorization earns an applicant a right to a right-of-way under these statutes.

A decision rejecting an application for a domestic water pipeline right-of-way will be affirmed when the record shows the decision to be a reasoned analysis of the factors involved made in due regard for the public interest, and no sufficient reason to disturb the decision is shown.

Stanley S. Leach, Roxanna M. Leach, 35 IBLA 53 (May 9, 1978)

RIGHTS-OF-WAY--Continued

FEDERAL LAND POLICY AND MANAGEMENT ACT OF 1976--Continued

Given the specific facts presented by the right-of-way application, where the use of a large percentage (71% - 89%) of the reservoir water is not known, the Secretary cannot make an "informed decision" on the application, as required by Title V of the Federal Land Policy and Management Act of 1976, 90 Stat. 2743 (Oct. 21, 1976), 43 U.S.C. § 1761 *et seq.* (1976) (FLPMA), and therefore may not proceed to consider the application.

The apparent discretion granted to the Secretary in sec. 1761 of FLPMA which states that the Secretary shall require such information "which he deems necessary" to grant a right-of-way must be interpreted in light of sec. 1764's specific mandate to submit a plan of operation, sec. 1765's specific mandate to include protective terms and conditions, and Congress' reference to "the use, or intended use" of the right-of-way. Therefore, information about the intended use--as opposed to possible uses--of the water is necessary to the Secretary's decision whether to grant the application, under the circumstances presented by this case.

Federal Land Policy and Management Act's Effect on the Right-of-Way Application for the Middle Fork Reservoir on the Powder River, Wyoming, M-36900 (Jan. 12, 1979) 86 I.D. 293

Under the Federal Land Policy and Management Act of 1976, approval for a right-of-way for a timber access road is discretionary. A decision by BLM rejecting such an application will be affirmed when the record shows the decision to be a reasoned analysis of the factors involved, made with due regard for the public interest.

Lowell Durham, 40 IBLA 209 (Apr. 10, 1979)

Pending applications for rights-of-way filed under the Acts of Feb. 15, 1901, and Mar. 4, 1911, shall be considered as applications under the Federal Land Policy and Management Act of 1976.

New England Fish Co., 42 IBLA 200 (Aug. 22, 1979)

NATURE OF INTEREST GRANTED

Although the grants of a right-of-way to a railroad under sec. 2 of the Act of July 1, 1862, and of title to odd-numbered sections of land under sec. 3 of that Act were grants *in praesenti*, the railroad's interest in the right-of-way land stems solely from sec. 2. There is no difference in its interest in portions of the right-of-way land which cross even-numbered sections of land and in portions which cross odd-numbered sections. Minerals underlying the right-of-way were reserved to the United States in both instances.

Title to the oil and gas deposits underlying the right-of-way granted to a railroad by the Act of July 1, 1862, 12 Stat. 489, did not pass under a patent to the land that the right-of-way crosses. Rather, title remains in the United States.

Brown W. Cannon, Jr., et al., 24 IBLA 166 (Mar. 16, 1976) 83 I.D. 80

The Secretary of the Interior does not have authority under the Right-of-Way and Gas Leasing Act of May 21, 1930, 30 U.S.C. § 301 *et seq.* (1970), to dispose of deposits of oil and gas underlying a railroad right-of-way granted pursuant to the Act of Mar. 3, 1875, when the lands traversed by the right-of-way were later patented under the Act of Apr. 24, 1820, without any reservation for minerals. In such case, title to the

RIGHTS-OF-WAY--Continued

NATURE OF INTEREST GRANTED--Continued

mineral estate was included within the grant to the patentee.

Amerada Hess Corp., 24 IBLA 360 (Apr. 27, 1976)
83 I.D. 194

The grantee of a right-of-way for irrigation or drainage purposes may not fence the right-of-way unless it is necessary to protect the grantee's use. Where the necessity of protecting an irrigation reservoir from incursion by cattle did not appear on the record, and the fence was not so located as to serve that purpose, fencing the reservoir constituted a trespass.

Joe Stewart, 33 IBLA 225 (Dec. 28, 1977)

A right-of-way issued pursuant to the Act of Jan. 21, 1895, gives the holder thereof an exclusive right of user.

Western Aggregates of Mineral & Rock, Inc., 34 IBLA 164 (Mar. 14, 1978)

RULE OF APPROXIMATION

The special rule of approximation for geothermal lease offers is applied by subtracting from the total acreage of the offer the acreage of the irregular subdivision which caused the excess acreage. Where a geothermal lease offer describes four complete sections and the area embraced in the application exceeds the acreage limit because one or more of the sections is irregular, the offer may be considered if deletion of the irregular section (or one of them if there is more than one) would cause an acreage deficiency (acreage limit less acreage described in the offer) greater than the excess acreage resulting from inclusion of the section.

Nelson B. Hunt, 27 IBLA 365 (Nov. 8, 1976)

RULES OF PRACTICE

(See also Appeals, Contests and Protests, Contracts, Federal Coal Mine Health and Safety Act of 1969, Hearings, Indian Probate, Practice Before the Department--if included in this Index.)

GENERALLY

Where the party bearing the risk of nonpersuasion does not appear at a hearing ordered pursuant to 43 CFR 4.415, that party's appeal is properly dismissed.

Stanley G. West, 18 IBLA 337 (Jan. 10, 1975)

A Bureau of Land Management State Office may reconsider one of its decisions prior to the filing of an appeal in the case, but the filing of an appeal terminates that authority.

John J. Sexton (On Reconsideration), 20 IBLA 187 (May 7, 1975)

RULES OF PRACTICE--Continued

GENERALLY--Continued

Where a lessee fails to pay the annual rental on or before the anniversary date, and where the lessee knew, or should have known, that the payment was due, estoppel will not operate to relieve the lessee of the consequent automatic termination of the lease.

The Polumbus Corp., 22 IBLA 270 (Oct. 30, 1975)

A stipulation as to procedure only involving two appeals arising under the same contract is disregarded where following the submission of simultaneous briefs under a cross motions for summary judgment procedure, the Board finds some of the terms of the stipulation in which it had acquiesced to be at variance with the rule in the Court of Claims against the splitting of the cause of action under a single and indivisible contract and that adherence to the stipulation could be prejudicial to the contractor in certain foreseeable circumstances. The stay of proceedings provided for by the stipulation with respect to one appeal is therefore vacated and as a corollary to such action the appellant is directed to file its complaint.

Finding that it has inherent discretion to order consolidation of appeals in appropriate cases, the Board orders the consolidation of two appeals which the appellant has asserted involve common questions of law and fact and which, in any event, arose under the same contract, involve the same attorneys and, presumably, the same witnesses.

Appeals of Armstrong & Armstrong, Inc., IBCA-1061-3-75 and IBCA-1072-7-75 (Apr. 7, 1976)
83 I.D. 148

Where it appears that the Bureau of Land Management determined the status of land without considering the effect of conflicting surveys and maps, and where there is insufficient data in the case file for this Board to resolve the conflicts the decision will be remanded to the Bureau for reconsideration in light of those conflicts.

Beverly Trull, 25 IBLA 157 (June 10, 1976)

Where an attorney files an answer to a contest concerning mining claims on behalf of certain individuals, who, during the pendency of the contest proceedings, transfer their interests in the mining claims to a corporation of which they are major stockholders and directors, and the attorney represents those individuals and the corporation at the contest hearing, the corporation is bound by the determination reached therein, even though the corporation may not have received actual notice of the contest.

Service of a document upon a person's attorney of record constitutes effective service upon such person.

United States v. Nine Development Corp., et al., 27 IBLA 238 (Oct. 18, 1976)

A document which is sent by the Bureau of Land Management to an oil and gas lessee by certified mail is considered to be served upon the lessee when a receptionist in lessee's office signs the return receipt card, and the lessee will be charged with notice as of that date as to the contents of such document.

Lone Star Producing Co., 28 IBLA 132 (Nov. 19, 1976)

RULES OF PRACTICE--Continued

GENERALLY--Continued

The fact that the contest regulations may not contain a specific provision providing for the assertion of affirmative defenses or counterclaims in an answer to a contest complaint does not necessarily bar an administrative law judge from consideration of the substance of such assertions.

United States v. Jerry L. Crow, 28 IBLA 345 (Jan. 24, 1977)

A mining claim is properly declared null and void where the Government establishes a prima facie case of lack of discovery, and the contestee does not show by a preponderance of the evidence that a discovery has been made.

United States v. Chester L. Ramsey, 29 IBLA 243 (Mar. 25, 1977)

A Bureau of Land Management decision, dismissing an answer to contest complaints filed in behalf of individual contestees and a company, and holding mining claims null and void because it appeared the company did not own the claims and because the answer was filed in behalf of the individual contestees by someone not authorized to practice in their behalf, will be vacated where on appeal it is shown that within the time for filing the answer the claims had been transferred to the company. There is no need to dismiss the contest and initiate a new contest against the company since a timely answer has been filed in its behalf; instead, the complaints should be amended to substitute the company as the contestee and party in interest and the contest proceeding should go forward against it.

Sharon K. Milazzo et al., 33 IBLA 57 (Dec. 5, 1977)

Where, in a quasi-judicial Departmental proceeding, an individual entered an appearance as attorney for a party to the action, and it was subsequently revealed that he was not qualified to practice before the Department under any of the provisions of 43 CFR 1.3, the presiding administrative law judge properly refused to continue to recognize his appearance or to permit him to continue to conduct the case in a representative capacity.

United States v. John Gayanich, 36 IBLA 111 (July 14, 1978)

Service by registered or certified mail may be proved by a Post Office return receipt showing that the document was delivered to the person's record address. The receipt need not be signed necessarily by the person to whom the mail was addressed.

Lillian Sweet, 37 IBLA 25 (Sept. 14, 1978)

The use of a post office box number as an address is not barred by the oil and gas leasing regulations governing applications or by the Rules of Practice of the Department.

Duncan Miller, 38 IBLA 259 (Dec. 8, 1978)

RULES OF PRACTICE--Continued

GENERALLY--Continued

While an appeal of one decision of the BLM is pending before the Board, the BLM is without authority to exercise jurisdiction in the matter which is the subject of the appeal. Where the BLM exercises jurisdiction and the subsequent decision presents the same issue as the first, and the parties are given an adequate opportunity at the hearing and on appeal to present evidence and argue as to this issue, the Board will proceed to consider both decisions on their merits.

California Ass'n of Four-Wheel Drive Clubs et al., 38 IBLA 361 (Dec. 29, 1978)

The right to administrative relief is a privilege afforded by law to persons who consider themselves interested or aggrieved. The burden is upon the interested person to act affirmatively to protect perceived interests. Such a person is not entitled to wait until all other interested persons act, to speculate on the outcome, and then, if the decision is adverse, to seek to reopen the matter on his or her own behalf, when that person has been afforded notice of all the proceedings.

Western Slope Gas Co. (On Reconsideration), 43 IBLA 259 (Oct. 15, 1979)

Service of a BLM decision may be made by sending the document by registered or certified mail, return receipt requested, to an applicant's address of record in the Bureau, and it is irrelevant who there actually receives and signs for it.

Martha P. Merrill, 44 IBLA 136 (Nov. 30, 1979)

APPEALS

Generally

The doctrine of administrative finality, the administrative counterpart of res judicata, ordinarily bars reopening the issue of a permittee's class 1 base property qualifications resolved in a prior Departmental decision, but will not prevent modification of a decision to correct a conclusion inconsistent with the legal ruling of the case and apparently the result of an oversight as to the basis of the factual finding upon which it relies.

J. J. Cowgill et al., 19 IBLA 274 (Apr. 7, 1975)

An appeal filed for an appellant by an attorney-in-fact who is not himself qualified to practice before the Department under 43 CFR 1.3 is subject to summary dismissal.

Haruyuki Yamane et al., 19 IBLA 320 (Apr. 7, 1975)

Where an appeal has been taken and a final Departmental decision has been reached, the principle of res judicata will operate to bar consideration of a new appeal arising from a later proceeding involving the same claim and same issues, absent compelling legal or equitable reasons for reconsideration.

Ben Cohen, Ray C. Nordstrom, 21 IBLA 330 (Aug. 18, 1975)

RULES OF PRACTICE--Continued

APPEALS--Continued

Generally--Continued

Where a desert land applicant appeals from a decision of the BLM holding his application incomplete and, therefore, without priority of filing as against subsequent applications, which were allegedly perfected before the earlier application was corrected and refiled, the case will be remanded for final action on the respective applications so as to avoid premature, piecemeal adjudication.

Michael E. Heaney, 21 IBLA 339 (Aug. 18, 1975)

Nelda E. McAndrew, 24 IBLA 205 (Mar. 22, 1976)

Decisions rendered by officers of the Bureau of Land Management should contain relevant appeal information except in those situations in which it is clear that no appeal lies.

L. O. Power et al., 22 IBLA 15 (Sept. 5, 1975)

When the issues presented on appeal are moot the appeal will be dismissed.

Duncan Miller, 22 IBLA 52 (Sept. 17, 1975)

A petition for revocation of a withdrawal must be denied where the holding agency does not consent, and Bureau of Land Management should inform the applicant that further correspondence relative to his petition should be addressed to the holding agency.

Robert D. Hughes, 22 IBLA 121 (Sept. 26, 1975)

On appeal from decision(s) rejecting oil and gas lease offer(s) insofar as they include land(s) within a lava flow under consideration for primitive or natural area status, when the Bureau of Land Management indicates that it is willing to lease some of the land(s) under a no-surface-occupancy stipulation, and the offeror(s) indicate they would accept such a stipulation for all the land(s) at issue, the decision(s) will be set aside and the case(s) remanded for consideration of issuance of lease(s) containing no-surface-occupancy stipulation(s) on the land(s) in the lava flow.

Houston Oil and Minerals Corp., Leland A. Hodges (Trustee), 22 IBLA 172 (Sept. 30, 1975)

Leland A. Hodges (Trustee), 23 IBLA 142 (Dec. 23, 1975)

An appeal to the Director, Geological Survey, is properly dismissed by him where the appellant failed to comply with the procedure prescribed by the applicable regulations with respect to the form and content of the notice of appeal, the time afforded for the filing of additional reasons, arguments or briefs, and the procedure for obtaining an extension of such time, and no valid reason is given which would warrant excusing such failures as an exercise of administrative discretion.

Robert B. Ferguson, 23 IBLA 29 (Dec. 2, 1975)

RULES OF PRACTICE--Continued

APPEALS--Continued

Generally--Continued

The Board of Land Appeals will not give favorable consideration to new or additional evidence submitted with an appeal from a rejection of a Native allotment application in the absence of a satisfactory showing why the evidence was not submitted to Bureau of Land Management within the period afforded the applicant for the submission of such evidence.

Alexandra Atchak, 23 IBLA 81 (Dec. 12, 1975)

Where a contract for the construction of a powerline contained two rates for the erection of tower steel and the contractor, contending that the contract was ambiguous (which was admitted by the Government in part), claimed additional compensation at the higher helicopter erection rate and filed a request for the production of documents in nine separate categories which request was opposed by the Government principally upon the ground that the documents were irrelevant to any issue in the appeal, the Board, following the rule that it is not a valid objection that information sought in discovery proceedings may not be admissible at the hearing if the request appears reasonably calculated to lead to the discovery of admissible evidence, grants appellant's request in principal part.

Appeal of Commonwealth Electric Co., IBCA-1048-11-74 (Dec. 18, 1975) 82 I.D. 625

Where the record of a Native allotment application at the time of adjudication shows that rejection would be proper, appellant will not be allowed on appeal to submit data which might warrant a different result, absent a clear and convincing showing explaining why the information was not afforded to the Bureau of Land Management when appellant was called upon for such data.

David E. Stevens, 23 IBLA 221 (Jan. 8, 1976)

The Board of Land Appeals will not give favorable consideration to new or additional evidence submitted with an appeal from rejection of a Native allotment satisfactory to it why the evidence was not submitted to the Bureau of Land Management within the 60-day period afforded the applicant to submit a further evidence in support of his application. General, rather than specific, allegations of difficulties in travel and communicating in Alaska are not satisfactory showings of the reason for late filing of such evidence.

Linda L. Walker, 23 IBLA 299 (Jan. 14, 1976)

The Board of Land Appeals may entertain and, where appropriate, grant a motion by the Bureau of Land Management to remand a case to it for further consideration on the question of whether an environmental impact statement must be filed, even though an appellant, who has protested against a negative declaration that no impact statement is required, objects to the remand.

Harold Gillis, 24 IBLA 208 (Mar. 25, 1976)

A district manager's failure to hold an Advisory Board meeting on a grazing applicant's protest is mooted by a subsequent regulatory amendment terminating graziers' rights to an Advisory Board meeting on protests. In any event, the case would not be remanded for such a

RULES OF PRACTICE--Continued

APPEALS--Continued

Generally--Continued

meeting when there is no prejudice because the applicant is foreclosed by the grazing regulation from the possibility prevailing on his protests.

Phil J. Hillberry, 24 IBLA 283 (Mar. 31, 1976)

A stipulation as to procedure only involving two appeals arising under the same contract is disregarded where following the submission of simultaneous briefs under a cross motions for summary judgment procedure, the Board finds some of the terms of the stipulation in which it had acquiesced to be at variance with the rule in the Court of Claims against the splitting of the cause of action under a single and indivisible contract and that adherence to the stipulation could be prejudicial to the contractor in certain foreseeable circumstances. The stay of proceedings provided for by the stipulation with respect to one appeal is therefore vacated and as a corollary to such action the appellant is directed to file its complaint.

Finding that it has inherent discretion to order consolidation of appeals in appropriate cases, the Board orders the consolidation of two appeals which the appellant has asserted involve common questions of law and fact and which, in any event, arose under the same contract, involve the same attorneys and, presumably, the same witnesses.

Appeals of Armstrong & Armstrong, Inc., IBCA-1061-3-75 and IBCA-1072-7-75 (Apr. 7, 1976)
83 I.D. 148

Upon appeal from a decision of an administrative law judge, the Board of Land Appeals may make all findings of fact and conclusions of law based upon the record just as though it were making the decision in the first instance.

Eldon Brinkerhoff, 24 IBLA 324 (Apr. 21, 1976)
83 I.D. 185

Where an issue which gives rise to an appeal is mooted during the pendency of the appeal, the appeal will not be dismissed where the priority of the application is dependent upon the correctness of the original decision.

Caroline L. Hunt, 26 IBLA 218 (Aug. 17, 1976)

Where a decision by an officer of the Department has become final, the principle of res judicata will operate to bar consideration of a new appeal arising from a later proceeding involving the same claim and same issues, absent compelling legal or equitable reasons for reconsideration.

David Loring Gamble, Darrel Houglum, 26 IBLA 249 (Aug. 18, 1976)

Since the Bureau of Land Management has no authority to issue a public land order withdrawing land, such authority existing only in the Secretary, the Under Secretary and the Assistant Secretaries of the Department of the Interior, recommendations by officers of the Bureau of Land Management relating to withdrawals are not subject to review under the provisions of 43 CFR 4.450-2 or 43 CFR 4.410.

City of Kotzebue, 26 IBLA 264 (Aug. 20, 1976)
83 I.D. 315

RULES OF PRACTICE--Continued

APPEALS--Continued

Generally--Continued

Where there is uncertainty regarding title to the oil and gas in an acquired land tract embraced in an oil and gas lease offer, and the evidence provided by the applicant is not sufficient basis for a legal opinion as to the status of title, the offer is properly rejected by the BLM. However, if the applicant provides new evidence on appeal tending to show the existence of a United States interest in the oil and gas in the tract, the case may be remanded for consideration of the new evidence.

Jean Oakason, 27 IBLA 41 (Sept. 22, 1976)

While the Department of the Interior does not rigidly apply the doctrine of administrative finality so as to bar any subsequent reassertion of soldier's additional homestead scrip rights which have been determined to be invalid, it is incumbent upon an applicant seeking to exercise such rights to submit compelling legal or equitable reasons for reconsideration.

George Rodda, Jr., 27 IBLA 186 (Oct. 4, 1976)

An appeal to the Board of an automatic termination of an oil and gas lease will be dismissed as not ripe where appellant sends the appeal to the Board before a Notice of Termination of Lease has been issued and a Petition for Reinstatement rejected by the State Office, Bureau of Land Management.

Read & Stevens, Inc.; Franklin, Aston & Fair, Ltd.; and Colorado Interstate Gas Co., 29 IBLA 154 (Mar. 4, 1977)

A Bureau of Land Management decision extending the lease term of an oil and gas lease for 2 years following the termination of the unit agreement of which the lease was a part is premature, where the lessee has appealed the Geological Survey's determination of the effective date of termination of the unit agreement. The Bureau of Land Management decision will be set aside and the case remanded to await the final outcome of the lessee's appeal of the Geological Survey determination.

Tenneco Oil Co., 29 IBLA 157 (Mar. 7, 1977)

The thrust of 43 CFR 4.410, which limits the right to appeal to those who are parties to a case, is not to restrict access to administrative review of actions of Bureau of Land Management officials, but to provide a logical framework within which such review might be exercised. An "appeal" by an individual or group which has not, prior to the "appeal," participated in the formulation of the action to which objection is being voiced, should be treated as a protest under the provisions of 43 CFR 4.450-2.

California Ass'n of Four Wheel Drive Clubs et al., 30 IBLA 383 (June 10, 1977)

The Board of Land Appeals will entertain and grant a motion by the Bureau of Land Management to remand an oil and gas lease case on appeal to the Board from a decision holding the lease had terminated and denying a petition to reinstate the lease, where BLM discovered, while the case was on appeal, that its decision was predicated on an erroneous factual basis in that annual rental for the lease had actually been paid on time,

RULES OF PRACTICE--Continued

APPEALS--Continued

Generally--Continued

but the check had been misplaced by BLM and was later found.

Kathryn A. Dalton, 31 IBLA 1 (June 15, 1977)

Where a State swampland selection has been rejected on the ground that the land selected has been disposed of, but in fact that land was available to the State, the judgment is valid and binding until set aside. Since the Secretary has jurisdiction to determine whether the land selected is available, he has jurisdiction to decide erroneously. The erroneous decision will not be set aside where the State did not appeal and the decision has remained unchallenged for over 100 years, the State itself sold the land to a color of title applicant's predecessor, and an adverse right has intervened.

John Stuart Hunt, Sherman H. Hunt, 3. IBLA 304 (July 22, 1977) 84 I.D. 421

Implementation of the Taylor Grazing Act of 1934 is committed to the discretion of the Secretary of the Interior. A decision made in the exercise of that discretion must contain such a statement of reasons in support of the decision as will establish that the discretion has been exercised in a manner that is neither arbitrary nor capricious. Review on the issue of abuse of discretion is limited to an inquiry whether the statement of reasons establishes a rational and defensible basis for the decision below.

Andrew [illegible] L. Anderson et al., 32 IBLA 123 (Sept. 12, 1977)

When a right-of-way applicant fails to submit corrected maps and payment of charges within a reasonable time after notice, which notice does not prescribe a specific time therefor, but on appeal applicant explains the reasons for delay, a rejection of the application may be set aside and the case remanded.

Jerrold R. Cooley, Lucy M. Cooley, 32 IBLA 387 (Nov. 7, 1977)

Under 43 CFR 4.401(a), a notice of appeal to the Board of Land Appeals may be considered even if not filed within the 30-day appeal period, where it is filed within 10 days of the deadline date and is transmitted within the appeal period.

United States v. James Becker, 33 IBLA 301 (Jan. 10, 1978)

The publication by the Director, Geological Survey, of a "Notice to Lessees" is not an action appealable to this Board under 30 CFR Part 290, where the "Notice" is a generalized instruction to subordinates of the Geological Survey, and the "Notice," itself, is not self-executing. Specific application of the "Notice" to a lessee is, however, a matter subject to appeal and review within the Board of Land Appeals.

Tenneco Oil Co., 36 IBLA 1 (June 27, 1978)

RULES OF PRACTICE--Continued

APPEALS--Continued

Generally--Continued

Where the Board of Land Appeals has considered an appeal and rendered a final decision holding that a particular oil and gas lease offer was not proper and must be rejected, the applicant may not thereafter appeal the matter to this Board merely because the Bureau of Land Management, in implementing the Board's decision, mistakenly advised him that he had the right to such an appeal. The matter is res judicata, and the subsequent appeal must be dismissed.

Where the Board of Land Appeals, by a previous decision, has held that a particular oil and gas lease offer must be rejected, and the rejected applicant files suit for judicial review of that decision in the United States District Court, and also files a contemporaneous appeal to the Board from a BLM decision implementing the Board's decision, the Board will defer to the Court's jurisdiction and make no decision on the merits of the appeal, which is subject to summary dismissal by the Board.

Donald W. Coyer (Appellant), Alfred L. Easterday (Appellee), 36 IBLA 181 (July 31, 1978)

Where contestant in private homestead entry contest appeals to Board of Land Appeals and makes certain assignments of error by administrative law judge, but allegations of fact upon which those assignments are based were not corroborated at filing of contest complaint, and issues raised by those assignments were not raised in complaint, such assignments are not material for purposes of appeal to the Board.

Ernest C. Lamb v. Richard R. Stoffel, 36 IBLA 201 (Aug. 3, 1978)

Where the Board of Land Appeals has considered an appeal and rendered a final decision holding that certain coal prospecting permits have terminated and that no preference right to a coal lease is attached to any of them, an unapproved assignee of the permits may not thereafter appeal the matter to this Board following Bureau of Land Management notification to the permittees of this Board's decision. The matter is res judicata and such subsequent appeal must be dismissed, absent compelling legal or equitable considerations.

Peabody Coal Co., 36 IBLA 242 (Aug. 14, 1978)

Where the Board of Land Appeals has considered an appeal and rendered a final decision holding that a particular oil and gas lease offer may properly be rejected for the reason that title to the lands involved was uncertain, and a new lease offer for the same lands is again rejected for the same reason, the matter is res judicata, and the subsequent appeal is properly dismissed.

N. L. Industries, Inc., 37 IBLA 335 (Oct. 26, 1978)

The Board of Land Appeals will not exercise its de novo review authority to deny applications for Alaska grazing leases on the basis of trespass where (1) trespass was not cited as a reason for denial of the applications in the decision under appeal, (2) the record does not provide a clear basis for determining the applicant's responsibility for the trespass, and (3) there is no record of compliance with the procedures specified in 43 CFR 9239.0-9(b).

Kenneth R. Lynch, 37 IBLA 346 (Oct. 27, 1978)

RULES OF PRACTICE--Continued

APPEALS--Continued

Generally--Continued

A request for an oral argument before the Board of Land Appeals may be denied when legal issues are well briefed and no useful purpose would be served.

Estate of Charles D. Ashley, 37 IBLA 367 (Nov. 2, 1978) 85 I.D. 403

An appeal from a decision denying a protest against the issuance of a patent must be dismissed if the patent has been issued, because the Department has no jurisdiction to act further in the matter.

Because issuance of a patent removes the land from Departmental jurisdiction, it is not proper to issue that patent simultaneously with dismissal of a protest against the patent application because such action deprives the protester of his right to review and precludes compliance with 43 U.S.C.A. § 1701(a)(5) (West Supp. 1978) which mandates objective administrative review of initial decisions.

Matanuska-Susitna Borough, Inc., 38 IBLA 382 (Dec. 29, 1978)

A mining claim contestee's allegation that BLM wrongly held a mining claim null and void ab initio will not be entertained where the contention is raised long after the time for appealing the decision has passed.

United States v. Jerry Prock et al., 39 IBLA 148 (Jan. 29, 1979)

A party adversely affected by a final order or decision of an officer of the Conservation Division of the Geological Survey has a right to appeal to the Director, Geological Survey, unless the decision was approved by the Secretary or Director prior to promulgation.

A party adversely affected by a final decision of the Director, Geological Survey, had a right of appeal to the Board of Land Appeals in the Office of Hearings and Appeals, Office of the Secretary.

Phoenix Resources Co., 39 IBLA 153 (Jan. 29, 1979)

Where Bureau of Land Management terminates a sodium lease because lessee failed to submit justification for holding a lease in excess of the acreage limitation, the decision will be set aside upon submission or explanation of failure to provide written information, and the case will be remanded for the State Office to determine whether the information submitted on appeal justifies continued lease tenure.

Olin Corp., 39 IBLA 161 (Jan. 29, 1979)

A notice of appeal must be filed within 30 days after appellant is served with the decision from which he is appealing. When a party does not appeal, the doctrine of administrative finality, the administrative equivalent of res judicata, generally bars consideration of the same issue in a later appeal.

Ralph and Ruth Dickinson, 39 IBLA 258 (Feb. 15, 1979)

RULES OF PRACTICE--Continued

APPEALS--Continued

Generally--Continued

Relitigation of the issue of discovery is barred by the principle of res judicata and its corollary, collateral estoppel, insofar as the same lands, parties, and claims are involved, absent compelling legal or equitable reasons for reconsideration.

Under principles of res judicata, a judgment is binding upon all parties to the proceedings in which it is rendered and to their privies. Privity denotes a mutual or successive relationship to the same right in property. Privity exists within the meaning of the doctrine of res judicata to bind a subsequent grantee, transferee, or lienor of property.

United States v. Leroy S. Johnson et al., 39 IBLA 337 (Feb. 28, 1979)

When a State Office rejects the offer of a first-drawn applicant in a drawing under the simultaneous oil and gas leasing program, an appeal by the applicant raises the issue of his qualifications to hold the lease. The qualifications of the second-drawn applicant are irrelevant until such time as the offer of the first-drawn applicant is rejected and all his avenues of appeal are exhausted. However, it is not improper for BLM to name the second-drawn applicant as an adverse party in a decision rejecting the first-drawn applicant.

Thomas E. Flickinger, William S. Flickinger, et al., 40 IBLA 53 (Mar. 16, 1979)

Where the holder of an oil and gas lease on the Outer Continental Shelf has filed a suit in a Federal district court to recover certain royalties paid under his lease, the Board of Land Appeals will affirm a decision of the Director, Geological Survey, holding in abeyance the lessee's request for a refund while the suit is pending.

Tenneco Oil Co., 41 IBLA 195 (June 22, 1979)

A decision by the Bureau of Land Management canceling fee simple patents issued to Indians and simultaneously issuing new Indian trust patents is not subject to review by the Board of Land Appeals, which has no jurisdiction in the matter, where the decision was made at the direction of the Assistant Secretary for Indian Affairs.

Blue Star, Inc., Atomic Western, Inc., Fremont Energy Corp., Ivor Adair, 41 IBLA 333 (July 11, 1979)

The principle of res judicata does not operate to bar consideration of a new Alaska Native allotment application under 43 U.S.C. §§ 270-1 through 270-3 (1970), despite previous denial of a prior application, when the initial adjudication was confined to a single issue, which issue is irrelevant under a later interpretation of the statute.

Rika Murphy, Gene H. Seagge, 42 IBLA 51 (July 31, 1979)

Mailing to the Bureau of Indian Affairs a carbon copy of a decision rejecting an application for an Alaska Native allotment is not service upon the applicant so as to comply with 43 CFR 4.401.

Gust J. Heft, Sr., 42 IBLA 86 (Aug. 13, 1979)

RULES OF PRACTICE--Continued

APPEALS--Continued

Generally--Continued

The relaxed procedural rules relating to the filing of statements of reasons for appeal in Native allotment cases enunciated in the letter of Sept. 24, 1975, and extended in the order of Nov. 26, 1976, IBLA 76-715, are hereby revoked. All future requests for extensions of time must comport with the regulations found at 43 CFR 4.22(f)(2).

Where, in a decision holding a Native allotment for approval and a State selection for rejection to the extent of a conflict, the Bureau of Land Management grants the State 30 days to initiate a private contest challenging the Native allotment, the 30-day appeal period will commence upon expiration of the 30 days accorded the State for initiation of a private contest and not with receipt of the decision.

Where it appears that a party did not realize that an election of remedies was mandated by Departmental procedures, a decision requiring the initiation of a private contest will be set aside, and the party will be permitted a period of time in which to initiate a private contest, or alternatively, waive such private contest and pursue a direct appeal on the question of whether a Government contest should issue.

State of Alaska et al., 42 IBLA 94 (Aug. 16, 1979)

Where an appellant admits in correspondence with the Department that the decision of the Bureau of Land Management State Office holding his mining claim invalid is correct, the appeal may be dismissed.

Ernest V. Hiniker, 43 IBLA 153 (Sept. 28, 1979)

Upon assuming jurisdiction of an appeal, the Board of Land Appeals has full authority to consider the entire record in making a decision, and its review is not limited to the theories of law upon which the parties have proceeded.

United States v. Elbert Gassaway, 43 IBLA 382 (Oct. 31, 1979)

The filing of a timely protest suspends the authority of the State Office to act upon the matter until the protest has been ruled upon. Further, action is to be additionally suspended after a ruling on the protest for the period of time in which a person adversely affected may file a notice of appeal therefrom.

Where, on appeal from the denial of a protest to the issuance of a right-of-way, an appellant does not show that issuance of the right-of-way was contrary to the law or applicable regulations, a decision rejecting the protest will be affirmed.

James W. Smith, 44 IBLA 275 (Dec. 26, 1979)

Answers

Motion for quantum hearing will be allowed when the Government admitted liability on certain claims in the Answer and the first hearing was limited to entitlement.

Appeal of Scona, Inc., IBCA-1094-1-76 (Dec. 28, 1977)
84 I.D. 1019

RULES OF PRACTICE--Continued

APPEALS--Continued

Answers--Continued

The applicable regulation, 43 CFR 4.414 (1977), allows the Board some discretion in deciding whether to disregard the answer of an appellee who fails to file an answer within 30 days after service on him of the notice of appeal or statement of reasons and whose delay in filing is not waived under the provisions of 43 CFR 4.401(a) (1977).

California Portland Cement Co., Rosebud Coal Sales Co., 40 IBLA 339 (May 10, 1979)

Burden of Proof

A determination by a district manager of the grazing capacity of lands offered for a sec. 15 grazing lease will not be overturned in the absence of a clear showing of error. The burden of proof is upon the party challenging such determination to show that the decision is erroneous or that he has not been dealt with fairly.

John T. Murtha, 19 IBLA 97 (Mar. 4, 1975)

Kaser Brothers, 24 IBLA 265 (Mar. 29, 1976)

A party challenging a determination that lands are within a known geologic structure has the burden of making a clear and definite showing of error in the determination; material indicating that the geologic formation at issue is irregular in quality and productivity does not constitute a showing that the lands are not presumptively productive, *i.e.*, that the lands are not within the known or inferred limits of the multiple and overlapping producing intervals involved.

Nola Grace Ptasynski, Barbara C. Lisco, 19 IBLA 125 (Mar. 5, 1975)

The burden of proving that failure to pay advance rentals on or before the anniversary date was either justifiable or not due to a lack of reasonable diligence is the obligation of the one who failed to make timely payment.

E. J. Harvey, Jr., 19 IBLA 230 (Mar. 25, 1975)

A protestant against the filing of a survey plat bears the burden of proof, *i.e.*, the risk of nonpersuasion, to show why the plat should not be accepted, and the applicant State has the burden of demonstrating that land is swamp and overflowed in character. The protestant against the filing of a survey plat who claims that title to the land passed to the State under the Swamp Lands Act, 43 U.S.C. §§ 981-986 (1970), is properly assessed with the burden of proof, *i.e.*, the risk of nonpersuasion, in the proceeding.

Virgil Lopez et al., 21 IBLA 33 (June 17, 1975)

In a mining claim contest, the claimant is the proponent of the rule or order that he has complied with the provisions of the mining law, which have been brought into issue, and the Government bears the burden only of presenting a prima facie case of invalidity; the claimant must then preponderate on the issues litigated.

United States v. Ed Brandt, 21 IBLA 166 (July 22, 1975)

RULES OF PRACTICE--Continued

APPEALS--Continued

Burden of Proof--Continued

To be able to support a claim for excess reprocurement costs, the Government must establish that work under a reprocurement contract has been performed and that payment has been made.

Appeal of Ballwebers Cleaning Service, IBCA-1057-1-75 (Oct. 2, 1975)

An oil and gas lease bidder appealing from the rejection of his tender on the basis of inadequacy of the bonus bid must show by substantial evidence either (1) the criteria utilized in establishing the minimum bid value failed to include all relevant considerations, or included factors that were not relevant; or (2) the criteria were incorrectly applied.

H & W Oil Co., Inc., 22 IBLA 313 (Nov. 10, 1975)

A claim for acceleration under a contract for the construction of footings for a transmission line is denied where one of appellant's principal contentions was that in a telephone conversation following record show in late September the project engineer had directed that men and equipment be added to the job in order to finish the work by the contract completion date of Nov. 1, but in correspondence conducted with the Government for almost 6 months after such telephone conversation the contractor failed to refer to the directions purportedly received from the project engineer and even failed to reference the particular telephone conversation. Actions taken by the Government's principal inspector were also found not to constitute acceleration orders when the evidence clearly showed that both parties viewed the inspector's action as involving suggestions rather than directions and that whether the suggestions were accepted by the contractor's job superintendent depended upon the exercise of his business judgment.

Appeal of Iversen Construction Co. (a/k/a Iconco), 82 I.D. 646
IBCA-981-1-73 (Dec. 30, 1975)

A claim for a longer time extension under a construction contract due to unusually severe weather is denied where the contracting officer obtained the local climatological data and after reviewing the data granted a time extension when appellant failed to dispute the data or offer any evidence to support its claim for a longer period.

Appeal of David M. Cox, Inc., IBCA-1079-10-75 (Apr. 7, 1976)

Under a contract requiring the use of grout the Board denies a contractor's claim where it finds the terms of the specifications dispositive of the question presented.

Appeal of Whalen & Co., IBCA-1066-3-75 (May 26, 1976)

A first category differing site conditions claim based on the encountering of subsurface waterlines not shown on the contract drawings in the vicinity of a fish hatchery building is denied, where the Board finds that except for the unsupported allegations of the contractor there is nothing in the record to indicate that the experienced subcontractor who performed required excavation in the area where the buried waterlines were located failed to anticipate the conditions he actually encountered.

Although a first category differing site conditions claim is established by the presence of a septic tank in an area where the plans indicate a sewage treatment plant was slated to go, a contractor's claim based thereon is denied where the evidence shows that the location of the sewage treatment plant was changed before any significant amount of work was done in the area where the septic tank was located.

Appeal of William Lagnion (Contractor), IBCA-1083-10-75 (Jan. 5, 1977)

While the burden of showing an excusable cause of delay to exist is on the construction contractor, the invoking of this rule presupposes that the Government will leave this responsibility with the contractor, or, if it undertakes to correspond directly with the subcontractors or suppliers concerning delays experienced, it will inform them of the criteria set forth in the contract for establishing an excusable cause of delay.

Appeal of The J. C. Hester Co., Inc., IBCA-1114-7-76 (Jan. 14, 1977)

A claim for extra work is denied where the appellant does not even undertake to show why the work was considered to be beyond the requirements of the contract.

Appeals of Willie H. Patterson, IBCA-1115-7-76, IBCA-1116-7-76, IBCA-1117-7-76 and IBCA-1118-7-76 (Oct. 28, 1977)

In prosecuting an appeal the burden of proof is upon appellant to establish by credible evidence that it is entitled to an equitable adjustment.

Appeal of Halvorson-Lents (A Joint Venture), IBCA-1059-2-75 (Mar. 3, 1977)

Surveys of the United States, after acceptance, are presumed to be correct and will not be disturbed except upon clear proof that they are fraudulent or grossly erroneous. An appellant challenging a Government resurvey has the burden of establishing by clear and convincing evidence that the resurvey is not an accurate retracement and reestablishment of the lines of the original survey.

Frank Lujan, 30 IBLA 95 (Apr. 29, 1977)

Under a contract requiring contractor to provide all necessary material, equipment and labor, the contractor's admission that it did not have adequate equipment or an efficient work force, as well as a lack of experience in the work required to be performed does not meet the burden of proof to justify an extension of time.

Appeal of Scona, Inc., IBCA-1094-1-76 (May 6, 1977)

RULES OF PRACTICE--Continued

APPEALS--Continued

Burden of Proof--Continued

A mining claimant must prove a discovery under the prudent man test, including that the mineral can be extracted, removed and marketed at a profit.

United States v. Pittsburgh Pacific Co., 30 IBLA 388 (June 15, 1977) 84 I.D. 282

Claimant has the burden of proof of extra work and failed to establish that in placing utility lines the actual work performed differed from contractually required work.

Appeal of Rocky Mountain Construction Co., IBCA-1091-12-75 (Aug. 17, 1977) 84 I.D. 829

An appeal is dismissed as untimely when it was not filed within 30 days of the date on which the contracting officer's final decision was received by a person who was not employed by the appellant but who was authorized to receive his mail during the 6 weeks the appellant was away on vacation. While the appellant denied that such person was authorized to sign a return receipt for certified mail, the Board noted that no question of authority to sign for certified mail had been raised in the contractor's letter requesting an extension in the time for filing the appeal and that no such question was raised until the Government's motion to dismiss the instant appeal was filed.

Appeal of Harry Claterbos Co. JV, IBCA-1153-5-77 (Dec. 6, 1977) 84 I.D. 969

When the contract requires the pipe to be laid in a trench 18 inches in depth measured from the center line of the pipe to the top of the ground line or on top of the ground with 18 inches of cover if rock strata is encountered, the contractor cannot sustain an allegation of a constructive change when the Government insists the requirements be followed and objects to contractor laying the pipe in a trench less than 18 inches in depth.

Appeal of Underground Utility Services, IBCA-1047-11-74, IBCA-1089-11-75 (Dec. 28, 1977)

The Government, after waiver of the original delivery schedule, has the burden of proof that the unilaterally established new schedule is reasonable under all the circumstances existing at the time of the reestablishment, which, however, it failed to show.

Appeal of Systems Technology Associates, Inc., IBCA-1108-4-76 (Jan. 19, 1978) 85 I.D. 12

Where, on appeal, a grantee of a right-of-way makes a substantial showing of error in the revision of the rental rate for use of the right-of-way, and where the State Office has not had an opportunity to consider the grantee's arguments, a decision dismissing a protest to the revised rental rate will be set aside and the case will be remanded in order to afford the State Office an opportunity to review its appraisal in light of the grantee's contentions.

Circle L, Inc., 36 IBLA 260 (Aug. 15, 1978)

RULES OF PRACTICE--Continued

APPEALS--Continued

Burden of Proof--Continued

On appeal, an assessment of damages made by BLM for timber trespass will not be disturbed where neither appellant's contentions nor the record prove that BLM determination was in error.

David Robinson, 36 IBLA 386 (Sept. 5, 1978)

In challenging the Government resurvey, appellant has the burden of establishing by clear and convincing evidence that the resurvey is not an accurate retracement and reestablishment of the lines of the original survey.

Bethel C. Vernon, 37 IBLA 226 (Oct. 16, 1978)

Applicant has burden of establishing entitlement to headquarters site claim, and must demonstrate that he has complied with statute and regulations.

United States v. Maurice L. Wilson, 38 IBLA 305 (Dec. 14, 1978)

United States v. Henry Jay Bush, 40 IBLA 106 (Mar. 27, 1979)

Where arguably conflicting uses of the public lands are at issue and the matter has been committed to the discretion of the BLM, the Board will uphold the decision of the BLM resolving the conflict unless appellant has shown that the BLM did not adequately consider all of the factors involved, including whether less stringent alternatives would accomplish the intended purpose, or that there is sufficient reason to change the result.

California Ass'n of Four-Wheel Drive Clubs et al., 38 IBLA 361 (Dec. 29, 1978)

On appeal from a determination of United States Geological Survey under 30 U.S.C. §§ 1002-03 (1976), rejecting offeror's competitive geothermal lease bid as too low, offeror has the burden of showing that the rejection is arbitrary and capricious and that Survey has no rational basis for rejection of the bid.

Union Oil Co., 38 IBLA 373 (Dec. 29, 1978)

A district manager's decision reached in the exercise of administrative discretion pursuant to the Taylor Grazing Act of 1934 may be regarded as arbitrary or capricious only where it is not supportable on any rational basis and the burden is on the appellant to show by substantial evidence that the decision is improper. A district manager's decision not to reissue a grazing lease for a certain area until that area is fenced and to reduce appellant's AUM's accordingly rests on a rational basis where the facts show that this unfenced area adjoins the bombing range and grazing thereon could result in trespass on the bombing range, inconsistent with the use of the range.

Colvin Cattle Co., Inc., 39 IBLA 176 (Jan. 30, 1979)

RULES OF PRACTICE--Continued

APPEALS--Continued

Burden of Proof--Continued

In review proceedings of notices of violation and cessation orders, the burden of going forward to establish a prima facie case rests with OSM and the ultimate burden of persuasion rests with the applicant for review.

Dean Trucking Co., Inc., 1 IBSMA 229 (Sept. 11, 1979)
86 I.D. 437

An appellant will be held to have failed to sustain its burden of proof and the appeal will be denied where appellant's case is submitted on the record without a hearing and the record consists only of claim letters and pleadings alleging that the contracting officer's findings of fact and decision are erroneous in certain respects. Disputed allegations do not constitute evidence and cannot be accepted as proof of facts.

Appeal of C.I.C. Construction Co., Inc., IBCA-1190-4-78
(Sept. 25, 1979) 86 I.D. 475

The burden of showing that late payment of annual rental for an oil and gas lease is justifiable is on the lessee. An assertion of personal reasons without further explanation, is insufficient to meet this burden. Nor does reliance on receipt of a courtesy notice justify failure to pay rental timely.

William A. Klug, 43 IBLA 255 (Oct. 10, 1979)

Under 43 CFR 3120.3-1, the United States reserves the right to reject all bids, but any rejection must be based on a record sufficient to establish that the rejection has a reasonable basis in fact.

Gerald S. Ostrowski (On Reconsideration after Remand), 44 IBLA 17 (Nov. 6, 1979)

Discovery

A motion for remand of a mining claim contest for further hearing on the grounds of prejudicial surprise, based upon Government counsel's failure to supplement interrogatory answers listing witnesses and exhibits as ordered in lieu of prehearing conference, will be denied where contestee's counsel ignored repeated offers of continuance made at various stages of the hearing.

United States v. Theresa E. Robinson, 21 IBLA 363
(Aug. 25, 1975) 82 I.D. 414

Where a contract for the construction of a powerline contained two rates for the erection of tower steel and the contractor, contending that the contract was ambiguous (which was admitted by the Government in part), claimed additional compensation at the higher helicopter erection rate and filed a request for the production of documents in nine separate categories which request was opposed by the Government principally upon the ground that the documents were irrelevant to any issue in the appeal, the Board, following the rule that it is not a valid objection that information sought in discovery proceedings may not be admissible at the hearing if the request appears reasonably calculated to lead to the discovery of admissible evidence, grants appellant's request in principal part.

Appeal of Commonwealth Electric Co., IBCA-1048-11-74
(Dec. 18, 1975) 82 I.D. 625

RULES OF PRACTICE--Continued

APPEALS--Continued

Discovery--Continued

A mining claim is properly declared null and void where the Government establishes a prima facie case of lack of discovery, and the contestee does not show by a preponderance of the evidence that a discovery has been made.

United States v. Wayne E. Bighley, 30 IBLA 21 (Apr. 7, 1977)

The parties are entitled to discover all documents not privileged which are reasonably likely to lead to admissible evidence and do not cause a burden disproportionate to the probable benefit from the requested discovery taking into account the size of the claims involved and their nature as well as the nature of the defenses.

Appeal of Airco, Inc., IBCA-1074-8-75 (Oct. 17, 1977)
84 I.D. 838

The Federal Rules of Civil Procedure are not binding on administrative agencies.

United States v. Milton Wichner, 35 IBLA 240 (May 30, 1978)

Dismissal

An appeal to the Board of Land Appeals will be dismissed when the appellant fails to file a statement of reasons therefor within the time allowed.

M. R. Williamson, 19 IBLA 6 (Feb. 20, 1975)

An appeal by a concessionaire at a wildlife refuge who alleges that Government harassment of the public, failure to repair roads and other actions resulted in a decrease of business and who seeks therefor to be relieved of payment of a semi-annual franchise fee of 3 percent of gross receipts required under the concession agreement and given the right to sell beer, inter alia, is dismissed for lack of jurisdiction, since the agreement contains no adjustment provisions and the relief requested entails reformation of the agreement, but is remanded to the contracting officer, who has wide discretion under the agreement to provide relief, for further consideration in the light of the Board's opinion.

Appeal of Pirate's Cove Marina, IBCA-1018-2-74
(Feb. 25, 1975) 83 I.D. 065

An appeal from a district manager's decision reducing the authorized use of lands offered under a sec. 15 grazing lease will be dismissed where the grazing season covered by the term of the proposed lease has expired and the appellant must meet a precondition before any future lease issues. The dismissal, however, will be without prejudice to the appellant's submitting evidence to the district manager to disprove the determination of the carrying capacity of the range, if he otherwise meets the precondition for a lease.

John T. Murtha, 19 IBLA 97 (Mar. 4, 1975)

RULES OF PRACTICE--Continued

APPEALS--Continued

Dismissal--Continued

An appeal will be dismissed where the claim on which it is based arose from a mistake in connection with the contractor's bid, resulting from the failure of his timely dispatched telegraphic bid modification to be received prior to bid opening and where it is clear that he intended to file his appeal in the General Accounting Office.

Appeal of P. L. Larsen Co., IBCA-1054-1-75 (Mar. 25, 1975)

An appeal from a decision denying a petition for deferment of annual assessment work on mining claims will be dismissed where the petitioner files evidence with its appeal showing that the assessment work was subsequently performed.

Hibernia Silver Mines, Inc., 20 IBLA 12 (Apr. 14, 1975)

Failure to serve notice of an appeal on an interested party pursuant to 25 CFR 2.36 does not make dismissal mandatory but it may be considered as cause for dismissal by the officer to whom it is made.

Administrative Appeal of J. B. Love v. Area Director, Aberdeen Area Office, et al., 4 IBIA 74 (June 6, 1975)

Under 43 CFR 4.402, an appeal is subject to summary dismissal by the Board of Land Appeals when notice of appeal or statement of reasons is not served on adverse parties within the time prescribed.

Elmer Peterson, 21 IBLA 52 (June 17, 1975)

An appeal to the Board of Land Appeals will be dismissed where the appellant failed to file a timely notice of appeal. A notice of appeal, although received within the 10-day grace period, but not transmitted within the 30-day period following service of the decision, is not timely filed and must be dismissed.

Shelley Anne Trainor, 21 IBLA 326 (Aug. 14, 1975)

Where a contractor has filed an appeal and has failed to file a complain when often requested to do so over a 2-year period, the appeal is dismissed for want of prosecution.

Appeal of Evergreen Engineering, Inc., IBCA-994-5-73 (Sept. 2, 1975) 82 I.D. 427

An appeal from a decision canceling a grazing lease for loss of control of non-Federal lands upon which the lease was based will be dismissed where the lease has expired by its terms. The dismissal will be without prejudice to a new lease application for the grazing lands which the appellant may decide to submit.

Ralph Rogers, 22 IBLA 31 (Sept. 10, 1975)

RULES OF PRACTICE--Continued

APPEALS--Continued

Dismissal--Continued

An appeal to the Board of Land Appeals will be dismissed when the appellant fails to file a statement of reasons in support of the appeal within the time permitted by Departmental regulation.

Thurman Banks et al., 22 IBLA 205 (Oct. 15, 1975)

A qualified heir or devisee of a deceased applicant for a mineral lease under 43 CFR 3564, or the administrator or executor of his estate, may receive the lease in the applicant's stead, or maintain an appeal from the rejection of such application on the same basis as the heirs or representatives of deceased applicants for other kinds of mineral leases where no third-party interests require consideration.

George W. Wright, Sr. (Deceased), 22 IBLA 280 (Oct. 30, 1975)

A statement of reasons which does not point out the grounds upon which the decision appealed from is in error will be treated in the same manner as an appeal in which no statement of reasons is filed and the appeal will be dismissed.

Appellant's failure to timely serve and prove service of appeal on adverse party named in the decision from which the appeal is taken will subject the appeal to summary dismissal.

Richard E. and Phyllis Lee, 22 IBLA 284 (Oct. 30, 1975)

An appeal to the Board of Land Appeals will be dismissed where the appellant failed to file a timely notice of appeal, and the notice, though filed within the 10-day grace period, was not transmitted within the 30-day period following service of the decision.

Martha Charlie, 22 IBLA 287 (Oct. 30, 1975)

An appeal to the Director, Geological Survey, is properly dismissed by him where the appellant failed to comply with the procedure prescribed by the applicable regulations with respect to the form and content of the notice of appeal, the time afforded for the filing of additional reasons, arguments or briefs, and the procedure for obtaining an extension of such time, and no valid reason is given which would warrant excusing such failures as an exercise of administrative discretion.

Robert E. Ferguson, 23 IBLA 29 (Dec. 2, 1975)

A notice of appeal to the Board of Land Appeals must be dismissed where it is not timely filed within the ambit of 43 CFR 4.411(a), and 43 CFR 4.401, since the requirement of timely filing is jurisdictional.

Lavonne E. Grewell, 23 IBLA 190 (Jan. 6, 1976)

A notice of appeal to the Board of Land Appeals must be dismissed in accordance with 43 CFR 4.411(b), where it was filed within the grace period provided by 43 CFR 4.401(a), but was not transmitted within the appeal filing period.

Michael J. S. Miller, 23 IBLA 224 (Jan. 8, 1976)

RULES OF PRACTICE--Continued

APPEALS--Continued

Dismissal--Continued

On appeals from decisions to proceed with proposed timber sales, when the district manager tentatively proposes to withdraw the tracts from sale plans in order more fully to examine appellants' allegations and material submitted in a related appeal, the decisions will be set aside and the cases remanded for further consideration.

Alan Winter, Elizabeth Freeman, et al., 23 IBLA 343 (Jan. 21, 1976)

Where a construction contractor failed to appeal from a notice of termination for default which included findings that the contractor's delay in performing the work was not due to excusable causes, but did file a timely appeal from a damage assessment for, inter alia, the increased cost of completing the work, the Board denied the Government's motion to strike paragraphs of the complaint alleging that the contractor's delay was due to excusable causes and that the termination for default was improper since under the so-called Fulford doctrine, which had been held equally applicable to construction contracts, an appeal from a damage or excess cost assessment following a termination for default allows the contractor to contest the propriety of the termination.

Where certain paragraphs of a complaint filed by a construction contractor in an appeal from a damage assessment following a termination for default raised issues as to the propriety of the termination, the Board denied a Government motion to strike those paragraphs based on contentions that the contractor had agreed that delay in completion of the work was not excusable and that the contractor's agreement to a revised date for completion of the work precluded it from raising issues as to the excusability of delays occurring prior to the agreement, since it is well settled that accord and satisfaction is an affirmative defense which must be pleaded and proved and that allegations of accord and satisfaction raise factual issues as to the intent of the parties at the time of the alleged accord.

Appeal of Airco, Inc., IBCA-1074-8-75 (Apr. 6, 1976)
83 I.D. 137

Where an issue which gives rise to an appeal is mooted during the pendency of the appeal, the appeal will not be dismissed where the priority of the application is dependent upon the correctness of the original decision.

Caroline L. Hunt, 26 IBLA 218 (Aug. 17, 1976)

Where an appellant fails to point out some error in a decision or to show that he has wrongly been deprived of some right, and instead limits his statement of reasons for appeal to allegations which are irrelevant and immaterial, the appeal will be dismissed as frivolous.

Duncan Miller, 28 IBLA 62 (Nov. 10, 1976)

A contractor's claim for additional costs attributed to the Government's delay in requesting contemplated installation services under a contract calling for the furnishing of governors for hydraulic turbines is dismissed for want of jurisdiction where the Board finds that the claim asserted is not redressable under the Changes clause of Standard Form 32 (Supply Contract) or under the special Suspension of Deliveries (or Services) clause which reserves to the Government the right to suspend services and preserves the contractor's right to make claim therefor but fails to provide that any costs attributable to such suspension shall be recoverable by way of an adjustment to the contract price.

Appeal of Cheston Co., IBCA-1093-1-76 (Nov. 19, 1976)
84 I.D. 924

An appeal to the Board of an automatic termination of an oil and gas lease will be dismissed as not ripe where appellant sends the appeal to the Board before a Notice of Termination of Lease has been issued and a Petition for Reinstatement rejected by the State Office, Bureau of Land Management.

Read & Stevens, Inc.; Franklin, Aston & Fair, Ltd.; and Colorado Interstate Gas Co., 29 IBLA 154 (Mar. 4, 1977)

A statement of reasons in support of an appeal which does not point out affirmatively in what respect the decision appealed from is in error does not meet the requirements of the Department's rules of practice and may be dismissed.

Duncan Miller, 29 IBLA 174 (Mar. 14, 1977)

Duncan Miller, 34 IBLA 283 (Apr. 17, 1978)

United States v. David F. Mangum and Donald E. LeGuerre, 35 IBLA 131 (May 22, 1978)

Duncan Miller, 41 IBLA 129 (June 13, 1979)

Where an appellant withdraws an appeal, the appeal must be dismissed.

Where a decision by a Bureau of Land Management official is interlocutory in nature and the appellant fails to show any reason why the decision is in error, or should not be implemented, a purported appeal from such a decision must be dismissed.

Elko County Board of County Supervisors, 29 IBLA 220 (Mar. 23, 1977)

An appeal taken by a subcontractor in its own name is dismissed where the Board finds the subcontractor has no standing to invoke the provisions of the Disputes Clause as a means of securing an adjudication by the Board of the rights and obligations of the contesting parties.

An appeal is dismissed where the prime contractor has stated that nothing will be done to further an appeal taken by a subcontractor in its own name and the Board finds that the action of the prime contractor in giving the Government written notice of a potential claim of changed conditions by the subcontractor and any statements made by the prime contractor endorsing the potential claim at the time such notice was given are not a sufficient basis upon which to ground jurisdiction over the appeal.

Appeal of Divide Constructors, Inc., Subcontractor to Granite Construction Co., IBCA-1134-12-76 (Mar. 25, 1977)
84 I.D. 119

RULES OF PRACTICE--Continued

APPEALS--Continued

Dismissal--Continued

An appeal to the Board of Land Appeals will be dismissed where the enactment of legislation renders moot the questions on appeal.

Gibbonsville Townsite, 30 IBLA 74 (Apr. 18, 1977)

An appeal to the Board of Land Appeals will be dismissed where the enactment of the Federal Land Policy and Management Act renders moot the questions on appeal.

Silver Peak Townsite (Trustee), 30 IBLA 357 (June 10, 1977)

The Government's motion to dismiss an appeal because of the failure of the contractor to give the 20-day written notice required by the Changes clause is denied, where the Board finds that there was timely notice with respect to some of the costs on which the claim is based and that the hearing to be held may show that some or all of the remaining costs fall within other recognized exceptions to the strict application of the 20-day cost-limitation provision.

Appeal of Hartford Accident and Indemnity Co., IBCA-1139-1-77 (June 23, 1977) 84 I.D. 296

Where a right-of-way application has been rejected in part, an appeal therefrom should be dismissed if not filed within the period prescribed in 43 CFR 4.411.

Jerrold R. Cooley, Lucy M. Cooley, 32 IBLA 387 (Nov. 7, 1977)

A Government motion to dismiss an appeal is denied where the ground for the motion is that the contractor failed to raise its allegations before the contracting officer prior to filing its appeal but the Board finds that the contracting officer did have an opportunity to pass upon the principal allegations of the contractor prior to rendering his decision.

Appeal of Briles Wing & Helicopter, Inc., IBCA-1158-7-77 (Dec. 2, 1977) 84 I.D. 967

An appeal is dismissed as untimely when it was not filed within 30 days of the date on which the contracting officer's final decision was received by a person who was not employed by the appellant but who was authorized to receive his mail during the 6 weeks the appellant was away on vacation. While the appellant denied that such person was authorized to sign a return receipt for certified mail, the Board noted that no question of authority to sign for certified mail had been raised in the contractor's letter requesting an extension in the time for filing the appeal and that no such question was raised until the Government's motion to dismiss the instant appeal was filed.

A motion to dismiss an appeal is granted when the appellant had failed to file an appeal within 30 days of the date on which the contracting officer's final decision was received. Respecting the contractor's argument that the 30-day time limit should be waived, the Board noted that the right to extend the time for filing a notice of appeal had been specifically excepted from the grant of authority to the Board as set forth in the regulations governing Board proceedings.

Appeal of Harry Claterbos Co., Jr., IBCA-1153-5-77 (Dec. 6, 1977) 84 I.D. 969

Where appellant's allegations on appeal are immaterial and irrelevant and appellant fails to establish any error in the decision below or any infringement of appellant's rights, the appeal is properly dismissed as lacking in merit.

Duncan Miller, 33 IBLA 83 (Dec. 8, 1977)

The Government's opposition to appellant's request for a hearing and its motion for partial summary judgment in a default termination case are both denied where the contractor contends and the Government denies that the delays experienced by the contractor in attempting to perform the contract were excusable and the Board finds that determining whether delays are excusable in such circumstances involves resolving a fact question which should only be done after the parties have had an opportunity to present their evidence at a hearing where one has been requested.

Appeal of Briles Wing & Helicopter, Inc., IBCA-1158-7-77 (Apr. 14, 1978) 85 I.D. 77

The publication by the Director, Geological Survey, of a "Notice to Lessees" is not an action appealable to this Board under 30 CFR Part 290, where the "Notice" is a generalized instruction to subordinates of the Geological Survey, and the "Notice," itself, is not self-executing. Specific application of the "Notice" to a lessee is, however, a matter subject to appeal and review within the Board of Land Appeals.

Tenneco Oil Co., 36 IBLA 1 (June 27, 1978)

Where the Board of Land Appeals has considered an appeal and rendered a final decision holding that a particular oil and gas lease offer was not proper and must be rejected, the applicant may not thereafter appeal the matter to this Board merely because the Bureau of Land Management, in implementing the Board's decision, mistakenly advised him that he had the right to such an appeal. The matter is res judicata, and the subsequent appeal must be dismissed.

Donald W. Coyer (Appellant), Alfred L. Easterday (Appellee), 36 IBLA 181 (July 31, 1978)

Where the Board of Land Appeals has considered an appeal and rendered a final decision holding that certain coal prospecting permits have terminated and that no preference right to a coal lease is attached to any of them, an unapproved assignee of the permits may not thereafter appeal the matter to this Board following Bureau of Land Management notification to the permittees of this Board's decision. The matter is res judicata and such subsequent appeal must be dismissed, absent compelling legal or equitable considerations.

Peabody Coal Co., 36 IBLA 242 (Aug. 14, 1978)

RULES OF PRACTICE--Continued

APPEALS--Continued

Dismissal--Continued

When appellant has failed to serve a copy of the notice of appeal and statement of reasons on the adverse party named in the decision appealed from, in the manner prescribed in 43 CFR 4.401(c), and the adverse party moves for summary dismissal under 43 CFR 4.413(b), the appeal is properly dismissed where appellant has not responded to the motion for dismissal or acknowledged the procedural deficiency.

Dawley Creek Ranch and L. Franklin Mader, 37 IBLA 30 (Sept. 18, 1978)

An appeal is properly dismissed where the appellant fails to point out the grounds on which the decision appealed from is in error, and the allegations in his statement of reasons are irrelevant and immaterial.

Duncan Miller, 37 IBLA 129 (Oct. 4, 1978)

Where the Board of Land Appeals has considered an appeal and rendered a final decision holding that a particular oil and gas lease offer may properly be rejected for the reason that title to the lands involved was uncertain, and a new lease offer for the same lands is again rejected for the same reason, the matter is res judicata, and the subsequent appeal is properly dismissed.

N. L. Industries, Inc., 37 IBLA 335 (Oct. 26, 1978)

An appeal is properly dismissed where the appellant fails to point out the grounds on which the decision appealed from is in error and the allegations in his statement of reasons are vague and unsupported.

Duncan Miller, 38 IBLA 259 (Dec. 8, 1978)

Where the Board of Land Appeals determines that matters raised in an appeal may become moot, or in any event, will be more clearly delineated by further action of BLM relating to subject matter of the appeal, such an appeal will be dismissed without prejudice to the appellant, subject to its right to assert its views in any future appeal to the Board.

State of Alaska, Department of Highways, 40 IBLA 48 (Mar. 15, 1979)

An appeal from a decision respecting a petition for deferment of assessment work on lode mining claims is properly dismissed where it appears that appellant has no interest in the claims.

Rasmussen Drilling, Inc., 40 IBLA 173 (Apr. 3, 1979)

The Department has determined that an official of the Bureau of Indian Affairs is not entitled to represent a Native allotment applicant in an appeal to the Board of Land Appeals. However, where the case involves the propriety of proofs submitted by the Bureau of Indian Affairs in behalf of a deceased Native allotment applicant, that issue may be resolved.

Ernest L. Olson, Jr. (Deceased), 41 IBLA 179 (June 22, 1979)

RULES OF PRACTICE--Continued

APPEALS--Continued

Dismissal--Continued

The Department has determined that an official of the Bureau of Indian Affairs is not entitled to represent a Native allotment applicant in an appeal to the Board of Land Appeals. However, where the partial rejection of an Alaska Native allotment application turns on the resolution of a factual issue, the case will be remanded to BLM so that heirs or claimants to the estate of the deceased applicant may be afforded notice and opportunity for hearing.

Unknown Heirs of Higley Kelly, 41 IBLA 387 (July 24, 1979)

An appeal is dismissed where the contractor has not shown any intent to appeal to an authority higher than the contracting officer from a final decision disallowing certain costs.

Appeal of Geer, Dubois, Inc., IBCA-1212-9-78 (July 27, 1979)

Where BLM fails to show that there was service of a decision rejecting an Alaska Native allotment and the applicant learns of his rejection 4-1/2 years after rejection, the applicant may file a timely appeal within 30 days of notice of the decision.

Gust J. Heft, Sr., 42 IBLA 86 (Aug. 13, 1979)

Where a decision by an official of the Bureau of Land Management is interlocutory in nature, and the future implementation of the decision is contingent upon the occurrence of an event not scheduled, an appeal from such decision will be dismissed in the absence of any showing of necessity for immediate resolution.

Marathon Oil Co., Union Oil Co. of California, 43 IBLA 309 (Oct. 22, 1979)

An appeal to the Director, U.S. Geological Survey, is properly dismissed where the appellant failed to file a timely notice of appeal in the proper office within 30 days from service of the decision appealed from in order to comply with the requirements of the applicable regulations in 30 CFR 290.

Mesa Petroleum Co., 44 IBLA 165 (Nov. 30, 1979)

Effect of

A Bureau of Land Management State Office may reconsider one of its decisions prior to the filing of an appeal in the case, but the filing of an appeal terminates that authority.

John J. Sexton (On Reconsideration), 20 IBLA 167 (May 7, 1975)

A Bureau of Land Management office has no jurisdiction to take further action on an oil and gas lease application where there has been an appeal to the Board of Land Appeals on that application.

Jean Oakason, 22 IBLA 33 (Sept. 10, 1975)

RULES OF PRACTICE--Continued

APPEALS--Continued

Effect of--Continued

An appeal from a decision rejecting a color of title application will stay the running of the 60-day period, provided by the decision appealed from, for filing affidavits and evidence in support of arguments that the dependent resurvey of the land applied for erroneously classified the land as swamp and overflowed in character.

Paul H. and Fay L. Sleeper, 22 IBLA 318 (Nov. 10, 1975)

Notice of appeal of all issues in a contracting officer's decision puts all the issues contained therein "at issue" before the IBCA until the parties state the issues then in dispute in the Complaint and Answer.

Appeal of Scona, Inc., IBCA-1094-1-76 (Dec. 28, 1977)
84 I.D. 1019

A timely appeal from rejection of an oil and gas lease offer because of a determination of known geologic structure suspends the rejection pending decision by this Board, and where the Geological Survey rescinds the KGS determination as having been erroneously made during the pendency of the appeal, the status quo ante of land involved is restored.

Where land was omitted from an oil and gas lease only because of an erroneous KGS determination, and the applicant has preserved his priority by timely appealing the rejection, it is proper to amend such lease to include such omitted land when the Geological Survey rescinds its erroneous KGS determination.

David A. Provinse, 33 IBLA 312 (Jan. 13, 1978)

Where BLM issues a decision requiring that an oil and gas offeror submit additional advance rental within 30 days, and the offeror files a timely appeal to this Board, the running of the 30 days is suspended. Following affirmation by this Board of BLM's decision, the offeror is properly given the entire 30 days within which to submit the additional rental.

Mobil Oil Corp., 35 IBLA 375 (June 23, 1978)
85 I.D. 225

When an appeal is filed with the Board of Surface Mining and Reclamation Appeals from a decision made by the Office of Surface Mining Reclamation and Enforcement, that office loses jurisdiction and has no authority to take any action concerning it until that jurisdiction is restored by action of the Board that is dispositive of the appeal.

Apache Mining Co., 1 IBSMA 14 (July 13, 1978)
85 I.D. 395

When an appeal is filed with the Board of Land Appeals from a decision made by an official of the Bureau of Land Management, that official loses jurisdiction of the case and has no further authority to take any action concerning it until his jurisdiction over the matter is restored by action dispositive of the appeal.

Duncan Miller, 38 IBLA 154 (Dec. 5, 1978)

Warren D. Elmore, 42 IBLA 91 (Aug. 13, 1979)

RULES OF PRACTICE--Continued

APPEALS--Continued

Effect of--Continued

While an appeal of one decision of the BLM is pending before the Board, the BLM is without authority to exercise jurisdiction in the matter which is the subject of the appeal. Where the BLM exercises jurisdiction and the subsequent decision presents the same issue as the first, and the parties are given an adequate opportunity at the hearing and on appeal to present evidence and argue as to this issue, the Board will proceed to consider both decisions on their merits.

California Ass'n of Four-Wheel Drive Clubs et al., 38 IBLA 361 (Dec. 29, 1978)

The receipt of timber sale bids by BLM pursuant to an advertised sale and subsequent to the filing of a protest of the sale, does not constitute an irrevocable commitment to complete the sale where all bidders acknowledge that the final decision to award the sale contract is contingent upon adjudication of the protest and the decision reached on any proper appeal therefrom. Hence, receipt of bids by BLM does not prejudice the rights of protestants to have their protest ruled upon and any proper appeal heard.

Blaine Mikels et al., 41 IBLA 305 (July 3, 1979)

Generally the Geological Survey may reconsider and modify or revoke its own decision in the absence of an appeal to the Board of Land Appeals. However, the filing of an appeal to the Board removes the matter from the jurisdiction of Survey pending disposition of the appeal.

Where Geological Survey and one of two parties to a compulsory unitization of two outer continental shelf oil and gas leases request a remand of a Survey decision for further consideration, and certain issues raised on appeal would appropriately be better first considered by Survey, the case will be remanded to Survey. In the circumstances, a request to stay implementation of Survey's prior decision may be granted by the Board unless and until Survey acts upon the request when it reconsiders the case.

Sun Oil Co., 42 IBLA 254 (Aug. 23, 1979)

An oil and gas lease in its extended term because of the termination of an approved unit plan to which it was committed, on which lease there is no well capable of production in paying quantities, terminates automatically by operation of law where the annual rental is not paid on or before the anniversary date of the lease. The pendency of an appeal regarding the termination date of the extension does not excuse the failure to maintain the lease in good standing by timely payment of the annual rental.

Tenneco Oil Co., Cordillera Corp., 44 IBLA 171 (Nov. 30, 1979)

Extensions of Time

While the burden of showing an excusable cause of delay to exist is on the construction contractor, the invoking of this rule presupposes that the Government will leave this responsibility with the contractor, or, if it undertakes to correspond directly with the subcontractors or suppliers concerning delays experienced, it will inform them of the criteria set forth

RULES OF PRACTICE--Continued

APPEALS--Continued

Extensions of Time--Continued

in the contract for establishing an excusable cause of delay.

Appeal of The J. C. Hester Co., Inc., IBCA-1114-7-76 (Jan. 14, 1977)

A motion to dismiss an appeal is granted when the appellant had failed to file an appeal within 30 days of the date on which the contracting officer's final decision was received. Respecting the contractor's argument that the 30-day time limit should be waived, the Board noted that the right to extend the time for filing a notice of appeal had been specifically excepted from the grant of authority to the Board as set forth in the regulations governing Board proceedings.

Appeal of Harry C. Oaterbos Co., JV, IBCA-1153-5-77 (Dec. 6, 1977) 84 I.D. 969

Failure to Appeal

The assignor of an oil and gas lease is not barred from protesting against a decision approving the assignment because of his failure to appeal from an earlier decision denying the assignee's request for assignment approval but stating that approval would be permitted upon performance of certain conditions.

Joseph Alstad, 19 IBLA 104 (Mar. 4, 1975)

Where request for reconsideration of Bureau of Land Management 1968 homesite decision is taken in 1974, appellant stating he was never served with decision, but where receipt in record shows service in 1968, reconsideration should be denied.

Hollis E. Justis, 21 IBLA 63 (June 25, 1975)

In the absence of a timely appeal from a decision rejecting the State of Alaska's selection application for certain lands, the lands are no longer segregated from other disposition and a withdrawal of those lands may attach, precluding subsequent selection by the State.

State of Alaska, 22 IBLA 229 (Oct. 16, 1975)

Where an offeror failed to take an appeal from a decision issuing a noncompetitive oil and gas lease but erroneously rejecting certain available lands while correctly rejecting other lands in the offer and the offeror failed to retender rental for the erroneously rejected lands, and where the error could be readily apparent to the offeror, and the offeror acquiesced for a year and a half in the lease as issued, such failure precludes the amendment of the lease and the offeror is deemed to have abandoned his preference right as the first-qualified applicant to lease the land which was erroneously rejected.

John Oakason, 23 IBLA 336 (Jan. 21, 1976)

Appellant's earlier failure to protest and appeal a decision rejecting his challenge to another grazier's base property commensurability rating, bars him from appealing a subsequent decision rejecting an application containing the same challenge.

Phil J. Hillberry, 24 IBLA 283 (Mar. 31, 1976)

RULES OF PRACTICE--Continued

APPEALS--Continued

Failure to Appeal--Continued

Where a construction contractor failed to appeal from a notice of termination for default which included findings that the contractor's delay in performing the work was not due to excusable causes, but did file a timely appeal from a damage assessment for, *inter alia*, the increased cost of completing the work, the Board denied the Government's motion to strike paragraphs of the complaint alleging that the contractor's delay was due to excusable causes and that the termination for default was improper since under the so-called *Fulford* doctrine, which has been held equally applicable to construction contracts, an appeal from a damage or excess cost assessment following a termination for default allows the contractor to contest the propriety of the termination.

Appeal of Airco, Inc., IBCA-1074-8-75 (Apr. 6, 1976) 83 I.D. 137

Where a State swampland selection has been rejected on the ground that the land selected has been disposed of, but in fact that land was available to the State, the judgment is valid and binding until set aside. Since the Secretary has jurisdiction to determine whether the land selected is available, he has jurisdiction to decide erroneously. The erroneous decision will not be set aside where the State did not appeal and the decision has remained unchallenged for over 100 years, the State itself sold the land to a color of title applicant's predecessor, and an adverse right has intervened.

John Stuart Hunt, Sherman M. Hunt, 31 IBLA 304 (July 22, 1977) 84 I.D. 421

In order for a State to receive legal title to a swampland selection, the Secretary of the Interior or his delegate must determine that the land is swamp in character and available for disposition under the grant. An erroneous decision that selected land is unavailable because it was sold prior to the selection is valid and binding until set aside. The erroneous decision will not be set aside where the State did not appeal and the decision has remained unchallenged for over 100 years, the State itself sold the land at a tax sale to the predecessor in interest of a color of title applicant, and an adverse right, *i.e.*, a class 2 color of title application, has intervened.

White Castle Lumber and Shingle Co., Ltd., 32 IBLA 129 (Sept. 12, 1977)

Where a right-of-way application has been rejected in part, an appeal therefrom should be dismissed if not filed within the period prescribed in 43 CFR 4.411.

Jerrold B. Cooley, Lucy E. Cooley, 32 IBLA 387 (Nov. 7, 1977)

When BLM adjudicates issue and offeror does not appeal, doctrine of administrative finality, which is administrative counterpart of res judicata, generally bars consideration of new appeal arising from later proceeding involving same lease and same issue. Accordingly, BLM acted properly in dismissing appellant's protest, filed Nov. 18, 1977, against oil and gas lease annual rental adjudicated on July 27, 1977.

Wilfred Plomis, 35 IBLA 1 (May 3, 1978)

RULES OF PRACTICE--Continued

APPEALS--Continued

Failure to Appeal--Continued

A notice of appeal must be filed within 30 days after appellant is served with the decision from which he is appealing. When a party does not appeal, the doctrine of administrative finality, the administrative equivalent of res judicata, generally bars consideration of the same issue in a later appeal.

Ralph and Ruth Dickinson, 39 IBLA 258 (Feb. 15, 1979)

An appeal is dismissed where the contractor has not shown any intent to appeal to an authority higher than the contracting officer from a final decision disallowing certain costs.

Appeal of Geer, Dubois, Inc., IBCA-1212-9-78 (July 27, 1979)

Where BLM fails to show that there was service of a decision rejecting an Alaska Native allotment and the applicant learns of his rejection 4-1/2 years after rejection, the applicant may file a timely appeal within 30 days of notice of the decision.

Gust J. Beft, Sr., 42 IBLA 86 (Aug. 13, 1979)

A summary dismissal of a private contest against an Alaska homestead becomes a final administrative ruling on that contest when the contestant, instead of appealing the dismissal, files a second contest which must be considered an entirely new action. When a final departmental adjudication has been made, the doctrine of administrative finality, which is the administrative counterpart of the principle of res judicata, generally bars consideration of a new appeal arising from a later proceeding involving the same homestead and the same issue.

Joe O. Amberger, 43 IBLA 178 (Sept. 28, 1979)

Hearings

When an appellant asserts facts which do not on their face sustain the contentions on appeal, this Board will deny a request for a hearing to determine the asserted issues of fact. 43 CFR 4.415.

Nola Grace Ptasynski, Barbara C. Lisco, 19 IBLA 125 (Mar. 5, 1975)

In a mining claim contest, the claimant is the proponent of the rule or order that he has complied with the provisions of the mining law, which have been brought into issue, and the Government bears the burden only of presenting a prima facie case of invalidity; the claimant must then preponderate on the issues litigated.

Where the hearing record in a mining claim contest is unsatisfactory, a "stipulation" on another issue may have prevented the introduction of evidence relevant to the issue on appeal, the parties will not be unduly burdened, and further proceedings will likely be productive of relevant evidence, the Board may remand the case for additional hearing.

United States v. Ed Brandt, 21 IBLA 166 (July 22, 1975)

RULES OF PRACTICE--Continued

APPEALS--Continued

Hearings--Continued

A request for a hearing in connection with an appeal will not be granted where undisputed facts are of record, and the determination rests on legal conclusions based on such facts.

Concho Petroleum Co. and J. C. Karcher, 22 IBLA 135 (Sept. 26, 1975)

Where the decision appealed from is based essentially on the facts disclosed by appellant, there is no dispute as to any material fact, and the sole question presented is a legal issue, no evidentiary hearing is required on appeal.

Sarah E. Lindgren, Emery V. Showalter, 23 IBLA 174 (Dec. 31, 1975)

When an appellant from a decision canceling a headquarters site claim does not assert facts which, taken as true, would constitute the initiation of a claim protected from the effect of a withdrawal, the appellant is not entitled to notice and a hearing on the factual issues pertaining to the establishment of a valid existing right.

Mary C. Polen, 24 IBLA 100 (Mar. 1, 1976)

Cross motions for summary judgment are denied where the Board finds the stipulated record furnishes an insufficient basis for an informed judgment and that a hearing will be required for determining the merits of the entitlement question presented for decision.

Appeals of Armstrong & Armstrong, Inc., IBCA-1061-3-75 and IBCA-1072-7-75 (Apr. 7, 1976) 83 I.D. 148

One who appeals from the rejection of a trade and manufacturing site purchase application and disputes the factual findings and conclusions in the field examiner's report, is not entitled to an opportunity for a hearing on the disputed issues of fact when appellant's assertions of use and improvement, taken as true, do not show use of the land that qualifies her for the right of purchase.

Evelyn M. Bunch, 25 IBLA 44 (May 13, 1976)

A request for a hearing pursuant to 43 CFR 4.415 for the purpose of taking testimony on the Bureau of Land Management's "continued refusal" to restore land in a reclamation withdrawal to entry will be denied. An appeal from a decision declaring mining claims and millsites null and void ab initio because the lands are in the withdrawal may not serve as the vehicle for petitioning the Secretary of the Interior to revoke the withdrawal. Furthermore, even if the withdrawal were revoked and the lands opened to entry, this action could not revive mining claims which were void when located while the withdrawal was in effect and the land closed to entry under the mining laws.

J. E. Hinds et al., 25 IBLA 67 (June 1, 1976) 83 I.D. 275

RULES OF PRACTICE--Continued

APPEALS--Continued

Hearings--Continued

The regulations do not provide for hearings as a matter of right on trespass violations involving a sec. 15 grazing lessee. For the Board of Land Appeals to exercise its discretion under 43 CFR 4.415 and order a hearing, the appellant must allow facts which, if proved, would entitle him to the relief sought.

Rodney Rolfe and Ronald J. Rolfe, 25 IBLA 331 (June 30, 1976) 83 I.D. 269

It is within the discretion of the Board of Land Appeals to grant a request for a hearing on a question of fact. In order to warrant such a hearing, an appellant must at least allege facts which, if proved, would entitle him to the relief sought.

Sun Studs, Inc., 27 IBLA 278 (Oct. 26, 1976) 83 I.D. 518

Where applicant alleges facts which, even if proved to be true, would not change the legal conclusion of the case, a request for a hearing will be denied.

Frank G. Wells, 28 IBLA 113 (Nov. 15, 1976)

A request for a hearing on a Native allotment application will be denied where an evidentiary hearing is not necessary because there are no facts in dispute and the sole question is a legal issue.

Mable Melovedoff, 29 IBLA 250 (Mar. 25, 1977)

Where the Bureau of Land Management has dismissed a protest to the issuance of a special land use permit and on appeal the protestant requests an evidentiary hearing, such request will be denied when no evidence is proferred by protestant which would engender the belief that the development of further facts would require a different result.

Department of the Navy, Naval Weapons Center, China Lake, 29 IBLA 324 (Mar. 30, 1977)

The obligation for proving a valid color of title claim is upon the claimant. Where a claimant has alleged facts which, if proven, may establish her color of title, the Board of Land Appeals may order a fact-finding hearing pursuant to 43 CFR 4.415.

Mable M. Farlow, 30 IBLA 320 (June 7, 1977) 84 I.D. 276

The obligation to establish a valid color of title claim is upon the claimant. Where a claimant has alleged facts which, if proved, may establish his color of title, the Board of Land Appeals may order a fact-finding hearing pursuant to 43 CFR 4.415.

Joe I. and Celina V. Sanchez, et al., 32 IBLA 228 (Sept. 20, 1977)

Lawrence E. Willmorth, 32 IBLA 378 (Nov. 1, 1977)

RULES OF PRACTICE--Continued

APPEALS--Continued

Hearings--Continued

When a mining claim located in the Papago Indian Reservation is declared invalid for failure to pay annual rental timely, and that fact is not disputed, a hearing is not required as there are no issues of fact involved but only of law.

Louis B. Ellsworth, Jr., 33 IBLA 26 (Nov. 22, 1977)

Motion for quantum hearing will be allowed when the Government admitted liability on certain claims in the Answer and the first hearing was limited to entitlement.

Request that hearing of a substantial complex appeal be limited to "entitlement," will not be construed to be a waiver of right to hearing on "quantum" absent a clear record that the request was so intended.

Motion for reconsideration is granted where original ruling that hearing will be limited to entitlement may have contributed to lack of evidence at the hearing and where issues included complex question of concurrent fault and damages.

Appeal of Scona, Inc., IBCA-1094-1-76 (Dec. 28, 1977) 84 I.D. 1019

The Government's opposition to appellant's request for a hearing and its motion for partial summary judgment in a default termination case are both denied where the contractor contends and the Government denies that the delays experienced by the contractor in attempting to perform the contract were excusable and the Board finds that determining whether delays are excusable in such circumstances involves resolving a fact question which should only be done after the parties have had an opportunity to present their evidence at a hearing where one has been requested.

Appeal of Briles Wing & Helicopter, Inc., IBCA-1158-7-77 (Apr. 14, 1978) 85 I.D. 77

Where, on appeal, application for renewal of communication site rights-of-way was approved subject to condition of a lump-sum payment of an increased rental without a hearing, the decisions below will be set aside and the cases remanded for hearing and for other revisions consistent with principles enunciated in Board decisions to be followed in renewal of communication site rights-of-way and in setting increases in the amount of rental for such sites.

Donald R. Clark, C. Reinhart & Son, Inc., Hartwell Excavating Co., 39 IBLA 182 (Jan. 31, 1979)

A request for a hearing on a Native allotment application will be denied where there are no facts in dispute and the sole question is a legal issue.

Lindberg Alexander, 41 IBLA 382 (July 23, 1979)

The Board of Land Appeals has the discretion to grant a request for a hearing on issues of fact but, in order to warrant such a hearing, an appellant must at least allege facts which, if proved, would entitle him to the relief sought.

Mardelle M. Smith, Sherman C. Smith, 42 IBLA 136 (Aug. 16, 1979)

RULES OF PRACTICE--Continued

APPEALS--Continued

Hearings--Continued

Where legal conclusions may be reached upon undisputed facts and there has been no proffer of further facts which could compel different legal conclusions, a request for a hearing is properly denied.

Sam Hanlon, Sr., 42 IBLA 161 (Aug. 17, 1979)

A second hearing of a Government mining contest will not be afforded where a claimant was given notice and an opportunity to appear at a hearing, where he was actually present at the hearing, and where nothing has been submitted which suggests that another hearing would produce a different result. A petition to reopen a hearing of a Government mining contest will be denied when the contestee offers no valid justification for the neglect to offer evidence which was or could have been available at the original hearing. A further hearing will not be ordered merely to afford a claimant an additional opportunity to explore and make a discovery.

United States v. Andy Syndbad, 42 IBLA 313 (Aug. 29, 1979)

A request for a hearing on a Native allotment application will be denied where no factual dispute exists and all issues are legal ones.

Betty J. Thompson, 43 IBLA 174 (Sept. 28, 1979)

Motions

A contractor's petition to reopen and conduct an evidentiary hearing after an adverse decision of its appeal, which was decided on the record without an oral hearing, was denied where the petition, treated as a motion for reconsideration, not only failed to satisfy the newly discovered evidence rule but also failed to disclose the evidence which would be proffered at the hearing and thus furnished no reason for vacating the original decision.

Appeal of COAC, Inc., IBCA-1004-9-73 (Feb. 19, 1975)
82 I.D. 65

A contractor's motion for reconsideration is denied where the contractor offered to provide evidence on one claim item which was obtained after the Board's adverse decision but which could have been obtained, in the exercise of due diligence, before the hearing and where other evidence offered on all claim items was in the contractor's possession at the time of the hearing and no valid reason was given for the failure to introduce such evidence. The motion for reconsideration is not a vehicle for correction of errors or omissions by a party in the presentation of its case.

Appeal of Robert P. Jones (Contractor), IBCA-1002-8-73 (Aug. 6, 1975)

A contractor's parol evidence rule objection to the admission in evidence of the answer given to a question raised at a prebidding conference as set forth in a contemporaneous Government memorandum is overruled where the Board finds that the answer given simply reflects information contained in the invitation for bids on which the contract is based.

Appeal of J. A. LaPorte, Inc., IBCA-1014-12-73 (Sept. 29, 1975)
82 I.D. 459

RULES OF PRACTICE--Continued

APPEALS--Continued

Motions--Continued

Where an appeal is timely the absence from a contracting officer's letter of a terminal paragraph advising the contractor of his right of appeal under the Disputes clause is not a basis for remand to the contracting officer.

Claims of constructive change under a cost-plus-fixed-fee contract first presented in the notice of appeal are outside the jurisdiction of the Board and are remanded to the contracting officer for the issuance of new or supplemental findings.

Appeal of VTN Colorado, Inc., IBCA-1073-8-75 (Oct. 29, 1975)
82 I.D. 527

The Board of Land Appeals may entertain and, where appropriate, grant a motion by the Bureau of Land Management to remand a case to it for further consideration on the question of whether an environmental impact statement must be filed, even though an appellant, who has protested against a negative declaration that no impact statement is required, objects to the remand.

Harold Gillis, 24 IBLA 248 (Mar. 25, 1976)

Where a construction contractor failed to appeal from a notice of termination for default which included findings that the contractor's delay in performing the work was not due to excusable causes, but did file a timely appeal from a damage assessment for, inter alia, the increased cost of completing the work, the Board denied the Government's motion to strike paragraphs of the complaint alleging that the contractor's delay was due to excusable causes and that the termination for default was improper since under the so-called Fulford doctrine, which has been held equally applicable to construction contracts, an appeal from a damage or excess cost assessment following a termination for default allows the contractor to contest the propriety of the termination.

Where certain paragraphs of a complaint filed by a construction contractor in an appeal from a damage assessment following a termination for default raised issues as to the propriety of the termination, the Board denied a Government motion to strike those paragraphs based on contentions that the contractor had agreed that delay in completion of the work was not excusable and that the contractor's agreement to a revised date for completion of the work precluded it from raising issues as to the excusability of delays occurring prior to the agreement, since it is well settled that accord and satisfaction is an affirmative defense which must be pleaded and proved and that allegations of accord and satisfaction raise factual issues as to the intent of the parties at the time of the alleged accord.

Appeal of Aitco, Inc., IBCA-1074-8-75 (Apr. 6, 1976)
83 I.D. 137

Cross motions for summary judgment are denied where the Board finds the stipulated record furnishes an insufficient basis for an informed judgment and that a hearing will be required for determining the merits of the entitlement question presented for decision.

A stipulation as to procedure only involving two appeals arising under the same contract is disregarded where following the submission of simultaneous briefs under a cross motions for summary judgment procedure, the Board finds some of the terms of the stipulation in which it had acquiesced to be at variance with the rule in the Court of Claims against the splitting of the cause of action under a single and indivisible contract and that

RULES OF PRACTICE--Continued

APPEALS--Continued

Motions--Continued

adherence to the stipulation could be prejudicial to the contractor in certain foreseeable circumstances. The stay of proceedings provided for by the stipulation with respect to one appeal is therefore vacated and as a corollary to such action the appellant is directed to file its complaint.

Finding that it has inherent discretion to order consolidation of appeals in appropriate cases, the Board orders the consolidation of two appeals which the appellant has asserted involve common questions of law and fact and which, in any event, arose under the same contract, involve the same attorneys and, presumably, the same witnesses.

Appeals of Armstrong & Armstrong, Inc., IBCA-1061-3-75 and IBCA-1072-7-75 (Apr. 7, 1976) 83 I.D. 148

The Board of Land Appeals will entertain and grant a motion by the Bureau of Land Management to remand an oil and gas lease case on appeal to the Board from a decision holding the lease had terminated and denying a petition to reinstate the lease, where BLM discovered, while the case was on appeal, that its decision was predicated on an erroneous factual basis in that annual rental for the lease had actually been paid on time, but the check had been misplaced by BLM and was later found.

Kathryn A. Dalton, 31 IBLA 1 (June 15, 1977)

The Government's motion to dismiss an appeal because of the failure of the contractor to give the 20-day written notice required by the Changes clause is denied, where the Board finds that there was timely notice with respect to some of the costs on which the claim is based and that the hearing to be held may show that some or all of the remaining costs fall within other recognized exceptions to the strict application of the 20-day cost-limitation provision.

Appeal of Hartford Accident and Indemnity Co., IBCA-1139-1-77 (June 23, 1977) 84 I.D. 296

The Government's motion for reconsideration, which advanced a number of arguments designed to show that the Government's interpretation of the contract was reasonable, provides no reason for overturning the Board's principal decision which applied the rule of *contra proferentem*. The Board, having previously found that appellant's interpretation was reasonable, now affirms its principal decision since the rule requires interpretation against the drafter of a document to resolve an ambiguity even if each party's interpretation is reasonable.

Appeal of Commonwealth Electric Co., IBCA-1048-11-74 (Sept. 30, 1977) 84 I.D. 867

Motion for a protective order to prevent the disclosure of pre-award technical discussions with bidders in a two-step IFB unsupported by affidavits that the information furnished was (a) a trade secret and was (b) furnished in confidence, was denied, but the Government is nevertheless given 45 days to file affidavits by the bidders on these and other issues.

Appeal of Airco, Inc., IBCA-1074-8-75 (Oct. 17, 1977) 84 I.D. 838

RULES OF PRACTICE--Continued

APPEALS--Continued

Motions--Continued

A Government motion to dismiss an appeal is denied where the ground for the motion is that the contractor failed to raise its allegations before the contracting officer prior to filing its appeal but the Board finds that the contracting officer did have an opportunity to pass upon the principal allegations of the contractor prior to rendering his decision.

Appeal of Briles Wing & Helicopter, Inc., IBCA-1158-7-77 (Dec. 2, 1977) 84 I.D. 967

An appeal is dismissed as untimely when it was not filed within 30 days of the date on which the contracting officer's final decision was received by a person who was not employed by the appellant but who was authorized to receive his mail during the 6 weeks the appellant was away on vacation. While the appellant denied that such person was authorized to sign a return receipt for certified mail, the Board noted that no question of authority to sign for certified mail had been raised in the contractor's letter requesting an extension in the time for filing the appeal and that no such question was raised until the Government's motion to dismiss the instant appeal was filed.

A motion to dismiss an appeal is granted when the appellant had failed to file an appeal within 30 days of the date on which the contracting officer's final decision was received. Respecting the contractor's argument that the 30-day time limit should be waived, the Board noted that the right to extend the time for filing a notice of appeal had been specifically excepted from the grant of authority to the Board as set forth in the regulations governing Board proceedings.

Appeal of Harry Claterbos Co., JV, IBCA-1153-5-77 (Dec. 6, 1977) 84 I.D. 965

Motion for quantum hearing will be allowed when the Government admitted liability on certain claims in the Answer and the first hearing was limited to entitlement.

Motion for reconsideration is granted where original ruling that hearing will be limited to entitlement may have contributed to lack of evidence at the hearing and where issues included complex question of concurrent fault and damages.

Appeal of Scona, Inc., IBCA-1094-1-76 (Dec. 28, 1977) 84 I.D. 1019

The Government's opposition to appellant's request for a hearing and its motion for partial summary judgment in a default termination case are both denied where the contractor contends and the Government denies that the delays experienced by the contractor in attempting to perform the contract were excusable and the Board finds that determining whether delays are excusable in such circumstances involves resolving a fact question which should only be done after the parties have had an opportunity to present their evidence at a hearing where one has been requested.

Appeal of Briles Wing & Helicopter, Inc., IBCA-1158-7-77 (Apr. 14, 1978) 85 I.D. 77

RULES OF PRACTICE--Continued

APPEALS--Continued

Motions--Continued

A claim by a concessioner under a National Park Service Contract is dismissed as beyond the purview of the Board's jurisdiction where the contract contains no disputes clause and by its express terms the Contract Disputes Act of 1978 is not applicable to the claim asserted.

Appeal of Yosemite Park and Curry Co., IBCA-1232-12-78 (Mar. 16, 1979) 86 I.D. 197

An appeal is dismissed where the contractor has not shown any intent to appeal to an authority higher than the contracting officer from a final decision disallowing certain costs.

Appeal of Geer, Dubois, Inc., IBCA-1212-9-78 (July 27, 1979)

A contractor may not proceed under the provisions of the Contract Disputes Act of 1978 where the appeal is from a final decision of the contracting officer rendered and received by the appellant prior to the effective date of the Act.

Appeals of Gregory Lumber Co., Inc., IBCA-1237-12-78, 1238-12-78, 1239-12-78, 1240-12-78 (Sept. 28, 1979) 86 I.D. 520

The right to administrative relief is a privilege afforded by law to persons who consider themselves interested or aggrieved. The burden is upon the interested person to act affirmatively to protect perceived interests. Such a person is not entitled to wait until all other interested persons act, to speculate on the outcome, and then, if the decision is adverse, to seek to reopen the matter on his or her own behalf, when that person has been afforded notice of all the proceedings.

Western Slope Gas Co. (On Reconsideration), 43 IBLA 259 (Oct. 15, 1979)

The appellant's motion for reconsideration provides no reason for overturning the Board's principal decision which dismissed the subject appeals for lack of jurisdiction. The Board, having found significant current precedents consistent with the view that the effective date of the Contract Disputes Act of 1978 was Mar. 1, 1979, and that claims appealed to the Board prior to that date were not pending then before the Contracting Officer, finds those precedents controlling without analysis of all matters argued in appellant's brief.

Appeals of Gregory Lumber Co., Inc. (On Reconsideration), IBCA-1237-12-78, 1238-12-78, 1239-12-78, 1240-12-78 (Nov. 23, 1979) 86 I.D. 654

Notice of Appeal

Where an appeal is timely the absence from a contracting officer's letter of a terminal paragraph advising the contractor of his right of appeal under the Disputes clause is not a basis for remand to the contracting officer.

Claims of constructive change under a cost-plus-fixed-fee contract first presented in the notice of appeal are outside the jurisdiction of the Board and are remanded to the contracting officer for the issuance of new or supplemental findings.

Appeal of WIN Colorado, Inc., IBCA-1073-8-75 (Oct. 29, 1975) 82 I.D. 527

A Government motion to dismiss an appeal is denied where the ground for the motion is that the contractor failed to raise its allegations before the contracting officer prior to filing its appeal but the Board finds that the contracting officer did have an opportunity to pass upon the principal allegations of the contractor prior to rendering his decision.

Appeal of Briles Wing & Helicopter, Inc., IBCA-1158-7-77 (Dec. 2, 1977) 84 I.D. 967

Notice of appeal of all issues in a contracting officer's decision puts all the issues contained therein "at issue" before the IBCA until the parties state the issues then in dispute in the Complaint and Answer.

Appeal of Scona, Inc., IBCA-1094-1-76 (Dec. 28, 1977) 84 I.D. 1019

Where, in a decision holding a Native allotment for approval and a State selection for rejection to the extent of a conflict, the Bureau of Land Management grants the State 30 days to initiate a private contest challenging the Native allotment, the 30-day appeal period will commence upon expiration of the 30 days accorded the State for initiation of a private contest and not with receipt of the decision.

State of Alaska et al., 42 IBLA 94 (Aug. 16, 1979)

Where a person moves from his record address without leaving a forwarding address, and a copy of a BLM decision affecting him is mailed to this last address of record and returned by the postal service as undeliverable, the decision is considered to have been "served" him as of the date it is returned to BLM. 43 CFR 4.401(c). Accordingly, the deadline for filing a notice of appeal is 30 days after the date the decision is returned to BLM.

BLM may not properly waive the untimely filing of a notice of appeal under 43 CFR 4.401(a) where it is clear that the notice of appeal was not transmitted to BLM until after the end of the time in which it was required to be filed.

Where a notice of appeal is not timely filed, it must be dismissed.

Nicky Nickoli, 43 IBLA 296 (Oct. 17, 1979)

Reconsideration

A contractor's petition to reopen and conduct an evidentiary hearing after an adverse decision of its appeal, which was decided on the record without an oral hearing, was denied where the petition, treated as a motion for reconsideration, not only failed to satisfy the newly discovered evidence rule but also failed to disclose the evidence which would be proffered at the hearing

RULES OF PRACTICE--Continued

APPEALS--Continued

Reconsideration--Continued

and thus furnished no reason for vacating the original decision.

Appeal of COAC, Inc., IBCA-1004-9-73 (Feb. 19, 1975)
82 I.D. 65

A contractor's motion for reconsideration is denied where the contractor offered to provide evidence on one claim item which was obtained after the Board's adverse decision but which could have been obtained, in the exercise of due diligence, before the hearing and where other evidence offered on all claim items was in the contractor's possession at the time of the hearing and no valid reason was given for the failure to introduce such evidence. The motion for reconsideration is not a vehicle for correction of errors or omissions by a party in the presentation of its case.

Appeal of Robert P. Jones (Contractor), IBCA-1002-8-73 (Aug. 6, 1975)

Where in moving for reconsideration of a decision denying its claim for constructive acceleration, the contractor contended that the Bureau's failure to promptly investigate its claim of delay due to unusually severe weather amounted to a denial of a request for a time extension and that the denial plus other actions of Bureau inspectors constituted an order to complete the work by the specified completion date irrespective of excusable delay and thus was an acceleration order, the Board ruled that a denial of a request for a time extension was insufficient in and of itself to constitute constructive acceleration and reviewing the evidence, affirmed the denial of the claim, holding that the actions of the inspectors were regarded as suggestions by the contractor and accepted or rejected depending on whether the suggestions were practical or economical.

Appeal of Iversen Construction Co. (a/k/a ICONCO), IBCA-981-1-73 (Apr. 19, 1976)
83 I.D. 179

Where an offer of land under the Mining Claims Occupancy Act may include land within a right-of-way being condemned for a State highway, and where such evidence was not before the Board when it considered the appeal, a petition for reconsideration may be granted.

Robert P. Starritt (On Reconsideration), 26 IBLA 205 (Aug. 16, 1976)

Where a petition for reconsideration of a previous Board decision applying departmental contest procedures to Alaska Native allotment applications fails to show that the original decision was erroneous in any matter, the original decision will be sustained.

Donald Peters (On Reconsideration), 28 IBLA 153 (Nov. 23, 1976)
83 I.D. 564

Repeating arguments made during the hearing and in the posthearing briefs is not a basis for granting a motion for reconsideration.

Appeal of Halvorson-Lents (A Joint Venture), IBCA-1059-2-75 (May 9, 1977)

RULES OF PRACTICE--Continued

APPEALS--Continued

Reconsideration--Continued

A request to reconsider a 1968 decision by the Department rejecting final proof for a homestead entry and canceling the entry is properly rejected in the absence of a showing of "extraordinary circumstances." In the absence of compelling legal or equitable reasons for reconsideration, the principle of res judicata, and its counterpart, finality of administrative action, will operate to bar consideration of a new appeal arising from a later proceeding involving the same claim and the same issues.

Pekka K. Merikallio, 30 IBLA 157 (May 18, 1977)

Where a decision of the Board of Land Appeals is based upon an interpretation of Departmental policy, and that policy is subsequently revised and clarified so as to impel a different result in the case without prejudice to the right of any third party, on reconsideration by the Board that portion of its original decision will be modified and the revised policy will be implemented.

Warner Bergman (On Reconsideration), 31 IBLA 21 (June 20, 1977)

The Government's motion for reconsideration, which advanced a number of arguments designed to show that the Government's interpretation of the contract was reasonable, provides no reason for overturning the Board's principal decision which applied the rule of *contra proferentem*. The Board, having previously found that appellant's interpretation was reasonable, now affirms its principal decision since the rule requires interpretation against the drafter of a document to resolve an ambiguity even if each party's interpretation is reasonable.

Appeal of Commonwealth Electric Co., IBCA-1048-11-74 (Sept. 30, 1977)
84 I.D. 867

Upon reconsideration, the Board finds that where the Government issues an "Extra Work Order" under a "force account" provision for minor extra work not provided for in other pay items, at agreed on rates, the contractor is entitled to be paid for inefficiency, rework costs and delay costs when moisture causes borrow material placed under the extra work order, to become muddy. However, the appellant's failure to give prompt notice of the claim under the force account provision caused the Government to order added pay item work, thus the claim must be reduced by the amount of added pay item payment.

Appeal of Rocky Mountain Construction Co., IBCA-1091-12-75 (Nov. 4, 1977)
84 I.D. 898

The doctrine of finality of administrative action, counterpart of res judicata, designed to achieve orderliness in the administration of public lands, bars reconsideration of a 1936 General Land Office decision, rendered according to procedures then in effect, which canceled a stock-raising homestead entry and from which no appeal was taken.

John Lynn Brough, 33 IBLA 36 (Nov. 25, 1977)

Motion for quantum hearing will be allowed when the Government admitted liability on certain claims in the Answer and the first hearing was limited to entitlement.

Request that hearing of a substantial complex appeal be limited to "entitlement," will not be construed to be a waiver of right to hearing on "quantum" absent a clear record that the request was so intended.

The findings and determinations of the contracting officer which have been appealed become some evidence to be considered and weighed by the Board together with all the other evidence in the record when the appeal is decided by the Board.

Motion for reconsideration is granted where original ruling that hearing will be limited to entitlement may have contributed to lack of evidence at the hearing and where issues included complex question of concurrent fault and damages.

Appeal of Scona, Inc., IBCA-1094-1-76 (Dec. 28, 1977) 84 I.D. 1019

A request for allowance of attorney fees is denied on a motion for reconsideration where the prior decision specifically considered and disallowed these costs in accordance with prevailing law.

A motion for reconsideration is denied where based on the same arguments made and fully considered in the principal decision.

Appeals of JB&C Co., IBCA-1020-2-74 and IBCA-1033-4-74 (Feb. 22, 1978) 85 I.D. 67

A Government motion for reconsideration is denied where the Board finds that a cost estimate (cost and pricing data) was not a firm offer to perform the work within the hours and at the prices or rates specified, but was rather simply the initial basis for negotiating a cost-plus-fixed-fee contract.

Appeal of W. F. Sigler & Associates, IBCA-1159-7-77 (Apr. 14, 1978) 85 I.D. 167

A request to reconsider a final decision of the Department rejecting applications for homestead entry is properly rejected in the absence of a showing of extraordinary circumstances. Except where compelling legal and equitable reasons for reconsideration are shown, the principle of res judicata and its counterpart, finality of administrative action, will bar consideration of a new appeal arising from a later proceeding involving the same claim and the same issues.

Dallas C. Qualman et al., 36 IBLA 119 (July 25, 1978)

When an appellant files a timely motion for reconsideration asking that an equitable adjustment be increased, the effect is to prevent finality from attaching to the original decision and the Board has jurisdiction to consider a Government response asking that the equitable allowance be reduced, even though the response was not filed within the 30-day period allowed for initial filing of a motion for reconsideration.

When arguments advanced in a motion for reconsideration convince the Board that the formula used in determining an equitable adjustment was not the most accurate method but where neither party submits a better method, the Board will vacate its original finding regarding

the equitable adjustment and make a recomputation based on the evidence of record.

Appeal of J. A. LaPorte, Inc., IBCA-1146-3-77 (Feb. 14, 1979) 86 I.D. 125

Reconsideration of a decision of this Board is permitted only in extraordinary circumstances. A motion to reconsider will be denied when it is premised on the same arguments as those which were fully considered prior to the Board's decision, in the absence of compelling reasons.

The right to administrative relief is a privilege afforded by law to persons who consider themselves interested or aggrieved. The burden is upon the interested person to act affirmatively to protect perceived interests. Such a person is not entitled to wait until all other interested persons act, to speculate on the outcome, and then, if the decision is adverse, to seek to reopen the matter on his or her own behalf, when that person has been afforded notice of all the proceedings.

In the absence of compelling legal and equitable reasons supporting reconsideration, the principle of res judicata, and its counterpart, finality of administrative action, will operate to bar consideration of a new appeal arising from a later proceeding involving the same claim, the same parties, and the same issues.

Western Slope Gas Co. (On Reconsideration), 43 IBLA 259 (Oct. 15, 1979)

The appellant's motion for reconsideration provides no reason for overturning the Board's principal decision which dismissed the subject appeals for lack of jurisdiction. The Board, having found significant current precedents consistent with the view that the effective date of the Contract Disputes Act of 1978 was Mar. 1, 1979, and that claims appealed to the Board prior to that date were not pending then before the Contracting Officer, finds those precedents controlling without analysis of all matters argued in appellant's brief.

Appeals of Gregory Lumber Co., Inc. (On Reconsideration), IBCA-1237-12-78, 1238-12-78, 1239-12-78, 1240-12-78 (Nov. 23, 1979) 86 I.D. 654

Service on Adverse Party

An appeal to the Board of Land Appeals will not be dismissed for lack of service upon the adverse party where the adverse party is not specifically designated as such in the decision from which the appeal is taken.

T. T. Cowgill et al., 19 IBLA 274 (Apr. 7, 1975)

Under 43 CFR 4.402, an appeal is subject to summary dismissal by the Board of Land Appeals when notice of appeal or statement of reasons is not served on adverse parties within the time prescribed.

Elmer Peterson, 21 IBLA 52 (June 17, 1975)

RULES OF PRACTICE--Continued

APPEALS--Continued

Service on Adverse Party--Continued

Appellant's failure to timely serve and prove service of appeal on adverse party named in the decision from which the appeal is taken will subject the appeal to summary dismissal.

Richard E. and Phyllis Lee, 22 IBLA 284 (Oct. 30, 1975)

An appeal from a decision of the Bureau of Land Management rejecting a grazing lease application and approving a conflicting application will not be summarily dismissed for failure to serve an adverse party who is not specifically designated as such in the decision appealed from. A decision of the Bureau of Land Management that a conflicting applicant has a preference right to the grazing lease will be affirmed when the applicant appealing fails to indicate any error in the decision.

Jack Sedman, 25 IBLA 277 (June 25, 1976)

When a contestee fails to answer a complaint, the allegations are deemed admitted and the case may be dismissed with prejudice as to that contestee. In addition, in a Government contest, the complaint is not deemed to be insufficient or subject to dismissal where the Government fails to name all interested parties, or for failure to serve every party who has been named.

United States (Contestant) v. Earl Frisco and Sandra S. Young (Contestees), 32 IBLA 248 (Sept. 21, 1977)

When appellant has failed to serve a copy of the notice of appeal and statement of reasons on the adverse party named in the decision appealed from, in the manner prescribed in 43 CFR 4.401(c), and the adverse party moves for summary dismissal under 43 CFR 4.413(b), the appeal is properly dismissed where appellant has not responded to the motion for dismissal or acknowledged the procedural deficiency.

Dawley Creek Ranch and L. Franklin Mader, 37 IBLA 30 (Sept. 18, 1978)

Standing to Appeal

A qualified heir or devisee of a deceased applicant for a mineral lease under 43 CFR 3564, or the administrator or executor of his estate, may receive the lease in the applicant's stead, or maintain an appeal from the rejection of such application on the same basis as the heirs or representatives of deceased applicants for other kinds of mineral leases where no third-party interests require consideration.

George W. Wright, Sr. (Deceased), 22 IBLA 280 (Oct. 30, 1975)

A city organized under Alaska State law has standing to appeal from the rejection of its application for townsite deeds to land within its city limits, and the awarding of deeds to occupants of the townsite lots at the time of final subdivisional survey.

City of Klawock v. P. H. Andrew et al., City of Klawock v. State of Alaska, Department of Highways, 24 IBLA 85 (Feb. 25, 1976) 83 I.D. 47

RULES OF PRACTICE--Continued

APPEALS--Continued

Standing to Appeal--Continued

Where a reduction in the authorized use of land leased pursuant to sec. 15 of the Taylor Grazing Act is required in order to conform to the actual grazing capacity of the land, the full amount of that reduction must be imposed immediately rather than gradually. Where acceptance of the reduction is made a condition precedent for the approval of an assignment and for the issuance of a new lease, the assignee and prospective lessee will be held to have the same right to appeal the reduction as the original lessee.

Rube W. Evans et al., 26 IBLA 15 (July 7, 1976)

A person who admits he has no interest in a mining claim which has been held invalid for failure of the named contestee to file an answer other than he disputes a charge that the land in the contested claim is not mineral in character or that the date of a withdrawal is incorrect is not adversely affected by the decision and has no standing to appeal.

United States v. William Robinson & William McCaskill, Phelps Dodge Corp., 26 IBLA 137 (Aug. 2, 1976)

One having no right or privilege to the use or possession of Indian lands by way of a lease, permit or license has no standing to appeal under 25 CFR Part 2.

Administrative Appeal of Dean Hansen v. Area Director, Aberdeen Area Office, Bureau of Indian Affairs, 5 IBIA 250 (Nov. 16, 1976) 83 I.D. 561

An appeal taken by a subcontractor in its own name is dismissed where the Board finds the subcontractor has no standing to invoke the provisions of the Disputes Clause as a means of securing an adjudication by the Board of the rights and obligations of the contesting parties.

An appeal is dismissed where the prime contractor has stated that nothing will be done to further an appeal taken by a subcontractor in its own name and the Board finds that the action of the prime contractor in giving the Government written notice of a potential claim of changed conditions by the subcontractor and any statements made by the prime contractor endorsing the potential claim at the time such notice was given are not a sufficient basis upon which to ground jurisdiction over the appeal.

Appeal of Divide Constructors, Inc., Subcontractor to Granite Construction Co., IBCA-1134-12-76 (Mar. 29, 1977) 84 I.D. 115

The thrust of 43 CFR 4.410, which limits the right to appeal to those who are parties to a case, is not to restrict access to administrative review of actions of Bureau of Land Management officials, but to provide a logical framework within which such review might be exercised. An "appeal" by an individual or group which has not, prior to the "appeal," participated in the formulation of the action to which objection is being voiced, should be treated as a protest under the provisions of 43 CFR 4.450-2.

California Ass'n of Four Wheel Drive Clubs et al., 30 IBLA 383 (June 10, 1977)

RULES OF PRACTICE--Continued

APPEALS--Continued

Standing to Appeal--Continued

An organization appealing a Bureau of Land Management decision will be considered a "party to a case" within the meaning of 43 CFR 4.410 where the organization uses the lands in question, is recognized as a bona fide representative of the community, receives notice of Bureau actions concerning the lands, actively and extensively participates in the formulation of land use plans for the lands in question, and takes a position in a dispute concerning the use of the land contrary to another group or individual.

Headwaters, 33 IBLA 91 (Dec. 16, 1977

Under 43 CFR 3522.2-1(a), a proposed readjustment of a coal lease should not be appealed directly to the Board of Land Appeals under 43 CFR 4.410, but, rather, a lessee's objections thereto should first be referred to and acted upon by the State Office, Bureau of Land Management.

California Portland Cement Co., 33 IBLA 223 (Dec. 28, 1977)

Under 43 CFR 4.410, any party to a case who is adversely affected by a decision of the Bureau of Land Management has a right of appeal to the Board of Land Appeals, even where the decision concerns legislation which has been repealed.

Fancher Bros., 33 IBLA 262 (Jan. 5, 1978)

Suzanne A. Halliday, 34 IBLA 219 (Mar. 27, 1978)

A decision to return an application for a public sale constitutes an action adverse to the applicant by an officer of the Bureau of Land Management and is thus appealable to the Board of Land Appeals under 43 CFR 4.410.

United Park City Mines Co., 33 IBLA 358 (Jan. 18, 1978)

An insurance company is refused permission to participate directly in prosecution of an appeal proceeding with a view to recovering the amount paid to the contractor under a builder's risk insurance policy as part of the contractor's differing site conditions claim, where the grounds assigned for the participation are that the interests of the contractor and the insurance company may well prove to be adverse and that the insurance company has the right to participate directly by reason of its status as a partial subrogee, the Board finding (i) that the privity of contract rule rather than the real party in interest rule is controlling in appeal proceedings and (ii) that it has no authority under the Disputes clause to adjudicate the rights of the contractor and the insurance company should they prove to be adverse, irrespective of whether such rights are asserted by the insurance company under a release and assignment of interest executed by the contractor or as a partial subrogee and without regard to the fact that the appellant had authorized the insurance company to file a separate complaint and to prosecute its claim through its own attorneys in the appellant's name.

Appeal of Zurn Engineers, IBCA-1176-12-77 (July 20, 1978) 85 I.D. 279

RULES OF PRACTICE--Continued

APPEALS--Continued

Standing to Appeal--Continued

A group of individual landowners, whose lands assertedly abut a Federal tract which is offered for timber sale, have standing to appeal from a decision dismissing their protest against the proposed sale.

George Jalbert et al., 39 IBLA 205 (Feb. 2, 1979)

The characterization of a submission as an "appeal" or as a "protest" is not binding upon a State Office; rather, reference must be made to the nature of the submission to determine whether the submission is properly treated as an "appeal" *or* as a "protest."

Duncan Miller (On Reconsideration), 39 IBLA 312 (Feb. 23, 1979)

When a State Office rejects the offer of a first-drawn applicant in a drawing under the simultaneous oil and gas leasing program, an appeal by the applicant raises the issue of his qualifications to hold the lease. The qualifications of the second-drawn applicant are irrelevant until such time as the offer of the first-drawn applicant is rejected and all his avenues of appeal are exhausted. However, it is not improper for BLM to name the second-drawn applicant as an adverse party in a decision rejecting the first-drawn applicant.

Thomas R. Flickinger, William S. Flickinger, et al., 40 IBLA 53 (Mar. 16, 1979)

This Board approves the rule that a surety may prosecute and appeal in its own name when it enters into a takeover agreement to complete performance of a defaulted contract, but in the absence of such an agreement, the surety may appeal under the defaulted contract only in a representative capacity with the consent of its principal, the principal contractor on the defaulted contract.

Appeal of General Construction Corp. of America by Financial Indemnity Co. (Its Surety), IBCA-1178-2-78 (Mar. 29, 1979) 86 I.D. 206

The right of appeal to the Board is limited to parties to a case adversely affected by a decision of BLM. A person protesting a timber sale does not become a party to a case until such time as BLM has issued a final decision adverse to his or her interests. The case is ordinarily ripe for appeal only when an adverse decision is made on the protest.

Elaine Mikels et al., 41 IBLA 305 (July 3, 1979)

A person has no standing to appeal with respect to action taken on a simultaneous oil and gas lease when he has not shown that he participated in the drawing or that he has a present interest in the lease.

Duncan Miller, 44 IBLA 259 (Dec. 19, 1979)

Statement of Reasons

A contractor's petition to reopen and conduct an evidentiary hearing after an adverse decision of its appeal, which was decided on the record without an oral hearing, was denied where the petition, treated as a motion for reconsideration, not only failed to satisfy the newly discovered evidence rule but also failed to disclose the evidence which would be proffered at the hearing

RULES OF PRACTICE--Continued

APPEALS--Continued

Statement of Reasons--Continued

and thus furnished no reason for vacating the original decision.

Appeal of COAC, Inc., IBCA-1004-9-73 (Feb. 19, 1975)
82 I.D. 65

An appeal to the Board of Land Appeals will be dismissed when the appellant fails to file a statement of reasons therefor within the time allowed.

W. R. Williamson, 19 IBLA 6 (Feb. 20, 1975)

A statement of reasons in support of an appeal which does not point out affirmatively in what respect the decision appealed from is in error does not meet the requirements of the Department's rules of practice and may be dismissed.

Duncan Miller, 20 IBLA 19 (Apr. 16, 1975)

Duncan Miller, 21 IBLA 21 (June 16, 1975)

Duncan Miller, 22 IBLA 336 (Nov. 11, 1975)

Earl D. Roberts, 28 IBLA 286 (Dec. 27, 1976)

Duncan Miller, 29 IBLA 174 (Mar. 14, 1977)

Duncan Miller, 34 IBLA 283 (Apr. 17, 1978)

United States v. David F. Mangum and Donald E. DeGuerre, 35 IBLA 131 (May 22, 1978)

Duncan Miller, 41 IBLA 129 (June 13, 1979)

An appeal is subject to summary dismissal where a statement of reasons is not timely filed. A statement of reasons in support of an appeal which does not point affirmatively in what respect the decision appealed from is in error does not meet the requirements of the Department's rules of practice and may be dismissed.

J. Bernard Roberts, 21 IBLA 204 (July 30, 1975)

A contractor's motion for reconsideration is denied where the contractor offered to provide evidence on one claim item which was obtained after the Board's adverse decision but which could have been obtained, in the exercise of due diligence, before the hearing and where other evidence offered on all claim items was in the contractor's possession at the time of the hearing and no valid reason was given for the failure to introduce such evidence. The motion for reconsideration is not a vehicle for correction of errors or omissions by a party in the presentation of its case.

Appeal of Robert P. Jones (Contractor), IBCA-1002-8-73 (Aug. 6, 1975)

An appeal to the Board of Land Appeals will be dismissed when the appellant fails to file a statement of reasons in support of the appeal within the time permitted by Departmental regulation.

Thurman Banks et al., 22 IBLA 205 (Oct. 15, 1975)

RULES OF PRACTICE--Continued

APPEALS--Continued

Statement of Reasons--Continued

A statement of reasons which does not point out the grounds upon which the decision appealed from is in error will be treated in the same manner as an appeal in which no statement of reasons is filed and the appeal will be dismissed.

Richard E. and Phyllis Lee, 22 IBLA 284 (Oct. 30, 1975)

An appeal to the Board of Land Appeals is subject to summary dismissal when appellant fails to file a statement of reasons in support of his appeal.

Nathern Lewis Stacy, 23 IBLA 166 (Dec. 24, 1975)

Mere accusations by appellant that a company which was awarded an oil and gas lease was involved in fraudulent and corruptive practices, without substantiating this charge, is not a supportable basis for an appeal. A Statement of Reasons which does not point out affirmatively in what respect the decision appealed from is in error will be treated in the same manner as an appeal in which no statement of reasons was filed, and may be dismissed.

Duncan Miller, 25 IBLA 263 (June 24, 1976)

A statement of reasons which merely contains broadside assertions and does not point out affirmatively in what respect the decision appealed from is in error may be dismissed.

Duncan Miller, 26 IBLA 37 (July 8, 1976)

Statements of reasons for appeal will not be accorded favorable consideration where they do not state with some particularity the exact reason for appeal and the allegations are not supported by evidence.

United States v. Richard and Beverly Weigel, 26 IBLA 183 (Aug. 10, 1976)

A statement of reasons in support of an appeal which does not point out affirmatively in what respect the decision appealed from is in error, but merely asserts that earlier filed sodium permit applications were erroneously approved, does not meet the requirements of the Department's rules of practice and is properly dismissed.

James G. Macey, 26 IBLA 191 (Aug. 10, 1976)

Where there is uncertainty regarding title to the oil and gas in an acquired land tract embraced in an oil and gas lease offer, and the evidence provided by the applicant is not sufficient basis for a legal opinion as to the status of title, the offer is properly rejected by the BLM. However, if the applicant provides new evidence on appeal tending to show the existence of a United States interest in the oil and gas in the tract, the case may be remanded for consideration of the new evidence.

Jean Oakason, 27 IBLA 41 (Sept. 22, 1976)

RULES OF PRACTICE--Continued

APPEALS--Continued

Statement of Reasons--Continued

Where an appellant fails to point out some error in a decision or to show that he has wrongly been deprived of some right, and instead limits his statement of reasons for appeal to allegations which are irrelevant and immaterial, the appeal will be dismissed as frivolous.

Duncan Miller, 28 IBLA 62 (Nov. 10, 1976)

The Government's motion for reconsideration, which advanced a number of arguments designed to show that the Government's interpretation of the contract was reasonable, provides no reason for overturning the Board's principal decision which applied the rule of *contra proferentem*. The Board, having previously found that appellant's interpretation was reasonable, now affirms its principal decision since the rule requires interpretation against the drafter of a document to resolve an ambiguity even if each party's interpretation is reasonable.

Appeal of Commonwealth Electric Co., IBCA-1048-11-74 (Sept. 30, 1977) 84 I.D. 867

A Government motion to dismiss an appeal is denied where the ground for the motion is that the contractor failed to raise its allegations before the contracting officer prior to filing its appeal but the Board finds that the contracting officer did have an opportunity to pass upon the principal allegations of the contractor prior to rendering his decision.

Appeal of Briles Wing & Helicopter, Inc., IBCA-1158-7-77 (Dec, 2, 1977) 84 I.D. 967

Where appellant's allegations on appeal are immaterial and irrelevant and appellant fails to establish any error in the decision below or any infringement of appellant's rights, the appeal is properly dismissed as lacking in merit.

Duncan Miller, 33 IBLA 83 (Dec. 8, 1977)

An appeal is properly dismissed where the appellant fails to point out the grounds on which the decision appealed from is in error, and the allegations in his statement of reasons are irrelevant and immaterial.

Duncan Miller, 37 IBLA 129 (Oct. 4, 1978)

An appeal is properly dismissed where the appellant fails to point out the grounds on which the decision appealed from is in error and the allegations in his statement of reasons are vague and unsupported.

Duncan Miller, 38 IBLA 259 (Dec. 8, 1978)

An appeal from an appraisal of a communication site right-of-way will not be accorded favorable consideration where it does not with some particularity show adequate reason for appeal and support the allegations with evidence showing error.

Valley Mobile Communications, Inc., 38 IBLA 359 (Dec. 29, 1978)

RULES OF PRACTICE--Continued

APPEALS--Continued

Statement of Reasons--Continued

The relaxed procedural rules relating to the filing of statements of reasons for appeal in Native allotment cases enunciated in the letter of Sept. 24, 1975, and extended in the order of Nov. 26, 1976, IBLA 76-715, are hereby revoked. All future requests for extensions of time must comport with the regulations found at 43 CFR 4.22(f)(2).

State of Alaska et al., 42 IBLA 94 (Aug. 16, 1979)

Allegations on appeal will not be afforded favorable consideration where they are not stated with some particularity and supported by evidence.

New England Fish Co., 42 IBLA 200 (Aug. 22, 1979)

An appellant may adopt arguments prepared by another person and submit them as his or her own statement of reasons so long as appellant acts in good faith and the statement is relevant to the issues on appeal.

Alice M. Hardy, 44 IBLA 5 (Nov. 6, 1979)

Timely Filing

Where request for reconsideration of Bureau of Land Management 1968 homesite decision is taken in 1974, appellant stating he was never served with decision, but where receipt in record shows service in 1968, reconsideration should be denied.

Hollis E. Justis, 21 IBLA 63 (June 25, 1975)

An appeal to the Board of Land Appeals will be dismissed where the appellant failed to file a timely notice of appeal. A notice of appeal, although received within the 10-day grace period, but not transmitted within the 30-day period following service of the decision, is not timely filed and must be dismissed.

Shelley Anne Trainor, 21 IBLA 326 (Aug. 14, 1975)

Where a right-of-way application has been rejected in part, an appeal therefrom should be dismissed if not filed within the period prescribed in 43 CFR 4.411.

Jerrold B. Cooley, Lucy B. Cooley, 32 IBLA 367 (Nov. 7, 1977)

An appeal is dismissed as untimely when it was not filed within 30 days of the date on which the contracting officer's final decision was received by a person who was not employed by the appellant but who was authorized to receive his mail during the 6 weeks the appellant was away on vacation. While the appellant denied that such person was authorized to sign a return receipt for certified mail, the Board noted that no question of authority to sign for certified mail had been raised in the contractor's letter requesting an extension in the time for filing the appeal and that no such question was raised until the Government's motion to dismiss the instant appeal was filed.

A motion to dismiss an appeal is granted when the appellant had failed to file an appeal within 30 days of the date on which the contracting officer's final decision was received. Respecting the contractor's argument that the 30-day time limit should be waived, the Board noted that the right to extend the time for

RULES OF PRACTICE--Continued

APPEALS--Continued

Timely Filing--Continued

filing a notice of appeal had been specifically excepted from the grant of authority to the Board as set forth in the regulations governing Board proceedings.

Appeal of Harry Claterbos Co., JV, IBCA-1153-5-77 (Dec. 6, 1977) 84 I.D. 969

When an appellant files a timely motion for reconsideration asking that an equitable adjustment be increased, the effect is to prevent finality from attaching to the original decision and the Board has jurisdiction to consider a Government response asking that the equitable allowance be reduced, even though the response was not filed within the 30-day period allowed for initial filing of a motion for reconsideration.

Appeal of J. A. LaPorte, Inc., IBCA-1146-3-77 (Feb. 14, 1979) 86 I.D. 125

The applicable regulation, 43 CFR 4.414 (1977), allows the Board some discretion in deciding whether to disregard the answer of an appellee who fails to file an answer within 30 days after service on him of the notice of appeal or statement of reasons and whose delay in filing is not waived under the provisions of 43 CFR 4.401(a) (1977).

California Portland Cement Co., Rosebud Coal Sales Co., 40 IBLA 339 (May 10, 1979)

Where a person moves from his record address without leaving a forwarding address, and a copy of a BLM decision affecting him is mailed to this last address of record and returned by the postal service as undeliverable, the decision is considered to have been "served" him as of the date it is returned to BLM. 43 CFR 4.401(c). Accordingly, the deadline for filing a notice of appeal is 30 days after the date the decision is returned to BLM.

BLM may not properly waive the untimely filing of a notice of appeal under 43 CFR 4.401(a) where it is clear that the notice of appeal was not transmitted to BLM until after the end of the time in which it was required to be filed.

Where a notice of appeal is not timely filed, it must be dismissed.

Nicky Nickoli, 43 IBLA 296 (Oct. 17, 1979)

An appeal to the Director, U.S. Geological Survey, is properly dismissed where the appellant failed to file a timely notice of appeal in the proper office within 30 days from service of the decision appealed from in order to comply with the requirements of the applicable regulations in 30 CFR 290.

Mesa Petroleum Co., 44 IBLA 165 (Nov. 30, 1979)

EVIDENCE

The ultimate burden of proof to show a discovery of a valuable mineral deposit is always upon the mining claimant. However, if the Government in a mining contest fails to present a prima facie case and the contestees move to dismiss the case and rest, the contest

RULES OF PRACTICE--Continued

EVIDENCE--Continued

complaint must be dismissed because there would be no evidentiary basis for an order of invalidity.

In determining the validity of a mining claim in a Government contest, the entire evidentiary record must be considered; therefore, if evidence presented by the contestees shows that there has not been a discovery, it may be used in reaching a decision that the claim is invalid because of a lack of discovery, regardless of any defects in the Government's prima facie case.

Where the Government has made a prima facie case of lack of discovery in a mining contest, any issue in doubt as to discovery raised by the evidence must be resolved against the party having the risk of nonpersuasion, the mining claimant. If a mining claimant fails to show by a preponderance of the evidence as to such issue that there has been a discovery of a valuable mineral deposit he has not satisfied his burden of proof and an administrative law judge must declare the claim invalid, rather than leave the question of the claim's validity unresolved.

United States v. Clarion W. Taylor, Sr., and Gerald O'Connor, 19 IBLA 9 (Feb. 20, 1975) 82 I.D. 68

In a mining contest a mining claimant is the true proponent under the Administrative Procedure Act, 5 U.S.C. § 556(d) (1970), of a rule or order that he has complied with the mining laws, and he has the ultimate burden of proof--the risk of nonpersuasion--to show by a preponderance of the evidence that there is a valuable mineral deposit on the claim, when the Government has made a prima facie case of lack of such a discovery.

Evidence submitted on appeal after an initial decision in a mining contest may not be considered or relied upon in making a final decision but may only be considered to determine if there should be a further hearing.

United States v. Howard S. McKenzie, 20 IBLA 38 (Apr. 17, 1975)

Evidence tendered on appeal from an adverse decision in a mining claim contest cannot be considered except for the limited purpose of deciding whether a further hearing is warranted. However, such evidence will only be considered if accompanied by a cogent explanation of why it was not tendered at the hearing.

United States v. Charles J. MacIver et al., 20 IBLA 352 (June 11, 1975)

To establish the mineral character of railroad grant lands under the Act of July 1, 1862, 12 Stat. 489, as amended by the Act of July 2, 1864, 13 Stat. 356, it must be shown that known conditions--which may include geological conditions, discoveries of minerals in adjacent land and other observable external conditions upon which prudent and experienced men are known to be accustomed to act--are such as reasonably to engender the belief that the land contains mineral of such quality and quantity as to render its extraction profitable and justify expenditures to that end.

Southern Pacific Co., Heirs of George H. Wedekind, 20 IBLA 365 (June 12, 1975)

RULES OF PRACTICE--Continued

EVIDENCE--Continued

A request for an evidentiary hearing will be denied where there is no dispute involving a material fact, and there is no chance of development of further material facts which would require a different decision.

Beulah Moses, 21 IBLA 157 (July 21, 1975)

Stanley P. McCormick, 23 IBLA 304 (Jan. 16, 1976)

An evidentiary hearing will be denied where the information supplied by the applicant shows, as a matter of law, that the requirements of the statute have not been met.

Warner Bergman, 21 IBLA 173 (July 25, 1975)

A lack of sales of a mineral of widespread occurrence, such as sand and gravel, may raise a presumption that there was no demand for the mineral during that time, and, hence, the material was not marketable. The presumption may be overcome with credible evidence to the contrary or by bona fides in development.

Evidence tendered on appeal from an adverse decision in a mining claim contest cannot be considered except for the limited purpose of deciding whether a further hearing is warranted. However, such evidence will only be considered if accompanied by a cogent explanation of why it was not tendered at the hearing.

United States v. C. V. Hallenbeck et al., 21 IBLA 296 (Aug. 11, 1975)

A motion for remand of a mining claim contest for further hearing on the grounds of prejudicial surprise, based upon Government counsel's failure to supplement interrogatory answers listing witnesses and exhibits as ordered in lieu of prehearing conference, will be denied where contestee's counsel ignored repeated offers of continuance made at various stages of the hearing.

United States v. Theresa B. Robinson, 21 IBLA 363 (Aug. 25, 1975) 82 I.D. 414

A contractor's parol evidence rule objection to the admission in evidence of the answer given to a question raised at a prebidding conference as set forth in a contemporaneous Government memorandum is overruled where the Board finds that the answer given simply reflects information contained in the invitation for bids on which the contract is based.

Appeal of J. A. LaPorte, Inc., IBCA-1014-12-73 (Sept. 29, 1975) 82 I.D. 459

The Board of Land Appeals will not give favorable consideration to new or additional evidence submitted with an appeal from a rejection of a Native allotment application in the absence of a satisfactory showing why the evidence was not submitted to Bureau of Land Management within the period afforded the applicant for the submission of such evidence.

Alexandra Atchak, 23 IBLA 81 (Dec. 12, 1975)

RULES OF PRACTICE--Continued

EVIDENCE--Continued

A claim for acceleration under a contract for the construction of footings for a transmission line is denied where one of appellant's principal contentions was that in a telephone conversation following record snow in late September the project engineer had directed that men and equipment be added to the job in order to finish the work by the contract completion date of Nov. 1, but in correspondence conducted with the Government for almost 6 months after such telephone conversation the contractor failed to refer to the directions purportedly received from the project engineer and even failed to reference the particular telephone conversation. Actions taken by the Government's principal inspector were also found not to constitute acceleration orders when the evidence clearly showed that both parties viewed the inspector's action as involving suggestions rather than directions and that whether the suggestions were accepted by the contractor's job superintendent depended upon the exercise of his business judgment.

Appeal of Iversen Construction Co. (a/k/a Iconco), IBCA-981-1-73 (Dec. 30, 1975) 82 I.D. 646

A Native allotment applicant is not entitled to a hearing as a matter of right inasmuch as the issuance of an allotment is discretionary with the Secretary of the Interior. However, where there does appear to be a dispute as to material facts raised by conflicting affidavits as to the alleged use of land by conflicting applicants, a further field investigation will be directed in an attempt to resolve the factual uncertainties.

Amelia K. Blastervold et al., 23 IBLA 207 (Jan. 6, 1976)

The Board of Land Appeals will not give favorable consideration to new or additional evidence submitted with an appeal from rejection of a Native allotment satisfactory to it why the evidence was not submitted to the Bureau of Land Management within the 60-day period afforded the applicant to submit a further evidence in support of his application. General, rather than specific, allegations of difficulties in travel and communicating in Alaska are not satisfactory showings of the reason for late filing of such evidence.

Linda L. Walker, 23 IBLA 299 (Jan. 14, 1976)

Evidence offered on appeal from an initial decision by an administrative law judge after a hearing in a contest may not be considered or relied upon in making a final decision but may only be considered to determine if there should be a further hearing.

United States v. George R. Edeline et al., 24 IBLA 34 (Feb. 17, 1976)

David A. Burns, 30 IBLA 359 (June 10, 1977)

Joe I. Sanchez and Celina V. Sanchez, et al., 42 IBLA 176 (Aug. 22, 1979)

Evidence tendered on appeal from an adverse decision in a mining claim contest cannot be considered except for the limited purpose of deciding whether a further hearing is warranted.

United States v. Gary C. Fichtner et al., 24 IBLA 128 (Mar. 3, 1976)

United States v. Robert L. Taylor, 25 IBLA 21 (May 5, 1976)

Where the Government fails to present a prima facie case, a contestee, upon timely motion, may move to dismiss the case and then rest. If, however, he goes forward and presents evidence, that evidence will be considered as part of the entire evidentiary record. Therefore, even if the Government has failed to make a satisfactory prima facie case, or the case is weak, contestee's evidence may be used against him to establish that case. Furthermore, where contestee chooses to rebut the case, he must do so by a preponderance of the evidence, bearing the risk of nonpersuasion if he fails.

United States v. Alex Bechthold, 25 IBLA 77 (June 1, 1976)

Evidence tendered on appeal from an adverse decision in a mining claim contest cannot be considered in the absence of a compelling showing that it could not be tendered at the hearing, and even then such evidence may only be considered for the purpose of determining whether a rehearing is warranted.

United States v. Richard C. Reynders and Carol J. Reynders, 26 IBLA 131 (July 30, 1976)

Where there is uncertainty regarding title to the oil and gas in an acquired land tract embraced in an oil and gas lease offer, and the evidence provided by the applicant is not sufficient basis for a legal opinion as to the status of title, the offer is properly rejected by the BLM. However, if the applicant provides new evidence on appeal tending to show the existence of a United States interest in the oil and gas in the tract, the case may be remanded for consideration of the new evidence.

Jean Oakason, 27 IBLA 41 (Sept. 22, 1976)

In a mining claim contest where a contestee is of the opinion that the Government did not make a prima facie case of no discovery, he may move to have the case dismissed at the conclusion of the Government's case, and then rest. The contest complaint could be dismissed if the administrative law judge rules that no prima facie case had been made of lack of discovery and there is no other evidence in the record to support the charges in the complaint. But if the contestee goes forward after making such a motion to dismiss and presents his evidence, that evidence must be considered as part of the entire record and its probative value will be weighed. Thus, even if the Government has failed to make a prima facie case, evidence presented by the contestee which supports the Government's contest charges may be used against the contestee, regardless of the defects in the Government's case.

United States v. Arizona Mining and Refining Co., Inc., et al., 27 IBLA 99 (Sept. 29, 1976)

United States v. R. B. Rodgers and Barbara J. Rodgers, 32 IBLA 77 (Sept. 2, 1977)

United States v. Andy Syndbad, 42 IBLA 313 (Aug. 29, 1979)

While the burden of showing an excusable cause of delay to exist is on the construction contractor, the invoking of this rule presupposes that the Government will leave this responsibility with the contractor, or, if it undertakes to correspond directly with the subcontractors or suppliers concerning delays experienced, it will inform them of the criteria set forth in the contract for establishing an excusable cause of delay.

Appeal of The J. C. Hester Co., Inc., IBCA-1114-7-76 (Jan. 14, 1977)

Evidence tendered on appeal from a mining contest may only be considered for the limited purpose of determining whether a further hearing is warranted.

United States v. George J. Hunt and A. H. Goodwin, 29 IBLA 86 (Feb. 23, 1977)

A field examination report of a trade and manufacturing site claim is not evidence on which the final action of cancellation may be taken, until such time as the pertinent facts are admitted by the applicant or the report is admitted into evidence at a hearing initiated by a contest complaint.

John B. Coghill, 29 IBLA 177 (Mar. 18, 1977)

Evidence tendered on appeal from an adverse decision in a mining claim contest can only be considered to determine whether a further hearing on the contest should be granted. Where the appellant shows no substantial equitable basis for holding such a hearing and where no substantial expectation appears to exist that such a hearing would produce more conclusive evidence on the issue, a further hearing will not be ordered.

United States v. Bradley F. Denham, 29 IBLA 165 (Mar. 18, 1977)

A lode mining claim for barite is properly declared null and void in the absence of a showing of a discovery on the claim of a deposit of barite which would warrant a prudent man in further expending his labor and means in the reasonable expectation of developing a valuable mine. Evidence of mineralization which may justify further exploration is not sufficient to establish that a discovery of a valuable mineral deposit has been made.

Once the Government has established in a mining claim contest a prima facie case that the claims are not valid for lack of discovery, the burden shifts to the contestee to prove the discovery of a valuable mineral deposit by a preponderance of the evidence.

United States v. Howard S. McKenzie, 29 IBLA 270 (Mar. 28, 1977)

The ultimate burden of proof to show a discovery of a valuable mineral deposit is always upon the mining claimant, but if the Government in a contest fails to present a prima facie case and the contestee moves to dismiss the case and rests, the contest complaint must be dismissed because there would be no evidentiary basis for an order of invalidity.

In determining the validity of a mining claim in a Government contest, the entire evidentiary record must be considered; therefore, if evidence presented by contestee shows there has not been a discovery, it may be used in reaching a decision that the claim is invalid regardless of any defects in the prima facie case.

Where the Government has made a prima facie case of lack of discovery in a mining contest, and a mining claimant fails to show discovery by a preponderance of the evidence, he has not satisfied his burden of proof and the claim must be declared invalid.

United States v. Lloyd O'Callaghan, Sr., et al., 29 IBLA 333 (Mar. 31, 1977)

In a Government contest challenging the validity of mining claims located for a clay-type material, an adequate prima facie case is established where there are expert witness opinions that the deposit is only a common clay or shale and it cannot meet refractory standards. The contestees then must go forward with evidence to rebut the Government's case with a preponderance of the evidence.

United States v. Thomas J. Peck et al., 29 IBLA 357 (Mar. 31, 1977) 84 I.D. 137

Under a contract requiring contractor to provide all necessary material, equipment and labor, the contractor's admission that it did not have adequate equipment or an efficient work force, as well as a lack of experience in the work required to be performed does not meet the burden of proof to justify an extension of time.

Appeal of Scona, Inc., IBCA-1094-1-76 (May 6, 1977)

Government witnesses in a contest proceeding who are qualified by education and experience are competent to testify as experts with reference to the prudent man rule.

United States v. A. O. Bartell, 31 IBLA 47 (June 23, 1977)

Past evidence of successful mining activity has limited probative value in determining whether there is a present discovery of a valuable mineral deposit on a mining claim, and assay reports can be given little weight when they are not supported by evidence as to who took the sample assayed, where it was taken, and what procedures were followed in taking the sample.

United States v. Lee Nicholson et al., 31 IBLA 224 (July 7, 1977)

After holding a hearing pursuant to the Administrative Procedure Act, an administrative law judge may properly find that a person has committed a grazing trespass if that finding is in accordance with and supported by reliable, probative, and substantial evidence. Because a grazing trespass proceeding is not a criminal proceeding, it need not be proved beyond a reasonable doubt that a particular individual committed the trespass.

When 33 percent of the available forage in a grazing allotment is on Federal land and the remainder is on private land, it is appropriate to find that 33 percent of the forage consumed by cattle throughout the allotment was Federal forage, in the absence of evidence to the contrary.

Bureau of Land Management v. Ross Babcock, 32 IBLA 174 (Sept. 15, 1977) 84 I.D. 475

To establish the mineral character of railroad grant lands under the Act of July 1, 1862 (12 Stat. 489), *as amended*, it must be shown that known conditions--which may include geological conditions, discoveries of minerals in adjacent land and other observable external conditions upon which prudent and experienced men are known to be accustomed to act--on the critical date are such as reasonably to engender the belief that the land contains mineral of such quality and in such quantity as to render its extraction profitable and justify expenditures to that end.

Southern Pacific Transportation Co., 32 IBLA 218 (Sept. 19, 1977)

Where a contestee fails to follow up his initial suggestion at the hearing that a deposition of a possible witness be taken with a proper request, it is not error for the administrative law judge to decide the case on the record made at the hearing.

United States (Contestant) v. Earl Frisco and Sandra S. Young (Contestees), 32 IBLA 248 (Sept. 21, 1977)

A party seeking a partial refund of the purchase price under the risk of loss provision of a contract for the cash sale of vegetative resources pursuant to the Materials Act of July 31, 1947, must present substantial evidence of the quantity of resources lost which otherwise would have been harvested.

Alma D. LeBaron, Jr., 32 IBLA 299 (Sept. 29, 1977)

The Goverment has the burden of proof that the contractor failed to deliver the goods. The contractor has the burden of proof that its failure was excusable. Where the only evidence of excusability was a letter from the contractor saying that it was delayed by delays in procurement of components and unexpectedly slower rates of system checkout and software debugging, the contractor has not carried its burden of proof of excusability and the appeal is denied.

Appeal of CSE, Inc., IBCA-1137-12-76 (Nov. 10, 1977) 84 I.D. 517

Motion for reconsideration is granted where original ruling that hearing will be limited to entitlement may have contributed to lack of evidence at the hearing and where issues included complex question of concurrent fault and damages.

Appeal of Scona, Inc., IBCA-1094-1-76 (Dec. 28, 1977) 84 I.D. 1019

A mining claim located on land which is not subject to mineral entry at the time of location is null and void from its inception. Where a mining claimant states in his notice of location that his mining claims were located on dates subsequent to a withdrawal which included the land encompassed by the mining claim, but indicates in his application for survey that the claims were located prior to the withdrawal, it is proper for the State Office to declare the mining claims null and void on the basis of the information in the notice of location where the claimant failed to submit evidence that the claims were in fact located prior to the withdrawal.

Ray L. Virgin, 33 IBLA 354 (Jan. 18, 1978)

RULES OF PRACTICE--Continued

EVIDENCE--Continued

What men have or have not done over a period of years is proper evidence as to the conduct of a prudent man in the same or very nearly the same circumstances. Where mining claims had been held for many years and little or no commercial production was achieved on such claims, it may be concluded that no prudent man would have been justified in the belief that the mineral deposit could be developed, extracted, and marketed at a reasonable profit.

United States v. Milton Wichner, 35 IBLA 240 (May 30, 1978)

A mining claim located on land which is not subject to mineral entry at the time of location is null and void from its inception. Where a mining claimant states in his notice of location that his mining claims were located on dates subsequent to the filing of an application for withdrawal which included the land encompassed by the mining claim, but indicates on appeal that the claims designated in the notice were merely a "regrouping," of identical claims filed prior to the segregation of the lands, it is nevertheless proper for the State Office to declare the mining claims null and void since mining claims located on withdrawn land are not subject to recordation.

Wilbur G. Hallauer, 36 IBLA 144 (July 26, 1978)

Evidentiary submissions on appeal can be considered only for the limited purpose of determining whether a further hearing should be granted. The record established at the hearing in a mining claim contest is the sole basis for determining the validity of a claim.

There is not a sufficient equitable basis for reopening a hearing in a mining contest because of an alleged fire to the contestee's home 3 days before the scheduled hearing where neither she nor her attorney who had entered an appearance in the case requested a postponement of the hearing or a continuation of the hearing after it had been held. Also, a further hearing will not be ordered merely to afford a claimant an additional opportunity to explore and make a discovery of a valuable mineral deposit.

United States v. Florence J. Mattox, 36 IBLA 171 (July 31, 1978)

In mining claim contest, Government must only go forward with evidence to establish prima facie case of no discovery of valuable mineral deposits, and burden then shifts to mining claimant to prove by preponderance of evidence that his claim is valid.

Government has established prima facie case when its mineral examiner testifies that he has examined mining claims in issue and found mineral values insufficient to support finding of discovery of valuable deposits.

United States v. Michael E. Marion, 37 IBLA 68 (Sept. 18, 1978)

Assay reports have limited probative value as to the existence of a valuable mineral deposit on a mining claim when they are not supported by evidence as to how and where the samples were taken.

United States v. John S. Porter, 37 IBLA 313 (Oct. 25, 1978)

United States v. John E. Burt et al., 43 IBLA 363 (Oct. 29, 1979)

RULES OF PRACTICE--Continued

EVIDENCE--Continued

Where the evidence as to specific trespass indicates that of a number of cattle counted some were located on private intermingled land, but there were no barriers, either natural or artificial, which would have prevented the cattle on private land from going onto the public land, it is proper to find that all cattle counted would tend to consume forage at a rate proportional to the ratio of forage available on private and public lands.

Bureau of Land Management v. Holland Livestock Ranch et al., 39 IBLA 272 (Feb. 15, 1979) 86 I.D. 133

When on appeal a sufficient showing is made to call into question a determination that land lies within a known geologic structure of a producing oil or gas field, and a hearing is requested, the decision may be set aside and remanded for hearing.

Jack J. Pender, 40 IBLA 26 (Mar. 9, 1979)

Where a Native allotment application is filed before the death of an applicant, proof of the applicant's use and occupancy, if otherwise timely, may be filed by the appropriate official of the Bureau of Indian Affairs pursuant to 43 CFR 2561.2(a) after the applicant's death. A decision rejecting the application because the proof was filed after the applicant's death must be set aside where the proof is not inconsistent with the application. Further proceedings must be served upon the heirs, known or unknown, by appropriate service, and also upon conflicting claimants, such as the State of Alaska.

Ernest L. Olson, Jr. (Deceased), 41 IBLA 179 (June 22, 1979)

It was proper to deny mining claimants' request to redrill on mining claims after the land was withdrawn from mining where the work would be an effort to make a discovery of a valuable mineral deposit within the claim rather than simply a confirmation or corroboration of a discovery prior to the withdrawal.

United States v. William Lavon Chappell et al., 42 IBLA 74 (Aug. 13, 1979)

An appellant will be held to have failed to sustain its burden of proof and the appeal will be denied where appellant's case is submitted on the record without a hearing and the record consists only of claim letters and pleadings alleging that the contracting officer's findings of fact and decision are erroneous in certain respects. Disputed allegations do not constitute evidence and cannot be accepted as proof of facts.

Appeal of C.I.C. Construction Co., Inc., IBCA-1190-4-78 (Sept. 25, 1979) 86 I.D. 475

GOVERNMENT CONTESTS

The ultimate burden of proof to show a discovery of a valuable mineral deposit is always upon the mining claimant. However, if the Government in a mining contest fails to present a prima facie case and the contestees move to dismiss the case and rest, the contest complaint must be dismissed because there would be no evidentiary basis for an order of invalidity.

In determining the validity of a mining claim in a Government contest, the entire evidentiary record must be considered; therefore, if evidence presented by the contestees shows that there has not been a discovery,

RULES OF PRACTICE--Continued

GOVERNMENT CONTESTS--Continued

it may be used in reaching a decision that the claim is invalid because of a lack of discovery, regardless of any defects in the Government's prima facie case.

Where the Government has made a prima facie case of lack of discovery in a mining contest, any issue in doubt as to discovery raised by the evidence must be resolved against the party having the risk of nonpersuasion, the mining claimant. If a mining claimant fails to show by a preponderance of the evidence as to such issue that there has been a discovery of a valuable mineral deposit he has not satisfied his burden of proof and an administrative law judge must declare the claim invalid, rather than leave the question of the claim's validity unresolved.

Where a contestee in a mining contest preponderates sufficiently to overcome the Government's prima facie case on an issue raised by the evidence in a mining contest and there is no evidence on other essential disputed issues, the contest should be dismissed unless a patent application is being contested, in which case a further hearing must be ordered to resolve other essential issues to determine whether the application may be allowed.

United States v. Clarion W. Taylor, Sr., and Gerald O'Connor, 19 IBLA 9 (Feb. 20, 1975) 82 I.D. 68

The doctrine of res judicata will not bar an administrative proceeding to determine the validity of three unpatented mining claims where, in a previous condemnation action for the War Department's taking of a temporary exclusive easement covering the claims, the judgment of the Federal district court was limited solely to the compensation to be paid by the United States, and there was no litigation of the issue of the validity of the claims and no prior adjudication of that issue in the Department of the Interior.

Equitable estoppel will not operate to bar a mining claim contest or alter its result where it is not shown that some officer of the Government, who was authorized to declare the claims valid, falsely misrepresented to, or concealed material facts from the claimants concerning the validity of the claims with the intention that the claimants should act in reliance thereon, with the result that the claimants were thereby induced to do so, to their ultimate damage.

The doctrine of collateral estoppel will not bar the administrative contest of the validity of three mining claims which were the subject of a previous condemnation action for the taking by the Government of a temporary exclusive easement over the claims, where the issue of the validity of the claims was not actually litigated and it was wholly unnecessary for the court to adjudicate that issue in rendering its judgment.

The Department of the Interior has jurisdiction, in proper proceedings, to determine the vaildity of mining claims on Federal lands.

United States v. A. B. Fleming et al., 20 IBLA 83 (Apr. 24, 1975)

The doctrine of collateral estoppel will not bar the administrative contest of the validity of five mining claims which, together with another claim, were the subject of previous condemnation actions for the taking of a temporary exclusive easement over the claims, where the issue of the validity of the individual claims was not actually litigated and it was wholly unnecessary for the Court to adjudicate that issue in rendering its judgment.

Equitable estoppel will not operate to bar a mining claim contest or alter its result where it is not shown that some officer of the Government, who was authorized

RULES OF PRACTICE--Continued

GOVERNMENT CONTESTS--Continued

to declare the claims valid, falsely misrepresented to, or concealed material facts from the claimant concerning the validity of the claim with the intention that the claimant should act in reliance thereon, with the result that the claimant was thereby induced to do so, to his ultimate damage.

There can be no waiver of the Secretary's right to contest a mining claim believed to be invalid without a showing of an authority to make such a waiver and an intention to do so.

United States v. Bert L. Johnson, 23 IBLA 349 (Jan. 21, 1976)

Where a contestee makes a timely response to a Government complaint in a mining contest, which can reasonably be construed as a general denial of the allegations contained in the complaint, the response will be considered a sufficient answer within the contemplation of the regulations. The allegations then cannot be taken as admitted and the mining claim declared null and void without a hearing.

United States v. Cliff Libby, 24 IBLA 39 (Feb. 19, 1976)

A mining claim is a claim to property which may not be declared invalid without proper notice and an adequate opportunity for an agency hearing in accordance with due process of law. That due process consists of notice and opportunity for hearing, and it suffices if the claimant is afforded the opportunity to be present and heard. The fact that the claimant, after filing a timely answer to the contest complaint, refused to attend that hearing and produce evidence does not vitiate the due process he has received.

United States v. Carl Bellamy, 25 IBLA 50 (May 14, 1976)

Where the Government fails to present a prima facie case, a contestee, upon timely motion, may move to dismiss the case and then rest. If, however, he goes forward and presents evidence, that evidence will be considered as part of the entire evidentiary record. Therefore, even if the Government has failed to make a satisfactory prima facie case, or the case is weak, contestee's evidence may be used against him to establish that case. Furthermore, where contestee chooses to rebut the case, he must do so by a preponderance of the evidence, bearing the risk of nonpersuasion if he fails.

United States v. Alex Bechthold, 25 IBLA 77 (June 1, 1976)

"Final entry." When an amended homestead final proof has been submitted, the term "final entry" in the proviso in sec. 7, Act of Mar. 3, 1891, 26 Stat. 1098, *as amended*, 43 U.S.C. § 1165 (1970) refers to the submission, to the proper officials, of the amended final proof and required fees.

Under sec. 7, Act of Mar. 3, 1891, 26 Stat. 1098, *as amended*, 43 U.S.C. § 1165 (1970) which requires issuance of a patent 2 years after receipt upon final proof for a homestead entry, a contest against an entry should not be dismissed where the complaint was filed within 2 years following the submission of additional affidavits amending the entryman's deficient final proof, despite the fact that the receipt in connection with the deficient proof had been issued more than 2

RULES OF PRACTICE--Continued

GOVERNMENT CONTESTS--Continued

years before filing of the complaint and the receipt had never been canceled or a new receipt issued.

United States v. Joe W. Bryant, 25 IBLA 247 (June 23, 1976)

A mining claim is properly declared invalid where the Government establishes a prima facie case of lack of discovery, and the contestee does not show by a preponderance of the evidence that a discovery has been made.

Where the Government contests a mining claim, official notice of a change in the published price of gold from that given at the hearing, as set forth in the evidence, may be taken by both the administrative law judge and the Board of Land Appeals, but official notice cannot be given to asserted "modern methods of extraction of gold."

United States v. Gold Placers, Inc., 25 IBLA 368 (July 6, 1976)

A Federal district court jury verdict in a suit to cancel desert land patents, that the entrymen and their purchaser under an illegal executory contract did not commit fraud against the United States, does not collaterally estop this Department from adjudicating a contest grounded on the illegal executory contract against the purchaser's own entry, because the legal standard applicable in the subsequent contest is different than that in the fraud action--a desert land entry can be subject to cancellation for acts that do not constitute fraud.

In the case of a desert land entry contestee who violates the 320-acre limitation on holding desert land because he is the "purchaser" of two other 320-acre entries under an illegal executory contract to convey after patent, all entries held by the "purchaser" are subject to cancellation, and the Department may proceed by way of contest against the "purchaser's" own entry, which was not a subject of the illegal contract.

United States v. Elodymae Zwang, United States v. Darrell Zwang, 26 IBLA 41 (July 9, 1976) 83 I.D. 280

Where the Bureau of Land Management determines that an Alaska Native allotment application should be rejected because the land was not used and occupied by the applicant, the BLM shall issue a contest complaint pursuant to 43 CFR 4.451 *et seq*. Upon receiving a timely answer to the complaint, which answer raises a disputed issue of material fact, the Bureau will forward the case file to the Hearings Division, Office of Hearings and Appeals, Department of the Interior, for assignment of an administrative law judge, who will proceed to schedule a hearing at which the applicant may produce evidence to establish entitlement to his allotment.

Donald Peters, 26 IBLA 235 (Aug. 17, 1976)
83 I.D. 308

John Moore et al., 40 IBLA 321 (Apr. 30, 1979)
86 I.D. 279

Although, in a mining claim contest, the Government may make a prima facie case of no discovery by the testimony of a mineral examiner that he has been on the land in issue and saw nothing of mineral value, a prima facie case is ordinarily not made where it is established that the examiner was not on the land in issue.

In a mining claim contest where a contestee is of the opinion that the Government did not make a prima facie case of no discovery, he may move to have the case dismissed at the conclusion of the Government's case, and then rest. The contest complaint could be dismissed if the administrative law judge rules that no prima facie case had been made of lack of discovery and there is no other evidence in the record to support the charges in the complaint. But if the contestee goes forward after making such a motion to dismiss and presents his evidence, that evidence must be considered as part of the entire record and its probative value will be weighed. Thus, even if the Government has failed to make a prima facie case, evidence presented by the contestee which supports the Government's contest charges may be used against the contestee, regardless of the defects in the Government's case.

In a mining claim contest where the evidence of a valuable mineral deposit, submitted by contestee at a hearing, bearing on the validity of a mining claim, has greater probative weight than that offered by the Government, it is proper to find that contestee has preponderated and to dismiss, without prejudice, the complaint alleging no discovery of a valuable mineral deposit.

United States v. Arizona Mining and Refining Co., Inc., et al., 27 IBLA 99 (Sept. 29, 1976)

Where an attorney files an answer to a contest concerning mining claims on behalf of certain individuals, who, during the pendency of the contest proceedings, transfer their interests in the mining claims to a corporation of which they are major stockholders and directors, and the attorney represents those individuals and the corporation at the contest hearing, the corporation is bound by the determination reached therein, even though the corporation may not have received actual notice of the contest.

A request for postponement made more than 10 days prior to a hearing is properly denied where there has been no showing of good cause and proper diligence. A contestee's request for postponement is properly denied when (1) a contestee only seeks postponement in order to pursue an exchange of land for the claims; and (2) the administrative law judge rules that the contestant may seek to dismiss the contest if an exchange is contemplated and the contestant does not wish to abate the contest proceedings.

A request for postponement made at a hearing or within 10 days of a hearing is properly denied where there has been no showing of an extreme emergency which could not have been anticipated and which justifies beyond question the granting of a postponement. This standard is not met by a party's assertion that it has not had adequate opportunity to prepare a defense where such difficulty could have been anticipated before the request was made.

United States v. Mins Development Corp., et al., 27 IBLA 238 (Oct. 18, 1976)

Where the State of Alaska has applied to select certain land and has been given tentative approval of that selection, and thereafter a conflicting Native allotment application is filed which is supported only by meager evidence of use and occupancy, it is error to allow the allotment application and to cancel the State's tentative approval and reject the selection application without notice and an opportunity for a hearing in which the State may participate.

State of Alaska, John Nusunginya, 28 IBLA 83 (Nov. 12, 1976)

RULES OF PRACTICE--Continued

GOVERNMENT CONTESTS--Continued

In a mining contest, a matter not charged in the complaint may only be considered by the administrative law judge if it was raised at the hearing without objection and the contestee was fully aware that the issue was raised.

United States v. Glenn C. Bolinder and L. O. Turner, et al., 28 IBLA 187 (Dec. 6, 1976) 83 I.D. 609

The fact that the contest regulations may not contain a specific provision providing for the assertion of affirmative defenses or counterclaims in an answer to a contest complaint does not necessarily bar an administrative law judge from consideration of the substance of such assertions.

United States v. Jerry L. Crow, 28 IBLA 305 (Jan. 24, 1977)

Under the Department of the Interior's rules governing contests against mining claims, where an answer to a complaint is not filed within the prescribed time the allegations of the complaint will be taken as admitted by the contestee and the case decided without a hearing by the appropriate officer of the Bureau of Land Management. A mining claim may be declared null and void where there was a charge in the complaint of insufficient minerals to constitute a valid discovery.

United States v. William C. Smith, a/k/a Bill Smith, 29 IBLA 7 (Feb. 8, 1977)

Under the Department of the Interior's rules governing contests against mining claims, where an answer to a complaint is not filed within the prescribed time the allegations of the complaint will be taken as admitted by the contestee and the case decided without a hearing by the appropriate officer of the Bureau of Land Management. However, under the rules an answer may be accepted if it is received within 10 days after the due date and it is determined that the answer was probably transmitted before the end of the period in which it was required to be filed.

United States v. Jesse Smith, 29 IBLA 10 (Feb. 8, 1977)

When a mining claimant has failed to answer a complaint in a mining contest, the allegations are deemed admitted and the State Office of the Bureau of Land Management will decide the case without a hearing. 43 CFR 4.450-7(a).

A defaulting contestee may not rely on an answer filed by another contestee in the same contest when such answer never purported to be on behalf of the defaulting contestee.

United States v. Frederick A. Haas et al., 29 IBLA 120 (Feb. 23, 1977)

The ultimate burden of proof to show a discovery of a valuable mineral deposit is always upon the mining claimant, but if the Government in a contest fails to present a prima facie case and the contestee moves to dismiss the case and rests, the contest complaint must be dismissed because there would be no evidentiary basis for an order of invalidity.

In determining the validity of a mining claim in a Government contest, the entire evidentiary record must be considered; therefore, if evidence presented by contestee shows there has not been a discovery, it may be used in reaching a decision that the claim is invalid regardless of any defects in the prima facie case.

RULES OF PRACTICE--Continued

GOVERNMENT CONTESTS--Continued

Where the Government has made a prima facie case of lack of discovery in a mining contest, and a mining claimant fails to show discovery by a preponderance of the evidence, he has not satisfied his burden of proof and the claim must be declared invalid.

United States v. Lloyd O'Callaghan, Sr., et al., 29 IBLA 333 (Mar. 31, 1977)

Since a Government contest is not insufficient and subject to dismissal for failure to name all parties in interest, a contest is properly brought against persons who are heirs of a director of a corporation whose charter has expired under State law, even though the State law provides that the property of such a corporation passes to a public trustee for distribution by him. Any interest of those not named or served in a manner provided by the pertinent regulation is not affected.

United States v. Emma Elizabeth Conger, and Walter J. Boltz, as the Heirs of R. W. Speer, a Last Known Director of the Arlington Gold Mining Co. (Contestees), 31 IBLA 173 (July 5, 1977)

In a mining claim contest where a contestee is of the opinion that the Government did not make a prima facie case of no discovery, he may move to have the case dismissed at the conclusion of the Government's case, and then rest. The contest complaint could be dismissed if the administrative law judge rules that no prima facie case had been made of lack of discovery and there is no other evidence in the record to support the charges in the complaint. But if the contestee goes forward after making such a motion to dismiss and presents his evidence, that evidence must be considered as part of the entire record and its probative value will be weighed. Thus, even if the Government has failed to make a prima facie case, evidence presented by the contestee which supports the Government's contest charges may be used against the contestee, regardless of the defects in the Government's case.

In a proceeding to determine the validity of an unpatented mining claim the claimants must prevail, if at all, upon the strength of their own case, rather than upon any weakness in that of the Government.

United States v. E. K. Rodgers and Barbara J. Rodgers, 32 IBLA 77 (Sept. 2, 1977)

A Bureau of Land Management decision, dismissing an answer to contest complaints filed in behalf of individual contestees and a company, and holding mining claims null and void because it appeared the company did not own the claims and because the answer was filed in behalf of the individual contestees by someone not authorized to practice in their behalf, will be vacated where on appeal it is shown that within the time for filing the answer the claims had been transferred to the company. There is no need to dismiss the contest and initiate a new contest against the company since a timely answer has been filed in its behalf; instead, the complaints should be amended to substitute the company as the contestee and party in interest and the contest proceeding should go forward against it.

Sharon R. Milazzo et al., 33 IBLA 57 (Dec. 5, 1977)

RULES OF PRACTICE--Continued

GOVERNMENT CONTESTS--Continued

In a Government contest, regular service of the complaint must be presumed, where no question is raised as to the validity of certified mail return receipts included in the record, regular on their face and indicating proper service.

United States v. Ronda Niece and Leslie Niece, 33 IBLA 290 (Jan. 10, 1978)

Although a millsite may be declared invalid when its only use is in connection with a mining claim which is declared invalid, a millsite can be contested separately and declared invalid when evidence establishes it is not being used for mining or milling purposes, independent of the issue of the validity of the mining claim.

United States v. John R. Parsons, 33 IBLA 326 (Jan. 16, 1978)

Where the Government contests a mining claim for lack of discovery, it assumes only the burden of making a prima facie showing that discovery is lacking, and the burden of showing a valuable discovery by a preponderance of the evidence then falls upon the claimants.

United States of America v. David L. King et al., 34 IBLA 15 (Feb. 10, 1978)

In a mining contest a contestee may rest at the close of the Government's case and move for a dismissal based on the Government's failure to make out a prima facie case of a claim's invalidity. If, however, the contestee goes forward and presents his own evidence, that evidence may be weighed against him notwithstanding any defects in the Government's case.

United States v. Michael Slater, 34 IBLA 31 (Feb. 14, 1978)

Where the Bureau of Land Management brings a contest complaint against unpatented mining claims, naming as contestee only the estate of the deceased claimant, proper service of process upon the court appointed administrator, executor, or personal representative of the deceased claimant is necessary in order to affect the interests of all the heirs of the deceased.

Heirs of a deceased mining claimant who personally respond without protest or objection to a Government contest complaint which names as contestee only the estate of their intestate decedent will be bound by the result of such contest insofar as it purports to affect their interest in that estate, even though service on the estate itself was faulty.

United States v. Estate of W. B. Wood, 34 IBLA 44 (Feb. 16, 1978)

Failure to file a timely answer to a mining claim contest complaint will result in the charges in the complaint being taken as admitted and the case being decided without a hearing. Unsubstantiated allegations of temporary incapacity due to a nervous breakdown cannot serve as a basis for waiving this mandatory requirement.

United States v. Brent J. Brunker, 36 IBLA 36 (June 27, 1978)

RULES OF PRACTICE--Continued

GOVERNMENT CONTESTS--Continued

Where the Government contests a mining claim for lack of discovery, it assumes only the burden of making a prima facie showing that discovery is lacking, and the burden of showing a valuable discovery by a preponderance of the evidence then falls upon the claimants.

Where, in a mining contest, a contestee presents his own evidence, that evidence may be weighed against him notwithstanding any defects in the Government's case.

United States v. Roger and Stephanie Cichetti, 36 IBLA 124 (July 25, 1978)

In order to sustain a charge that land embraced within a mining claim is not held in good faith for mining purposes the evidence relating to mineral claimant's lack of good faith must be clear.

United States v. Clayton A. Dillman and Jean P. Dillman, 36 IBLA 358 (Aug. 31, 1978)

Intervention, by right, as a full party in a contest proceeding is only recognized where the individual seeking intervention has the necessary interest to maintain a private contest independently under 43 CFR 4.450-1.

The extent of the participation in a contest hearing to be afforded "interested individuals" who do not have a sufficient interest to maintain a private contest is committed to the sound discretion of the administrative law judge. Among the factors which are properly considered are: the desires of the original parties; the likelihood that the party seeking intervention will provide information which would not be forthcoming without its participation; and the cost which must be borne by both the contestant and the contestee by the nature and scope of the intervention granted.

United States v. United States Pumice Co., 37 IBLA 153 (Oct. 5, 1978)

Failure to file a timely answer to a mining claim contest complaint will result in the charges in the complaint being taken as admitted and the case being decided without a hearing. Where contestees deny the allegations in the complaint only as to 4 claims but not as to 15 other claims addressed in the complaint, the complaint will be taken as admitted as to the 15 claims not addressed in the answer to the complaint.

Where contestees in a mining claim contest file a timely answer to the contest complaint, this answer is efficacious as to any other contestees who are members of his family if it appears on the face of the answer that they wish to retain their interests, if any, in the claims, as the contestees who answered may be regarded as having done so on their family members' behalf. In these circumstances, these other contestees are properly regarded as having answered the complaint, absent any manifestation of a contrary intent.

Where a contestee makes a timely response to a Government complaint in a mining contest which is sufficient to raise a justiciable controversy, the allegations then cannot be taken as admitted and the mining claim(s) cannot be declared null and void without a hearing.

United States v. Jerry Brock et al., 39 IBLA 146 (Jan. 29, 1979)

RULES OF PRACTICE--Continued

GOVERNMENT CONTESTS--Continued

Where Bureau of Land Management determines an application for a Native allotment should be rejected for failure to establish use and occupancy of the land, Bureau of Land Management should initiate a contest proceeding pursuant to 43 CFR 4.451 *et seq*.

Frederick Phillips et al., 41 IBLA 169 (June 22, 1979)

Ella S. Sheldon et al., 42 IBLA 276 (Aug. 27, 1979)

Elena Bartman, 43 IBLA 284 (Oct. 17, 1979)

Where the Bureau of Land Management (BLM) determines that an Alaska Native allotment application should be rejected in part because the Native did not use all of the land applied for, the BLM shall initiate a contest proceeding pursuant to 43 CFR 4.451 *et seq*.

Frank Holland, 41 IBLA 207 (June 27, 1979) 86 I.D. 342

Failure to file a timely answer to a mining claim contest complaint will result in the charges in the complaint being taken as admitted and the case being decided without a hearing.

United States v. James Hawkeswood et al., 41 IBLA 245 (June 27, 1979)

United States v. Edna Horstmeier, 42 IBLA 33 (July 26, 1979)

Where there is a conflict between an application by the State of Alaska to select land under the Statehood Act and an application by an Alaska Native for allotment under the Act of May 17, 1906, and it appears to BLM that the Native applicant has met the requirements for patent, upon notice of this determination the State, if dissatisfied, has an election of remedies. It may not appeal from the "Notice," which is interlocutory, but it may initiate private contest proceedings to prove lack of qualification on the part of the Native, or it may appeal the subsequent decision of BLM to the Board of Land Appeals. If, on appeal, the Board concludes that the Native's application is deficient it will order the institution of Government contest proceedings, but if it finds the allotment application acceptable, it will order the patent issued, if all else be regular.

State of Alaska, 41 IBLA 309 (July 5, 1979)

Where there is a conflict between an application by the State of Alaska to select land under the Statehood Act and an application by an Alaska Native for allotment under the Act of May 17, 1906, and it appears to BLM that the Native applicant has met the requirements for patent, upon notice of this determination the State, if dissatisfied, has an election of remedies. It may not appeal from an interlocutory decision which authorizes the State to initiate private contest proceedings to prove lack of qualification on the part of the Native. Rather, it may initiate the private contest within the time period prescribed, or it may appeal the decision of BLM, after it becomes final, to the Board of Land Appeals. If, on appeal, the Board concludes that the Native's application is deficient it will order the institution of Government contest proceedings, but if it finds the allotment application acceptable, it will order the patent issued, if all else be regular.

State of Alaska et al., 42 IBLA 94 (Aug. 16, 1979)

RULES OF PRACTICE--Continued

GOVERNMENT CONTESTS--Continued

Where an applicant for a Native allotment alleges for the first time on appeal his use and occupancy of lands prior to their withdrawal, a decision rejecting the Native's application shall be vacated and the case remanded to BLM for its consideration of appellant's new evidence.

Charles L. John, 42 IBLA 260 (Aug. 27, 1979)

Where there is a conflict between an application by the State of Alaska to select land under the Alaska Mental Health Enabling Act and an application by an Alaska Native for allotment under the Act of May 17, 1906, and it appears to the Bureau of Land Management that the Native applicant has met the requirements for patent, upon notice of this determination the State, if dissatisfied, has an election of remedies. It may initiate private contest proceedings to prove lack of qualification on the part of the Native, or it may appeal the determination to the Board of Land Appeals. If, on appeal, the Board concludes that the Native's application is deficient, it will order the institution of Government contest proceedings. If, however, the Board affirms the finding that the requirements of patent have been met, the State will have no further administrative recourse. Where the State had not, prior to its appeal, been afforded notice of the election, it should be afforded an opportunity to make such election.

State of Alaska v. Mattie E. Barton, 42 IBLA 269 (Aug. 27, 1979)

State of Alaska v. Daniel Johnson, 42 IBLA 370 (Sept. 11, 1979) 86 I.D. 441

In a mining claim contest where a contestee is of the opinion that the Government did not make a prima facie case of no discovery, he may move to have the case dismissed at the conclusion of the Government's case and then rest. The contest complaint could be dismissed if the administrative law judge rules that no prima facie case had been made of lack of discovery and there is no other evidence in the record to support the charges in the complaint. But if the contestee goes forward after making such a motion to dismiss and presents his evidence, that evidence must be considered as part of the entire record and its probative value will be weighed. Thus, even if the Government has failed to make a prima facie case, evidence presented by the contestee which supports the Government's contest charges may be used against the contestee, regardless of the defects in the Government's case.

A sufficient prima facie case by the Government does not require positive proof that there has been no discovery made or that the mining claim is nonmineral in character. Upon the Government's presentation of a prima facie case, the burden shifts to the claimant to prove by a preponderance of the evidence that he indeed has a discovery of a valuable mineral deposit within the limits of the claim.

United States v. Andy Syndtad, 42 IBLA 313 (Aug. 29, 1979)

It is the responsibility of a mining claimant to present evidence supporting his allegation of bias on the part of Government mineral examiners testifying as to the validity of his claim in a contest proceeding, and a showing of Department affiliation does not discredit a witness.

The procedures of the Department of the Interior in mining contests where a mining claimant is afforded notice and an opportunity to be heard comport with the

RULES OF PRACTICE--Continued

GOVERNMENT CONTESTS--Continued

requirements of due process under the United States Constitution.

United States v. J. D. Wilson, 44 IBLA 1 (Nov. 6, 1979)

Where Bureau of Land Management determines that an application for a Native allotment is invalid because the facts are not as stated in the application, Bureau of Land Management should initiate a contest proceeding pursuant to 43 CFR 4.450 - 4.452-9.

Amy Tukrook Nukapigak, 44 IBLA 313 (Dec. 31, 1979)

HEARINGS

Where the party bearing the risk of nonpersuasion does not appear at a hearing ordered pursuant to 43 CFR 4.415, that party's appeal is properly dismissed.

Stanley G. West, 18 IBLA 337 (Jan. 10, 1975)

While a mining contest is within the jurisdiction of an administrative law judge, he may reopen the hearing for the production of further evidence before he makes his decision.

United States v. Clarion W. Taylor, Sr., and Gerald O'Connor, 19 IBLA 9 (Feb. 20, 1975) 82 I.D. 68

Evidence submitted on appeal after an initial decision in a mining contest may not be considered or relied upon in making a final decision but may only be considered to determine if there should be a further hearing.

A further hearing in a mining contest may be ordered where the particular circumstances so warrant it.

United States v. Howard S. McKenzie, 20 IBLA 38 (Apr. 17, 1975)

Where at a hearing held pursuant to sec. 2 of the Mining Claims Rights Restoration Act, 30 U.S.C. § 621(b) (1970), the mining claimant, prior to the taking of any evidence, enters into a stipulation while laboring under confusion as to the effect of the stipulation, and the stipulation legally precludes all forms of placer mining on his claim, the decision below relying on the stipulation will be reversed and the case remanded for a full hearing on the merits.

Dwight Brooks, 20 IBLA 100 (Apr. 25, 1975)

An evidentiary hearing will be denied where the facts are not in issue and there is no chance of development of further facts not already of record upon which a decision may be predicated.

Ann McNoise, David Lee Osheim, Martha Anderson, 20 IBLA 169 (May 7, 1975)

James S. Picnalook, Sr., Mabel Bullard, 22 IBLA 191 (Oct. 15, 1975)

RULES OF PRACTICE--Continued

HEARINGS--Continued

In a hearing on a patent application filed under the Transportation Act of 1940, 49 U.S.C. § 65(b) (1970), the Government has the obligation of making a prima facie case of mineral character between the date the railroad line was definitely located and the date of purchase, whereupon the applicant has the burden of establishing nonmineral character by a preponderance of the evidence.

Southern Pacific Co., Heirs of George H. Wedekind, 20 IBLA 365 (June 12, 1975)

In a hearing held to determine whether lands were swamp and overflowed at the time of the Swamp Lands Act, 43 U.S.C. §§ 981-986 (1970), the parties asserting the State's title fail to meet their burden of proof when the evidence submitted indicates that the mangrove area claimed as swampland is in fact below the line of mean high tide, and was properly delineated from the upland by the meander line.

Virgil Lopez et al., 21 IBLA 33 (June 17, 1975)

A request for an evidentiary hearing will be denied where there is no dispute involving a material fact, and there is no chance of development of further material facts which would require a different decision.

Beulah Moses, 21 IBLA 157 (July 21, 1975)

Stanley E. McCormick, 23 IBLA 304 (Jan. 16, 1976)

An evidentiary hearing will be denied where the information supplied by the applicant shows, as a matter of law, that the requirements of the statute have not been met.

Harper Bergman, 21 IBLA 173 (July 25, 1975)

Applicants under the Alaska Native Allotment Act do not have a right to a formal hearing before an administrative law judge. However, a hearing may be ordered in the discretion of the Secretary of the Interior.

Elsie Bergman, Walter Titus, Steven Bergman, 22 IBLA 233 (Oct. 22, 1975)

An evidentiary hearing will be denied where there are no facts in dispute and only legal issues are involved.

Herman Nookahoon, 23 IBLA 54 (Dec. 4, 1975)

An applicant for a Native allotment has no right to a hearing, and none is required where there is no offer of proof which indicates that the findings of the State Office were incorrect, or where an offer of evidence is unaccompanied by a satisfactory explanation why it was not submitted to the State Office within the time provided.

Alexandra Atchak, 23 IBLA 81 (Dec. 12, 1975)

RULES OF PRACTICE--Continued

HEARINGS--Continued

A Native allotment applicant is not entitled to a hearing as a matter of right inasmuch as the issuance of an allotment is discretionary with the Secretary of the Interior. However, where there does appear to be a dispute as to material facts raised by conflicting affidavits as to the alleged use of land by conflicting applicants, a further field investigation will be directed in an attempt to resolve the factual uncertainties.

Amelia K. Blastervold et al., 23 IBLA 207 (Jan. 6, 1976)

When the Department of the Interior finds that public land within the place limits of a legislative grant-in-aid of the construction of a railroad was mineral in character and the railroad company challenges such finding, a hearing should be granted at which the Department has the obligation of making a prima facie case of mineral character, whereupon the company has the burden of establishing nonmineral character by a preponderance of the evidence.

Southern Pacific Transportation Co., Jay R. Fogal; Lloyd D. Hayes (Intervenor), 23 IBLA 232 (Jan. 9, 1976)
83 I.D. 1

A Native allotment applicant is not entitled to a hearing as a matter of right inasmuch as the issuance of an allotment is discretionary with the Secretary of the Interior. A hearing is not appropriate when there is no offer of proof which if established would impel a different legal conclusion.

Kathryn Eluska, 23 IBLA 288 (Jan. 12, 1976)

An applicant for a Native allotment does not have a right to a formal hearing before an administrative law judge. Hearings may be held in the discretion of the Secretary of the Interior and will not be held where it is unlikely that further evidence will result in a different conclusion.

John C. Hanssen, 23 IBLA 296 (Jan. 12, 1976)

An evidentiary hearing is not required where a decision is based upon the facts as stated by the applicant, there is no dispute as to any material fact, and the sole question presented is a legal issue.

Rachael Toroskok, 23 IBLA 318 (Jan. 16, 1976)

Evidence offered on appeal from an initial decision by an administrative law judge after a hearing in a contest may not be considered or relied upon in making a final decision but may only be considered to determine if there should be a further hearing.

A further hearing may be ordered in a mining contest where the record is unsatisfactorily confusing and conflicting on the issue of quantity of minerals to satisfy the discovery tests, a request for the rehearing has been made with an offer of proof which tends to show a new hearing might result in a different finding, and there has been no objection to the request.

United States v. George R. Edeline et al., 24 IBLA 34 (Feb. 17, 1976)

RULES OF PRACTICE--Continued

HEARINGS--Continued

A request for a hearing pursuant to 43 CFR 4.415 for the purpose of taking testimony on the Bureau of Land Management's "continued refusal" to restore land in a reclamation withdrawal to entry will be denied. An appeal from a decision declaring mining claims and millsites null and void ab initio because the lands are in the withdrawal may not serve as the vehicle for petitioning the Secretary of the Interior to revoke the withdrawal. Furthermore, even if the withdrawal were revoked and the lands opened to entry, this action could not revive mining claims which were void when located while the withdrawal was in effect and the land closed to entry under the mining laws.

J. P. Hinds et al., 25 IBLA 67 (June 1, 1976)
83 I.D. 275

In proceedings before the Department to determine the validity of a mining claim, notice and an opportunity for a hearing pursuant to the Administrative Procedure Act are required only where there is a disputed question of fact; where the validity of a claim turns on the legal effect to be given facts of record concerning the status of the land when the claim was located, no hearing is required.

Beverly Trull, 25 IBLA 157 (June 10, 1976)

David Loring Castle, Darrel Hogglum, 26 IBLA 249 (Aug. 18, 1976)

W. A. Todd, J. B. Johnson, 28 IBLA 160 (Dec. 1, 1976)

In a case where a substantial increase is proposed in charges for a communication site under 43 CFR 2802.1-7(e), the required hearing should be conducted in accordance with the accepted concepts of due process.

American Telephone and Telegraph Co. et al., 25 IBLA 341 (June 30, 1976)

The allowance of a request for a hearing before an administrative law judge in a protest against a survey by the Bureau of Land Management is within the discretion of the Board of Land Appeals. There is no right to such a hearing.

E. A. Mikelson, 26 IBLA 1 (July 6, 1976)

While a determination of the grazing capacity of public lands will not ordinarily be overturned in the absence of a clear showing of error, a hearing may be ordered to resolve conflicts in the opinions of different experts where the lessee has made a substantial and believable offer of proof which, if true, would show error in the Bureau of Land Management's determination.

Duke W. Evans et al., 26 IBLA 15 (July 7, 1976)

Where there are conflicting claimants to lots in a Native townsite and the record does not clearly reflect who occupied or who was entitled to occupancy of the lots on the date of final subdivisional survey, the Board may, on its own motion, order a hearing.

Leona B. Stiens, 26 IBLA 144 (Aug. 2, 1976)

RULES OF PRACTICE--Continued

HEARINGS--Continued

A second hearing will not be afforded where a claimant was given notice and an opportunity to appear at a hearing, where he/she actually was represented at the hearing, and where nothing has been submitted which suggests that another hearing would produce a different result.

United States v. Richard and Beverly Weigel, 26 IBLA 183 (Aug. 10, 1976)

United States v. Beatrice Ann Johnson, 33 IBLA 121 (Dec. 19, 1977)

The fact that assessment work has been performed on a mining claim does not estop the Government from determining the validity of a claim by proper proceedings giving adequate notice and an opportunity for a hearing where there are disputed determinative facts. However, where the claim was located after land has been withdrawn from mining, it is proper for the Bureau of Land Management to declare a claim null and void ab initio without a hearing.

Roy B. Cummins, 26 IBLA 223 (Aug. 17, 1976)

A petition to reopen a hearing for submission of further evidence will be denied when the contestee offers no valid justification for the neglect to offer the evidence, which was or could have been available at the original hearing.

United States v. Don Hanson, 26 IBLA 300 (Aug. 27, 1976)

Under 43 U.S.C. § 961 (1970) and 43 CFR 2802.1-7(a), an applicant has no right to a hearing in connection with original charges for use and occupancy of a communication site, and a hearing pursuant to a request under 43 CFR 4.415 will not be granted where applicant fails to make specific allegations or offer specific proof to show in what factors a Departmental appraisal is in error.

Mountain States Telephone and Telegraph Co., 26 IBLA 393 (Sept. 16, 1976) 83 I.D. 332

Rejection of a desert land entry application because the applicant has failed to supply satisfactory evidence of a right to the permanent use of sufficient water to irrigate and reclaim the irrigable portion of the entry will be set aside and the applicant's request for a hearing granted where there is conflicting evidence in the record concerning the sufficiency of the water supply and where the applicant has alleged facts which, if proved, would result in a different conclusion.

Dixie L. Bjornestad et al., 27 IBLA 201 (Oct. 6, 1976)

A request for postponement made more than 10 days prior to a hearing is properly denied where there has been no showing of good cause and proper diligence. A contestee's request for postponement is properly denied when (1) a contestee only seeks postponement in order to pursue an exchange of land for the claims; and (2) the administrative law judge rules that the contestant may seek to dismiss the contest if an exchange is contemplated and the contestant does not wish to abate the contest proceedings.

A request for postponement made at a hearing or within 10 days of a hearing is properly denied where there has been no showing of an extreme emergency which could not have been anticipated and which justifies beyond question the granting of a postponement. This standard is not met by a party's assertion that it has not had adequate opportunity to prepare a defense where such difficulty could have been anticipated before the request was made.

United States v. Mine Development Corp., et al., 27 IBLA 238 (Oct. 18, 1976)

The *dependent* resurvey is designed to accomplish a restoration of what purports to be the original conditions according to the record, based, first, upon identified existing corners of the original survey and other recognized and acceptable points of control, and, second, upon the restoration of missing corners by proportionate measurement in harmony with the record of the original survey. Where an appellant who protests a dependent resurvey presents evidence which questions whether, in fact, the Bureau of Land Management accurately located a quarter section corner and three certified surveyors agree with appellant, a hearing will be ordered for resolution of the factual issue of location of the quarter corner.

Frank Lujan, 30 IBLA 95 (Apr. 29, 1977)

A mining claim located on land withdrawn from location under the mining laws is null and void ab initio--without legal effect from the beginning. Such a mining claim may properly be declared null and void without a hearing where the records of the Department of the Interior show that the land was withdrawn from the operation of the United States mining laws at the time the claim was located.

Charles R. Nielsen, Pauline Nielsen, 30 IBLA 235 (May 26, 1977)

James Pessano, 35 IBLA 383 (June 23, 1978)

Evidence offered on appeal from an initial decision by an administrative law judge after a hearing in a contest may not be considered or relied upon in making a final decision but may only be considered to determine if there should be a further hearing.

David A. Burns, 30 IBLA 359 (June 10, 1977)

Joe I. Sanchez and Celina V. Sanchez, et al., 42 IBLA 176 (Aug. 22, 1979)

Upon a determination that production has ceased on an oil and gas lease in its extended term by reason of such production because the well on the lease is no longer capable of production in paying quantities, the lessees of record are entitled to notice and an opportunity to request a hearing on the issue of the productive capacity of the well where they have presented evidence raising an issue of fact regarding the status of the well.

Universal Resources Corp., et al., 31 IBLA 61 (June 23, 1977)

In a proceeding before the Department to determine the validity of a mining claim, notice and an opportunity for an evidentiary hearing is required only where there is a disputed question of fact; where the validity of a claim turns on the legal effect to be given facts of

RULES OF PRACTICE--Continued

HEARINGS--Continued

record concerning the status of the land when the claim was located, no hearing is required.

David Budinski et al., 31 IBLA 139 (June 30, 1977)

Where an administrative law judge's decision contains a ruling, in a single sentence, on all of the proposed findings and conclusions submitted by a party to a hearing and the ruling on each finding and conclusion is clear, there is no requirement that the judge rule separately as to each of the proposed findings and conclusions.

United States v. Leslie Harling and William Harling, 32 IBLA 29 (Aug. 31, 1977)

There is no constitutional right to a jury trial in an administrative proceeding such as a grazing trespass hearing.

Administrative hearings required in grazing trespass cases are not an unlawful exercise of judicial power and meet constitutional requirements and the standards of the Administrative Procedure Act. The constitutional requirement of due process is not violated merely because an administrative law judge is employed by the Department of the Interior.

Bureau of Land Management v. Ross Babcock, 32 IBLA 170 (Sept. 15, 1977) 84 I.D. 475

When the Department of the Interior finds that public land within the place limits of a grant to a railroad under the Act of July 1, 1862, as amended, was mineral in character and the railroad company, filing for patent on behalf of an alleged bona fide purchaser from it, challenges such finding, a hearing should be granted at which the Department has the obligation of making a prima facie case of mineral character, whereupon the company has the burden of establishing nonmineral character by a preponderance of the evidence, and the bona fides of the purchaser.

Southern Pacific Transportation Co., 32 IBLA 218 (Sept. 19, 1977)

A request for a hearing will be denied where there is no dispute involving a material fact, and there is no chance of development of further material facts which would require a different decision.

Cabax Mills, 32 IBLA 225 (Sept. 20, 1977)

An applicant has no right to a hearing in connection with original Federal charges for use and occupancy of a communication site, and in the absence of any specific assertion showing error in the appraisal, the appraisal will be sustained on appeal if it is properly formulated.

KVZ Television, Inc., 33 IBLA 80 (Dec. 8, 1977)

A request for a hearing will be denied in the absence of an assertion of fact which, if proved true, would entitle appellant to the relief sought.

Foote Mineral Co., 34 IBLA 285 (Apr. 17, 1978) 85 I.D. 171

RULES OF PRACTICE--Continued

HEARINGS--Continued

In some cases due process requires not that a person have notice and a prior hearing before a deprivation of property, but that an individual be given notice and an opportunity for a hearing before the deprivation of property becomes final.

In proceedings before the Department to determine the validity of a mining claim, notice and an opportunity for a hearing is required only where there is a disputed question of fact; where the validity of a claim turns on the legal effect to be given facts of record concerning the status of the land when the claim was located, no hearing is required.

H. B. Webb, 34 IBLA 362 (May 1, 1978)

The Federal Rules of Civil Procedure are not binding on administrative agencies.

United States v. Hilton Wichner, 35 IBLA 240 (May 30, 1978)

Where land has long been devoted to a particular public purpose such as inclusion in a forest reserve, laches may bar an application filed pursuant to the Transportation Act of 1940, 49 U.S.C. § 65(b) (1970) and 43 U.S.C. § 898 (1970), in which case a hearing need not be ordered to determine whether a railroad's purchaser was an innocent purchaser for value.

Southern Pacific Transportation Co., Donald R. Lee, Charles Silley v. United States Forest Service, 35 IBLA 270 (June 2, 1978)

Appellant may not use appeal to Board or request for hearing under 43 CFR 4.415 as vehicle for petitioning Secretary of the Interior to have withdrawal revoked and land restored to entry.

Harry H. Wilson, 35 IBLA 349 (June 15, 1978)

It requires a substantial showing of bias to disqualify a hearing officer in administrative proceedings or to justify a charge that the hearing was unfair.

United States v. Richard R. Kingdon and Edith E. Kingdon, 36 IBLA 11 (June 27, 1978)

Evidentiary submissions on appeal can be considered only for the limited purpose of determining whether a further hearing should be granted. The record established at the hearing in a mining claim contest is the sole basis for determining the validity of a claim.

There is not a sufficient equitable basis for reopening a hearing in a mining contest because of an alleged fire to the contestee's home 3 days before the scheduled hearing where neither she nor her attorney who had entered an appearance in the case requested a postponement of the hearing or a continuation of the hearing after it had been held. Also, a further hearing will not be granted merely to afford a claimant an additional opportunity to explore and make a discovery of a valuable mineral deposit.

United States v. Florence J. Mattox, 36 IBLA 131 (July 31, 1978)

RULES OF PRACTICE--Continued

HEARINGS--Continued

The notice and opportunity for hearing envisaged by 43 CFR 2802.1-7(e) requires at a minimum that the lessee be provided with a copy of the appraisal report, that he be permitted to appear before the decisionmaker, that the decisionmaker not be the person who made or approved the appraisal, and that adequate records of the hearing conducted pursuant to the regulations be maintained.

Circle L, Inc., 36 IBLA 260 (Aug. 15, 1978)

Donald R. Clark, C. Reinhart & Son, Inc., Hartwell Excavating Co., 39 IBLA 182 (Jan. 31, 1979)

A second hearing will not be afforded generally where a claimant was given notice and an opportunity to appear at a hearing, where he did appear and was represented at the hearing, and where nothing has been submitted which suggests that another hearing would produce a different result.

United States v. Andrew L. Freese II, 37 IBLA 7 (Sept. 6, 1978)

Where there exist factual questions about the location of section and subdivisional corners in a dependent resurvey, the Board of Land Appeals may order a hearing pursuant to 43 CFR 4.415 to resolve these questions.

Bethel C. Vernon, 37 IBLA 226 (Oct. 16, 1978)

A second hearing will not be afforded where a mining claimant has submitted nothing which suggests that another hearing would produce a different result, i.e., a finding that a valuable mineral deposit has been discovered on a mining claim. Assertions that further mineral examination would prove the existence of such a deposit and that such a deposit exists on adjacent land, without more, do not entitle the claimant to another hearing.

United States v. Lost Polack Mining Ass'n, 38 IBLA 101 (Nov. 20, 1978)

Where production has ceased on an oil and gas lease extended by production, and the record is unclear whether the conditions prescribed by 30 U.S.C. § 226(f) (1976) precluding termination of the lease have occurred, the case will be remanded to the Bureau of Land Management to reconsider with the Geological Survey if the lease has terminated, including a determination whether the lessee began reworking or drilling operations within 60 days after cessation of production and diligently prosecuted such operations before attaining production as asserted by him on appeal. A hearing should be held, if necessary, to resolve disputed facts.

Fred H. Bolinder and Julienne J. Bolinder, 40 IBLA 164 (Apr. 3, 1979)

Where the Geological Survey, in making its decision, has reviewed the same information submitted on appeal to the Board of Land Appeals to show that there was a well capable of producing oil or gas in paying quantities on the date the lease expired, and there are no disputed facts, but only a dispute on the proper application of the law to those facts and legal interpretations, a hearing is not warranted in the case.

American Resources Management Corp., 40 IBLA 195 (Apr. 5, 1979)

RULES OF PRACTICE--Continued

HEARINGS--Continued

Alaska Natives who allege substantial use and occupancy of vacant, unappropriated, and unreserved public land in Alaska for a period of at least 5 years pursuant to the Act of May 17, 1906, as amended, 43 U.S.C. §§ 270-1 to 270-3 (1970), and the regulations at 43 CFR Subpart 2561 are entitled to notice and an opportunity for a hearing prior to rejection of their application. Such notice shall specify the reasons for the proposed rejection. Claimant shall have an opportunity to present evidence and testimony of favorable witnesses at a hearing before the trier of fact prior to a decision.

John Moore et al., 40 IBLA 321 (Apr. 30, 1979)
86 I.D. 279

When an Alaska Native allotment applicant alleges that there has been substantial use and occupancy of vacant, unappropriated, and unreserved public land in Alaska for a period of at least 5 years pursuant to 43 U.S.C. §§ 270-1 to 270-3 (1970) and 43 CFR Subpart 2561, and the Bureau of Land Management determines the application should be rejected because the land was not so used and occupied, the Native is entitled under contest procedures, 43 CFR 4.451, to notice and an opportunity for a hearing prior to rejection of his application.

Mary Bobby, 41 IBLA 44 (May 29, 1979)

Rita Murphy, Gene E. Seague, 42 IBLA 51 (July 31, 1979)

Where issues of material fact are in dispute, due process requires that an applicant for a Native allotment be notified of the specific reasons for the proposed rejection, allowed to submit written evidence to the contrary, and granted an opportunity for an oral hearing before the trier of fact where evidence and testimony of favorable witnesses may be submitted before a decision is reached to reject an application for an allotment.

Frederick Phillips et al., 41 IBLA 169 (June 22, 1979)

Ella S. Sheldon et al., 42 IBLA 276 (Aug. 27, 1979)

Elena Bariman, 43 IBLA 204 (Oct. 17, 1979)

Where surface owners object to the amount of a bond, submitted to the Bureau of Land Management under sec. 9 of the Stock-Raising Homestead Act of Dec. 29, 1916, as amended, 43 U.S.C. § 299 (1970), as being inadequate in amount, request a hearing thereon, but fail to tender any evidence which would impel the conclusion that a hearing is likely to be productive and meaningful, the request for a hearing is properly denied.

Elmer Silvers et al., 42 IBLA 11 (July 25, 1979)

Two mining claims, located at a time when the land is withdrawn from mineral entry, may be properly declared null and void ab initio without a hearing. Such a result obtains despite reference to a location notice prior to the withdrawal where appellants do not make a showing of sufficient specific facts upon which to predicate a hearing, including which of the claims the previous location relates to, the boundaries thereof, whether the previous location was for a locatable mineral under a withdrawal order then in force, and the name of the previous locator.

The Heirs of R. E. Parkin, 42 IBLA 44 (July 31, 1979)

RULES OF PRACTICE--Continued

HEARINGS--Continued

The substantial use and occupancy required under the Native Allotment Act must be achieved by the Native himself as an independent citizen (or family head) and such use must be at least potentially exclusive of others. Although a minor may initiate such use and occupancy, use and occupancy by a dependent accompanied by his parents does not qualify.

Where a Native allotment application has been rejected, based on the guidelines of Oct. 18, 1973, on the basis that the applicant had not demonstrated 5 years use and occupancy of the land prior to the withdrawal affecting the land, and that requirement is abolished by Secretarial Order No. 3040, of May 25, 1979, the decision will be set aside and the case remanded for action.

Bella Boys, 42 IBLA 59 (Aug. 2, 1979)

Where issues of material fact are in dispute, due process requires that, before a decision is reached to reject an application for an allotment, the applicant for a Native allotment be notified of the specific reasons for the proposed rejection, allowed to submit written evidence to the contrary, and granted an opportunity for an oral hearing before a trier of fact where evidence and testimony of favorable witnesses may be submitted.

A hearing will be afforded to a Native allotment applicant to show his/her entitlement to a Native allotment in view of court decisions requiring hearings on Native allotment applications. Where the applicant requests a hearing and alleges there are factual disputes concerning abandonment and nonuse of the claim, although the showings on the application show nonuse of the land for a lengthy period of time sufficient ordinarily to constitute a prima facie case for rejection of the application, a hearing is nevertheless mandated.

Mildred Sparks, 42 IBLA 155 (Aug. 19, 1979)

A hearing is properly ordered where there exist issues of fact the resolution of which will determine whether an oil and gas lease concluding its primary term was converted from rental status to royalty status. Appellant shall have the burden of proof to establish by a preponderance of the evidence (a) that the Federal-Government #1 well was capable of producing oil and gas in paying quantities on Oct. 31, 1978, or (b) that there was a discovery of oil or gas in paying quantities on lease # 15891 on Oct. 31, 1978. If either (or both) of these propositions is established, the subject lease was not subject to automatic termination by law for failure to make timely rental payment.

Coronado Oil Co., 42 IBLA 235 (Aug. 22, 1979)

A second hearing will not be afforded where a mining claimant had notice of and appeared at the first hearing and no evidence has been submitted suggesting another hearing would produce a different result.

United States v. Howard D. Long, Dolores M. Phillips, 43 IBLA 150 (Sept. 28, 1979)

A continuance of a hearing into the validity of a mining claim will only be granted where the mining claimant presents sufficient reason to justify the grant of an additional opportunity to present his case, i.e., where circumstances have placed a substantial constraint upon his ability to obtain or offer samples or other evidence of a discovery. Furthermore, it must

appear that the claimant is not using the additional time to make the requisite discovery.

United States v. Elbert Gassaway, 43 IBLA 382 (Oct. 31, 1979)

Due process does not require notice and a prior hearing in every case that an individual is deprived of property so long as the individual is given notice and an opportunity to be heard before the deprivation becomes final.

In proceedings before the Department to determine the validity of a mining claim, notice and an opportunity for a hearing is required only where there is a disputed question of fact. Where the validity of a claim turns on the legal effect to be given facts of record concerning the status of the land when the claim was located, no hearing is required.

Dorothy Smith, Keith C. Hayes, 44 IBLA 25 (Nov. 6, 1979)

Where issues of material fact are in dispute, due process requires that an applicant for a Native allotment be notified of the specific reasons for the proposed rejection, allowed to submit written evidence to the contrary, and granted an opportunity for an oral hearing before a trier of fact where evidence and testimony of favorable witnesses may be submitted before a decision is reached to reject the application for allotment.

Amy Inkrook Nuharigak, 44 IBLA 313 (Dec. 31, 1979)

PRIVATE CONTESTS

A private contest brought against an Alaskan homestead entry charging that the entryman failed to meet the minimum cultivation requirements for the second entry year must be dismissed when it is disclosed that such information was of record in the Bureau of Land Management office at the time the complaint was filed.

Olaf W. Christie v. Larry E. O'Slester, 23 IBLA 155 (Dec. 23, 1975)

Where, pursuant to 43 U.S.C. § 315g (1970), a State has acquired land subject to a reservation of minerals to the United States, and the State thereafter leases the surface of the land to a corporation for purposes which are plainly incompatible with mining, the surface lessee has standing to initiate a private contest to determine the validity of unpatented mining claims located on the land. It is not essential to the cause of action that there be an actual physical interference by one party with the other party's use of the land if their respective interests are clearly and potentially conflicting.

Continental Oil Co. v. Aztec Exploration and Development Co., 32 IBLA 1 (Aug. 24, 1977)

A private contest complaint which does not set out in clear and concise language a statement of the facts constituting the grounds of contest is properly dismissed.

Eugene A. Whitsell, 34 IBLA 121 (Mar. 2, 1978)

Where the only properly corroborated fact alleged by private contestant related to situs of contestee's residence in 1975 and thereafter, but precomplaint record included assertion by contestee that he lived on homestead in 1972, 1973, and 1974, the contestant has not thereby alleged facts which, if proved, would require cancellation of entry, and contest must be dismissed under 43 CFR 4.450-5(a).

Although in his summary dismissal of private contest against homestead entry administrative law judge discussed issues upon which contestant had failed to submit corroborated allegations of fact along with his complaint, such action by judge did not relieve contestant of his burden of filing corroboration, despite provisions of 43 CFR 4.450-4(b) allowing judge to "raise issues in connection with deciding a contest."

Administrative law judge properly dismissed without a hearing a private homestead entry contest in which complaint failed to allege corroborated facts which, if proved, would provide sufficient basis for cancellation of entry.

Where contestant in private homestead entry contest appeals to Board of Land Appeals and makes certain assignments of error by administrative law judge, but allegations of fact upon which those assignments are based were not corroborated at filing of contest complaint, and issues raised by those assignments were not raised in complaint, such assignments are not material for purposes of appeal to the Board.

Ernest C. Lamb v. Richard A. Stoffel, 36 IBLA 201 (Aug. 3, 1978)

Intervention, by right, as a full party in a contest proceeding is only recognized where the individual seeking intervention has the necessary interest to maintain a private contest independently under 43 CFR 4.450-1.

The extent of the participation in a contest hearing to be afforded "interested individuals" who do not have a sufficient interest to maintain a private contest is committed to the sound discretion of the administrative law judge. Among the factors which are properly considered are: the desires of the original parties; the likelihood that the party seeking intervention will provide information which would not be forthcoming without its participation; and the cost which must be borne by both the contestant and the contestee by the nature and scope of the intervention granted.

United States v. United States Pumice Co., 37 IBLA 153 (Oct. 5, 1978)

Regulation 43 CFR 4.450-1 gives a person with an adverse interest in land a right to contest an adverse claim. The Department of the Interior has consistently recognized States as included within the term "person" within the meaning of the regulation, allowing them to initiate private contests.

Where the State of Alaska has shown an interest in land in its existing airport, it may bring a private contest to challenge Native allotment applications for land in conflict with the airport.

State of Alaska, 40 IBLA 79 (Mar. 22, 1979)

The State of Alaska will be afforded time within which to bring private contests against Native allotment applications conflicting with an existing airport runway built by the State and to show it has standing to contest. If it does so timely, the Bureau of Land Management will adjudicate its standing as a contestant and the contests will proceed if it finds affirmatively. If not, the State's timely objections will be taken as a protest and a factfinding hearing will be held. If the State fails to take timely action, a decision rejecting its application to reinstate a conflicting airport lease application will stand.

State of Alaska, 40 IBLA 118 (Mar. 27, 1979)

Where there is a conflict between an application by the State of Alaska to select land under the Statehood Act and an application by an Alaska Native for allotment under the Act of May 17, 1906, and it appears to BLM that the Native applicant has met the requirements for patent, upon notice of this determination the State, if dissatisfied, has an election of remedies. It may not appeal from the "Notice," which is interlocutory, but it may initiate private contest proceedings to prove lack of qualification on the part of the Native, or it may appeal the subsequent decision of BLM to the Board of Land Appeals. If, on appeal, the Board concludes that the Native's application is deficient it will order the institution of Government contest proceedings, but if it finds the allotment application acceptable, it will order the patent issued, if all else be regular.

State of Alaska, 41 IBLA 309 (July 5, 1979)

Under the "functional" standard to determine administrative standing set forth in Koniag, Inc. v. Andrus, 580 F.2d 601 (D.C. Cir. 1978), cert. denied, 99 S. Ct. 733 (1979), the State of Alaska has standing to challenge Native allotment applications conflicting with its selection applications even if the land is within a Native village selection area under the Alaska Native Claims Settlement Act. The State has standing under Departmental regulations to initiate private contests against such conflicting Native allotment applications.

"Person." A State is a "person" within the meaning of the Department's private contest regulations.

State of Alaska et al., 41 IBLA 315 (July 11, 1979)
86 I.D. 361

"Person." Regulation 43 CFR 4.450-1 specifically gives persons with an adverse interest in land a right to contest the adverse claim. It does not depend on the applicability of the due process clause of the Constitution to either claimant. A State is a "person" within the meaning of this private contest regulation.

The State of Alaska has a sufficient interest in land by virtue of its applications for an airport conveyance or by its selection application to have standing to initiate private contests against conflicting Native allotment applications.

State of Alaska, 42 IBLA 1 (July 25, 1979)

The owner of a patented stock-raising homestead, in which the minerals have been reserved to the United States under the Act of Dec. 29, 1916, as amended, has a sufficient adverse interest under 43 CFR 4.450-1, to

RULES OF PRACTICE--Continued

PRIVATE CONTESTS--Continued

initiate a contest against a mining claimant, alleging lack of discovery of valuable minerals.

The issue of whether a mining claim has been perfected by discovery of available mineral has no place in a proceeding to determine whether the amount of a stock-raising homestead bond is sufficient.

Elmer Silvera et al., 42 IBLA 11 (July 25, 1979)

Where there is a conflict between an application by the State of Alaska to select land under the Statehood Act and an application by an Alaska Native for allotment under the Act of May 17, 1906, and it appears to BLM that the Native applicant has met the requirements for patent, upon notice of this determination the State, if dissatisfied, has an election of remedies. It may not appeal from an interlocutory decision which authorizes the State to initiate private contest proceedings to prove lack of qualification on the part of the Native. Rather, it may initiate the private contest within the time period prescribed, or it may appeal the decision of BLM, after it becomes final, to the Board of Land Appeals. If, on appeal, the Board concludes that the Native's application is deficient it will order the institution of Government contest proceedings, but if it finds the allotment application acceptable, it will order the patent issued, if all else be regular.

State of Alaska et al., 42 IBLA 94 (Aug. 16, 1979)

Where there is a conflict between an application by the State of Alaska to select land under the Alaska Mental Health Enabling Act and an application by an Alaska Native for allotment under the Act of May 17, 1906, and it appears to the Bureau of Land Management that the Native applicant has met the requirements for patent, upon notice of this determination the State, if dissatisfied, has an election of remedies. It may initiate private contest proceedings to prove lack of qualification on the part of the Native, or it may appeal the determination to the Board of Land Appeals. If, on appeal, the Board concludes that the Native's application is deficient, it will order the institution of Government contest proceedings. If, however, the Board affirms the finding that the requirements of patent have been met, the State will have no further administrative recourse. Where the State had not, prior to its appeal, been afforded notice of the election, it should be afforded an opportunity to make such election.

State of Alaska v. Mattie E. Dalton, 42 IBLA 269 (Aug. 27, 1979)

State of Alaska v. Daniel Johnson, 42 IBLA 370 (Sept. 11, 1979) 86 I.D. 441

A private contest brought against an Alaska homestead charging that the entryman had failed to meet any of the residence or cultivation requirements of the law must be dismissed where the statutory life of the entry has previously expired without the entryman filing final proof and information was already of record in the BLM office that the entryman had done nothing during the life of the entry to perfect the claim. 43 CFR 4.450-1.

Joe G. Ashcraft, 43 IBLA 178 (Sept. 28, 1979)

RULES OF PRACTICE--Continued

PROTESTS

The assignor of an oil and gas lease is not barred from protesting against a decision approving the assignment because of his failure to appeal from an earlier decision denying the assignee's request for assignment approval but stating that approval would be permitted upon performance of certain conditions.

When an assignment of an oil and gas lease, made prior to lease renewal, has been approved after renewal and thereafter it appears that there is a controversy whether the parties contemplated that the assignment of the base lease would extend to the renewal lease, the Department will not take action on a protest requesting rescission of the assignment approval, but will maintain the status quo for a period sufficient to permit the parties to institute litigation or take other action to resolve their dispute.

Joseph Alstad, 19 IBLA 104 (Mar. 4, 1975)

Where there is a private dispute as to the validity or effect of an oil and gas lease assignment, the Bureau of Land Management will not take action on a request for assignment approval, but will maintain the status quo for a period sufficient to permit the parties to institute litigation or take other action to resolve their dispute.

James V. O'Hare, R. Kenneth Willhollen, 19 IBLA 171 (Mar. 18, 1975)

Where a desert land applicant, whose application is prior in time, appeals from a decision of the Bureau of Land Management, dismissing his protest against affording priority to a later-filed desert land application on the basis that the earlier-filed application was incomplete, the cases are properly remanded to the Bureau of Land Management for action on the respective applications, so as to avoid piecemeal adjudication.

George B. Craig, Richard L. Craig, 19 IBLA 208 (Mar. 21, 1975)

The Board of Land Appeals may entertain and, where appropriate, grant a motion by the Bureau of Land Management to remand a case to it for further consideration on the question of whether an environmental impact statement must be filed, even though an appellant, who has protested against a negative declaration that no impact statement is required, objects to the remand.

Harold Gillis, 24 IBLA 248 (Mar. 25, 1976)

It is improper to dismiss a protest against issuance of an oil and gas lease applied for pursuant to the Act of May 21, 1930, 30 U.S.C. § 301 *et seq.* (1970), for lands underlying a railroad right-of-way granted under the Act of Mar. 3, 1875, when the lands traversed by the right-of-way were later patented without a reservation for minerals. In such case, title to the mineral estate underlying the right-of-way is no longer held by the United States and, therefore, a lease issued pursuant to the 1930 Act is void and must be canceled.

Amerada Hess Corp., 24 IBLA 360 (Apr. 23, 1976) 83 I.D. 194

RULES OF PRACTICE--Continued

PROTESTS--Continued

The thrust of 43 CFR 4.410, which limits the right to appeal to those who are parties to a case, is not to restrict access to administrative review of actions of Bureau of Land Management officials, but to provide a logical framework within which such review might be exercised. An "appeal" by an individual or group which has not, prior to the "appeal," participated in the formulation of the action to which objection is being voiced, should be treated as a protest under the provisions of 43 CFR 4.450-2.

The filing of a written protest ordinarily stays the action being protested until such time as a decision on the protest is issued and, under 43 CFR 4.21, the time in which a person adversely affected may file a notice of appeal therefrom.

California Ass'n of Four Wheel Drive Clubs et al., 30 IBLA 383 (June 10, 1977)

Where a protest has been made against the validity of a drawing entry card (DEC) in the simultaneous oil and gas lease filing procedure, it is improper to issue a lease in response to the protested DEC before the protest is finally dismissed. The Board of Land Appeals, rather than a BLM State Office, has the authority to make final administrative determinations for the Department in matters relating to protests against oil and gas lease offers.

D. E. Pack, 31 IBLA 283 (July 22, 1977)

Service by registered or certified mail may be proved by a Post Office return receipt showing that the document was delivered to the person's record address. The receipt need not be signed necessarily by the person to whom the mail was addressed.

The burden is on a protestant to show, as justification for the disqualification of the successful drawee in a simultaneous filing drawing procedure, that the offer is in fact defective. A suggestion of the possibility of violation of a regulation is not sufficient; a protestant must present competent proof of such violation. Absent an adequate showing of disqualification, a protest alleging disqualification is properly rejected.

Lillian Sweet, 37 IBLA 25 (Sept. 14, 1978)

In a competitive materials sale, submission of the required 10 percent deposit in cash with the sealed bid is permissible under the regulations and not a ground for rejection of the highest bid. Therefore, a protest against acceptance of the bid for that reason is properly denied.

Roy Blake, 38 IBLA 151 (Dec. 5, 1978)

A group of individual landowners, whose lands assertedly abut a Federal tract which is offered for timber sale, have standing to appeal from a decision dismissing their protest against the proposed sale.

George Jalbert et al., 39 IBLA 205 (Feb. 2, 1979)

The characterization of a submission as an "appeal" or as a "protest" is not binding upon a State Office; rather, reference must be made to the nature of the submission to determine whether the submission is properly treated as an "appeal" *or* as a "protest."

Duncan Miller (On Reconsideration), 39 IBLA 312 (Feb. 23, 1979)

The State of Alaska will be afforded time within which to bring private contests against Native allotment applications conflicting with an existing airport runway built by the State and to show it has standing to contest. If it does so timely, the Bureau of Land Management will adjudicate its standing as a contestant and the contests will proceed if it finds affirmatively. If not, the State's timely objections will be taken as a protest and a factfinding hearing will be held. If the State fails to take timely action, a decision rejecting its application to reinstate a conflicting airport lease application will stand.

State of Alaska, 40 IBLA 118 (Mar. 27, 1979)

The right of appeal to the Board is limited to parties to a case adversely affected by a decision of BLM. A person protesting a timber sale does not become a party to a case until such time as BLM has issued a final decision adverse to his or her interests. The case is ordinarily ripe for appeal only when an adverse decision is made on the protest.

The receipt of timber sale bids by BLM pursuant to an advertised sale and subsequent to the filing of a protest of the sale, does not constitute an irrevocable commitment to complete the sale where all bidders acknowledge that the final decision to award the sale contract is contingent upon adjudication of the protest and the decision reached on any proper appeal therefrom. Hence, receipt of bids by BLM does not prejudice the rights of protestants to have their protest ruled upon and any proper appeal heard.

Elaine Mikels et al., 41 IBLA 305 (July 3, 1979)

A bond filed by a mining claim owner, covering lands patented under the Stock-Raising Homestead Act of Dec. 29, 1916, *as amended*, 43 U.S.C. §§ 291-301 (1970), need only be set in an amount to cover damages to crops, improvements, and the value of the land for grazing purposes within the limits of the mining claim. The *ad damnum* of the bond does not have to be sufficient to cover damages caused by a disruption of the surface owner's entire grazing operation.

Elmer Silvers et al., 42 IBLA 11 (July 25, 1979)

Where a protest, with accompanying supporting evidence, alleges that the oil and gas lease offer drawn first in a simultaneous filing-drawing procedure violated the regulations because a party in interest was not disclosed and there was a multiple filing, the Bureau of Land Management should first afford the drawee an opportunity to respond to the protest before rejecting the offer based on facts alleged in the protest. The error, however, is rendered harmless where on appeal the offeror has full opportunity to make factual submissions and respond to the allegations.

H. J. Enevoldsen, 44 IBLA 70 (Nov. 20, 1979)
86 I.D. 643

RULES OF PRACTICE--Continued

PROTESTS--Continued

The filing of a timely protest suspends the authority of the State Office to act upon the matter until the protest has been ruled upon. Further, action is to be additionally suspended after a ruling on the protest for the period of time in which a person adversely affected may file a notice of appeal therefrom.

Where, on appeal from the denial of a protest to the issuance of a right-of-way, an appellant does not show that issuance of the right-of-way was contrary to the law or applicable regulations, a decision rejecting the protest will be affirmed.

James W. Smith, 44 IBLA 275 (Dec. 26, 1979)

SUPERVISORY AUTHORITY OF THE SECRETARY

A motion to dismiss an appeal is granted when the appellant had failed to file an appeal within 30 days of the date on which the contracting officer's final decision was received. Respecting the contractor's argument that the 30-day time limit should be waived the Board noted that the right to extend the time for filing a notice of appeal had been specifically excepted from the grant of authority to the Board as set forth in the regulations governing Board proceedings.

Appeal of Harry Claterbos Co., JV, IBCA-1153-5-77
(Dec. 6, 1977) 84 I.D. 969

Where the Secretary has declined to exercise his jurisdiction, a decision rendered by this Board is final for the Department. Hence, statements by BLM and arguments of the Solicitor, while valuable to the Board, are not binding upon the Board.

H. B. Delasco, Inc., et al., 39 IBLA 194 (Feb. 2, 1979)

WITNESSES

A motion for remand of a mining claim contest for further hearing on the grounds of prejudicial surprise, based upon Government counsel's failure to supplement interrogatory answers listing witnesses and exhibits as ordered in lieu of prehearing conference, will be denied where contestee's counsel ignored repeated offers of continuance made at various stages of the hearing.

United States v. Theresa B. Robinson, 21 IBLA 363
(Aug. 25, 1975) 82 I.D. 414

A claim for acceleration under a contract for the construction of footings for a transmission line is denied where one of appellant's principal contentions was that in a telephone conversation following record snow in late September the project engineer had directed that men and equipment be added to the job in order to finish the work by the contract completion date of Nov. 1, but in correspondence conducted with the Government for almost 6 months after such telephone conversation the contractor failed to refer to the directions purportedly received from the project engineer and even failed to reference the particular telephone conversation. Actions taken by the Government's principal inspector were also found not to constitute acceleration orders when the evidence clearly showed that both parties viewed the inspector's action as involving suggestions rather than directions and that whether the suggestions were accepted by the contractor's job superintendent depended upon the exercise of his business judgment.

Appeal of Iversen Construction Co. (a/k/a Iconco),
IBCA-981-1-73 (Dec. 30, 1975) 82 I.D. 646

RULES OF PRACTICE--Continued

WITNESSES--Continued

Where the testimony and conclusions of an expert witness are based on careful examination of a mining claim by appropriate scientific methods, they will be accepted into evidence and given appropriate weight regardless of the fact that the witness may not be registered within that particular State as an expert in his field.

Cabot Sedgwick et al. v. O. M. Parker, 27 IBLA 256
(Oct. 20, 1976)

The Government failed to show that a rejected wall did not conform to the plans and specifications.

Appeal of Rocky Mountain Construction Co., IBCA-1091-12-75 (Aug. 17, 1977) 84 I.D. 829

Where a contestee fails to follow up his initial suggestion at the hearing that a deposition of a possible witness be taken with a proper request, it is not error for the administrative law judge to decide the case on the record made at the hearing.

United States (Contestant) v. Earl Frisco and Sandra S. Young (Contestees), 32 IBLA 248 (Sept. 21, 1977)

The Government, after waiver of the original delivery schedule, has the burden of proof that the unilaterally established new schedule is reasonable under all the circumstances existing at the time of the reestablishment, which, however, it failed to show.

Appeal of Systems Technology Associates, Inc., IBCA-1108-4-76 (Jan. 19, 1978) 85 I.D. 12

SCHOOL LANDS

GENERALLY

When title to an entire in-place school section has passed to the State, the United States no longer has a property interest therein and the land is no longer subject to location under the mining laws.

J. E. Binds et al., 25 IBLA 67 (June 1, 1976)
83 I.D. 275

An application for patent to school lands in place, pursuant to 43 U.S.C. § 871a (1970), which requests an exclusion of the right-of-way granted under the Act of July 1, 1862, *as amended* July 2, 1864, must be rejected. Such a patent must be issued "subject to" the right-of-way.

State of Wyoming, 27 IBLA 137 (Sept. 29, 1976)
83 I.D. 364

A State is entitled to indemnity for school lands which it did not acquire by reason of a fractional township. Where the fractional township is created by reason of the incursion of a navigable body of water, the State, by taking indemnity does not thereby grant to the United States the bed of the navigable body of water.

Leonard B. McSweyn, 28 IBLA 100 (Nov. 15, 1976)
83 I.D. 556

SCHOOL LANDS--Continued

GENERALLY--Continued

The acceptance by a State of other lands as indemnity for lands lying within the meander line of a nonnavigable lake adjacent to the granted upland school section, was a relinquishment of any interest in the adjacent land underlying the lake as an incident to the grant of the school section to the extent such land lies within the linear boundaries of the school section, and precludes the assertion of a State claim to such lands.

State of Montana, 28 IBLA 124 (Nov. 16, 1976)

GRANTS OF LAND

Title to a numbered school section which is surveyed on or after July 11, 1956, and on which there is outstanding at the time of such survey a mineral lease entered into by the United States, is granted to the State, and the State shall succeed to the position of the United States as lessor under such lease.

State of Utah, 22 IBLA 44 (Sept. 15, 1975)

INDEMNITY SELECTIONS

An application by a State for an indemnity school and land selection is not subject to rejection for the sole reason that the base lands are less valuable than the selected lands.

When a State files an indemnity school land application and selects lands withdrawn for leasable minerals and it is determined that disposal of such lands would unreasonably interfere with operations under the mineral leasing laws, such application may be rejected. However, when the State offers to waive the reserved leasable minerals and to allow reasonable surface entry for development and removal of the minerals, the application should be reevaluated in light of such offer.

State of New Mexico, 24 IBLA 135 (Mar. 8, 1976)

A railroad right-of-way, granted under the Act of July 1, 1862, 12 Stat. 489, *as amended* by Act of July 2, 1864, 13 Stat. 356, crossing a school section, does not constitute lands "otherwise disposed of by the United States" within the ambit of the school indemnity statutes. Therefore a rejection of an indemnity selection application, offering such base, is proper.

State of Wyoming, 27 IBLA 137 (Sept. 29, 1976)
83 I.D. 364

A State is entitled to indemnity for school lands which it did not acquire by reason of a fractional township. Where the fractional township is created by reason of the incursion of a navigable body of water, the State, by taking indemnity does not thereby grant to the United States the bed of the navigable body of water.

Leonard R. McSwegn, 28 IBLA 100 (Nov. 15, 1976)
83 I.D. 556

Under 43 U.S.C. § 852(a)(1) (1970), *as amended* by sec. 25 of the Geothermal Steam Act of 1970, 30 U.S.C. § 1024 (1970), a State may select lands with geothermal potential as indemnity for base lands lost by it from its grant for common schools without a reservation to the United States of the geothermal rights therein, provided that these base lands also have geothermal potential.

Per sec. 25 of the Geothermal Steam Act of 1970, geothermal resources are treated under 43 U.S.C. § 852(a) (1970) as other leasable minerals, rather than as oil and gas, so that a State need not submit as base for indemnity selection of lands which have been classified by the Geological Survey as being within a "KGRA" (known geothermal resource area) lands which also are classified as KGRA, but instead need only submit base lands classified by GS as having geothermal potential.

Where BLM has issued a clear list giving a State title to lands selected as indemnity for lost school lands but erroneously reserving to the United States geothermal rights to these selected lands, these geothermal rights are still within the power of the United States to dispose of, and the Department still exercises jurisdiction over them, so that the Board of Land Appeals may correct BLM's error by ordering that these rights be given to the State by deleting the reservation thereof in the clear list.

Where the record indicates that there may be gross disparity between the value of lands selected by a State as indemnity for lost school lands and the value of base lands submitted by the State in support of the selection, the matter will be remanded to the BLM for revaluation of the lands. If the revaluation reveals a gross disparity, the BLM shall withhold further action until judicial resolution of the propriety of the "grossly disparate value" policy.

State of California, 33 IBLA 160 (Dec. 20, 1977)

MINERAL LANDS

Title to a numbered school section which is surveyed on or after July 11, 1956, and on which there is outstanding at the time of such survey a mineral lease entered into by the United States, is granted to the State, and the State shall succeed to the position of the United States as lessor under such lease.

State of Utah, 22 IBLA 44 (Sept. 15, 1975)

Where, after statehood, a designated school section is surveyed and returned as mineral land (coal) known to be mineral in character prior to the date when the rights of the State would have attached, and where prior to the Act of Jan. 25, 1927 (44 Stat. 1026), the land is withdrawn for national forest purposes, title to the section did not pass to the State.

Malcolm E. McKinnon, 23 IBLA 1 (Nov. 25, 1975)

Under 43 U.S.C. § 852(a)(1) (1970), *as amended* by sec. 25 of the Geothermal Steam Act of 1970, 30 U.S.C. § 1024 (1970), a State may select lands with geothermal potential as indemnity for base lands lost by it from its grant for common schools without a reservation to the United States of the geothermal rights therein, provided that these base lands also have geothermal potential.

Per sec. 25 of the Geothermal Steam Act of 1970, geothermal resources are treated under 43 U.S.C. § 852(a) (1970) as other leasable minerals, rather than as oil and gas, so that a State need not submit as base for indemnity selection of lands which have been classified by the Geological Survey as being within a "KGRA" (known geothermal resource area) lands which

SCHOOL LANDS--Continued

MINERAL LANDS--Continued

also are classified as KGRA, but instead need only submit base lands classified by GS as having geothermal potential.

Where BLM has issued a clear list giving a State title to lands selected as indemnity for lost school lands but erroneously reserving to the United States geothermal rights to these selected lands, these geothermal rights are still within the power of the United States to dispose of, and the Department still exercises jurisdiction over them, so that the Board of Land Appeals may correct BLM's error by ordering that these rights be given to the State by deleting the reservation thereof in the clear list.

Where the record indicates that there may be gross disparity between the value of lands selected by a State as indemnity for lost school lands and the value of base lands submitted by the State in support of the selection, the matter will be remanded to the BLM for revaluation of the lands. If the revaluation reveals a gross disparity, the BLM shall withhold further action until judicial resolution of the propriety of the "grossly disparate value" policy.

State of California, 33 IBLA 160 (Dec. 20, 1977)

SCRIP

(*See also* Soldiers' Additional Homesteads--if included in this Index.)

GENERALLY

Where land had been conveyed to the United States pursuant to the Act of June 4, 1897, ch. 2, 30 Stat. 11, 36, as a base for forest lieu selection rights, and a purported color of title claim was initiated at a time when the land had not been opened to the operation of the public land laws, the color of title claim is not cognizable as valid under 43 U.S.C. § 1068 (1970).

Estate of John C. Brinton, 25 IBLA 283 (June 28, 1976)

PAYMENT IN SATISFACTION

Transfers of scrip or selection rights which are presented to the Department of the Interior for recordation pursuant to the Scrip Recordation Act more than 6 months after they were made cannot be accepted for recording or serve as a basis for the acquisition of lands. An application to elect to receive cash rather than land, which is based upon a transfer of a soldier's additional homestead selection right filed more than 6 months after it was made, must be rejected.

Where an applicant to receive cash in satisfaction of a soldier's additional homestead selection right fails to establish a complete chain of title from the soldier-entryman to the applicant, a purported assignment of the right to the applicant cannot be recognized and the application must be rejected.

Margaret M. Chivers, 21 IBLA 124 (July 14, 1975)

The right to locate Sioux Half-Breed scrip is a personal right not subject to transfer. However, such scrip may be located by an attorney in fact with authority from the scripee (1) to locate the land in the name of the scripee, and (2) to convey that land in the name of the scripee. Where proper documentation of this authority from the scripee is not presented to the Department with an application to receive cash payment

SCRIP--Continued

PAYMENT IN SATISFACTION--Continued

for redemption of the scrip under the Act of Aug. 31, 1964, the application is properly rejected.

Preston Nutter Corp., 25 IBLA 234 (June 21, 1976)

RECORDATION

Transfers of scrip or selection rights which are presented to the Department of the Interior for recordation pursuant to the Scrip Recordation Act more than 6 months after they were made cannot be accepted for recording or serve as a basis for the acquisition of lands. An application to elect to receive cash rather than land, which is based upon a transfer of a soldier's additional homestead selection right filed more than 6 months after it was made, must be rejected.

Margaret M. Chivers, 21 IBLA 124 (July 14, 1975)

A forest lieu selection right is extinguished when the base lands are reconveyed by the United States to the principal (the party who originally conveyed the land to the United States). The purported agent or attorney-in-fact of the principal has no rights thereafter against the United States even if he recorded his power of attorney and other selection documents prior to the reconveyance.

Ben Cohen, Ray C. Nordstrom, 21 IBLA 330 (Aug. 18, 1975)

The requirement of the Act of Aug. 5, 1955, 69 Stat. 535, that within 6 months of any transfer of scrip rights the holding or claim of right must be presented for recordation by the Department, presupposes a valid transfer. Where the holder of a soldier's additional homestead right shows that the transfer was fraudulent and without his knowledge, the failure of the fraudulent transferee to record the right will not extinguish the right claimed by the innocent holder.

George Dodds, Jr., 27 IBLA 186 (Oct. 4, 1976)

SPECIAL TYPES OF SCRIP

An application for satisfaction of forest lieu selection rights filed after Dec. 31, 1969, will be rejected, as all such claims which had not been satisfied on that date, or for which no satisfaction had been demanded, expired by operation of law.

A forest lieu selection right is extinguished when the base lands are reconveyed by the United States to the principal (the party who originally conveyed the land to the United States). The purported agent or attorney-in-fact of the principal has no rights thereafter against the United States even if he recorded his power of attorney and other selection documents prior to the reconveyance.

Ben Cohen, Ray C. Nordstrom, 21 IBLA 330 (Aug. 18, 1975)

The right to locate Sioux Half-Breed scrip is a personal right not subject to transfer. However, such scrip may be located by an attorney in fact with authority from the scripee (1) to locate the land in the name of the scripee, and (2) to convey that land in the name of the scripee. Where proper documentation of this authority from the scripee is not presented to the Department with an application to receive cash payment for redemption of the scrip under the Act of Aug. 31, 1964, the application is properly rejected.

Preston Nutter Corp., 25 IBLA 234 (June 21, 1976)

Where land had been conveyed to the United States pursuant to the Act of June 4, 1897, ch. 2, 30 Stat. 11, 36, as a base for forest lieu selection rights, and a purported color of title claim was initiated at a time when the land had not been opened to the operation of the public land laws, the color of title claim is not cognizable as valid under 43 U.S.C. § 1068 (1970).

Estate of John C. Brinton, 25 IBLA 283 (June 28, 1976)

VALIDITY

Where an applicant to receive cash in satisfaction of a soldier's additional homestead selection right fails to establish a complete chain of title from the soldier-entryman to the applicant, a purported assignment of the right to the applicant cannot be recognized and the application must be rejected.

Margaret W. Chivers, 21 IBLA 124 (July 14, 1975)

An application for satisfaction of forest lieu selection rights filed after Dec. 31, 1969, will be rejected, as all such claims which had not been satisfied on that date, or for which no satisfaction had been demanded, expired by operation of law.

A forest lieu selection right is extinguished when the base lands are reconveyed by the United States to the principal (the party who originally conveyed the land to the United States). The purported agent or attorney-in-fact of the principal has no rights thereafter against the United States even if he recorded his power of attorney and other selection documents prior to the reconveyance.

Ben Cohen, Ray C. Nordstrom, 21 IBLA 330 (Aug. 18, 1975)

The right to locate Sioux Half-Breed scrip is a personal right not subject to transfer. However, such scrip may be located by an attorney in fact with authority from the scripee (1) to locate the land in the name of the scripee, and (2) to convey that land in the name of the scripee. Where proper documentation of this authority from the scripee is not presented to the Department with an application to receive cash payment for redemption of the scrip under the Act of Aug. 31, 1964, the application is properly rejected.

Preston Nutter Corp., 25 IBLA 234 (June 21, 1976)

While the Department of the Interior does not rigidly apply the doctrine of administrative finality so as to bar any subsequent reassertion of soldier's additional homestead scrip rights which have been determined to be invalid, it is incumbent upon an applicant seeking to exercise such rights to submit compelling legal or equitable reasons for reconsideration.

The requirement of the Act of Aug. 5, 1955, 69 Stat. 535, that within 6 months of any transfer of scrip rights the holding or claim of right must be presented for recordation by the Department, presupposes a valid transfer. Where the holder of a soldier's additional homestead right shows that the transfer was fraudulent and without his knowledge, the failure of the fraudulent transferee to record the right will not extinguish the right claimed by the innocent holder.

Upon the death of a soldier-entryman the soldier's additional homestead right vests in his estate, subject to the right of his widow or minor orphan children to appropriate it pursuant to the terms of the statutory grant. Upon the death of the soldier-entryman's widow, and in the absence of minor orphan children, the right becomes absolute in the heirs of the soldier-entryman at the time of his death.

Where an applicant seeks to assert a soldier's additional homestead right which has been determined to be invalid in an earlier proceeding, and does not submit compelling legal or equitable reasons for reconsideration, but merely seeks to reargue the previous determination, the attempted exercise of soldier's additional homestead rights will be rejected.

George Bodda, Jr., 27 IBLA 186 (Oct. 4, 1976)

An application by a remote assignee to exercise soldiers' additional homestead rights is properly rejected when the validity of the right on which the assignment is based has not been established.

George Bodda, Jr., 37 IBLA 189 (Oct. 11, 1978)

SECRETARY OF THE INTERIOR

The Secretary of the Interior is authorized, and is under a duty, to consider and determine what lands are public lands, what public lands have been or should be surveyed, and what public lands require extension or correction of past surveys.

Joe S. Dent and Delores L. Dent, 18 IBLA 375 (Jan. 30, 1975)

The Secretary of the Interior is charged with seeing that valid mining claims are recognized, invalid ones eliminated, and the rights of the public preserved.

Richard E. and Shirley A. Jarrett, 19 IBLA 78 (Feb. 27, 1975)

H. E. Webb, 34 IBLA 362 (May 1, 1978)

A Departmental regulation promulgated pursuant to and comporting with statutory authority has the force and effect of law. One who exercises the delegated authority of the Secretary may not disregard the plain and unambiguous provisions of a mandatory regulation so as to impose a more onerous requirement on an applicant than is prescribed by the regulation in effect.

Arizona Public Service Co., 20 IBLA 120 (Apr. 25, 1975)

The Secretary of the Interior is authorized, and is under a duty, to consider and determine what lands are public lands, what public lands have been or should be surveyed, and what public lands have been or remain to be disposed of by the United States, and he has the authority to extend or correct the surveys of public lands as may be necessary, including the surveying of lands omitted from earlier surveys.

Chester H. Ferguson et al., 20 IBLA 224 (May 13, 1975)

R. A. Mikelson, 26 IBLA 1 (July 6, 1976)

SECRETARY OF THE INTERIOR--Continued

A regulation defining "eligible refiners" under the Act of July 13, 1946, providing for the sale of Government royalty oil or gas, as owners of existing refineries (including refineries not in operation) who qualify as a small business enterprise under the rules of the Small Business Administration and who are unable to purchase in the open market an adequate supply of crude oil to meet the needs of their existing refinery capacities, is an implementation of the Act within the ambit of the Secretary of the Interior's authority to prescribe rules and regulations.

Thunderbird Resources, Inc., 20 IBLA 248 (May 16, 1975)

Where a Native allotment applicant has used the land applied for only for hunting, trapping and fishing and there are no improvements on the land, it is proper in the exercise of the Secretary's discretionary authority to reject the application to the extent it conflicts with a special land use permit issued to the Alaska Fish and Game Department for scientific purposes.

Gregory Anelon, Sr., 21 IBLA 230 (Aug. 1, 1975)

Before relief may be granted to the lessee of a terminated oil and gas lease, he must comply with the prerequisites set forth in 30 U.S.C. § 188 (1970). The Secretary has no authority to waive such statutory prerequisites.

C. J. Iverson, 21 IBLA 312 (Aug. 14, 1975) 82 I.D. 386

The execution of special stipulations as a condition precedent to issuance of oil and gas leases for land located in a national forest may be required at the discretion of the Secretary of the Interior in order to protect environmental and other land use values. The need for the stipulation should be clear and the stipulation should be a reasonable means to the intended purpose. The Forest Service's recommended stipulations will be carefully considered by the Department, but the final authority for oil and gas leasing on public domain land rests in this Department.

Earl R. Wilson, 21 IBLA 392 (Aug. 27, 1975)

The execution of special stipulations as a condition precedent to the issuance of oil and gas lease for land located in national forests may be required at the discretion of the Secretary of the Interior in order to protect environmental, recreational and other land use values. In each case the need for the stipulation should be clear and the means to accomplish the intended purpose should be reasonable.

Bill J. Maddox, 22 IBLA 97 (Sept. 22, 1975)

The Secretary of the Interior may require execution of special stipulations reasonably designed to protect identifiable resource values as a condition precedent to issuance of an oil and gas lease. Stipulations proposed by the Forest Service will be carefully considered by this Department, but the final decision for oil and gas leasing on public domain land rests with this Department. A "no surface occupancy" stipulation proposed in order to protect a recreation area cannot stand if it might preclude surface occupancy unreasonably beyond the boundaries of the recreation area.

Beverley Lasrich, 22 IBLA 202 (Oct. 15, 1975)

SECRETARY OF THE INTERIOR--Continued

The Secretarial instruction of Oct. 18, 1973, which mandates a showing by a Native allotment applicant of 5 years of occupancy prior to a withdrawal of the land, was not required to be published as rulemaking since 5 U.S.C. § 553(a)(2) (1970) exempts from its ambit matters pertaining to public property.

Heirs of Dorothy Gordon, 22 IBLA 213 (Oct. 15, 1975)

The Secretarial guideline of Oct. 18, 1973, that a Native allotment application should be rejected when the applicant fails to show 5 years of use and occupancy prior to a withdrawal of the land: (a) is not subject to the rulemaking provisions of the Administrative Procedure Act, 5 U.S.C. § 553 (1970); and (b) is a proper exercise of the discretion vested in the Secretary by the Alaska Native Allotment Act, 43 U.S.C. §§ 270-1 to 270-3 (1970), the application of which does not violate any right of the allotment applicant.

Herman Joseph (On Reconsideration), 22 IBLA 266 (Oct. 30, 1975)

It is unnecessary for the Secretary to consult with men experienced in the exploitation of geothermal steam to make a determination of a known geothermal resources area. It is sufficient that he entertain the opinion that any or all of the elements delineated in 30 U.S.C. § 1001(e) (1970), would engender a belief in such men that the prospects for extraction of geothermal steam or associated geothermal resources are good enough to warrant expenditures of money for that purpose.

Robert C. Harper, 24 IBLA 44 (Feb. 23, 1976)

The Secretary of the Interior or his delegate is not obligated to issue a grazing permit or license to an applicant; the issuance of such permits or licenses is committed to agency discretion; therefore, the Secretary may refuse to issue or to renew such license where the applicant, to enhance his grazing operation, has violated the terms of a statute or regulation prohibiting the killing of wildlife.

National Wildlife Federation (Appellant) v. Bolten Ranch, Inc. (Respondent), 24 IBLA 391 (May 3, 1976)

In the absence of specific statutory authority to lease, the Secretary of the Interior has implied authority, as guardian of the public's natural resources, to lease an oil and gas deposit under his jurisdiction when it is in danger of being drained by wells drilled on adjacent land. However, such protective leases may be issued only by competitive bidding.

James L. Santy, 25 IBLA 390 (July 6, 1976)

The Secretary of the Interior may require an oil and gas lease applicant to accept stipulations reasonably designed to protect environmental and other land use values as a condition precedent to the issuance of a lease. Where a Bureau of Land Management districtwide environmental analysis record establishes the likelihood that significant archaeological values are prevalent in the district and may be found in the land embraced by leases in that district, a special protective stipulation is not unreasonable solely because no archaeological values have yet been discovered in the lands in the lease offer.

Cecil A. Walker, Alan C. F. Dillet, 26 IBLA 71 (July 9, 1976)

SECRETARY OF THE INTERIOR--Continued

The Secretary of the Interior has complete discretion to determine whether the surface of public land reported as valuable for any leasable mineral should be disposed of and a nonmineral application may be allowed only if it is determined by the proper officer with the concurrence of the Director, Geological Survey, that the disposal of the lands under the nonmineral application will not unreasonably interfere with current or contemplated operations under the Mineral Leasing Act.

The Kemmerer Coal Co., 26 IBLA 127 (July 30, 1976)

Since the Bureau of Land Management has no authority to issue a public land order withdrawing land, such authority existing only in the Secretary, the Under Secretary, and the Assistant Secretaries of the Department of the Interior, recommendations by officers of the Bureau of Land Management relating to withdrawals are not subject to review under the provisions of 43 CFR 4.450-2 or 43 CFR 4.410.

City of Kotzebue, 26 IBLA 264 (Aug. 20, 1976)
83 I.D. 313

The Secretary of the Interior has the authority to determine the validity of mining claims upon adequate notice and opportunity for hearing.

United States v. Mine Development Corp., et al., 27 IBLA 238 (Oct. 18, 1976)

The Secretary has authority to correct an erroneous Government survey under 43 U.S.C. § 2 (1970).

Taos Pueblo Tract C, M-36884 (Oct. 28, 1976)
83 I.D. 529

Ordinarily, the signing of an oil and gas lease offer by the authorized officer of the Bureau of Land Management is equivalent to issuance of the lease and creates a binding contract. However, where a Secretarial Order provides that all oil and gas noncompetitive offers must, prior to issuance of a lease, be referred to Geological Survey for a determination of whether the lands are within a known geological structure, and the authorized officer fails to follow such procedure prior to the signing, such signing is not authorized and, therefore, not binding on the Secretary.

Nola Grace Ptasynski (Supp.) (On Court Remand), 28 IBLA 256 (Dec. 20, 1976)

The Department of the Interior does not have the authority to modify a statute ratifying an agreement with an Indian tribe on the grounds of fraud or coercion in the execution of the agreement.

Title to Certain Land Within the Boundaries of the Fort Yuma Indian Reservation as Established by the Executive Order of Jan. 9, 1884, M-36886 (Jan. 18, 1977)
84 I.D. 1

It is unnecessary for the Secretary, or his delegate, to consult with men experienced in the exploitation of geothermal steam to make a determination of a known geothermal resources area. It is sufficient that he entertain the opinion that any or all of the elements delineated in 30 U.S.C. § 1001(e) (1970), would engender a belief in such men that the prospects for extraction of geothermal steam or associated geothermal resources are good enough to warrant expenditures of money for that purpose.

Earth Power Corp., 29 IBLA 37 (Feb. 16, 1977)

The Secretary of the Interior is not authorized to issue a patent to a mining claim until the requirements of the law have been met.

United States v. Fred and Eileen Garner, 30 IBLA 42 (Apr. 18, 1977)

Where the Bureau of Land Management orders a resurvey of a section to identify the boundaries of public land within the section, a private landowner may protest the resurvey and, where the protesting landowner points up a serious contradiction between the resurvey and the topographic calls accompanying the original plat, it is proper to remand the case for a fact hearing.

Domenico A. Tussio et al., 30 IBLA 92 (Apr. 29, 1977)

The Secretary of the Interior may cause to be made such resurveys or retracements of the rectangular system of surveys of public lands as he may deem essential to mark the boundaries of the remaining public lands.

Frank Lujan, 30 IBLA 95 (Apr. 29, 1977)

Where a decision of the Board of Land Appeals is based upon an interpretation of Departmental policy, and that policy is subsequently revised and clarified so as to impel a different result in the case without prejudice to the right of any third party, on reconsideration by the Board that portion of its original decision will be modified and the revised policy will be implemented.

Warner Bergman (On Reconsideration), 31 IBLA 21 (June 20, 1977)

Although the Bureau of Land Management may require such special stipulations as are necessary for the protection of the lands embraced in any lease, proposed special stipulations must be supported by valid reasons which will be weighed by this Department with due regard for the public interest. It is the Bureau's responsibility to impose stipulations which are necessary, appropriate and reasonably related to oil and gas activities, and a stipulation which would forbid the lessee to occupy the surface must be set aside on appeal where BLM fails to provide adequate justification for its imposition and fails to show that it has considered less stringent stipulations.

Reva H. Henderson, 31 IBLA 217 (July 6, 1977)

Where, in the public interest, the Secretary decides not to reopen land to settlement, a would-be settler on this land is denied no rights by this decision.

Henry E. Reeves, 31 IBLA 242 (July 18, 1977)

It is within the power of the Bureau of Land Management, as delegated by the Secretary of the Interior, to retrace any survey it has made whenever it becomes necessary to the determination of a question pending before it for decision involving rights to the public land.

Stanley A. Phillips et al., 31 IBLA 342 (July 22, 1977)

Until such time as the Department promulgates regulations, policy guidelines or criteria implementing sec. 302 of the Federal Land Policy and Management Act of 1976, the Bureau of Land Management may properly defer action on the proposed creation of an estate in Federal land thereunder.

Treva L. Berger, 31 IBLA 389 (Aug. 19, 1977)

Pursuant to the Property Clause of the U.S. Const. art. IV, § 3, cl. 2, Congress has enacted the Taylor Grazing Act, 43 U.S.C. § 315 et seq. (1970), and other statutory authority which empower the Secretary of the Interior to define what conduct constitutes a grazing trespass and to determine whether or not an individual has committed a trespass.

Under the Supremacy Clause, U.S. Const., art. VI, cl. 2, Federal laws, including Federal grazing regulations, override conflicting State laws with respect to public lands.

Bureau of Land Management v. Ross Babcock, 32 IBLA 174 (Sept. 15, 1977) 84 I.D. 475

The Secretary of the Interior has the authority to determine the validity of mining claims on any public lands of the United States, including lands within the National Forest System, after adequate notice and opportunity for hearing. A mining claim contest initiated under the authority of the Secretary of the Interior may be prosecuted by counsel employed by the Department of Agriculture acting on behalf of the Forest Service where such action is in accordance with a Memorandum of Understanding between the agencies.

United States v. Ernest F. Diven and Richard J. T. Anderson, 32 IBLA 361 (Oct. 25, 1977)

The decision to issue an oil and gas lease to the first-qualified offeror is within the discretion of the Secretary of the Interior, and offers within proposed wild and scenic river areas may be rejected to protect such areas.

Questa Petroleum Co., 33 IBLA 116 (Dec. 16, 1977)

Pursuant to the Act of Feb. 15, 1901, repealed by sec. 706(a) of the Act of Oct. 21, 1976 (90 Stat. 2743, 2793), the Department had discretionary authority to permit the use of a right-of-way across public lands to supply water for domestic purposes; however, a right-of-way application for such use was properly rejected where approval of the grant would be contrary to the public interest.

Broken H. Ranch Co., 33 IBLA 386 (Jan. 26, 1978)

The promulgation or revocation of a regulation is within the special authority of the Secretary of the Interior and a limited number of delegates. A regulation, when promulgated, is binding upon all Departmental officials.

Ronald Coulam, 35 IBLA 35 (May 8, 1978)

The Federal coal program was substantially revised in 1975 by the Secretary in proper exercise of his discretion. The Bureau of Land Management did not act in an arbitrary and capricious manner when, under the new coal policy, it suspended applications for coal prospecting permit extensions and the applications were eventually rejected because the Federal Coal Leasing Amendments Act of 1975 removed the authority to grant coal prospecting permit extensions. A program pursued for a period of time under a statutory grant of discretionary authority may be reviewed and revised at any time provided it is not done in an arbitrary manner and is done within the authority granted by Congress.

Island Creek Coal Co., 35 IBLA 247 (May 30, 1978) 85 I.D. 161

Thomas C. Woodward, 35 IBLA 262 (May 31, 1978)

"Subject to valid existing rights." The Secretary of the Interior in making withdrawals "subject to valid existing rights" in PLO 5179 and PLO 5250 intended exceptions to withdrawal to apply in behalf of only those claimants who themselves held such valid rights at time of withdrawal. The Secretary did not intend existence of another's valid rights on withdrawal date to restrain withdrawal so as to allow a topfiling claimant to enter pertinent lands after withdrawal date and independently establish rights under mining laws.

Because of the President's delegation of his nonstatutory withdrawal authority to the Secretary of the Interior by E.O. 10355, the Secretary was endowed with sufficient authority to withdraw lands in issue without reliance upon secs. 17(d)(1) and 17(d)(2) of Alaska Native Claims Settlement Act. Thus, distinctions between those two sections are not herein dispositive of question of Secretary's authority to withdraw lands in PLO 5250.

Harry H. Wilson, 35 IBLA 349 (June 19, 1978)

The Secretary of the Interior has the authority to determine the validity of mining claims on any public lands of the United States after adequate notice and opportunity for a hearing. A mining claim contest may be initiated under the authority of the Secretary of the Interior by the Bureau of Land Management at the behest of the Forest Service and prosecuted by counsel employed by the Department of Agriculture, with Forest Service employees as witnesses, where such action is in accordance with a Memorandum of Understanding between the agencies.

United States v. Andrew L. Freese II, 37 IBLA 7 (Sept. 6, 1978)

The Secretary of the Interior has plenary authority over the public lands, including mineral lands, and has been entrusted with the function of making the initial determination of the validity of claims against such lands.

United States v. Paul R. Fisher and Ruel R. Fisher, 37 IBLA 80 (Sept. 22, 1978)

United States v. Edward T. McHenry et al., 43 IBLA 122 (Sept. 26, 1979)

Under 43 CFR 4.1 the existence of a Secretarial policy limits review by the Board of Land Appeals to the question of whether the action under review is consistent with that policy.

Kenneth H. Bunch, 37 IBLA 346 (Oct. 27, 1978)

The Secretary of the Interior may require execution of special stipulations reasonably designed to protect environmental and other land use values as a condition precedent to the issuance of an oil and gas lease. Oil and gas lease offers within area proposed for inclusion in the wild and scenic river system may be rejected to protect such areas.

Dean W. Rowell, 37 IBLA 387 (Nov. 6, 1978)

Under the Supremacy Clause, U.S. Const., art. VI, cl. 2, Federal laws, including Federal grazing regulations, override conflicting State laws with respect to public lands.

Colvin Cattle Co., Inc., 39 IBLA 176 (Jan. 30, 1979)

Where the Secretary has declined to exercise his jurisdiction, a decision rendered by this Board is final for the Department. Hence, statements by BLM and arguments of the Solicitor, while valuable to the Board, are not binding upon the Board.

H. R. Delasco, Inc., et al., 39 IBLA 194 (Feb. 2, 1979)

The failure of the BLM officer to follow the procedure set out in a Secretarial Order requiring all offers, prior to issuance of a lease, to be sent to Geological Survey for a determination of whether the lands are within a known geologic structure, renders the signing of the lease unauthorized, and thus not binding on the Secretary.

United States v. William T. Alexander (On Court Remand), 41 IBLA 1 (May 21, 1979)

A decision by the Bureau of Land Management canceling fee simple patents issued to Indians and simultaneously issuing new Indian trust patents is not subject to review by the Board of Land Appeals, which has no jurisdiction in the matter, where the decision was made at the direction of the Assistant Secretary for Indian Affairs.

Blue Star, Inc., Atomic Western, Inc., Fremont Energy Corp., Ivor Adair, 41 IBLA 333 (July 11, 1979)

The Taylor Grazing Act, 43 U.S.C. §§ 315a-315r (1970), and other statutory authority empower the Secretary of the Interior to define what conduct constitutes a grazing trespass and whether or not an individual has committed a trespass.

Bureau of Land Management v. Harris Brothers, 42 IBLA 48 (July 31, 1979)

A decision rejecting a Native allotment application because there was not 5 years of use and occupancy of the land prior to a withdrawal affecting the land, will be set aside and the case remanded to the Bureau of Land Management for readjudication in accordance with Secretarial Order No. 3040 of May 25, 1979, which rescinds a former guideline requiring the 5 years prior to the withdrawal and now permits allotment after 5 years' use

and occupancy has been completed provided the applicant had either filed an application or commenced use and occupancy prior to a withdrawal.

Ella S. Sheldon et al., 42 IBLA 276 (Aug. 27, 1979)

Although the Bureau of Land Management may require such special stipulations as are necessary for the protection of the lands embraced in any lease, on appeal such special stipulations must be supported by valid reasons which will be weighed by the Department with due regard for the public interest, and where the stipulation and reason therefore does not appear in the record, the record must be augmented on remand.

James M. Chudnow, 43 IBLA 375 (Oct. 31, 1979)

The Secretary of the Interior has the authority to determine the validity of mining claims on any public lands of the United States after adequate notice and opportunity for a hearing. A mining claim contest may be initiated under the authority of the Secretary of the Interior by the Bureau of Land Management at the request of the U.S. Forest Service and prosecuted by counsel employed by the U.S. Department of Agriculture, with U.S. Forest Service employees as witnesses.

United States v. Jon Zimmers and Claire Kelly, 44 IBLA 142 (Nov. 30, 1979)

The Bureau of Land Management, on behalf of the Secretary of the Interior, may condition issuance of a lease on the execution of a no surface occupancy stipulation where on appeal the record shows that the Bureau has adequately considered the factors involved and the stipulation is a reasonable means to accomplish proper Departmental purposes.

H. E. Shillander, 44 IBLA 216 (Dec. 11, 1979)

SEGREGATION

GENERALLY

Whether or not a lease issued under the Alaska Grazing Act, 43 U.S.C. § 316 *et seq.* (1970), was properly issued, the land in such a lease is segregated from settlement, location or entry, including the acquisition of rights under the Alaska Native Allotment Act, 43 U.S.C. § 270-1 *et seq.* (1970), until the lease is canceled of record.

The filing of an Alaska State selection for land in an Alaska grazing lease constitutes a petition for determination under 43 CFR 4131.3-1, and upon favorable determination and cancellation of the lease, the State's rights, including segregation of the land in its favor, relate back to the filing of the selection.

Native use and occupancy of land within an Alaska grazing lease does not preclude the State from selecting the land as "vacant and unappropriated" land within the meaning of the Alaska Statehood Act, 72 Stat. 339, 48 U.S.C. notes prec. § 21 (1970). The initiation of use and occupancy subsequent to the segregation of the land in favor of the State gives an applicant no rights to an allotment.

Sandra M. Pestrikoff, 23 IBLA 197 (Jan. 6, 1976)

It would not be improper to issue a free use permit to a qualified applicant for land included in, and segregated by, an airport lease application where the airport lease applicant is a governmental entity and it consents to the issuance of the free use permit and such issuance is consistent with the public interest.

Good Roads District No. 1, 25 IBLA 123 (June 7, 1976)

Whether or not a lease issued under the Alaska Grazing Act, 43 U.S.C. § 316 et seq. (1970), was properly issued, the land in such a lease is segregated from settlement, location or entry, including the acquisition of rights under the Alaska Native Allotment Act, 43 U.S.C. § 270-1 et seq. (1970), until the lease is canceled of record pro tanto.

Myrtle M. Jensen Shanigan, 29 IBLA 255 (Mar. 25, 1977)

Publication in the Federal Register of a notice of proposed classification pursuant to 43 CFR 2461.2 will segregate the affected land to the extent indicated in the notice.

Where mining claims occupy land which has subsequently been withdrawn from the operation of the mining laws by a notice of proposed classification, 43 CFR 2461.2, the validity of the claim must be tested as of the date of the published notice, as well as of the date of determination. If the claim was not supported by such a discovery at the date of the published notice of classification, the land within the claim located in the classified area would not be excepted from the effect of the withdrawal.

United States v. R. E. Rodgers and Barbara J. Rodgers, 32 IBLA 77 (Sept. 2, 1977)

A classification of the lands under the Recreation and Public Purposes Act, 43 U.S.C. § 869 (1970), as amended, segregates the land from all other forms of appropriation under the public land laws including the mining laws when the classification is noted on the Bureau of Land Management State Office records.

H. B. Webb, 34 IBLA 362 (May 1, 1978)

There is a legal distinction between the administrative segregation of land under application for withdrawal, pending action on the application, and the completed withdrawal itself.

"Segregation" is an administrative procedure preliminary to favorable or unfavorable action on a withdrawal application by the Secretary of the Interior in the exercise of his delegated authority under the Pickett Act, 43 U.S.C. § 141 et seq. (1970), and is not legally equivalent, in its effect on the status of the land, to a completed withdrawal or reservation.

Appeal of Paug-Vik, Inc., Ltd., 3 ANCAB 49 (July 5, 1978) 85 I.D. 229

A mining claim located on land at a time when the land is segregated from mining location by a State selection application is properly declared null and void at initio.

W. Ted Hackett, 39 IBLA 28 (Jan. 11, 1979)

Prior to passage of the Multiple Mineral Development Act, 30 U.S.C. §§ 521-31 (1976), a prima facie valid mineral lease, or application therefor, though void and ineffectual to vest any rights to minerals subject to the mining laws in the lessee segregated the land from the operation of the mining laws and prevented the initiation of rights under the mining laws by another person until it had been set aside and removed from the records of the land office.

Charles House, Mrs. Leonard Skinner, 42 IBLA 364 (Sept. 11, 1979)

FILING OF APPLICATION

The date of the segregation from settlement, caused by the filing of a State selection application in the appropriate office of the Bureau of Land Management, is not tantamount to the "effective date" of "[a] withdrawal or reservation" described in the Secretarial directive of Oct. 18, 1973. Therefore, Native use and occupancy commenced before such segregation may continue, unhampered by such segregation, to gain the requisite 5 years' use and occupancy required under 43 U.S.C. §§ 270-1 to 270-3 (1970).

Victor A. Anahonak, 21 IBLA 347 (Aug. 18, 1975)

The filing of an amended Alaska State Selection, after a prior trade and manufacturing site claim for which a notice of location was recorded is canceled and closed of record but where the cancellation has not been posted on the records, segregates the land it describes from further appropriations based on application or settlement and location.

Margaret L. Klatt, Allan D. Klatt, 23 IBLA 59 (Dec. 11, 1975)

A selection application under the Alaska Statehood Act filed in the appropriate Bureau of Land Management office for properly described land segregates the land from all appropriation based upon subsequent application or settlement and location.

John W. Eastland et al., 24 IBLA 240 (Mar. 25, 1976)

It is improper for the Bureau of Land Management to reject desert land applications on the basis of directives within a deleted regulation which required that such applications be rejected when the lands described therein were included within a previously filed State application for a temporary withdrawal under the Act of Mar. 15, 1910, which permits the Secretary to temporarily withdraw lands in furtherance of the purposes of the Carey Act. In the absence of a recodification of the directives in the deleted regulation, the Bureau should suspend action on all applications filed subsequent to the withdrawal application pending final action on the application for withdrawal.

Kevin D. Ellis, Sylvia L. Ellis, 24 IBLA 387 (May 3, 1976)

It would not be improper to issue a free use permit to a qualified applicant for land included in, and segregated by, an airport lease application where the airport lease applicant is a governmental entity and it consents to the issuance of the free use permit and such issuance is consistent with the public interest.

Good Roads District No. 1, 25 IBLA 123 (June 7, 1976)

SEGREGATION--Continued

FILING OF APPLICATION--Continued

The filing by a qualified applicant of a homestead application to enter unappropriated surveyed lands in Alaska segregates the land covered by the application from appropriation. Such an application will be considered to have created a valid existing right which is protected from the effect of a subsequent withdrawal which is subject to valid existing rights.

Albert A. Howe, 26 IBLA 386 (Sept. 15, 1976)

The filing by a qualified applicant of an application for an allowed homestead entry of land which is open and available to such entry at the time of filing will operate to segregate the land from subsequent appropriation and invest the applicant with sufficient interest therein to preserve the land from the effect of a subsequent withdrawal which is made subject to valid existing rights.

Richard T. Pope, 27 IBLA 33 (Sept. 20, 1976)

Under 43 CFR 2091.6-3 and 2627.4(b), the filing of a State's application to select lands segregates these lands from all subsequent appropriation, including locations under the mining laws.

Janelle R. Deeter, Gary R. Deeter, Verna R. Lyons, Harry D. Lyons, 34 IBLA 81 (Feb. 22, 1978)

Joe D. Denson, 43 IBLA 136 (Sept. 28, 1979)

The filing of an application for withdrawal of public lands by a Federal agency segregates the land from location, sale, selection, entry, lease, or other forms of disposal under the Public Land Laws to the extent that such withdrawal, if effected, would prevent such forms of disposal.

Segregation of lands covered by a withdrawal application filed by a military agency, accomplished by a notation of the land records, does not prevent statutory withdrawal of such lands for selection by a Native Corporation pursuant to sec. 11 of ANCSA.

Appeal of Paug-Vik, Inc., Ltd., 3 ANCAB 49 (July 5, 1978) 85 I.D. 229

SETTLEMENTS ON PUBLIC LANDS

A homestead notice of location filed for lands open to location is acceptable for recordation. Where a homestead settler has marked the corners of his claim by posts prior to a withdrawal subject to valid existing rights, the claim survives the withdrawal if the location notice requirements have been satisfied.

Robert A. Rice, Jr., 22 IBLA 291 (Nov. 3, 1975)

An Alaska Native allotment applicant may not use the occupancy of public land by forebears to qualify herself for an allotment, nor does the use and occupancy of public land by a forebear, while the land was open to settlement, create any right that excepts the land from a withdrawal in favor of an applicant who initiated independent use and occupancy subsequent to the withdrawal.

Sandra M. Pestrikoff, 23 IBLA 197 (Jan. 6, 1976)

Myrtle M. Jensen Shanigan, 29 IBLA 255 (Mar. 25, 1977)

SETTLEMENTS ON PUBLIC LANDS--Continued

A notice of location filed under the Alaska settlement law, 43 U.S.C. § 687a (1970), regular on its face, for land which is open to such settlement and location, is acceptable for recordation. If a withdrawal follows the filing of a notice of location, the proper inquiry is into the validity of the claim, *i.e.*, whether the locator has by acts of settlement and improvement established a valid existing right protected from the effect of the withdrawal.

Mary C. Rolen, 24 IBLA 100 (Mar. 1, 1976)

A settlement claim initiated after a State selection application is filed and the land segregated from appropriation creates no rights in the settler.

John W. Eastland et al., 24 IBLA 240 (Mar. 25, 1976)

Where an applicant to purchase a trade and manufacturing site or a headquarters site states he was frustrated in completing his improvements and showing sufficient use of the land as required by the law because of more difficult or complex problems than anticipated, but has not shown that this operation could reasonably be expected to be successful, such problems will not afford any basis for equitable adjudication of his application to purchase.

United States v. Ronald E. Tippetts, 29 IBLA 348 (Mar. 31, 1977)

Where a notice of location of settlement claim is filed covering land which is not available for entry, the notice must be rejected and cannot be suspended to await the possible restoration of the land to entry.

Henry E. Reeves, 31 IBLA 242 (July 18, 1977)

A Native allotment applicant, who was 5 years old at the time when the land was withdrawn from all forms of appropriation, is properly deemed to be incapable as a matter of law of having exerted independent use and occupancy of the land to the exclusion of others prior to the withdrawal and consequently the allotment application is properly rejected.

An allotment right is personal to one who has complied with the laws and regulations. An applicant for a Native allotment may not rely or tack on use and occupancy of the land by his ancestors to establish his right.

Floyd L. Anderson, Sr., 41 IBLA 280 (June 28, 1979) 86 I.D. 345

An allotment right is personal to one who has complied with the laws and regulations. An applicant for a Native allotment may not rely on or tack on use and occupancy of the land by his ancestors to establish his right.

A Native allotment applicant, who was 5 years old at the time when the land was withdrawn from all forms of appropriation, is properly deemed to be incapable as a matter of law of having exerted independent use and occupancy of the land to the exclusion of others prior to the withdrawal and consequently the allotment application is properly rejected.

Public Land Order No. 2213 of Dec. 8, 1960, establishing the Kuskokwim National Wildlife Range withdrew certain lands from all forms of appropriation under the public land laws, and although such order preserved to Natives the right to hunt, fish, and trap thereon, the lands were no longer subject to initiation of rights

SETTLEMENTS ON PUBLIC LANDS--Continued

under the Native Allotment Act once the order became effective.

Peter Panruk, 43 IBLA 69 (Sept. 19, 1979)

A Native allotment applicant, who was 5 years old at the time when the land was withdrawn from all forms of appropriation, is properly deemed to be incapable as a matter of law of having exerted independent use and occupancy of the land to the exclusion of others prior to the withdrawal and consequently the allotment application is properly rejected.

Nicky Nickoli, 43 IBLA 296 (Oct. 17, 1979)

SMALL TRACT ACT

GENERALLY

Where land was subject to a mining claim at the time a small tract classification order withdrew the land from mineral entry and the mining claim was thereafter declared null and void, a subsequent transferee of the mining claim has no standing to object to the order classifying the land under the Small Tract Act.

Richard B. and Shirley A. Jarrett, 19 IBLA 78 (Feb. 27, 1975)

Where a Public Land Order withdraws land from all forms of appropriation under the public land laws for proper classification of the lands under Alaska Native Claims Settlement Act and for protection of public interest values, but provides that the withdrawn lands are subject to administration by the Secretary of the Interior under applicable laws and regulations and his authority to grant leases, an application for Small Tract lease accompanied by a petition for classification may be accepted for filing by the Bureau of Land Management. Ultimate disposition of the application will be dependent upon the classification of the land involved.

Elizabeth A. Sharp, 19 IBLA 312 (Apr. 7, 1975)

It is not an abuse of the Secretary's discretion under the Small Tract Act to offer a renewable 5-year lease instead of fee title where it appears that the latter form of tenure would interfere with proper resource development and management programs.

Edward W. Kirk, Beatrice Anne Kirk, Ralph Hevener, Ramona F. Hevener, 20 IBLA 156 (May 5, 1975)

An applicant for land under the Small Tract Act cannot acquire any right in the land by virtue of administrative delay in reappraising the land prior to issuance of patent. The mere filing of a small tract application does not create in the applicant any right or interest in the land.

George D. Jackson, 20 IBLA 253 (May 16, 1975)

Where a decision fixes a small tract rental derived from an appraisal report which does not comport with Departmental standards, the decision will be set aside and the case remanded for a new appraisal to establish the fair rental value.

Junction Oil Co., Inc., 21 IBLA 78 (June 25, 1975)

SMALL TRACT ACT--Continued

GENERALLY--Continued

Department of the Interior policy requires that, in most circumstances, full value be received by the Government in any sale of public land.

The mere filing of a small tract purchase application does not create in the applicant any right or interest in the land.

A notification to a small tract lessee, which was authorized by a memorandum of the Director, Bureau of Land Management, dated Oct. 19, 1955, and approved by the Secretary of the Interior on Nov. 9, 1955, that the lessee could purchase the tract under lease without constructing the improvements required in the option to purchase clause of the lease, if he paid the appraised price shown on the lease within a set time, was an offer to sell the tract by the United States, and exercise of the option by the lessee created a binding contract. Where issuance of the patent was delayed for years because of the contest of a conflicting mining claim, reappraisal to determine changed value since that time is not permissible because there was a binding contract under special authority.

Abraham Epstein, 24 IBLA 195 (Mar. 19, 1976)

The issuance of a lease for public lands under the Small Tract Act, 43 U.S.C. § 682a et seq. (1970), is within the discretion of the Secretary of the Interior. A decision to offer such a lease to a party residing in certain improvements on the public domain without claim of title to the land on which the improvements are located is not an abuse of discretion and will be upheld where the land is primarily valuable for outdoor recreation purposes and is important for purposes of providing public access to recreation opportunities on other public land and, thus, disposal of a fee simple interest would be inconsistent with good land management practices.

No rights are initiated under the Small Tract Act, 43 U.S.C. § 682a et seq. (1970), by occupying or improving the land prior to receiving authority to do so.

An applicant for land under the Small Tract Act, 43 U.S.C. § 682a et seq. (1970), cannot acquire any rights in the land by virtue of administrative delay.

Robert Gladwell, 26 IBLA 270 (Aug. 24, 1976)

The Small Tract Act, as amended, 43 U.S.C. § 682a et seq. (1970) was repealed by sec. 702 of the Federal Land Policy and Management Act of 1976 (FLPMA), 90 Stat. 2787, and no land may be purchased under this Act. Where a State Office decision approves an application for purchase of a tract of land filed pursuant to the Small Tract Act in order to correct an error in a land description in another patent previously issued to appellants under the Small Tract Act, the decision will be reversed and the case remanded to the State Office for determination of whether the original patent may be corrected under sec. 316 of FLPMA, Correction of Conveyance Documents, 43 U.S.C. § 1746 (1970).

Richard C. Cole et al., 38 IBLA 175 (Dec. 6, 1978)

The Small Tract Act, 43 U.S.C. § 682a-e (1970), was repealed by sec. 702, Federal Land Policy and Management Act of 1976, Oct. 21, 1976, P.L. 94-579, 90 Stat. 2787. Renewal of a small tract lease was discretionary under the former Small Tract Act, so there was no right to renewal of a small tract lease preserved by sec. 701 of FLPMA. Any use or occupancy of the public domain

SMALL TRACT ACT--Continued

GENERALLY--Continued

granted subsequent to Oct. 21, 1976, must be under authority contained in FLPMA.

Arthur G. Lane, Jr., 38 IBLA 297 (Dec. 14, 1978)

APPLICATIONS

Where a Public Land Order withdraws land from all forms of appropriation under the public land laws for proper classification of the lands under Alaska Native Claims Settlement Act and for protection of public interest values, but provides that the withdrawn lands are subject to administration by the Secretary of the Interior under applicable laws and regulations and his authority to grant leases, an application for Small Tract lease accompanied by a petition for classification may be accepted for filing by the Bureau of Land Management. Ultimate disposition of the application will be dependent upon the classification of the land involved.

Elizabeth A. Sharp, 19 IBLA 312 (Apr. 7, 1975)

APPRAISALS

An applicant for land under the Small Tract Act cannot acquire any right in the land by virtue of administrative delay in reappraising the land prior to issuance of patent. The mere filing of a small tract application does not create in the applicant any right or interest in the land.

Where the current fair market value of land has been determined in accordance with accepted appraisal procedures, the appraisal will not be disturbed in the absence of positive, substantial evidence that it is in error.

George D. Jackson, 20 IBLA 253 (May 16, 1975)

Where a decision fixes a small tract rental derived from an appraisal report which does not comport with Departmental standards, the decision will be set aside and the case remanded for a new appraisal to establish the fair rental value.

Junction Oil Co., Inc., 21 IBLA 78 (June 25, 1975)

An appellant contending that the rental for a small tract lease (Act of June 1, 1938, *as amended*) set by BLM appraisal is excessive has the burden of proving by substantial and positive evidence that the appraisal is in error.

Henry O. Woodruff, 24 IBLA 190 (Mar. 18, 1976)

Where an applicant for a small tract lease contends the rental set by the Bureau of Land Management is too high, the burden is upon him to prove by positive and substantial evidence that the appraisal is in error.

Opal H. Lofquist, 28 IBLA 111 (Nov. 15, 1976)

Where the current fair rental value of a small tract lease has been determined in accordance with accepted appraisal procedures, and the lessee contends that the rental is excessive, the burden is upon the lessee to prove by positive, substantial evidence that the appraisal is in error. Where the lessee fails to do so, the appraisal will stand.

Junction Oil Co., Inc., 28 IBLA 183 (Dec. 6, 1976)

CLASSIFICATION

The issuance of a lease for public lands under the Small Tract Act, 43 U.S.C. § 682a *et seq.* (1970), is within the discretion of the Secretary of the Interior. A decision to offer such a lease to a party residing in certain improvements on the public domain without claim of title to the land on which the improvements are located is not an abuse of discretion and will be upheld where the land is primarily valuable for outdoor recreation purposes and is important for purposes of providing public access to recreation opportunities on other public land and, thus, disposal of a fee simple interest would be inconsistent with good land management practices.

Robert Gladwell, 26 IBLA 270 (Aug. 24, 1976)

The Small Tract Act, 43 U.S.C. § 682a-e (1970), was repealed by sec. 702, Federal Land Policy and Management Act of 1976, Oct. 21, 1976, P.L. 94-579, 90 Stat. 2787. Renewal of a small tract lease was discretionary under the former Small Tract Act, so there was no right to renewal of a small tract lease preserved by sec. 701 of FLPMA. Any use or occupancy of the public domain granted subsequent to Oct. 21, 1976, must be under authority contained in FLPMA.

Arthur G. Lane, Jr., 38 IBLA 297 (Dec. 14, 1978)

LANDS SUBJECT TO

Land along the Lower Colorado River which has been designated in a land use plan approved by the Secretary of the Interior as a public recreation area is not subject to disposal under the Small Tract Act of June 1, 1938, 43 U.S.C. § 682a (1970).

John Paul Hinds, Ruth M. Hinds, 18 IBLA 385 (Jan. 31, 1975)

RENEWAL OF LEASE

The filing of an application to lease under the Small Tract Act does not vest any legal right or interest in the applicant, for it is within the discretion of the Secretary whether or not to exercise his authority to lease the land.

Alva E. Muse and Barbara J. Muse, 30 IBLA 36 (Apr. 11, 1977)

SODIUM LEASES AND PERMITS

GENERALLY

In exercising the Secretary of the Interior's discretionary authority to lease known sodium deposits under the Mineral Leasing Act, an application to have the lands leased is properly rejected where it appears that the land applied for and surrounding environment near a national recreation area may be more severely damaged than most other sites within the known sodium leasing area, there is local governmental and other opposition to the leasing, and Bureau of Land Management and Forest Service officials recommend preparation of

GENERALLY--Continued

an Environmental Impact Statement for the entire known sodium area before leasing further lands in the area.

Eugene V. Simons, 26 IBLA 208 (Aug. 16, 1976)

A silicate will be considered to be a sodium silicate and subject to disposal under the Mineral Leasing Act either where the sodium within the deposit is commercially valuable or where the sodium is essential to the existence of the mineral.

United States v. Union Carbide Corp., 31 IBLA 72 (June 24, 1977) 84 I.D. 309

"Other related products." "Other associated deposits." When sodium or potassium brines are covered by leases conveying the exclusive right to mine and dispose of sodium compounds and other related products or potassium compounds and other associated deposits, the leases convey the exclusive rights to all minerals dissolved in the brine, including lithium.

"Leasing Act minerals." The Multiple Mineral Development Act, 30 U.S.C. § 524 (1970), reserved all Leasing Act minerals to the United States, and no rights to deposits of Leasing Act minerals are open to location under the mining laws under 30 U.S.C. § 525 (1970). "Leasing Act minerals" is defined as "all minerals which, upon Aug. 13, 1954, are provided in the mineral leasing laws to be disposed of thereunder." 30 U.S.C. § 530 (1970). Because leases for sodium, potassium, and "other related products" are authorized pursuant to 30 U.S.C. §§ 262, 282 (1970), "other related products" along with sodium and potassium fall within the category of Leasing Act minerals which include lithium which is dissolved in a sodium or potassium brine.

Foote Mineral Co., 34 IBLA 285 (Apr. 17, 1978) 85 I.D. 171

LEASES

A sodium prospecting permittee who applies for a preference right sodium lease, alleging with supportive data that he has discovered a valuable deposit of sodium and that the land is chiefly valuable for sodium, as required by sec. 24 of the Mineral Leasing Act of 1920, as amended, 30 U.S.C. § 262 (1970), is entitled to a hearing conducted in accordance with sec. 5 of the Administrative Procedure Act, 5 U.S.C. § 554 (1970), before his lease application may be finally rejected for failure to prove such a discovery.

Marine Minerals Corp., 25 IBLA 153 (June 10, 1976)

In exercising the Secretary of the Interior's discretionary authority to lease known sodium deposits under the Mineral Leasing Act, an application to have the lands leased is properly rejected where it appears that the land applied for and surrounding environment near a national recreation area may be more severely damaged than most other sites within the known sodium leasing area, there is local governmental and other opposition to the leasing, and Bureau of Land Management and Forest Service officials recommend preparation of an Environmental Impact Statement for the entire known sodium area before leasing further lands in the area.

Eugene V. Simons, 26 IBLA 208 (Aug. 16, 1976)

LEASES--Continued

Under 30 U.S.C. § 262 (1970), a valuable deposit of sodium must be leased competitively even though the Geological Survey determination that lands are so known may have been made subsequent to appellant's filing of its application.

Under 30 U.S.C. §§ 162 and 262 (1970), valuable deposits of sodium compounds are not open to location and disposition under the mining laws, but may be disposed of only under the Mineral Leasing Act, except for certain claims under 43 CFR 3501.1-1(b), existent at passage of Mineral Leasing Act of 1920 which have since been maintained in accordance with statute and regulation.

Permian Mud Service, Inc., 31 IBLA 150 (June 30, 1977) 84 I.D. 342

Where Bureau of Land Management terminates a sodium lease because lessee failed to submit justification for holding a lease in excess of the acreage limitation, the decision will be set aside upon submission or explanation of failure to provide written information, and the case will be remanded for the State Office to determine whether the information submitted on appeal justifies continued lease tenure.

Olin Corp., 39 IBLA 161 (Jan. 29, 1979)

PERMITS

A sodium prospecting permittee who applies for a preference right sodium lease, alleging with supportive data that he has discovered a valuable deposit of sodium and that the land is chiefly valuable for sodium, as required by sec. 24 of the Mineral Leasing Act of 1920, as amended, 30 U.S.C. § 262 (1970), is entitled to a hearing conducted in accordance with sec. 5 of the Administrative Procedure Act, 5 U.S.C. § 554 (1970), before his lease application may be finally rejected for failure to prove such a discovery.

Marine Minerals Corp., 25 IBLA 153 (June 10, 1976)

A statement of reasons in support of an appeal which does not point out affirmatively in what respect the decision appealed from is in error, but merely asserts that earlier filed sodium permit applications were erroneously approved, does not meet the requirements of the Department's rules of practice and is properly dismissed.

It is proper to reject sodium permit applications to the extent that they conflict with prior filed applications which have ripened into permits.

James G. Macey, 26 IBLA 191 (Aug. 10, 1976)

The issuance of sodium prospecting permits is discretionary with the Secretary of the Interior, and the Secretary may refuse to issue permits for lands withdrawn for wildlife purposes if the use of the lands for mineral prospecting and development activities would adversely affect the wildlife habitat.

Where the regulations and Departmental and BLM Manuals do not specifically state how disputes between the Fish and Wildlife Service and the Bureau of Land Management over issuing sodium prospecting permits for lands within wildlife refuge areas are to be resolved, but the Departmental Manuals indicate that such decisions are to be made by the Secretary and the BLM Manual directs that such applications be forwarded to the Washington Office, a decision of a State Office rejecting an application for a sodium prospecting permit will be set

SODIUM LEASES AND PERMITS--Continued

PERMITS--Continued

aside and the case remanded for processing in accordance with the Departmental and BLM Manuals.

Vernal E. Bess et al., 27 IBLA 4 (Sept. 17, 1976)

The Bureau of Land Management may issue a sodium prospecting permit for lands adjacent to area withdrawn for wildlife concervation purposes subject to a stipulation which provides that, in the event of discovery of an exploitable sodium deposit, no preference right lease will be issued unless hydrologic and other environmental analyses indicate that sodium ore can be removed without a significant adverse environmental impact on the wildlife habitat within the withdrawn areas.

David E. Hughes, 27 IBLA 46 (Sept. 23, 1976)

Under 30 U.S.C. § 262 (1970), a valuable deposit of sodium must be leased competitively even though the Geological Survey determination that lands are so known may have been made subsequent to appellant's filing of its application.

Under 30 U.S.C. §§ 162 and 262 (1970), valuable deposits of sodium compounds are not open to location and disposition under the mining laws, but may be disposed of only under the Mineral Leasing Act, except for certain claims under 43 CFR 3501.1-1(b), existent at passage of Mineral Leasing Act of 1920 which have since been maintained in accordance with statute and regulation.

Permian Mud Service, Inc., 31 IBLA 150 (June 30, 1977)
84 I.D. 342

PREFERENCE RIGHT LEASES

In determining whether a permittee is entitled to a preference right lease the Secretary must consider all legal and economic conditions affecting the proposed operation of the lease as of the time of the determination, including the applicable statutory minimum production royalty rate. A preference right lease must provide for a production royalty rate in conformity with the statutory minimum rate applicable at the time of issuance.

Reduction of Production Royalties Below Statutory Minimum Rates, M-36920 (Dec. 11, 1979) 87 I.D. 69 (1980)

ROYALTIES

"Gross value at the point of shipment to market." The royalty rate for products mined and disposed of under sodium and potassium leases must be imposed on the "gross value of the sodium (or potassium) compounds and other related products at the point of shipment to market," which means the gross value of a refined product for sale in an established market, and in general, no deductions may be allowed for costs incurred in developing a product to a marketable condition except for the price of reagents which are chemically combined with the product sold from the lease.

Foote Mineral Co., 34 IBLA 285 (Apr. 17, 1978)
85 I.D. 171

SODIUM LEASES AND PERMITS--Continued

ROYALTIES--Continued

In determining whether a permittee is entitled to a preference right lease the Secretary must consider all legal and economic conditions affecting the proposed operation of the lease as of the time of the determination, including the applicable statutory minimum production royalty rate. A preference right lease must provide for a production royalty rate in conformity with the statutory minimum rate applicable at the time of issuance.

Reduction of Production Royalties Below Statutory Minimum Rates, M-36920 (Dec. 11, 1979) 87 I.D. 69 (1980)

SOLDIERS' ADDITIONAL HOMESTEADS

GENERALLY

Since the statute authorizing cash payment to the holder of soldiers' additional rights requires that an applicant for such payment must give written notice to the Secretary of the Interior of his election to receive such payment prior to Jan. 1, 1975, an application received on Jan. 2, 1975, must be rejected.

J. Sidney Rood, 20 IBLA 319 (June 4, 1975)

Transfers of scrip or selection rights which are presented to the Department of the Interior for recordation pursuant to the Scrip Recordation Act more than 6 months after they were made cannot be accepted for recording or serve as a basis for the acquisition of lands. An application to elect to receive cash rather than land, which is based upon a transfer of a soldiers' additional homestead selection right filed more than 6 months after it was made, must be rejected.

Where an applicant to receive cash in satisfaction of a soldier's additional homestead selection right fails to establish a complete chain of title from the soldier-entryman to the applicant, a purported assignment of the right to the applicant cannot be recognized and the application must be rejected.

Margaret W. Chivers, 21 IBLA 124 (July 14, 1975)

The requirement of the Act of Aug. 5, 1955, 69 Stat. 535, that within 6 months of any transfer of scrip rights the holding or claim of right must be presented for recordation by the Department, presupposes a valid transfer. Where the holder of a soldier's additional homestead right shows that the transfer was fraudulent and without his knowledge, the failure of the fraudulent transferee to record the right will not extinguish the right claimed by the innocent holder.

Upon the death of a soldier-entryman the soldier's additional homestead right vests in his estate, subject to the right of his widow or minor orphan children to appropriate it pursuant to the terms of the statutory grant. Upon the death of the soldier-entryman's widow, and in the absence of minor orphan children, the right becomes absolute in the heirs of the soldier-entryman at the time of his death.

Where an applicant seeks to assert a soldier's additional homestead right which has been determined to be invalid in an earlier proceeding, and does not submit compelling legal or equitable reasons for reconsideration, but merely seeks to reargue the previous determination, the attempted exercise of soldier's additional homestead rights will be rejected.

George Rodda, Jr., 27 IBLA 186 (Oct. 4, 1976)

SOLDIERS' ADDITIONAL HOMESTEADS--Continued

GENERALLY--Continued

An application by a remote assignee to exercise soldiers' additional homestead rights is properly rejected when the validity of the right on which the assignment is based has not been established.

George Rodda, Jr., 37 IBLA 189 (Oct. 11, 1978)

SOLICITOR, DEPARTMENT OF THE INTERIOR

Where the Secretary has declined to exercise his jurisdiction, a decision rendered by this Board is final for the Department. Hence, statements by BLM and arguments of the Solicitor, while valuable to the Board, are not binding upon the Board.

H. B. Delasco, Inc., et al., 39 IBLA 194 (Feb. 2, 1979)

SPECIAL USE PERMITS

The Bureau of Land Management, in the exercise of its discretionary power to issue special land use permits, may establish special fee assessments for off-road vehicle (ORV) events.

The filing of an application for a special land use permit does not vest in the applicant any rights which preclude the Bureau of Land Management from requiring compliance with fee assessments adopted after the date of such filing but before issuance of the permit. In the absence of a provision that pending applications are to be exempted from the effects of the change in fee requirements, the applicant must comply with the fee assessment in effect at the time of the issuance of the special land use permit.

An applicant's special land use permit application does not fall within the "firm commitment" exception of a Bureau of Land Management instruction memorandum requiring revised fee assessments for off-road vehicle (ORV) permits where, subsequent to issuance and notice of the memorandum, the application is still in the preliminary processing stage requiring additional pre-event meetings, the applicant's acceptance of special stipulations, and further staff investigation and review before approval; however, the case will be remanded for further consideration where the District Office decision does not determine whether the application falls within the memorandum exception which permits the honoring of "negotiations which have progressed too far to negate."

Walt's Racing Ass'n, 18 IBLA 359 (Jan. 30, 1975)

Where a special land use permit application to use land in support of various military programs, as an impact area for all types of air delivered items including parachute drops, arms firing, and inert items dropped from dispensers, is rejected, on the basis that the issuance of a renewal permit could result in undue risk to the safety of the public, without the preparation of an environmental impact analysis and without consideration of possible limitations upon use, the case will be remanded for such action.

Flight Systems, Inc., 19 IBLA 58 (Feb. 25, 1975)

The issuance of a special land use permit is discretionary, and the Bureau of Land Management may reject a special land use permit application when the proposed use would adversely affect the public interest, and may offer, in the alternative, a permit providing for use

SPECIAL USE PERMITS--Continued

consonant with proper management of national resource lands.

Jerry Tecklin, Leonard Brackett, 20 IBLA 308 (May 30, 1975)

An applicant's special land use permit application does not fall within a Bureau of Land Management instruction memorandum exception which permits the honoring of past "negotiations which have progressed too far to negate," in lieu of the new revised fee assessment required by the memorandum for off-road vehicle events, where at the time of issuance and notice of the memorandum only preliminary negotiations had occurred which could still be negated.

Walt's Racing Ass'n, 22 IBLA 238 (Oct. 22, 1975)

The issuance of a special land use permit by the Bureau of Land Management is clearly discretionary, but the Bureau may not issue a permit when the provisions of existing laws may be invoked to provide for the proposed use. However, if a withdrawal of the lands in issue precludes the invocation of such provisions, a permit may be granted if consistent with the public interest. Where the land has been withdrawn by Executive Order No. 6206 of July 16, 1933, for the protection of the water supply of the City of Los Angeles, and the City objects to the issuance of a permit for agricultural purposes, but does not show why it objects, the case will be remanded to develop the facts and for further appropriate consideration.

Edward L. Butterworth, 23 IBLA 136 (Dec. 23, 1975)

Issuance of special land use permits is discretionary, and it is proper to reject an application for such a permit if the use for which the application is made is inconsistent with the objectives of the Bureau of Land Management and programs for public use of the land.

Donald J. Laughlin, d/b/a Riverside Resort & Casino, 25 IBLA 41 (May 12, 1976)

A petition for reconsideration of a decision of the Board of Land Appeals which affirmed the rejection of a special land use permit application will not result in the modification of the earlier decision where that rejection is based upon rational grounds and is consistent with the objectives of the Bureau of Land Management and programs for public use of the land.

Donald J. Laughlin (d/b/a Riverside Resort & Casino) (On Reconsideration), 26 IBLA 154 (Aug. 2, 1976)

The issuance of a special land use permit by the Bureau of Land Management is discretionary, but the Bureau may not issue a permit when the provisions of existing laws may be invoked by the applicant to provide for the proposed use.

A special land use permit may be issued for land being used in trespass for a limited time during pendency of negotiations seeking to effect a land exchange whereby the land occupied in trespass may be patented.

Alfred Gaiser, 26 IBLA 313 (Aug. 30, 1976)

SPECIAL USE PERMITS--Continued

Where the declared administrative policy is to refuse permission for geophysical exploration on lands controlled by sec. 17(d)(1) of the Alaska Native Claims Settlement Act and the subject lands are under consideration for possible inclusion in the national forest system, a decision refusing such permission will be affirmed.

Shell Oil Co., 28 IBLA 378 (Feb. 4, 1977)

Where a corporation has applied for a special land use permit to use certain natural resource lands in its flight testing programs and the Bureau of Land Management has compiled an environmental analysis record and determined that any impact on the environment due to granting of the permit would be minimal and the Federal Aviation Administration is aware of possible air safety problems, yet has not acted to deter the flight test operations, the permit is properly granted despite the objections relating to air safety raised by the military, which holds restricted airspace adjacent to and above 20,000 feet directly over the lands in question.

Where the Bureau of Land Management has dismissed a protest to the issuance of a special land use permit and on appeal the protestant requests an evidentiary hearing, such request will be denied when no evidence is proferred by protestant which would engender the belief that the development of further facts would require a different result.

Department of the Navy, Naval Weapons Center, China Lake, 29 IBLA 324 (Mar. 30, 1977)

A special use permit for commercial passenger carrying river-trip operations may be denied renewal for non-use or reduced for incomplete use over a 2-year period and only use during the crucial high season may be counted in determining usage if the permit so provides. However, where the program is recent and permittees are not fully familiar with its operations, and all the requirements for maintaining the permit are not immediately apparent, a permittee may be given some leeway before his permit is denied renewal.

Wilderness River Outfitters and Trail Expeditions, Inc., 30 IBLA 148 (May 16, 1977)

A special recreation use permit for commercial boat operations may be denied renewal for nonuse over a 2-year period of any allocated passenger days under a properly noticed "use or lose" policy. However, where the permit program is relatively recent and administrative techniques are not fully reliable, and where the appellant documents on appeal some use of its allocation during the 2-year period, the permit should not be denied renewal under the "use or lose" policy.

Canyoneers, Inc., 30 IBLA 354 (June 9, 1977)

The issuance of a special use permit is discretionary, and the Bureau of Land Management properly exercises that discretion where it denies permits for three of four ORV events on the ground that lack of funds, time, and manpower would impede processing of applications and preclude preparation of the requisite environmental analysis records.

Baja Motor Sports, 32 IBLA 142 (Sept. 12, 1977)

SPECIAL USE PERMITS--Continued

A Bureau of Land Management appraisal from which the annual rental for a special use permit is calculated will be upheld unless the permittee shows by substantial and positive evidence, specific errors in the method or facts on which the appraisal is based.

Evidence that Forest Service land has been appraised at lower values and leased at lower rates than allegedly comparable Bureau of Land Management land will not suffice to overturn the latter's practices where no specific error in its methods has been shown.

Where a permittee introduces an alternative comparative sales analysis in opposition to that of the Bureau of Land Management, he must show by substantial and positive evidence why his analysis is valid and the Bureau of Land Management's invalid. Where the issue rests on the assertion of each party's expert on the validity of his respective analysis and the record fails to contain evidence by which this deadlock can be resolved, the case will be remanded for further factfinding.

Michael S. Deering, 33 IBLA 142 (Dec. 19, 1977)

The issuance of a use permit is discretionary, and BLM may reject an application for such a permit where Bureau studies indicate that the uses proposed are inconsistent with the agency's objectives for the lands involved.

Arnold E. Bedell, 37 IBLA 22 (Sept. 12, 1978)

Where an application for a special use permit is not filed until more than 10 months after a deadline for doing so imposed by BLM, it is properly rejected.

Where a permittee is not familiar with an unpublished BLM policy to the effect that the tardy filing of an application for permit renewal in 1978 makes the permittee a "new" applicant in 1979 and, as such, ineligible to receive a permit, BLM's decision enforcing this policy and rejecting the permittee's 1979 application will be reversed.

Outdoor Adventure River Specialists, Inc., 41 IBLA 132 (June 14, 1979)

The issuance of special use permits is discretionary and BLM may properly reject a permit application if the use identified is inconsistent with BLM's objectives, responsibilities and programs for managing the public lands. BLM may propose alternatives or impose restrictions or stipulations in order to issue a permit consistent with its responsibilities.

Southern California Motorcycle Club, Inc., Sierra Club, 42 IBLA 164 (Aug. 17, 1979)

STATE GRANTS

The Secretary of the Interior is authorized and under a duty to determine what lands are public lands and to survey such lands. Neither the Acts admitting Florida into the Union, nor the Reconstruction Act of Mar. 2, 1867, divested the Secretary of the Interior of that authority regarding islands in the State of Florida, nor divested the United States of title to any public lands in the State.

Virgil Lopez et al., 21 IBLA 33 (June 17, 1975)

STATE GRANTS--Continued

Title to a numbered school section which is surveyed on or after July 11, 1956, and on which there is outstanding at the time of such survey a mineral lease entered into by the United States, is granted to the State, and the State shall succeed to the position of the United States as lessor under such lease.

State of Utah, 22 IBLA 44 (Sept. 15, 1975)

Although a grant to a State pursuant to the Swamp Land Act of 1849 or 1850 is a grant *in praesenti*, in that the State is immediately vested with an inchoate equitable title, the legal title does not pass until the Secretary has determined that the land is swamp in character and otherwise available for disposition.

John Stuart Hunt, Sherman H. Hunt, 31 IBLA 304 (July 22, 1977)
84 I.D. 421

A Bureau of Land Management decision rejecting a selection application by the State of Utah under its Miner's Hospital Grant because the land is deemed mineral in character due to a classification as valuable for oil, gas, and coal will be set aside because it failed to consider relevant statutes and regulations permitting selections of land valuable for minerals leasable under the Mineral Leasing Acts with a reservation of the minerals to the United States.

State of Utah, Department of Natural Resources, 38 IBLA 85 (Nov. 15, 1978)

STATE LANDS

The States possess dominion over the beds of all navigable streams within their borders.

An oil and gas offer embracing land in the bed of a navigable river, which is State land, is properly rejected.

Leonard E. McSweyn, 28 IBLA 100 (Nov. 15, 1976)
83 I.D. 556

If the intent of the United States in administering lands now comprising a State was clearly to reserve the bed of a river for some particular purpose, then that intent, embodied in an appropriate legislative or administrative act, results in exclusion of the riverbed from lands passing to the State upon statehood.

Opinion on the Boundaries of and Status of Title to Certain Lands Within the Colville and Spokane Indian Reservations, M-36887 (Feb. 2, 1977)
84 I.D. 72

STATE LAWS

State mining laws relating to discovery may only add to the Federal mining law; such laws cannot diminish the Federal requirements for the discovery of a valuable mineral deposit on a mining claim located on Federal lands.

United States v. John H. Tappan, Jr., et al., 25 IBLA 1 (May 5, 1976)

STATE LAWS--Continued

Possession of Federal land for the period of a State's statute of limitations, which may create title rights in an adverse possessor to non-Federal land, cannot affect the title of land belonging to the United States. Where there is no other acceptable basis for a belief that a claimant has title other than mere adverse possession under such a State law, there is no claim or color of title recognizable under the Color of Title Act, 43 U.S.C. § 1068 (1970).

Manley Rustin and Betty Rustin, 28 IBLA 205 (Dec. 6, 1976)
83 I.D. 617

Under the mining law discovery of a valuable mineral deposit is the *sine qua non* for a valid mining claim. State mining laws relating to discovery may only add to the Federal mining law; such laws cannot diminish the Federal requirements for discovery of a valuable mineral deposit on a mining claim located on Federal lands.

United States v. Bradley F. Denham, 29 IBLA 185 (Mar. 18, 1977)

Where material involving a prior mineral reservation on acquired lands is first submitted on appeal, and the effect of a State statute and State court decree is in issue, it is appropriate to remand the case to the BLM State Office for further consideration.

A. B. Henderson, 30 IBLA 8 (Apr. 4, 1977)

Under the Supremacy Clause, U.S. Const., art. VI, cl. 2, Federal laws, including Federal grazing regulations, override conflicting State laws with respect to public lands.

Bureau of Land Management v. Ross Babcock, 32 IBLA 174 (Sept. 15, 1977)
84 I.D. 475

Colvin Cattle Co., Inc., 39 IBLA 176 (Jan. 30, 1979)

A provision of State law, relating to assessment work on mining claims, which is more liberal than the requirements of Federal law, cannot override such Federal law. Article IV, § 3, cl. 2, of the Federal Constitution vests in the Congress authority to promulgate appropriate laws governing the public lands and other property of the United States.

Bruce Parks, 42 IBLA 18 (July 25, 1979)

The State laws applicable to Federal oil and gas leases are limited to those classes of laws authorized or recognized by sec. 32 of the Mineral Leasing Act, *as amended*, 30 U.S.C. § 189 (1976).

Lamar M. Richardson, Jr., 42 IBLA 333 (Aug. 30, 1979)

A State law which requires filing of proof of assessment work which requirement is more liberal than the recordation requirement of the Federal Land Policy and Management Act of 1976, § 314a, 43 U.S.C. § 1744 (1976), cannot override the more onerous requirements of the latter, since Article VI, Clause 2 of the Federal Constitution makes the Constitution, and laws and treaties made in conformity therewith, the supreme law of the land.

James V. Joyce, 42 IBLA 383 (Sept. 11, 1979)

STATE SELECTIONS

(*See also* School Lands, Swamplands--if included in this Index.)

A selection application by the State of Alaska must be rejected where all of the applied for land is withdrawn from State selection.

State of Alaska, 18 IBLA 351 (Jan. 15, 1975)

Lands withdrawn by sec. 11(a)(1) & (2) of the Alaska Native Claims Settlement Act are subject to selection by qualified Native villages notwithstanding the prior tentative approval of selections of those lands by the State of Alaska pursuant to the Statehood Act.

Where the State of Alaska had received tentative approval of a land selection and had granted a patent to a third party in accordance with sec. 6(g) of the Alaska Statehood Act, and where the State patent was granted before the enactment of the Alaska Native Claims Settlement Act, with the express approval of the various Native groups then concerned, a Native village may not later select those lands pursuant to the Alaska Native Claims Settlement Act, as a valid third party right to the land had already been created.

Where statute and regulation provide that lands selected by the State of Alaska must be surveyed before patent can issue, but no similar requirement has been imposed as a precondition to the conveyance of lands selected pursuant to the Alaska Native Claims Settlement Act, the State's contention that this disparity is discriminatory will not afford a basis for reversing a decision which rejected a State selection application in favor of a conflicting Native village selection.

The fact that filing fees are required as a condition precedent for State selections and are not required for Native village selections pursuant to the Alaska Native Claims Settlement Act is not a basis for vacating a decision awarding lands to the Native villages.

State of Alaska, 19 IBLA 178 (Mar. 18, 1975)

The allowance of a State selection application furthers the discharge of the Federal obligation to fulfill the State's statutory entitlement and, generally, it will be preferred in the public interest over the discretionary application of one who does not have an entitlement of equal dignity.

The denial of a petition for classification and the rejection of an application under the Recreation and Public Purposes Act for a lease of lands which have been withdrawn and which are also subject to a State selection application which, under the terms of the withdrawal order, may be allowed, does not violate the tenets of due process because the disposition of the petition-application is at the discretion of the Secretary, and the petitioner-applicant has no vested right protected by constitutional guarantees or by the Administrative Procedure Act.

Mountaineering Club of Alaska, Inc., 19 IBLA 198 (Mar. 19, 1975)

The filing of a State selection under the Alaska Statehood Act does not create a right that prevents a Native village from selecting those lands under the terms of the Alaska Native Claims Settlement Act.

State of Alaska, 19 IBLA 242 (Mar. 27, 1975)

STATE SELECTIONS--Continued

Under 43 CFR 2091.6-4 and 2562.1(d) a notice of location for a trade and manufacturing site is unacceptable for recordation where the land is not subject to that form of disposition because it has been segregated by State selection applications.

Lloyd Schade, 19 IBLA 251 (Mar. 31, 1975)

The filing of a State selection application under sec. 6(b) of the Alaska Statehood Act of July 7, 1958, 72 Stat. 339, 340, 48 U.S.C. notes prec. § 21 (1970), does not create a right that prevents a Native village from selecting those lands under the provisions of the Alaska Native Claims Settlement Act of Dec. 18, 1971, 85 Stat. 688, 43 U.S.C. §§ 1601-1624 (Supp. III 1973).

Whether village selections authorized by the Alaska Native Claims Settlement Act, 43 U.S.C. §§ 1601-1624 (Supp. III 1973), constitute an unwarranted vitiation of the State selection provisions of the Alaska Statehood Act, 48 U.S.C. notes prec. § 21 (1970), and of the Compact of Admission to the Union, is beyond the consideration of this Board.

State of Alaska, 19 IBLA 316 (Apr. 7, 1975)

The inclusion of lands belonging to the United States in a proposed power project pursuant to sec. 24 of the Federal Power Act of 1920, 16 U.S.C. § 818 (1970), has the effect of reserving or withdrawing those lands from entry, location, or other disposal under the public land laws of the United States until otherwise directed by the Federal Power Commission or by Congress and until the withdrawal is revoked by the Secretary of the Interior.

A selection application by the State of Alaska must be rejected with respect to those public lands which are reserved or withdrawn from entry or other form of disposal under the public land laws of the United States and cannot be held open pending a possible future change of the status of the land.

State of Alaska, 20 IBLA 341 (June 11, 1975)

An application filed by a State under the Act of Mar. 15, 1910, for a temporary withdrawal of lands to aid in the selection of the lands for proposed development under the Carey Act of 1894 must be rejected where the lands are withdrawn for stock-driveway purposes, and cannot be suspended pending consideration of a petition for reclassification of the lands as suitable for selection under the Carey Act.

A grant of lands to a State under the Carey Act of 1894 is not a grant *in praesenti*, vesting title to any particular lands as of the time of passage of the Act or by relation back upon fulfillment of the conditions imposed by the Act, but the allowance or rejection of an application by a State under the Act of Mar. 15, 1910, for a temporary withdrawal of lands to aid in the selection of the lands for proposed development under the Carey Act is a matter wholly within the discretion of the Department; and where the lands sought to be selected by the State are embraced within a stock-driveway withdrawal made by the Secretary of the Interior under authority of law, they are not, so long as such withdrawal remains in force, subject to any claim of the State under the Carey Act.

Idaho Department of Water Resources, 21 IBLA 210 (July 31, 1975)

STATE SELECTIONS--Continued

The allowance of a State selection application furthers the discharge of the Federal obligation to fulfill the State's statutory entitlement and, generally, it will be preferred in the public interest over the discretionary application of one who does not have an entitlement of equal dignity.

C. Burglin et al., 21 IBLA 234 (Aug. 11, 1975)

The notation on land office records of a noncompetitive oil and gas lease application does not prevent the State of Alaska from selecting the land pursuant to the Alaska Statehood Act.

Yukon Service, Inc., 22 IBLA 220 (Oct. 15, 1975)

A headquarters site claim is invalid when occupancy of the site was initiated more that 90 days prior to the filing of a notice of location and an intervening State selection application has segregated the land.

William G. Fairbanks, 22 IBLA 255 (Oct. 23, 1975)

The filing of an amended Alaska State Selection, after a prior trade and manufacturing site claim for which a notice of location was recorded is canceled and closed of record but where the cancellation has not been posted on the records, segregates the land it describes from further appropriations based on application or settlement and location.

Margaret L. Klatt, Allan D. Klatt, 23 IBLA 59 (Dec. 11, 1975)

A selection application under the Alaska Statehood Act filed in the appropriate Bureau of Land Management office for properly described land segregates the land from all appropriation based upon subsequent application or settlement and location.

John W. Eastland et al., 24 IBLA 240 (Mar. 25, 1976)

Applications filed by the State of Idaho under the Act of Mar. 15, 1910, for temporary withdrawals of land for proposed development under the Carey Act of 1894, must be rejected where the lands have been previously withdrawn for reclamation, stock-driveway, agricultural research or military purposes.

Idaho Department of Water Resources, 25 IBLA 27 (May 5, 1976)

A railroad right-of-way, granted under the Act of July 1, 1862, 12 Stat. 489, *as amended*, by Act of July 2, 1864, 13 Stat. 356, crossing a school section, does not constitute lands "otherwise disposed of by the United States" within the ambit of the school indemnity statutes. Therefore a rejection of an indemnity selection application, offering such base, is proper.

State of Wyoming, 27 IBLA 137 (Sept. 29, 1976)
83 I.D. 364

Applications filed by the State of Idaho under the Act of Mar. 15, 1910, for temporary withdrawals of land for proposed development under the Carey Act of 1894, must be rejected where the lands have been previously withdrawn for reclamation purposes.

Idaho Department of Water Resources, 27 IBLA 302 (Oct. 26, 1976)

Lands described in a State selection application under sec. 6(b) of the Alaska Statehood Act are segregated from all forms of appropriation including location under the mining laws from the time the application is filed in the proper office of the BLM. An amendment to a pre-existing application is effective to segregate the land described in the amendment from the time it is filed.

Dennis G. Chinn, 29 IBLA 307 (Mar. 30, 1977)

Applications filed for temporary withdrawals of land for proposed development under the Carey Act of 1894 must be rejected where the lands have been previously withdrawn for other purposes.

Idaho Department of Water Resources, 32 IBLA 89 (Sept. 2, 1977)

Under 43 U.S.C. § 852(a)(1) (1970), *as amended* by sec. 25 of the Geothermal Steam Act of 1970, 30 U.S.C. § 1024 (1970), a State may select lands with geothermal potential as indemnity for base lands lost by it from its grant for common schools without a reservation to the United States of the geothermal rights therein, provided that these base lands also have geothermal potential.

Per sec. 25 of the Geothermal Steam Act of 1970, geothermal resources are treated under 43 U.S.C. § 852(a) (1970) as other leasable minerals, rather than as oil and gas, so that a State need not submit as base for indemnity selection of lands which have been classified by the Geological Survey as being within a "KGRA" (known geothermal resource area) lands which also are classified as KGRA, but instead need only submit base lands classified by GS as having geothermal potential.

Where BLM has issued a clear list giving a State title to lands selected as indemnity for lost school lands but erroneously reserving to the United States geothermal rights to these selected lands, these geothermal rights are still within the power of the United States to dispose of, and the Department still exercises jurisdiction over them, so that the Board of Land Appeals may correct BLM's error by ordering that these rights be given to the State by deleting the reservation thereof in the clear list.

Where the record indicates that there may be gross disparity between the value of lands selected by a State as indemnity for lost school lands and the value of base lands submitted by the State in support of the selection, the matter will be remanded to the BLM for revaluation of the lands. If the revaluation reveals a gross disparity, the BLM shall withhold further action until judicial resolution of the propriety of the "grossly disparate value" policy.

State of California, 33 IBLA 160 (Dec. 20, 1977)

Under 43 CFR 2091.6-4 and 2627.4(b), the filing of a State's application to select lands segregates these lands from all subsequent appropriation, including locations under the mining laws.

Janelle R. Deeter, Gary D. Deeter, Verna D. Lyons, Harry D. Lyons, 34 IBLA 81 (Feb. 22, 1978)

Joe E. Benson, 43 IBLA 136 (Sept. 28, 1979)

STATE SELECTIONS--Continued

A Bureau of Land Management decision rejecting a selection application by the State of Utah under its Miner's Hospital Grant because the land is deemed mineral in character due to a classification as valuable for oil, gas, and coal will be set aside because it failed to consider relevant statutes and regulations permitting selections of land valuable for minerals leasable under the Mineral Leasing Acts with a reservation of the minerals to the United States.

A State selection application for lands valuable for leasable minerals may be rejected where it is determined that the disposal of the surface rights will unreasonably interfere with current or contemplated operations under the Mineral Leasing Acts and there is a proper basis in the record for such a determination which is unrefuted by the applicant. However, if there is no substantiation in the record for the determination and a State asserts error, the case will be remanded to the Bureau of Land Management to reconsider the determination, with the Geological Survey, and substantiate the basis of any future determination.

State of Utah, Department of Natural Resources, 38 IBLA 85 (Nov. 15, 1978)

Where the State is a party to decisions by the Bureau of Land Management and the State's selection applications were rejected by those decisions, under 43 CFR 4.410, the State has standing to appeal those decisions to the Board of Land Appeals.

The Alaska Native Claims Settlement Act extinguished aboriginal occupancy claims of Alaska Natives; such claims cannot serve as a bar to a State selection, nor preclude the State from challenging Native allotment applications conflicting with its selection.

Under the "functional" standard to determine administrative standing set forth in *Koniag, Inc.* v. *Andrus*, 580 F.2d 601 (D.C. Cir. 1978), *cert. denied*, 99 S. Ct. 733 (1979), the State of Alaska has standing to challenge Native allotment applications conflicting with its selection applications even if the land is within a Native village selection area under the Alaska Native Claims Settlement Act. The State has standing under Departmental regulations to initiate private contests against such conflicting Native allotment applications.

State of Alaska et al., 41 IBLA 315 (July 11, 1979)
86 I.D. 361

The State of Alaska has a sufficient interest in land by virtue of its applications for an airport conveyance or by its selection application to have standing to initiate private contests against conflicting Native allotment applications.

State of Alaska, 42 IBLA 1 (July 25, 1979)

Where the State of Alaska has filed an application to select certain land 2 years prior to the date when an applicant for a Native allotment declares that he first began his use and occupancy of that land, the segregative effect of the State selection will preclude allowance of the Native allotment as a matter of law.

The segregative effect of a State of Alaska selection application is operative on the land for which the State has applied from the date of filing, and remains in effect until the State's application is finally disposed, during which time no new rights may be initiated. The ultimate disallowance of the State's application will neither negate the segregative effect of its filing on the land, nor validate *nunc pro tunc* any claim initiated during the period when the land was so segregated.

Andrew Petla, 43 IBLA 186 (Oct. 5, 1979)

STATE TAXES

Public lands owned by the United States cannot be subjected to taxation by the State in which they are located. When Congress has prescribed the conditions upon which portions of the public domain may be alienated and has provided that upon fulfillment of certain conditions the United States shall issue patent, the land becomes taxable only after the applicant has fulfilled all conditions precedent to such conveyance. Payment of taxes to a State for Federal land does not afford the taxpayer any rights against the United States, unless specifically provided by a Federal statute.

Joseph Tosalino, August Sokotka, 42 IBLA 117 (Aug. 16, 1979)

STATUTES

The Bureau of Land Management has the authority to impose a stipulation on an oil and gas lease covering reserved minerals on patented lands, which would require archaeological investigation and excavations by lessee.

General Crude Oil Co., 28 IBLA 214 (Dec. 10, 1976)
83 I.D. 666

STATUTORY CONSTRUCTION

GENERALLY

Although there may be no general rule for distinguishing between mandatory and directory provisions, a statute should be construed according to its subject matter and the purpose for which it was enacted, and the intention of the legislature should be controlling.

To deny status as an eligible village to persons in fact entitled to that status would be an unjust and unfair denial of a right specifically granted by Congress, as evidenced in the legislative history.

Authority to Determine Eligibility of Native Villages After June 18, 1974, M-36877 (Jan. 7, 1975) 82 I.D. 14

Whether village selections authorized by the Alaska Native Claims Settlement Act, 43 U.S.C. §§ 1601-1624 (Supp. III 1973), constitute an unwarranted vitiation of the State selection provisions of the Alaska Statehood Act, 48 U.S.C. notes prec. § 21 (1970), and of the Compact of Admission to the Union, is beyond the consideration of this Board.

State of Alaska, 19 IBLA 316 (Apr. 7, 1975)

In providing for allocation of rents, royalties and bonuses between the United States and a State in proportion to their ownership of a mineral lease partly within and partly without a numbered school section, the Congress intended for producing mineral leases to be included within the exceptions set out in the amendatory Act of July 11, 1956, 30 U.S.C. § 870(d) (1970).

State of Utah, 22 IBLA 44 (Sept. 15, 1975)

STATUTORY CONSTRUCTION--Continued

GENERALLY--Continued

One of the functions of the Department of Justice is to construe the laws under which other Government Departments act, 28 U.S.C. § 512 (1970), and when the Department of Justice has advised the Department of the Interior that it has construed a conflict of interest statute affecting Members of Congress and has determined that it is permissible for the spouse of a Member of Congress to hold a grazing lease for national resource lands under certain circumstances, that opinion is binding on this Department, and a grazing lease is properly issued when the applicant has satisfied the criteria set forth by the Department of Justice.

Joseph T. Kurkowski, 24 IBLA 58 (Feb. 23, 1976)

Where a statute designates the Illinois River as a potential addition to the river system, and similarly designates other rivers and their tributaries, the tributaries of the Illinois River are not included as potential additions, under the principle *inclusio unius alterius exclusio est*.

Walter D. Freeman et al., 25 IBLA 150 (June 10, 1976)

Sec. 5(b) of the Act of May 25, 1948 (62 Stat. 269) is not applicable to those tribal lands upon which the Flathead Irrigation Project's Kerr Substation and Switchyard are located.

Relocation of Flathead Irrigation Project's Kerr Substation and Switchyard, M-36735 (Supp.) (Sept. 24, 1976) 83 I.D. 346

Sec. 31 of the Mineral Leasing Act, *as amended*, 30 U.S.C. § 188 (1970), providing for the automatic termination of a lease, not containing a well capable of production of oil and gas in paying quantities, for nonpayment of the annual rental, does apply to a lease which is entitled to an extension beyond its initial 10-year term because of termination of an approved communitization agreement under 30 U.S.C. § 226(j) (1970), even though notice of the extension was not given to the lessee in time for him to receive it and return the rental so that the payment would be received by BLM no later than the 11th anniversary date of the lease.

Jack L. McClellan, Marton Majoros, 34 IBLA 53 (Feb. 16, 1978)

As to gravel, interpretations of the mineral reservation in patents issued by the United States under the Stock-Raising Homestead Act, 43 U.S.C. § 299 (1970), must be consistent with the established rule that land grants are to be construed favorably to the Government, that nothing passes except what is conveyed in clear language, and that if there are doubts they are resolved for the Government, not against it.

In determining whether gravel is included in a mineral reservation in a patent issued under the Stock-Raising Homestead Act, 43 U.S.C. § 299 (1970), the interpretation of the reservation must take into account the intended use for which the land was conveyed and those uses which the Government intended to reserve.

"*Ejusdem generis*." The *ejusdem generis* rule of construction may not be invoked to exclude gravel from the scope of a reservation of "all the coal and other minerals" in patents issued under the Stock-Raising Homestead Act, 43 U.S.C. § 299 (1970), because this rule of construction can only be effectively applied where there is a series of specific terms which define a class so that one may construe a general term by reference to that class.

Western Nuclear, Inc., 35 IBLA 146 (May 22, 1978) 85 I.D. 129

When those provisions of reclamation law which are specifically incorporated by SRPA are added to the provisions of SRPA itself, they form a complete scheme which is capable of standing by itself without need to incorporate the general body of reclamation law.

When a statute is enacted as being "supplemental" to a general law, it will incorporate the provisions of that other law to the extent the provisions of the general law are not inconsistent with the supplemental statute, unless the intent is otherwise clear that Congress did not intend incorporation.

Application of the Acreage Limitation and Residency Requirements to Small Reclamation Projects Act Projects, M-36904 (July 17, 1978) 85 I.D. 254

When interpreting Federal agreements and statutes pertaining to Indian Affairs, one must consider the legislative history, as well as surrounding circumstances and subsequent administrative practices to determine what the parties intended, and in particular, what the Indians understood the agreement to mean. Doubtful expressions are to be resolved in the Indians' favor.

Congressional intent to modify or abrogate Indian property rights must be clear and cannot be lightly inferred.

Sec. 25 of the Act of Apr. 21, 1904 (33 Stat. 189, 224), which authorized the application of the 1902 Reclamation Act to the Fort Yuma and Colorado River Reservations, and which provided for the allotment and sale of surplus irrigable lands on those reservations, was unrelated to and was not intended to effect the conditional cession provided for in the 1893 agreement and the 1894 ratifying statute.

Title to Certain Lands Within the Boundaries of the Fort Yuma (now called Quechan) Indian Reservation, M-36908 (Jan. 2, 1979) 86 I.D. 3

Subsequent to the passage of the Federal Land Policy and Management Act of 1976 (FLPMA), the Department lacked the authority to accept donations of land under the Act of July 14, 1960, which had been expressly repealed by FLPMA. Inasmuch as the actions of the Secretary under the Act of July 14, 1960, were not ministerial, the doctrine of relation cannot be used to validate, on a *nunc pro tunc* basis, an acceptance of a donation under the authority of the Act of July 14, 1960, occurring after the repeal of that Act by Congress.

Junior L. Dennis, 40 IBLA 12 (Mar. 9, 1979)

ADMINISTRATIVE CONSTRUCTION

The 2 1/2-year time limitation set forth by Congress in sec. 11(b)(2) of the Alaska Native Claims Settlement Act, 43 U.S.C. § 1610(b)(2) (1970), for the determinations of village eligibility, is an estimate of time reasonable enough to accomplish the basic purposes of that section of the Act.

Authority to Determine Eligibility of Native Villages After June 18, 1974, M-36877 (Jan. 7, 1975) 82 I.D. 14

STATUTORY CONSTRUCTION--Continued

ADMINISTRATIVE CONSTRUCTION--Continued

The administrative treatment of land as reservation land under the jurisdiction of the Bureau of Indian Affairs for many purposes is not dispositive of the status of the land in the face of clear legislation demonstrating that it was absolutely ceded, even without conflicting administrative treatment of the lands as public domain or under the jurisdiction of the Reclamation Service. The Department has the authority to resolve disputes and correct errors in the status of lands within its jurisdiction.

Title to Certain Land Within the Boundaries of the Fort Yuma Indian Reservation as Established by the Executive Order of Jan. 9, 1884, M-36886 (Jan. 18, 1977)
84 I.D. 1

In determining whether interpretation of a statute should be given prospective effect, some of the factors to be considered are whether the statute is easily susceptible to more than one interpretation; whether the interpretation being overruled has been followed since enactment of the statute; the nature of the reliance placed on the precedent by the parties; the purpose of the statute or rule in light of public policy; the harm to the parties who have relied on the precedent to their detriment; and the harm either to the Government or the public purpose.

Reclamation Law - Control of the Sale Price of Formerly Excess Lands, M-36913 (May 18, 1979)
86 I.D. 306

IMPLIED REPEALS

Sec. 25 of the Act of Apr. 21, 1904, which authorized the application of the Reclamation Act of 1902 to the Yuma Indian Reservation, did not repeal by implication sec. 17 of the Act of Aug. 15, 1894, which provided for the cession, reclamation and allotment of the Reservation, and is in no way inconsistent with the 1894 Act.

Title to Certain Land Within the Boundaries of the Fort Yuma Indian Reservation as Established by the Executive Order of Jan. 9, 1884, M-36886 (Jan. 18, 1977)
84 I.D. 1

LEGISLATIVE HISTORY

To deny status as an eligible village to persons in fact entitled to that status would be an unjust and unfair denial of a right specifically granted by Congress, as evidenced in the legislative history.

Authority to Determine Eligibility of Native Villages After June 18, 1974, M-36877 (Jan. 7, 1975) 82 I.D. 14

STOCK-RAISING HOMESTEADS

An application to make a stock-raising homestead entry is properly rejected because the homesteading provisions of the Stock-Raising Homestead Act were impliedly repealed by the Taylor Grazing Act of June 28, 1934.

Lee, 24 IBLA 308 (Apr. 14, 1976)

STOCK-RAISING HOMESTEADS--Continued

When, as a result of direct proceedings against mining claims, the Department determines that no discovery has been made, the claims must be declared null and void notwithstanding that they are located on land patented under the Stock-Raising Homestead Act and the contest was privately initiated.

Cabot Sedgwick et al. v. C. M. Parker, 27 IBLA 256 (Oct. 20, 1976)

An application filed in 1976 to make a stock-raising homestead entry is properly rejected because the homesteading provisions of the Stock-raising Homestead Act were impliedly repealed by the Taylor Grazing Act and were expressly repealed by the Federal Land Policy and Management Act.

Daniel A. Anderson, 31 IBLA 162 (July 1, 1977)

As to gravel, interpretations of the mineral reservation in patents issued by the United States under the Stock-Raising Homestead Act, 43 U.S.C. § 299 (1970), must be consistent with the established rule that land grants are to be construed favorably to the Government, that nothing passes except what is conveyed in clear language, and that if there are doubts they are resolved for the Government, not against it.

In determining whether gravel is included in a mineral reservation in a patent issued under the Stock-Raising Homestead Act, 43 U.S.C. § 299 (1970), the interpretation of the reservation must take into account the intended use for which the land was conveyed and those uses which the Government intended to reserve.

A patent of land under the Stock-Raising Homestead Act, 43 U.S.C. § 291 *et seq.* (1970), was not generally intended to give the grantee the right to use the land for mineral development and mineral development was to proceed only under the mineral laws.

"*Ejusdem generis*." The *ejusdem generis* rule of construction may not be invoked to exclude gravel from the scope of a reservation of "all the coal and other minerals" in patents issued under the Stock-Raising Homestead Act, 43 U.S.C. § 299 (1970), because this rule of construction can only be effectively applied where there is a series of specific terms which define a class so that one may construe a general term by reference to that class.

Sec. 9 of the Stock-Raising Homestead Act, 43 U.S.C. § 299 (1970), contemplates the Department of the Interior retaining continuing jurisdiction and administration of mineral deposits reserved by that Act.

"Public lands." Under 43 CFR 9239.0-7 which defines a trespass, the term "public lands" includes mineral deposits reserved under the Stock-Raising Homestead Act, 43 U.S.C. § 299 (1970).

The declaration in the Surface Resources Act, 30 U.S.C. § 611 (1970), that no deposit of common varieties of gravel shall be deemed a valuable mineral deposit within the meaning of the mining laws, was not intended to operate as a conveyance, to holders of patents, of any minerals reserved under the Stock-Raising Homestead Act, 43 U.S.C. § 299 (1970).

Gravel in a valuable deposit is a mineral reserved to the United States in patents issued under the Stock-Raising Homestead Act, 43 U.S.C. § 299 (1970).

Western Nuclear, Inc., 35 IBLA 146 (May 22, 1978)
85 I.D. 129

STOCK-RAISING HOMESTEADS--Continued

A bond filed by a mining claim owner, covering lands patented under the Stock-Raising Homestead Act of Dec. 29, 1916, as amended, 43 U.S.C. §§ 291-301 (1970), need only be set in an amount to cover damages to crops, improvements, and the value of the land for grazing purposes within the limits of the mining claim. The ad damnum of the bond does not have to be sufficient to cover damages caused by a disruption of the surface owner's entire grazing operation.

Elmer Silvera et al., 42 IBLA 11 (July 25, 1979)

SUBMERGED LANDS

Federal title to land may be lost by erosion, and land which has become submerged under water is no longer subject to disposition under the Alaska Native Allotment Act. The fact that an Alaska Native may have used, occupied, and filed an application for such land when it was dry does not prevent the loss of Federal title to that land by erosion. Neither the Alaska Statehood Act nor the Submerged Lands Act prevents the passage of title to such land to the State.

Frank Holland, 41 IBLA 207 (June 27, 1979) 86 I.D. 342

The Mineral Leasing Act for Acquired Lands does not exclude from oil and gas leasing those lands underlying the Missouri River within the boundaries of the Fort Berthold Indian Reservation as established by the Treaty of Fort Laramie (1851) and the Executive Order of Apr. 12, 1870, which were reacquired by the United States from the Indian tribes. The exclusion in the Act for submerged lands refers to submerged coastal lands, as set forth in 43 CFR 3101.2-1(g).

Impel Energy Corp., 42 IBLA 105 (Aug. 16, 1979)

SUBMERGED LANDS ACT

GENERALLY

Submerged and filled tidelands passed to the State of Alaska on the date of its admission to the Union, Jan. 3, 1959. Ownership of tidelands subsequently created by avulsive action remains in those persons or entities, including the Federal Government, who held title to the land prior to the avulsive action.

Sandra L. Lough, Damon M. Blackburn, 25 IBLA 96 (June 3, 1976)

Where submerged lands were included in a withdrawal order in Alaska, which was in effect at the time the State entered the Union, even though such submerged lands were not specifically described in the withdrawal order, such submerged lands would not pass to the State at statehood pursuant to sec. 5(a) of the Submerged Lands Act.

The subsequent revocation of a withdrawal of submerged lands which prevented the State from acquiring title to such lands at statehood pursuant to sec. 5(a) of the Submerged Lands Act, has no effect on the ownership of the lands contained in the withdrawal.

Where the coastal submerged lands in the Arctic National Wildlife Refuge were segregated by an application for a withdrawal filed by the Fish and Wildlife Service in Jan. 1958, 1 year before Alaska statehood, such application operated as an express retention of the lands at statehood under the Submerged Lands Act, and prevented passage of title of the coastal submerged lands to the State.

The Effect of Public Land Order 82 on the Ownership of Coastal Submerged Lands in Northern Alaska, M-36911 (Dec. 12, 1978) 86 I.D. 151 (1979)

Federal title to land may be lost by erosion, and land which has become submerged under water is no longer subject to disposition under the Alaska Native Allotment Act. The fact that an Alaska Native may have used, occupied, and filed an application for such land when it was dry does not prevent the loss of Federal title to that land by erosion. Neither the Alaska Statehood Act nor the Submerged Lands Act prevents the passage of title to such land to the State.

Frank Holland, 41 IBLA 207 (June 27, 1979) 86 I.D. 342

The Board adopts the Solicitor's conclusion that Public Land Order No. 82 (Jan. 22, 1943) (8 FR 1599 (Feb. 4, 1943)) constituted an express retention for the United States of submerged lands when Alaska was admitted to the Union, and title to the submerged lands withdrawn by PLO No. 82 did not pass to the State of Alaska with statehood.

Regulations in 43 CFR 2650.5-1(b) deal explicitly with chargeability of acreage and implicitly with land title, establishing two categories of submerged lands not required to be selected and charged: those underlying navigable waters, and those underlying nonnavigable waters of one-half section or more.

Under regulations in 43 CFR 2650.5-1(b), Federal ownership of submerged lands does not require all such lands to be charged against a Native corporation's acreage entitlement.

Appeal of State of Alaska, 3 ANCAB 297 (July 31, 1979) 86 I.D. 361

ACCRETIONS

Submerged and filled tidelands passed to the State of Alaska on the date of its admission to the Union, Jan. 3, 1959. Ownership of tidelands subsequently created by avulsive action remains in those persons or entities, including the Federal Government, who held title to the land prior to the avulsive action.

Sandra L. Lough, Damon M. Blackburn, 25 IBLA 96 (June 3, 1976)

SURFACE MINING CONTROL AND RECLAMATION ACT OF 1977

ABATEMENT

A refusal to grant an extension of time for abatement is not necessarily an abuse of discretion when the request for an extension was made after the abatement time had expired.

White Winter Coals, Inc., 1 IBSMA 305 (Dec. 4, 1979) 86 I.D. 675

ADMINISTRATIVE PROCEDURE

Generally

An administrative law judge may raise questions which go to the authority of the Department under the Act even if the parties fail to raise those questions.

If a party objects to any ruling of or action taken by an administrative law judge it should do so in a manner that the administrative law judge can reconsider his action in light of that objection.

It is imperative both to the just implementation of this Act and to the proper functioning of administrative review within the Department that parties cooperate with the administrative law judge's conduct of the proceeding and with his requests.

Delight Coal Corp., 1 IBSMA 186 (June 5, 1979)
86 I.D. 321

In a case on appeal, the Board bases its deliberations on the record before it.

Where the applicant for review bases his defense upon the assertion that the amount of coal removed or to be removed is less than that provided by law to constitute surface coal mining, he must prove such an assertion.

James Moore, 1 IBSMA 216 (July 20, 1979) 86 I.D. 369

In review proceedings of notices of violation and cessation orders, the burden of going forward to establish a prima facie case rests with OSM and the ultimate burden of persuasion rests with the applicant for review.

Dean Trucking Co., Inc., 1 IBSMA 229 (Sept. 11, 1979)
86 I.D. 437

Findings

The administrative law judge may frame findings of fact in any of a number of acceptable ways, but, however they are arrived at, findings must be sufficiently comprehensive and pertinent to form a basis for decision when measured against the evidence.

Dean Trucking Co., Inc., 1 IBSMA 105 (Mar. 23, 1979)
86 I.D. 201

Except in cases governed by 43 CFR 4.1187(e) or 4.1266(b)(7)(ii), a written decision or a written order confirming a ruling from the bench constitutes the initial decision. The written decision or order incorporating the ruling from the bench must comply with 43 CFR 4.1127. The only exception to this rule is when the administrative law judge both specifically states that a ruling from the bench constitutes his initial decision and fully complies with the requirements of 43 CFR 4.1127 in that oral ruling.

Delight Coal Corp., 1 IBSMA 186 (June 5, 1979)
86 I.D. 321

In review proceedings of cessation orders issued pursuant to sec. 521(a)(2) of the Surface Mining Control and Reclamation Act of 1977, there must be a determination whether the condition, practice, or violation which is the basis for the order is one which creates an imminent danger to the health or safety of the public, or

is causing, or can reasonably be expected to cause significant, imminent environmental harm to land, air, or water resources.

Claypool Construction Co., Inc., 1 IBSMA 259 (Sept. 26, 1979)
86 I.D. 486

APPEALS

Effect of

Although, when a matter is appealed to the Board, OSM cannot take further action in the matter except to advise the Board whether the requested relief should or should not be granted, OSM can at any time move the Board to take what OSM feels is appropriate action.

White Winter Coals, Inc., 1 IBSMA 305 (Dec. 4, 1979)
86 I.D. 675

APPLICABILITY

Generally

Where excavation work has taken place and coal exposed, but no coal removed, and the landowner's intent is to create homesites and not to remove coal unless permission to do so is received from the State, the Office of Surface Mining Reclamation and Enforcement lacks jurisdiction over the land.

Squire Baker, 1 IBSMA 279 (Oct. 25, 1979)
86 I.D. 550

Enforcement Provisions

The enforcement provisions of the Act and the initial Federal regulatory program are not avoided by the failure of a person to obtain a State permit before conducting surface coal mining and reclamation operations regulated by a State.

Claypool Construction Co., Inc., 1 IBSMA 259 (Sept. 26, 1979)
86 I.D. 486

Postmining Land Use

Excavation for the purpose of obtaining coal is an activity which may be subject to regulation under the Act, even though that activity may be incidental to a postmining land use plan.

Claypool Construction Co., Inc., 1 IBSMA 259 (Sept. 26, 1979)
86 I.D. 486

ATTORNEYS' FEES

Bad Faith

An award of costs and expenses including attorneys' fees may be awarded to a permittee from OSM only if the permittee establishes that OSM took enforcement action in bad faith and for the purpose of harassing or embarrassing the permittee.

Dennis R. Patrick, 1 IBSMA 248 (Sept. 18, 1979)
86 I.D. 450

SURFACE MINING CONTROL AND RECLAMATION ACT OF 1977 --Continued

BACKFILLING AND GRADING REQUIREMENTS

Previously-mined Lands

The backfilling and grading requirements of 30 CFR 715.14 apply only to lands which are used, disturbed, or redisturbed in connection with or to facilitate mining or to comply with the requirements of the Act or Federal interim regulations, and do not apply to previously mined lands on which no adverse physical impact results from surface coal mining and reclamation operations conducted after the effective date of the Federal initial performance requirements.

Cedar Coal Co., 1 IBSMA 145 (Apr. 20, 1979) 86 I.D. 250

CESSATION ORDERS

A cessation order is not properly issued under sec. 521(a)(2) of the Act when there is no suggestion in the record that the cited violation was creating an imminent danger to public health or safety or was causing or could reasonably be expected to cause significant, imminent environmental harm.

White Winter Coals, Inc., 1 IBSMA 305 (Dec. 4, 1979) 86 I.D. 675

CIVIL PENALTIES

Generally

During the initial regulatory program a person may be assessed a civil penalty under 30 CFR 723.1 for violations of a permit condition, a regulation, or a provision of Title V of the Act even though he does not hold a permit from the State regulatory authority.

Delight Coal Corp., 1 IBSMA 186 (June 5, 1979) 86 I.D. 321

Hearings Procedure

The filing of an application for review of a notice of violation does not suspend the running of the period within which a petition for review of a proposed assessment of a civil penalty must be filed.

C & K Coal Co., 1 IBSMA 118 (Mar. 30, 1979) 86 I.D. 221

ENVIRONMENTAL HARM

In review proceedings of cessation orders issued pursuant to sec. 521(a)(2) of the Surface Mining Control and Reclamation Act of 1977, there must be a determination whether the condition, practice, or violation which is the basis for the order is one which creates an imminent danger to the health or safety of the public, or is causing, or can reasonably be expected to cause significant, imminent environmental harm to land, air, or water resources.

Claypool Construction Co., Inc., 1 IBSMA 259 (Sept. 26, 1979) 86 I.D. 486

A cessation order is not properly issued under sec. 521(a)(2) of the Act when there is no suggestion in the record that the cited violation was creating an imminent danger to public health or safety or was causing

SURFACE MINING CONTROL AND RECLAMATION ACT OF 1977 --Continued

ENVIRONMENTAL HARM--Continued

or could reasonably be expected to cause significant, imminent environmental harm.

White Winter Coals, Inc., 1 IBSMA 305 (Dec. 4, 1979) 86 I.D. 675

EVIDENCE

Where the evidence presented by OSM in support of a cited violation of the initial regulatory program performance standards is that the inspector relied on representations made to him in writing the violation, such evidence must be sufficient to withstand challenges to the substance of the representations made and to the authority to bind the permittee of the individual making the representations.

Island Creek Coal Co., 1 IBSMA 316 (Dec. 21, 1979) 86 I.D. 724

HEARINGS

Any objection to the location of a minesite review hearing must be made before or at the time of the minesite hearing.

White Winter Coals, Inc., 1 IBSMA 305 (Dec. 4, 1979) 86 I.D. 675

INITIAL REGULATORY PROGRAM

Generally

The Secretary of the Interior has interpreted the Surface Mining Control and Reclamation Act of 1977 through his duly promulgated interim program regulations to exclude sec. 521(a)(1) of the Act from having effect during the interim regulatory program.

Dayton Mining Co., Inc., and Plateau, Inc., 1 IBSMA 125 (Apr. 17, 1979) 86 I.D. 241

The definition of "permittee" adopted by the Secretary for the initial regulatory program in 30 CFR 700.5 includes those persons who, through ignorance or dishonesty, fail to obtain a permit before engaging in activities regulated by a State.

Delight Coal Corp., 1 IBSMA 186 (June 5, 1979) 86 I.D. 321

When an interim regulatory provision is ambiguous when applied to a particular operation, and its intended meaning is not clarified by reference to the interim regulatory provisions as a whole and other pertinent interpretive materials, that provision may be construed in favor of the entity seeking relief from its application.

Western Engineering, Inc., 1 IBSMA 202 (June 22, 1979) 86 I.D. 336

"Permittee." The definition of "permittee" adopted by the Secretary for the initial regulatory program in 30 CFR 700.5 includes those persons who fail to obtain

SURFACE MINING CONTROL AND RECLAMATION ACT OF 1977
--Continued

INITIAL REGULATORY PROGRAM--Continued

Generally--Continued

a State permit before conducting surface coal mining and reclamation operations regulated by a State.

Claypool Construction Co., Inc., 1 IBSMA 259 (Sept. 26, 1979) 86 I.D. 486

Performance Requirements

Applicability

The extraction of coal as an incidental part of privately financed construction is not an activity excluded, as such, from coverage by the performance requirements of the initial regulatory program.

James Moore, 1 IBSMA 216 (July 20, 1979) 86 I.D. 369

State Regulation

Compliance with State mining permit conditions does not excuse noncompliance with the initial Federal performance requirements.

Cedar Coal Co., 1 IBSMA 145 (Apr. 20, 1979) 86 I.D. 250

Regardless of whether a permittee has a mining and reclamation plan approved by the State regulatory authority before the interim regulations became effective, that plan must meet the requirements of the regulations.

Alabama By-Products Corp., 1 IBSMA 239 (Sept. 14, 1979) 86 I.D. 446

State Regulation

The initial Federal regulatory program is not applicable to a surface coal mining operation which is located on State land and which is not subject to State regulation within the scope of any of the initial performance standards.

Dennis R. Patrick, 1 IBSMA 158 (Apr. 24, 1979) 86 I.D. 266

INSPECTIONS

In the absence of extraordinary circumstances, the Board is unwilling to consider an entry made without prior presentation of credentials by an inspector to be in compliance with the requirements of 30 CFR 721.12(a).

Consolidation Coal Co., 1 IBSMA 273 (Sept. 28, 1979) 86 I.D. 523

PUBLIC HEALTH AND SAFETY

A cessation order is not properly issued under sec. 521(a)(2) of the Act when there is no suggestion in the record that the cited violation was creating an imminent danger to public health or safety or was causing or could reasonably be expected to cause significant, imminent environmental harm.

White Winter Coals, Inc., 1 IBSMA 305 (Dec. 4, 1979) 86 I.D. 675

SURFACE MINING CONTROL AND RECLAMATION ACT OF 1977
--Continued

ROADS

Maintenance

Haul roads shall be maintained, in accordance with 30 CFR 717.17(j), by means that will prevent additional contributions of suspended solids to streamflow, or to runoff outside the permit area, to the extent possible using the best technology currently available.

In determining whether there is a violation of the haul road maintenance requirements of 30 CFR 717.17(j)(3)(i), the relevant inquiry is not whether the road's condition constituted failure to maintain it in view of its use, but whether its condition demonstrated a failure to maintain it in a manner that would prevent adverse impacts on the hydrologic balance in general and additional contributions of suspended solids to streamflow or to runoff outside the permit area in particular.

Island Creek Coal Co., 1 IBSMA 285 (Nov. 9, 1979) 86 I.D. 623

SIGNS AND MARKERS

While the initial Federal regulatory program requires that the perimeter of the permit area be clearly marked, there is no definition of permit area applicable during such program; therefore, an interpretation of 30 CFR 715.12(c) that is consonant with the spirit and purposes of the Act will be upheld.

Signs and markers, whenever required, must be durable and easily recognized.

Burgess Mining and Construction Corp., 1 IBSMA 293 (Nov. 30, 1979) 86 I.D. 656

SPOIL AND MINE WASTES

Valley and Head-of-Hollow Fills

The fact that an operator may have begun constructing a fill which obstructed, interrupted, or encroached upon a natural drainage channel or natural stream channel prior to May 3, 1978, may not excuse the operator from complying with Federal requirements for a valley fill when he subsequently continues construction of the valley fill.

Dean Trucking Co., Inc., 1 IBSMA 229 (Sept. 11, 1979) 86 I.D. 437

STATE REGULATION

Regardless of whether a permittee has a mining and reclamation plan approved by the State regulatory authority before the interim regulations became effective, that plan must meet the requirements of the regulations.

In order for the regulatory authority's approval of a permittee's use of alternative materials in place of topsoil to be timely, it must be given before alternative material is substituted for topsoil.

Alabama By-Products Corp., 1 IBSMA 239 (Sept. 14, 1979) 86 I.D. 446

SURFACE OWNER CONSENT

The Secretary may, in computing the fair market value of coal to be leased competitively under privately owned surface, assume a limited surface owner consent cost, based on losses and costs to the surface estate and operation and similar evaluations, regardless of the actual price paid or the amount which a surface owner could otherwise demand for consent.

Assumption of a limited surface owner consent cost to be used in place of actual cost in the computation of fair market value of coal to be leased competitively is necessary to ensure receipt of fair market value by the public as required by 30 U.S.C. § 201(a) (1976).

In the exercise of his discretion to lease under the Mineral Leasing Act, the Secretary has authority to decline to issue a coal lease where surface owner consent costs prevent the public from realizing a fair return on the value of the coal.

Coal Leasing Program -- Relationship of the Cost of Surface Owner Consent to Receipt of Fair Market Value for Federally Owned Coal, M-36909 (Jan. 15, 1979)
86 I.D. 28

TOPSOIL

Generally

A showing of contamination is not a necessary requirement in establishing a topsoil removal violation pursuant to 30 CFR 715.16. Protection of topsoil from contamination is merely a reason for the removal requirement, not a requirement itself.

Island Creek Coal Co., 1 IBSMA 316 (Dec. 21, 1979)
86 I.D. 724

Alternative Materials

Even when the regulatory authority has approved the use of alternative materials in place of topsoil, the alternative materials must be handled in accordance with 30 CFR 715.16(a)(4)(iii).

In order for the regulatory authority's approval of a permittee's use of alternative materials in place of topsoil to be timely, it must be given before alternative material is substituted for topsoil.

Alabama By-Products Corp., 1 IBSMA 239 (Sept. 14, 1979)
86 I.D. 446

An operator must obtain approval from a State regulatory authority before using alternative materials instead of removing, segregating, and redistributing topsoil.

Carbon Fuel Co., 1 IBSMA 253 (Sept. 25, 1979)
86 I.D. 483

Handling

Absent express approval of an alternative plan by a regulatory authority in the manner provided by law, 30 CFR 715.16 requires no less than all the available topsoil to be salvaged.

Burgess Mining and Construction Corp., 1 IBSMA 293 (Nov. 30, 1979)
86 I.D. 656

VARIANCES

Any exemption from the requirements of 30 CFR 715.17(a), concerning sedimentation ponds, must be sought from the appropriate regulatory authority.

White Winter Coals, Inc., 1 IBSMA 305 (Dec. 4, 1979)
86 I.D. 675

WATER QUALITY STANDARDS AND EFFLUENT LIMITATIONS

Discharges from Disturbed Areas

Discharges from any portion of a permitted area that is disturbed in the course of the permittee's mining operations must comply with the effluent limitations contained in 30 CFR 715.17(a) of the Department's initial regulatory program.

Thunderbird Coal Corp. v. Office of Surface Mining Reclamation and Enforcement, 1 IBSMA 85 (Jan. 16, 1979)
86 I.D. 38

Disturbed Areas

Sedimentation Ponds

A sedimentation pond is a "disturbed area," as that term is defined for the purpose of 30 CFR 715.17(a) of the Department's initial regulatory program, when any portion of the permitted area which drains into the sedimentation pond has been disturbed by the permittee other than by the construction of other sedimentation ponds, roads or diversion ditches.

Thunderbird Coal Corp. v. Office of Surface Mining Reclamation and Enforcement, 1 IBSMA 85 (Jan. 16, 1979)
86 I.D. 38

Sedimentation Ponds

Any exemption from the requirements of 30 CFR 715.17(a), concerning sedimentation ponds, must be sought from the appropriate regulatory authority.

White Winter Coals, Inc., 1 IBSMA 305 (Dec. 4, 1979)
86 I.D. 675

WORDS AND PHRASES

"Permittee." The definition of "permittee" adopted by the Secretary for the initial regulatory program in 30 CFR 700.5 includes those persons who fail to obtain a State permit before conducting surface coal mining and reclamation operations regulated by a State.

Classical Construction Co., Inc., 1 IBSMA 255 (Sept. 26, 1979)
86 I.D. 486

"Topsoil." For purposes of the topsoil removal requirements of 30 CFR 715.16(a), topsoil is either all the A horizon or the A horizon plus unconsolidated material to a depth of 6 inches or all unconsolidated material where less than 6 inches of material exists.

Carbon Fuel Co., 1 IBSMA 253 (Sept. 25, 1979)
86 I.D. 483

SURFACE RESOURCES ACT

GENERALLY

The Surface Resources Act of July 23, 1955, declared that common varieties of sand and gravel are not valuable mineral deposits under the mining laws. In order for a claim for such material to be sustained as validated by a discovery, the prudent man/marketability test of discovery of a valuable mineral deposit must have been met at the date of the Act, and reasonably continuously thereafter.

United States v. Clarion W. Taylor, Sr., and Gerald O'Connor, 19 IBLA 9 (Feb. 20, 1975) 82 I.D. 68

In a proceeding under sec. 5 of the Surface Resources Act of July 23, 1955, to determine the rights of the Government and a mining claimant as to the use and management of the surface and its resources on certain mining claims, it is incumbent upon the holder of a claim to demonstrate a discovery of a valuable mineral deposit within the claim as of the time of the Act, and also at the time of the hearing.

Under sec. 5 of the Surface Resources Act of July 23, 1955, the effect of a decision that no mineral discovery has been shown is to permit the Government to manage and dispose of the vegetative and other surface resources without disturbing claimant's right to develop his mining claims by using the subsurface and surface to the extent necessary to conduct his mining operations.

United States v. A. O. Bartell, 31 IBLA 47 (June 23, 1977)

The declaration in the Surface Resources Act, 30 U.S.C. § 611 (1970), that no deposit of common varieties of gravel shall be deemed a valuable mineral deposit within the meaning of the mining laws, was not intended to operate as a conveyance, to holders of patents, of any minerals reserved under the Stock-Raising Homestead Act, 43 U.S.C. § 299 (1970).

Western Nuclear, Inc., 35 IBLA 146 (May 22, 1978)
85 I.D. 129

In a competitive materials sale, submission of the required 10 percent deposit in cash with the sealed bid is permissible under the regulations and not a ground for rejection of the highest bid. Therefore, a protest against acceptance of the bid for that reason is properly denied.

Roy Blake, 38 IBLA 151 (Dec. 5, 1978)

APPLICABILITY

"Public lands." Under 43 CFR 9239.0-7 which defines a trespass, the term "public lands" includes mineral deposits reserved under the Stock-Raising Homestead Act, 43 U.S.C. § 299 (1970).

Western Nuclear, Inc., 35 IBLA 146 (May 22, 1978)
85 I.D. 129

HEARINGS

When the Bureau of Land Management has appraised the damages for a mineral trespass under 43 CFR Part 9230, a hearing will not be ordered and an appraisal will not be disturbed in the absence of an offer of specific substantial evidence that the determination is incorrect.

Western Nuclear, Inc., 35 IBLA 146 (May 22, 1978)
85 I.D. 129

VERIFIED STATEMENT

A verified statement required under sec. 5 of the Surface Resources Act of July 23, 1955, 30 U.S.C. § 613 (1970), is properly rejected when the mining claim in connection with which it is filed, is declared to be null and void ab initio because it was located on land withdrawn from mineral location for power purposes prior to the Mining Claims Rights Restoration Act of Aug. 11, 1955, 30 U.S.C. § 621 *et seq.* (1970), and the land was segregated for purposes other than power development at that time and continuously thereafter.

Roy B. Cummins, 26 IBLA 223 (Aug. 17, 1976)

SURPLUS PROPERTY

(*See also* Federal Property and Administrative Services Act--if included in this Index.)

Where oil and gas deposits in lands acquired by the United States and devoted to use for military purposes become "surplus property" under the Federal Property and Administrative Services Act, such deposits may be leased only under the provisions of that Act, and are not subject to leasing under the Mineral Leasing Act for Acquired Lands.

Paradox Oil and Gas Co., 22 IBLA 287 (Oct. 22, 1975)

Lands acquired for military purposes and subsequently disposed of as surplus property under the Federal Property and Administrative Services Act with a reservation of mineral rights to the United States are not subject to leasing under the Mineral Leasing Act for Acquired Lands. Oil and gas leases on such land may issue only under the provisions of the Federal Property and Administrative Services Act, which requires competitive bidding.

Capitol Oil Corp., 33 IBLA 392 (Jan. 26, 1978)

SURVEYS OF PUBLIC LANDS

GENERALLY

The Secretary of the Interior is authorized, and is under a duty, to consider and determine what lands are public lands, what public lands have been or should be surveyed, and what public lands require extension or correction of past surveys.

Where one who protests the performance and acceptance of a survey of land, identified by the cadastral engineer making the survey as public domain land, offers probative evidence that changes arose because of avulsion rather than accretion and so the land is not in fact Federally owned, a hearing will be ordered to receive and consider such evidence and to ascertain the facts.

Joe S. Dent and Dolores L. Dent, 18 IBLA 375 (Jan. 30, 1975)

SURVEYS OF PUBLIC LANDS--Continued

GENERALLY--Continued

Where statute and regulation provide that lands selected by the State of Alaska must be surveyed before patent can issue, but no similar requirement has been imposed as a precondition to the conveyance of lands selected pursuant to the Alaska Native Claims Settlement Act, the State's contention that this disparity is discriminatory will not afford a basis for reversing a decision which rejected a State selection application in favor of a conflicting Native village selection.

State of Alaska, 19 IBLA 178 (Mar. 18, 1975)

Although the Secretary of the Interior may survey any public lands which have been erroneously omitted from a survey, a plat of survey, once accepted, is presumed to be correct and will not be disturbed except upon clear proof of fraud or gross error; in the absence of such proof an application for survey of omitted land is properly rejected.

George C. Matthews, 19 IBLA 215 (Mar. 28, 1975)

The Secretary of the Interior is authorized, and is under a duty, to consider and determine what lands are public lands, what public lands have been or should be surveyed, and what public lands have been or remain to be disposed of by the United States, and he has the authority to extend or correct the surveys of public lands as may be necessary, including the surveying of lands omitted from earlier surveys.

A patent of land from the United States conveys only land which is surveyed, and when the surveyors have carried a survey only to a certain line, a grantee may not successfully challenge the correctness of their action or claim land beyond that line under a patent issued in accordance with that survey.

Generally, the meander line is not to be treated as a boundary and when the United States conveys a tract of land by patent referring to an official plat which shows the tract to be bordering on a navigable body of water, the patent conveys all the land to the water line. However, there are three situations in which meander lines will serve as the boundary of a conveyance or grant, rather than a water body: namely, where there is (1) fraud or (2) gross error shown in the survey, or (3) where the facts and circumstances disclose an intention to limit a grant or conveyance to the actual traverse lines.

The Bureau of Land Management acted appropriately in surveying an omitted area of 18.17 acres of land as compared to the original area of surveyed land of 17.52 acres where it found that area of omitted land to be too large to be regarded as merely a technical difference from the original survey. Such a discrepancy is unquestionably a large enough omission to be classified as either gross error or fraud in the original survey.

A survey of a previously unsurveyed portion of an island, proved to have been in existence in 1876 when an original survey was conducted in the area, is proper and shall be officially filed where the record shows that the plat of survey reflects the true location of the island on the surface of the earth and was conducted in accordance with both the Manual of Survey Instructions and the special instructions for this conditional survey.

Chester H. Ferguson et al., 20 IBLA 228 (May 13, 1975)

SURVEYS OF PUBLIC LANDS--Continued

GENERALLY--Continued

A protestant against the filing of a survey plat bears the burden of proof, *i.e.*, the risk of nonpersuasion, to show why the plat should not be accepted, and the applicant State has the burden of demonstrating that land is swamp and overflowed in character. The protestant against the filing of a survey plat who claims that title to the land passed to the State under the Swamp Lands Act, 43 U.S.C. §§ 981-986 (1970), is properly assessed with the burden of proof, *i.e.*, the risk of nonpersuasion, in the proceeding.

The survey of an offshore island without the use of 18.6-year mean high tide data, which governs boundary disputes between private upland and tideland owners, is proper; the 18.6-year lunar cycle tide data does not govern meander lines established in public land surveys.

Meander of an offshore island is ordinarily based on a mean high tide determined by the vegetative line upon the soil in accordance with the Bureau of Land Management's *Manual of Surveying Instructions*.

The meandering of the public land of an offshore island is properly based on a mean high tide line established at the vegetative line upon the soil, in accordance with the provisions of the Bureau of Land Management's *Manual of Surveying Instructions*, and a protest against the filing of a plat of survey based on such a mean high tide line is properly rejected.

Demonstration that the field notes accompanying the plat of survey inaccurately or incompletely recite the history of the lands surveyed does not require rejection of the survey or field notes, when it is not disputed that the field notes accurately describe the evidence of the history of settlement and use visible during examination and survey, and when it is concluded that the survey itself was properly executed.

Virgil Lopez et al., 21 IBLA 33 (June 17, 1975)

There can be no "valid existing right" in a claimant of a headquarters site on land withdrawn by Public Land Order No. 4582 unless a notice of location or application to purchase had been filed in accordance with the Act of Apr. 29, 1950. The filing of an application for a survey of omitted land did not by itself create any preference rights to the land.

Notices of location for headquarters sites must be accepted for filing by the authorized Bureau of Land Management office if the land has been subject to location during the preceding 90 days. The fact that land had been omitted from the original survey is not a valid reason for the Bureau of Land Management to refuse to record a properly filed notice of location for a headquarters site.

Ray W. Ferguson, 22 IBLA 160 (Sept. 30, 1975)

The amount of acreage contained in an oil and gas lease may be reduced where, upon resurvey of the land, it is determined that the area under lease is actually smaller than the area shown by the original survey.

Grace M. Brown et al., 24 IBLA 301 (Apr. 1, 1976)

The Secretary of the Interior is authorized, and is under a duty, to consider and determine what lands are public lands, what public lands have been or should be surveyed, and what public lands have been or remain to be disposed of by the United States, and he has the

SURVEYS OF PUBLIC LANDS--Continued

GENERALLY--Continued

authority to extend or correct the surveys of public lands as may be necessary, including the surveying of lands omitted from earlier surveys.

Title to an island omitted from the original survey but existing at that time in a nonnavigable river remains in the United States and is subject to survey despite the disappearance of the channel separating the island from the lots which were formerly riparian.

R. A. Mikelson, 26 IBLA 1 (July 6, 1976)

Where the Bureau of Land Management orders a resurvey of a section to identify the boundaries of public land within the section, a private landowner may protest the resurvey and, where the protesting landowner points up a serious contradiction between the resurvey and the topographic calls accompanying the original plat, it is proper to remand the case for a fact hearing.

Domenico A. Tussio et al., 30 IBLA 92 (Apr. 29, 1977)

In determining what land is conveyed under patents or grants of public land bordering a meandered watercourse, the general rule is that the waterline itself, not the meander line, constitutes the boundary. There is an exception where the meander line may constitute the boundary between lands omitted from the survey and the watercourse if fraud or gross error is shown in the survey. This exception is only applicable to limit the boundary of the surveyed lots on the side of the watercourse where the omitted land is shown. It does not apply to a lot on the opposite side of the watercourse from the omitted land so as to pass title to the omitted land with title to the lot on the opposite side. The waterline would remain the actual boundary of that lot.

Mable M. Farlow, 30 IBLA 320 (June 7, 1977) 84 I.D. 276

It is within the power of the Bureau of Land Management, as delegated by the Secretary of the Interior, to retrace any survey it has made whenever it becomes necessary to the determination of a question pending before it for decision involving rights to the public land.

Stanley A. Phillips et al., 31 IBLA 342 (July 22, 1977)

Where there is no ambiguity or confusion in the description of lands in an oil and gas lease offer because it includes a complete description of land in a section in a particular township by legal subdivisions embracing unnumbered survey lots or fractional subdivisions, as well as a description of unnumbered lots in accord with current survey numbering practice, the lot designation may be disregarded, and the regulatory requirement that lands in an oil and gas lease offer which have been surveyed under the public land rectangular system must be described by legal subdivision, section, township, and range, is satisfied, even though the official plat of survey does not designate or number the fractional subdivisions as lots.

David H. Yates, 33 IBLA 175 (Dec. 20, 1977)

SURVEYS OF PUBLIC LANDS--Continued

GENERALLY--Continued

Where both an original survey prior to the issuance of a patent and a dependent resurvey after issuance indicate that a homestead patent has issued on land within a national forest, the patent is invalid notwithstanding that the Federal Government may not by means of a second survey affect property rights acquired under an official survey.

Roland and Marie Oswald, 35 IBLA 79 (May 12, 1978)

A dependent resurvey by BLM which does not follow the Manual of Surveying Instructions (1973) constitutes gross error and must be canceled. Such gross error includes conducting a dependent resurvey in which data in the official plat of survey of the township and its field notes are ignored and changing corners established by the original survey to the prejudice of bona fide property rights acquired in good faith in reliance on the integrity of the original survey.

Domenico A. Tussio et al., 37 IBLA 132 (Oct. 4, 1978)

The dependent resurvey is designed to restore the original conditions of the official survey according to the record. It is based, first, upon identified corners and other acceptable points of control, and second, upon the restoration of lost corners by proportionate measurement in harmony with the record of the original survey. Corners established by the original survey should be located, if possible, by considering all the relevant evidence and not simply one or two factors.

Ethel C. Vernon, 37 IBLA 226 (Oct. 16, 1978)

The primary rule which the courts apply in construing and interpreting a conveyance where the location of the boundary lines is uncertain by reason of inconsistent or conflicting descriptive calls in the conveyance is that the intention of the parties controls and is to be followed. Where the calls for the location of boundaries to land are inconsistent, calls to monuments, natural or artificial, are of paramount importance and will prevail over all other calls inconsistent therewith. Calls to boundaries are of secondary importance, and courses and distances must be altered if, as given, they will not reach the designated boundary. Calls of course take precedence over distances, so that where it is necessary to either change direction to reach a boundary or else reduce or extend the prescribed distance, the distance must yield to the course. The recital of quantity or area of land conveyed or retained will be least influential.

United States v. Leroy S. Johnson et al., 39 IBLA 337 (Feb. 28, 1979)

An error in omitting to survey an island in a navigable stream does not divest the United States of title or interpose any obstacle to surveying it at a later time. An island within the public domain in a navigable stream and actually in existence both at the time of the survey of the banks of the stream and also upon the admission to the Union of the State within which it is situated remains the property of the United States. Even though omitted from survey, such land does not become part of the fractional subdivisions on the opposite banks of the stream.

Joseph Tomalino, August Sobotka, 42 IBLA 117 (Aug. 16, 1979)

SURVEYS OF PUBLIC LANDS--Continued

AUTHORITY TO MAKE

The Secretary of the Interior is authorized, and is under a duty, to consider and determine what lands are public lands, what public lands have been or should be surveyed, and what public lands require extension or correction of past surveys.

Joe S. Dent and Delores L. Dent, 18 IBLA 375 (Jan. 30, 1975)

The Secretary of the Interior is authorized, and is under a duty, to consider and determine what lands are public lands, what public lands have been or should be surveyed, and what public lands have been or remain to be disposed of by the United States, and he has the authority to extend or correct the surveys of public lands as may be necessary, including the surveying of lands omitted from earlier surveys.

Chester H. Ferguson et al., 20 IBLA 224 (May 13, 1975)

R. A. Mikelson, 26 IBLA 1 (July 6, 1976)

The Secretary of the Interior is authorized and under a duty to determine what lands are public lands and to survey such lands. Neither the Acts admitting Florida into the Union, nor the Reconstruction Act of Mar. 2, 1867, divested the Secretary of the Interior of that authority regarding islands in the State of Florida, nor divested the United States of title to any public lands in the State.

Virgil Lopez et al., 21 IBLA 33 (June 17, 1975)

Where the Bureau of Land Management orders a resurvey of a section to identify the boundaries of public land within the section, a private landowner may protest the resurvey and, where the protesting landowner points up a serious contradiction between the resurvey and the topographic calls accompanying the original plat, it is proper to remand the case for a fact hearing.

Domenico A. Tussio et al., 30 IBLA 92 (Apr. 29, 1977)

The Secretary of the Interior may cause to be made such resurveys or retracements of the rectangular system of surveys of public lands as he may deem essential to mark the boundaries of the remaining public lands.

Frank Lujan, 30 IBLA 95 (Apr. 29, 1977)

It is within the power of the Bureau of Land Management, as delegated by the Secretary of the Interior, to retrace any survey it has made whenever it becomes necessary to the determination of a question pending before it for decision involving rights to the public land.

Stanley A. Phillips et al., 31 IBLA 342 (July 22, 1977)

DEPENDENT RESURVEYS

A class 1 color of title application for lands classified upon dependent resurvey as omitted swamp and overflowed lands must be rejected when the applicants' 20-year period of peaceful adverse possession under color of title had not been established at the date title vested in the State under the provisions of the Swamp Lands Act, 43 U.S.C. §§ 981-986 (1970).

An appeal from a decision rejecting a color of title application will stay the running of the 60-day period,

SURVEYS OF PUBLIC LANDS--Continued

DEPENDENT RESURVEYS--Continued

provided by the decision appealed from, for filing affidavits and evidence in support of arguments that the dependent resurvey of the land applied for erroneously classified the land as swamp and overflowed in character.

Paul E. and Ray L. Sievers, 22 IBLA 318 (Nov. 10, 1975)

Restoration of a lost corner by means of proportionate measurement in accordance with the record of the original survey is the proper procedure in a dependent resurvey where there is a lack of conclusive evidence as to the location of the original corner.

Surveys of the United States, after acceptance, are presumed to be correct and will not be disturbed except upon clear proof that they are fraudulent or grossly erroneous. An appellant challenging a Government resurvey has the burden of establishing by clear and convincing evidence that the resurvey is not an accurate retracement and reestablishment of the lines of the original survey.

Henry O. Woodruff, 24 IBLA 190 (Mar. 18, 1976)

Stanley A. Phillips et al., 31 IBLA 342 (July 22, 1977)

The Secretary of the Interior may cause to be made such resurveys or retracements of the rectangular system of surveys of public lands as he may deem essential to mark the boundaries of the remaining public lands.

The dependent resurvey is designed to accomplish a restoration of what purports to be the original conditions according to the record, based, first, upon identified existing corners of the original survey and other recognized and acceptable points of control, and, second, upon the restoration of missing corners by proportionate measurement in harmony with the record of the original survey. Where an appellant who protests a dependent resurvey presents evidence which questions whether, in fact, the Bureau of Land Management accurately located a quarter section corner and three certified surveyors agree with appellant, a hearing will be ordered for resolution of the factual issue of location of the quarter corner.

Surveys of the United States, after acceptance, are presumed to be correct and will not be disturbed except upon clear proof that they are fraudulent or grossly erroneous. An appellant challenging a Government resurvey has the burden of establishing by clear and convincing evidence that the resurvey is not an accurate retracement and reestablishment of the lines of the original survey.

Frank Lujan, 30 IBLA 95 (Apr. 29, 1977)

A dependent resurvey by BLM which does not follow the Manual of Surveying Instructions (1973) constitutes gross error and must be canceled. Such gross error includes conducting a dependent resurvey in which data in the official plat of survey of the township and its field notes are ignored and changing corners established by the original survey to the prejudice of bona fide property rights acquired in good faith in reliance on the integrity of the original survey.

Domenico A. Tussio et al., 37 IBLA 132 (Oct. 4, 1978)

SURVEYS OF PUBLIC LANDS--Continued

DEPENDENT RESURVEYS--Continued

The dependent resurvey is designed to restore the original conditions of the official survey according to the record. It is based, first, upon identified corners and other acceptable points of control, and second, upon the restoration of lost corners by proportionate measurement in harmony with the record of the original survey. Corners established by the original survey should be located, if possible, by considering all the relevant evidence and not simply one or two factors.

Where there exist factual questions about the location of section and subdivisional corners in a dependent resurvey, the Board of Land Appeals may order a hearing pursuant to 43 CFR 4.415 to resolve these questions.

In challenging the Government resurvey, appellant has the burden of establishing by clear and convincing evidence that the resurvey is not an accurate retracement and reestablishment of the lines of the original survey.

Bethel C. Vernon, 37 IBLA 226 (Oct. 16, 1978)

Where, at a hearing, a protestant does not meet his burden of establishing by clear and convincing evidence that a dependent resurvey is not an accurate retracement and reestablishment of the lines of the original survey, the decision dismissing his protest against the survey will be affirmed.

Frank Lujan, 40 IBLA 184 (Apr. 5, 1979)

SWAMPLANDS

A protestant against the filing of a survey plat bears the burden of proof, i.e., the risk of nonpersuasion, to show why the plat should not be accepted, and the applicant State has the burden of demonstrating that land is swamp and overflowed in character. The protestant against the filing of a survey plat who claims that title to the land passed to the State under the Swamp Lands Act, 43 U.S.C. §§ 981-986 (1970), is properly assessed with the burden of proof, i.e., the risk of nonpersuasion, in the proceeding.

In a hearing held to determine whether lands were swamp and overflowed at the time of the Swamp Lands Act, 43 U.S.C. §§ 981-986 (1970), the parties asserting the State's title fail to meet their burden of proof when the evidence submitted indicates that the mangrove area claimed as swampland is in fact below the line of mean high tide, and was properly delineated from the upland by the meander line.

The United States is not estopped to assert title to, survey, or deny the swamp and overflowed character of public lands constituting offshore islands in Florida either by Departmental inaction on the State's swampland application, or by inclusion of the islands in a swampland selection list, or by the survey protestants' adverse chain of title and claims of occupancy and use.

Demonstration that the field notes accompanying the plat of survey inaccurately or incompletely recite the history of the lands surveyed does not require rejection of the survey or field notes, when it is not disputed that the field notes accurately describe the evidence of the history of settlement and use visible during examination and survey, and when it is concluded that the survey itself was properly executed.

Virgil Lopez et al., 21 IBLA 33 (June 17, 1975)

SWAMPLANDS--Continued

A class 1 color of title application for lands classified upon dependent resurvey as omitted swamp and overflowed lands must be rejected when the applicants' 20-year period of peaceful adverse possession under color of title had not been established at the date title vested in the State under the provisions of the Swamp Lands Act, 43 U.S.C. §§ 981-986 (1970).

An appeal from a decision rejecting a color of title application will stay the running of the 60-day period, provided by the decision appealed from, for filing affidavits and evidence in support of arguments that the dependent resurvey of the land applied for erroneously classified the land as swamp and overflowed in character.

Paul H. and Fay L. Sleeper, 22 IBLA 318 (Nov. 10, 1975)

Land, which in its natural condition, quite apart from any overflow of water, is uncultivable, is not land of the character described in the grant of Swamplands to the respective States.

State of California, 29 IBLA 132 (Feb. 23, 1977)

Although a grant to a State pursuant to the Swamp Land Act of 1849 or 1850 is a grant in praesenti, in that the State is immediately vested with an inchoate equitable title, the legal title does not pass until the Secretary has determined that the land is swamp in character and otherwise available for disposition.

Where a State swampland selection has been rejected on the ground that the land selected has been disposed of, but in fact that land was available to the State, the judgment is valid and binding until set aside. Since the Secretary has jurisdiction to determine whether the land selected is available, he has jurisdiction to decide erroneously. The erroneous decision will not be set aside where the State did not appeal and the decision has remained unchallenged for over 100 years, the State itself sold the land to a color of title applicant's predecessor, and an adverse right has intervened.

A color of title claim stemming from a tax sale by a State in 1900 to a color of title applicant's predecessor in interest on which taxes have since been paid is an adverse claim sufficient to warrant the Department in not setting aside an 1853 decision erroneously rejecting a swampland selection or from not giving a new State selection priority over the color of title application.

John Stuart Hunt, Sherman M. Hunt, 31 IBLA 304 (July 22, 1977) 84 I.D. 421

Where a State selects land as swamp and overflowed within the meaning of the Swamplands Acts and relies on field notes which predate the Acts to establish the character of the land, those field notes must show conclusively that the land is swamp and overflowed. In analyzing such pre-Act field notes, the Department will examine all descriptive references contained in the notes, including types of terrain and vegetation and their relative location.

It is generally stated that grants of swamp and overflowed lands under the 1849 and 1850 Swampland Acts were in praesenti and gave the States inchoate title to such lands that was perfected, as of the dates of the Acts, when the lands were identified and legal title passed to the State under the procedure established by the Acts.

SWAMPLANDS--Continued

In order for a State to receive legal title to a swampland selection, the Secretary of the Interior or his delegate must determine that the land is swamp in character and available for disposition under the grant. An erroneous decision that selected land is unavailable because it was sold prior to the selection is valid and binding until set aside. The erroneous decision will not be set aside where the State did not appeal and the decision has remained unchallenged for over 100 years, the State itself sold the land at a tax sale to the predecessor in interest of a color of title applicant, and an adverse right, *i.e.*, a class 2 color of title application, has intervened.

White Castle Lumber and Shingle Co., Ltd., 32 IBLA 129 (Sept. 12, 1977)

TAYLOR GRAZING ACT

GENERALLY

An application to make a stock-raising homestead entry is properly rejected because the homesteading provisions of the Stock-Raising Homestead Act were impliedly repealed by the Taylor Grazing Act of June 28, 1934.

Leo, 24 IBLA 308 (Apr. 14, 1976)

Under the terms and conditions in 43 CFR 4125.1-1(i) placed by the Department on the continued effectiveness of grazing leases, as allowed by sec. 15 of the Taylor Grazing Act, a grazing lease may be canceled in its entirety in order to use the land included in it as a wildlife habitat.

Bill W. Fraser, 30 IBLA 277 (June 1, 1977)

An application filed in 1976 to make a stock-raising homestead entry is properly rejected because the homesteading provisions of the Stock-raising Homestead Act were impliedly repealed by the Taylor Grazing Act and were expressly repealed by the Federal Land Policy and Management Act.

Daniel A. Anderson, 31 IBLA 162 (July 1, 1977)

A district manager's decision reached in the exercise of administrative discretion pursuant to the Taylor Grazing Act of 1934 may be regarded as arbitrary or capricious only where it is not supportable on any rational basis and the burden is on the appellant to show by substantial evidence that the decision is improper. A district manager's decision not to reissue a grazing lease for a certain area until that area is fenced and to reduce appellant's AUM's accordingly rests on a rational basis where the facts show that this unfenced area adjoins the bombing range and grazing thereon could result in trespass on the bombing range, inconsistent with the use of the range.

Colvin Cattle Co., Inc., 39 IBLA 176 (Jan. 30, 1979)

The Taylor Grazing Act created no reserved water rights.

The management programs mandated by Congress in such Acts as the Taylor Grazing Act and FLPMA require the appropriation of water by the United States in order to assure the success of the programs and carry out the objectives established by Congress.

TAYLOR GRAZING ACT--Continued

GENERALLY--Continued

FLPMA, the Taylor Grazing Act, the CEC Act, and other statutes permit the United States to appropriate water for the diverse purposes found in the various statutes.

Federal Water Rights of the National Park Service, Fish and Wildlife Service, Bureau of Reclamation and the Bureau of Land Management, M-36914 (June 25, 1979)
86 I.D. 553

TIDELANDS

The survey of an offshore island without the use of 18.6-year mean high tide data, which governs boundary disputes between private upland and tideland owners, is proper; the 18.6-year lunar cycle tide data does not govern meander lines established in public land surveys.

Meander of an offshore island is ordinarily based on a mean high tide determined by the vegetative line upon the soil in accordance with the Bureau of Land Management's *Manual of Surveying Instructions*.

In a hearing held to determine whether lands were swamp and overflowed at the time of the Swamp Lands Act, 43 U.S.C. §§ 981-986 (1970), the parties asserting the State's title fail to meet their burden of proof when the evidence submitted indicates that the mangrove area claimed as swampland is in fact below the line of mean high tide, and was properly delineated from the upland by the meander line.

The meandering of the public land of an offshore island is properly based on a mean high tide line established at the vegetative line upon the soil, in accordance with the provisions of the Bureau of Land Management's *Manual of Surveying Instructions*, and a protest against the filing of a plat of survey based on such a mean high tide line is properly rejected.

Virgil Lopez et al., 21 IBLA 33 (June 17, 1975)

Where a notice of location is filed for a trade and manufacturing site and such notice is declared unacceptable for recordation because the lands containing the business improvements are tidelands owned by the State of Alaska, the decision must be set aside and the case remanded when the record does not show that there ever was a survey conducted of such lands to determine whether they are, in fact, tidelands owned by the State.

Submerged and filled tidelands passed to the State of Alaska on the date of its admission to the Union, Jan. 3, 1959. Ownership of tidelands subsequently created by avulsive action remains in those persons or entities, including the Federal Government, who held title to the land prior to the avulsive action.

Sandra L. Lough, Damon M. Blackburn, 25 IBLA 96 (June 3, 1976)

The Mineral Leasing Act for Acquired Lands does not exclude from oil and gas leasing those lands underlying the Missouri River within the boundaries of the Fort Berthold Indian Reservation as established by the Treaty of Fort Laramie (1851) and the Executive Order of Apr. 12, 1870, which were reacquired by the United States from the Indian tribes. The exclusion in the Act for submerged lands refers to submerged *coastal* lands, as set forth in 43 CFR 3101.2-1(g).

Intel Energy Corp., 42 IBLA 105 (Aug. 16, 1979)

TIMBER SALES AND DISPOSALS

A request for extension of a timber sale contract is properly denied where the purchaser has not shown that its delay in cutting and removal was due to causes beyond its control. A business depression is no excuse within the "beyond control" exceptions contained in the exculpatory clause of a contract.

Yuba River Lumber Co., Inc., 19 IBLA 65 (Feb. 25, 1975)

Where a contract for the sale of vegetative resources (pine nuts) contains a disclaimer of warranty by the vendor (Government) as to the quantity of resources sold, the parties are deemed to have contracted on the assumption that there was doubt as to the quantity, and the risk with respect to such factor must be considered to have been assumed by the purchaser as one of the elements of the bargain. Thus, the fact that the quantity of the resource available for harvesting turned out to be less than was expected at the time of contracting is not a basis for a claim to a refund.

Where appellant alleges a loss of vegetative resources (pine nuts) which he purchased occurring subsequent to the time of contracting and prior to severance, due to severe and unusual damage by birds, and the contract of sale provides that the risk of loss shall remain in the Government and not pass to purchaser until such vegetative resources have been severed or extracted, appellant's claim for a refund is governed by the risk of loss provision rather than a disclaimer of warranty as to quantity contained in a separate part of the contract.

Alma LeBaron, Jr., 25 IBLA 164 (June 14, 1976)

Where a purchaser in a timber sale contract alleges that there is a discrepancy between the volume of timber estimated by the Bureau of Land Management and the volume removed by the purchaser, the shortage may be explained by the fact that BLM's cruising and scaling standards are substantially different from those used by the Columbia River Log Scaling and Grading Bureau which estimated the volume recovered by the purchaser.

A timber sale is a lump-sum sale where the purchase price is not contingent on the volume of timber to be recovered. Where the timber sale contract specifically disclaims warranties of quantity and quality, the purchaser may not recover for an alleged shortage in the volume on the theory that the Government was negligent in estimating the volume of timber, or that there was a mutual mistake in fact in regard to the volume, or that such disclaimers are unconscionable.

La Bo Lumber Co., Inc., 30 IBLA 202 (May 20, 1977)

The Bureau of Land Management, under 43 CFR 5442.3, has the authority to reject bids submitted for timber sales where it rationally determines that rejection is in the Government's interest.

Cabax Mills, 32 IBLA 225 (Sept. 20, 1977)

A party seeking a partial refund of the purchase price under the risk of loss provision of a contract for the cash sale of vegetative resources pursuant to the Materials Act of July 31, 1947, must present substantial evidence of the quantity of resources lost which otherwise would have been harvested.

Alma D. LeBaron, Jr., 32 IBLA 299 (Sept. 29, 1977)

The Federal Land Policy and Management Act of 1976, 43 U.S.C.A. § 1702(h) (West Supp. 1978), providing for sustained yield management of timber resources, and 16 U.S.C. §§ 594, 594-1 (1970), which direct a policy of preserving forest resources from insect infestation and damage, envisage that the Department is under an obligation to protect timber from such ravages, including without limitation, the sale of timber so affected.

A decision by a district office to proceed with a proposed timber sale, which was made after consideration of all relevant facts, and which decision is supported by the record, will not be disturbed in the absence of a showing that the decision is clearly in error.

Where a proposed Federal timber sale would allow the cutting of trees on a 162-acre tract pursuant to a properly promulgated decision of the Director of the Bureau of Land Management concerning the allowable cut in that district, such sale does not, by itself, constitute a major Federal action significantly affecting the quality of the human environment such as will require the preparation of an environmental impact statement prior to the sale.

George Jalbert et al., 39 IBLA 205 (Feb. 2, 1979)

The right of appeal to the Board is limited to parties to a case adversely affected by a decision of BLM. A person protesting a timber sale does not become a party to a case until such time as BLM has issued a final decision adverse to his or her interests. The case is ordinarily ripe for appeal only when an adverse decision is made on the protest.

The receipt of timber sale bids by BLM pursuant to an advertised sale and subsequent to the filing of a protest of the sale, does not constitute an irrevocable commitment to complete the sale where all bidders acknowledge that the final decision to award the sale contract is contingent upon adjudication of the protest and the decision reached on any proper appeal therefrom. Hence, receipt of bids by BLM does not prejudice the rights of protestants to have their protest ruled upon and any proper appeal heard.

Elaine Mikels et al., 41 IBLA 305 (July 3, 1979)

BLM is obligated in preparing Environmental Analysis Records (EAR's) preliminary to a determination as to whether a full environmental impact statement for a proposed Federal action will be prepared pursuant to the National Environmental Policy Act of 1969, 42 U.S.C. § 4332 (1976), to develop a reviewable record reflecting a consideration of all relevant factors. In the case of a proposed Federal timber sale the purely speculative threat of erosion or threat to the watershed caused by the absence of forest regeneration or a proposed trails system where the sale area is deemed to be of negligible recreational value are properly considered in a decision denying a protest of the sale.

A proposed Federal timber sale does not violate the principle of multiple use embodied in the Federal Land Policy and Management Act of 1976, 43 U.S.C. § 1701 (1976), where it involves Oregon and California revested land committed by the Act of Aug. 28, 1937, 43 U.S.C. § 1181a (1976), to dominant use management for commercial forestry.

Elaine Mikels et al., 44 IBLA 51 (Nov. 19, 1979)

TITLE

GENERALLY

The Secretary of the Interior does not have authority under the Right-of-Way Oil and Gas Leasing Act of May 21, 1930, 30 U.S.C. § 301 *et seq.* (1970), to dispose of deposits of oil and gas underlying a railroad right-of-way granted pursuant to the Act of Mar. 3, 1875, when the lands traversed by the right-of-way were later patented under the Act of Apr. 24, 1820, without any reservation for minerals. In such case, title to the mineral estate was included within the grant to the patentee.

Amerada Hess Corp., 24 IBLA 360 (Apr. 27, 1976)
83 I.D. 194

In public land law, the term "equitable title" is used to describe the interest held by an entryman who, upon full compliance with requirements of the law, has rights in the land superior to all other claims, and is entitled to issuance of patent by the Federal Government, which hold only legal title to the land.

Appeal of Eklutna, Inc., 1 ANCAB 190 (Dec. 10, 1976)
83 I.D. 619

REAL PROPERTY

Where material involving a prior mineral reservation on acquired lands is first submitted on appeal, and the effect of a State statute and State court decree is in issue, it is appropriate to remand the case to the BLM State Office for further consideration.

A. M. Henderson, 30 IBLA 8 (Apr. 4, 1977)

TOWNSITES

The date determinative of the rights of occupants of Alaska Native townsite land is the date of final subdivisional survey, not the date of patent; if, at the date of final subdivisional survey, the lots are occupied by non-Natives as well as Natives, the lots will be disposed of under both the non-Native and Native townsite provisions.

City of Klawock v. P. H. Andrew et al.; City of Klawock v. State of Alaska, Department of Highways, 24 IBLA 85 (Feb. 25, 1976)
83 I.D. 47

An appeal to the Board of Land Appeals will be dismissed where the enactment of legislation renders moot the questions on appeal.

Gibbonsville Townsite, 30 IBLA 74 (Apr. 18, 1977)

An appeal to the Board of Land Appeals will be dismissed where the enactment of the Federal Land Policy and Management Act renders moot the questions on appeal.

Silver Peak Townsite (Trustee), 30 IBLA 357 (June 10, 1977)

TOWNSITES--Continued

Authority to dispose of land within Alaska railroad townsites under 43 U.S.C. § 975b (1970) was repealed by sec. 704(a) of the Federal Land Policy and Management Act of 1976.

Matanuska-Susitna Borough, Inc., 38 IBLA 382 (Dec. 29, 1978)

R.S. 2387, 2388 and 2389, 43 U.S.C. §§ 718-720 (1976), were repealed by sec. 703 of the Federal Land Policy and Management Act of 1976 (FLPMA), 90 Stat. 2790, and any transfer of land for a townsite within a National Forest after the effective date of FLPMA, Oct. 21, 1976, must be made under authority of sec. 213 of that Act. The filing of an application under other statutes prior to the enactment of FLPMA does not constitute a valid existing right which would survive FLPMA.

Townsite of Liberty, 40 IBLA 317 (Apr. 30, 1979)

Alaska Natives who occupied lots in a Native townsite on date of approval of final subdivisional townsite survey, prior to Oct. 21, 1976, are entitled to receive deeds thereto from the townsite trustee.

Leona R. Strang (Supp.), 43 IBLA 156 (Sept. 28, 1979)

The Alaska townsite laws, 43 U.S.C. §§ 732-736 (1970), were repealed by the Federal Land Policy and Management Act of 1976, sec. 703(a), 90 Stat. 2789, so that no rights under the townsite laws could be derived from occupancy commenced after Oct. 21, 1976.

Stu Mach, 43 IBLA 306 (Oct. 17, 1979)

TRESPASS

GENERALLY

Where timber on Federal land is cut for commercial purposes by one who knows that no patent has issued and who occupies the land either as a mining claimant or as one who is engaged in attempting to defeat the interests of third parties by adverse possession, the taking of the timber constitutes a willful trespass against the interests of the United States. If the taking occurs after a State court has issued its decree quieting title in the timber-taker against all third parties but not against the United States, the taking will nonetheless constitute a trespass if it is determined that legal title had not passed from the United States by operation of law.

Southern Pacific Transportation Co., Jay E. Eggal; Lloyd D. Hayes (Intervenor), 23 IBLA 232 (Jan. 5, 1976)
83 I.D. 1

The term "grazing trespass" as used in the context of the Federal Range Code refers to the grazing of livestock on Federal land without an appropriate license or permit or in violation of the terms and conditions of a license or permit, and not to any other special meaning ascribed under other laws and circumstances if inconsistent with this usage.

Where a permittee was found to have committed repeated grazing trespasses, a fine of twice the commercial rate for foraging such animals was warranted in accordance with the regulations.

TRESPASS--Continued

GENERALLY--Continued

Where a grazing trespass is willful, grossly negligent, or repeated, disciplinary action in the form of suspension, reduction, or revocation, or denial of renewal of a grazing license or permit may be warranted. The regulatory factors, together with any mitigating circumstances, should be considered to determine the extent of the reduction or other disciplinary action.

In determining whether grazing trespasses are "willful," intent sufficient to establish willfullness may be shown by proof of facts which objectively show that the circumstances do not comport with the action that the trespasser acted in good faith or innocent mistake, or that his conduct was so lacking in reasonableness or responsibility that it became reckless or negligent.

Eldon Brinkerhoff, 24 IBLA 324 (Apr. 21, 1976)
83 I.D. 185

When the holder of a grazing lease is found to have violated regulations and the terms of his lease because his cattle have trespassed on Federal land, his lease may be canceled when lesser sanctions have proved to be of no effect or when the nature of the violation demands such severity. However, a decision canceling a lease will be set aside where the district manager relied upon alleged trespasses of which the lessees had no notice and which occurred after a show cause notice had issued, and the case will be remanded for further proceedings.

Rodney Rolfe and Ronald J. Rolfe, 25 IBLA 331 (June 30, 1976)
83 I.D. 269

Where the number of cattle grazing on the Federal range exceeds the number allowed by license and such excess is attributable solely to appellants' lack of control over their cattle and their lack of diligence in taking corrective action after being informed by the Bureau that the excess existed, a finding of willful trespass is warranted.

Cesar and Robert Siard, 26 IBLA 29 (July 8, 1976)

A mining claim void at initio may be a proper basis for a conveyance under the Mining Claims Occupancy Act, but pursuant to 30 U.S.C. § 706 (1970) trespass damages should ordinarily be assessed.

Feliciano Y. Jimenez, Margarita R. Jimenez, 30 IBLA 82 (Apr. 27, 1977)

One who grazes livestock in a grazing allotment without authorization prior to the issuance of a license commits a grazing trespass.

Where there is a final administrative determination of the assessment of damages for a grazing trespass by a licensee, no license or permit should thereafter be issued or renewed until payment of the assessed amount.

Pursuant to the Property Clause of the U.S. Const. art. IV, § 3, cl. 2, Congress has enacted the Taylor Grazing Act, 43 U.S.C. § 315 *et seq*. (1970), and other statutory authority which empower the Secretary of the Interior to define what conduct constitutes a grazing trespass and to determine whether or not an individual has committed a trespass.

There is no constitutional right to a jury trial in an administrative proceeding such as a grazing trespass hearing.

TRESPASS--Continued

GENERALLY--Continued

Where cattle are admitted to an allotment at the beginning of the usual grazing season but prior to the issuance of a license for that season, and payment is later made by a check which recites that it is "payment in full for 1975 grazing fee," the Bureau of Land Management may properly deposit the check, allotting part of the proceeds for the grazing license for the rest of the season, and deposit the remainder of the proceeds in a suspense account pending resolution of the trespass. Such action indicates that the check was not accepted in settlement of the trespass damages, and cashing the check does not constitute an accord and satisfaction of the trespass damages.

Bureau of Land Management v. Ross Babcock, 32 IBLA 174 (Sept. 15, 1977)
84 I.D. 475

An assertion by an alleged trespasser that he holds the right to graze and enclose Federal range must be documented to rebut the Government's prima facie case of trespass.

The grantee of a right-of-way for irrigation or drainage purposes may not fence the right-of-way unless it is necessary to protect the grantee's use. Where the necessity of protecting an irrigation reservoir from incursion by cattle did not appear on the record, and the fence was not so located as to serve that purpose, fencing the reservoir constituted a trespass.

Joe Stewart, 33 IBLA 225 (Dec. 28, 1977)

A person intending to occupy land has a duty to ascertain its owner and to gain his consent to utilization prior to such occupancy. A person cited for a previous similar trespass for which he paid damages may properly be deemed to be a willful trespasser. Under Arizona law, punitive damages for willful trespass are permissible, and the imposition of triple damages for a willful trespass is not inappropriate.

Mountain States Telephone & Telegraph Co., 34 IBLA 154 (Mar. 10, 1978)

Where there has been an unauthorized use of the public lands, BLM may assess damages against the trespasser and serve him with a demand for payment thereof, prior to turning the matter over to the Department of Justice for initiation of judicial proceedings.

Gold Mountain Logging Co., 34 IBLA 326 (Apr. 25, 1978)

Sec. 9 of the Stock-Raising Homestead Act, 43 U.S.C. § 299 (1970), contemplates the Department of the Interior retaining continuing jurisdiction and administration of mineral deposits reserved by that Act.

"Public lands." Under 43 CFR 9239.0-7 which defines a trespass, the term "public lands" includes mineral deposits reserved under the Stock-Raising Homestead Act, 43 U.S.C. § 299 (1970).

Western Nuclear, Inc., 35 IBLA 146 (May 22, 1978)
85 I.D. 129

Under 43 CFR 9239.3-2(e), the repetitive nature of grazing trespasses coupled with a negligent failure of licensee to take corrective action supports a finding of willful trespass.

On appeal from a show cause proceeding under 43 CFR 9239.3-2(e), a requirement for ear-tagging of cattle recommended by a district manager and imposed by an

TRESPASS--Continued

GENERALLY--Continued

administrative law judge will be set aside where the grazer objected thereto and was not accorded proper opportunity to offer evidence thereon. 43 CFR 4112.3-2(a)(4).

Calvin C. Johnson, 35 IBLA 306 (June 2, 1978)

On appeal, an assessment of damages made by BLM for timber trespass will not be disturbed where neither appellant's contentions nor the record prove that BLM determination was in error.

David Robinson, 36 IBLA 386 (Sept. 5, 1978)

The Board of Land Appeals will not exercise its de novo review authority to deny applications for Alaska grazing leases on the basis of trespass where (1) trespass was not cited as a reason for denial of the applications in the decision under appeal, (2, the record does not provide a clear basis for determining the applicant's responsibility for the trespass, and (3) there is no record of compliance with the procedures specified in 43 CFR 9239.0-9(b).

Kenneth H. Bunch, 37 IBLA 346 (Oct. 27, 1978)

Where the alleged trespasser makes no allegations of a specific and substantial nature regarding whether or not a trespass has in fact occurred, the procedure authorized by 43 CFR 9239.3-2(c)(4) limiting a hearing "to the determination of the amount of damages, value of the forage consumed, and any other amounts considered to be due the United States as a result of said trespass" does not result in a denial of due process.

A hearing on the issue of whether or not a trespass was willful or not clearly willful is authorized by 43 CFR 9239.3-2(c)(4) because a finding on this issue affects the rate at which the value of the forage consumed shall be computed pursuant to 43 CFR 9239.3-2(c)(2).

In determining whether grazing trespasses are willful, intent sufficient to establish willfulness may be shown by proof of facts which objectively show that the circumstances do not comport with the notion that the trespasser acted in good faith or innocent mistake or that his conduct was so lacking in reasonableness or responsibility that it became reckless or negligent.

Since a grazing trespass is not a criminal proceeding, it need not be proved beyond a reasonable doubt that a particular individual committed the trespass.

Evidence is insufficient to support a finding of a willful trespass where it fails to show that the alleged trespasser intended to disregard the regulation prohibiting trespass or that he was plainly indifferent to its requirements or that he acted with gross neglect of a known duty.

Where the administrative law judge does not make a finding as to whether a trespass was willful or not clearly willful, the Board of Land Appeals may make this finding based upon the record as if it were sitting as trier of fact.

Where BLM has impounded five horses found to be trespassing on public lands closed to grazing and no notice and hearing are afforded to the owner of said animals prior to impoundment because the owner is unknown to BLM, the due process rights of said owner are not violated. The procedures authorized by 43 CFR 9239.3-2(c)(3) do not violate due process.

The Property Clause of the United States Constitution art. IV, § 3, cl. 2, gives Congress the power over the public lands "to control their occupancy and use, to

TRESPASS--Continued

GENERALLY--Continued

protect them from trespass and injury and to prescribe the conditions upon which others may obtain rights in them." When Congress so acts, the Federal legislation necessarily overrides conflicting State laws under the Supremacy Clause. U.S. Constitution art. IV, cl. 2.

Fernando Herrera v. Bureau of Land Management, 38 IBLA 262 (Dec. 8, 1978)

A notice to cease trespass and an order to remove improvements from the public lands are proper where appellant has been occupying public lands while operating a well service for 7-8 years without proper authorization.

James E. Billings, 38 IBLA 353 (Dec. 22, 1978)

Where there has been an unauthorized use of the public lands, BLM may assess damages against the trespasser and serve him with a demand for payment thereof, prior to turning the matter over to the Department of Justice for initiation of judicial proceedings. Where BLM assesses trespass damages based on the reasonable value, extent, and duration of an unauthorized use of the public lands, this assessment will not be disturbed unless the trespasser submits convincing evidence that it is incorrect.

Outdoor Adventure River Specialists, Inc., 41 IBLA 132 (June 14, 1979)

Past trespass, trespass damages, and trespass settlements may properly be considered in determining whether trespasses are repeated for the purpose of computing the damages to be assessed.

The Taylor Grazing Act, 43 U.S.C. §§ 315a-315r (1970), and other statutory authority empower the Secretary of the Interior to define what conduct constitutes a grazing trespass and whether or not an individual has committed a trespass.

Bureau of Land Management v. Harris Brothers, 42 IBLA 48 (July 31, 1979)

MEASURE OF DAMAGES

Where it has been determined that a grazing trespass on the Federal range is clearly willful, the value of the forage consumed shall be computed and assessed at $4 per animal unit month, or twice the commercial rate if such amount is higher. Where the commercial rate is $4.90, the assessment of damages shall be at the rate of $9.80 per animal unit month.

Cesar and Robert Siard, 26 IBLA 29 (July 8, 1976)

Under existing regulations, where a grazing trespass is not clearly willful, damages are to be computed at the rate of $2 per AUM of Federal forage consumed or the commercial rate, whichever is greater.

When 33 percent of the available forage in a grazing allotment is on Federal land and the remainder is on private land, it is appropriate to find that 33 percent of the forage consumed by cattle throughout the allotment was Federal forage, in the absence of evidence to the contrary.

Bureau of Land Management v. Ross Babcock, 32 IBLA 174 (Sept. 15, 1977) 84 I.D. 475

TRESPASS--Continued

MEASURE OF DAMAGES--Continued

Arizona Revised Statutes § 37-502, which provides for damages in civil actions for trespass on State lands, does not apply to cases involving right-of-way trespass on Federal lands located in Arizona.

A person intending to occupy land has a duty to ascertain its owner and to gain his consent to utilization prior to such occupancy. A person cited for a previous similar trespass for which he paid damages may properly be deemed to be a willful trespasser. Under Arizona law, punitive damages for willful trespass are permissible, and the imposition of triple damages for a willful trespass is not inappropriate.

Mountain States Telephone & Telegraph Co., 34 IBLA 154 (Mar. 10, 1978)

Where BLM assesses trespass damages based on the reasonable value, extent, and duration of an unauthorized use of the public lands, this assessment will not be disturbed unless the trespasser submits convincing evidence that it is incorrect.

Gold Mountain Logging Co., 34 IBLA 326 (Apr. 25, 1978)

When the Bureau of Land Management has appraised the damages for a mineral trespass under 43 CFR Part 9230, a hearing will not be ordered and an appraisal will not be disturbed in the absence of an offer of specific substantial evidence that the determination is incorrect.

Western Nuclear, Inc., 35 IBLA 146 (May 22, 1978) 85 I.D. 129

Where record shows willful trespass on Federal lands located in Oregon, applicable law, as mandated under 43 CFR 9239.0-8, for measure of damages is found in Oregon Revised Statutes 105.810, which prescribes treble damages.

Proper computation under Oregon Revised Statutes 105.810 of damages for willful timber trespass begins with assessment of actual damages, which are measured by difference between market values of pertinent land before and after severance of trees. Ordinarily, the market value of the trespass timber will reflect the value of the actual damage to the public land. Actual damages are then trebled, and from this amount is subtracted an allowance for such salvage as BLM by its own diligence realized or should have realized. The sum allowed in mitigation of damages is that which may be appropriate in a given case.

David Robinson, 36 IBLA 386 (Sept. 5, 1978)

In determining whether grazing trespasses are willful, intent sufficient to establish willfulness may be shown by proof of facts which objectively show that the circumstances do not comport with the notion that the trespasser acted in good faith or innocent mistake or that his conduct was so lacking in reasonableness or responsibility that it became reckless or negligent.

Fernando Herrera v. Bureau of Land Management, 38 IBLA 262 (Dec. 8, 1978)

TRESPASS--Continued

MEASURE OF DAMAGES--Continued

Where the evidence as to specific trespass indicates that of a number of cattle counted some were located on private intermingled land, but there were no barriers, either natural or artificial, which would have prevented the cattle on private land from going onto the public land, it is proper to find that all cattle counted would tend to consume forage at a rate proportional to the ratio of forage available on private and public lands.

Bureau of Land Management v. Holland Livestock Ranch et al., 39 IBLA 272 (Feb. 15, 1979) 86 I.D. 133

Where there has been an unauthorized use of the public lands, BLM may assess damages against the trespasser and serve him with a demand for payment thereof, prior to turning the matter over to the Department of Justice for initiation of judicial proceedings. Where BLM assesses trespass damages based on the reasonable value, extent, and duration of an unauthorized use of the public lands, this assessment will not be disturbed unless the trespasser submits convincing evidence that it is incorrect.

Outdoor Adventure River Specialists, Inc., 41 IBLA 132 (June 14, 1979)

Where the evidence shows that the commercial rate for forage ranged from $2.50 to $9.50 per AUM, an Administrative Law Judge's computation of damages, using $3.50 as the base figure, cannot be said to be unreasonable under 43 CFR 9239.3-2 (1976).

Bureau of Land Management v. Harris Brothers, 42 IBLA 48 (July 31, 1979)

UNIFORM RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION POLICIES ACT OF 1970

GENERALLY

A hearing will not be held on a relocation assistance appeal where the facts are not in dispute and resolution of the appeal rests primarily upon an interpretation of law and where it does not appear that any additional evidence would be produced at a hearing to warrant any change in the decision from which the appeal is taken.

Uniform Relocation Assistance Appeal of South Cold Springs Friends Band Church, 1 OHA 110 (Apr. 14, 1975)

Uniform Relocation Assistance Appeal of Mrs. Blanche Schnuck, 3 OHA 65 (Apr. 10, 1979)

The Act does not provide for the replacement of business property condemned by and acquired by the United States and the Park Service has no authority to provide other park land as a replacement for the acquired property.

A claim for damage incidental or otherwise to real property remaining in the landowner after the acquisition of part of his property by the United States is properly denied on the basis that the Act and implementing regulations do not provide for such damage or incidental damage payments.

Uniform Relocation Assistance Appeal of S. S. Shedd, 1 OHA 125 (June 20, 1975)

UNIFORM RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION POLICIES ACT OF 1970--Continued

GENERALLY--Continued

Land purchase contracts which involve negotiations and agreement between the parties are transactions separate and distinct from relocation assistance payments and benefits under the Act which are made administratively by acquiring agencies in accordance with administrative regulations and procedures established under provisions of the Act, and neither the price for which an appellant's property was acquired by voluntary conveyance nor the accuracy of appraisals and the soundness of determinations involving just compensation paid to others whose property was similarly acquired by voluntary conveyance to the United States for the same project are reviewable upon appeal.

Uniform Relocation Assistance Appeal of John E. Houston, 1 OHA 157 (Aug. 8, 1975)

Claims for reimbursement for travel time to and from replacement property to sign options for the purchase of replacement property and to accompany a carpenter for the purposes of estimating building costs are properly denied on the basis that the Act and implementing regulations do not provide for such payment.

A claim for reimbursement for travel time to check on legal matters regarding replacement property is properly denied on the basis that the Act and implementing regulations do not provide for such payments.

A claim for reimbursement for travel time to bank to get money to make payment on replacement property is properly denied on the basis that the Act and implementing regulations do not provide such payments.

A claim for reimbursement for cost of paying neighbor to guard personal property or a claim for reimbursement for appellants' time spent guarding their property is properly denied on the basis that the Act and implementing regulations do not provide for such payments.

A claim for reimbursement for travel time to meet with attorney and judge for a pretrial conference held in conjunction with the trial which related to the condemnation case involving the acquired land is properly denied on the basis that the Act and implementing regulations do not provide for such payments.

A claim for reimbursement for travel time and legal expenses incurred in perfecting the appellants' appeal under the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, are properly denied on the basis that the Act and implementing regulations do not provide for such payments.

An appealed case will not be remanded to the Director of the acquiring bureau where there are facts sufficient to support a final determination of the case.

Uniform Relocation Assistance Appeal of William and Mary Danneman, 1 OHA 170 (Sept. 18, 1975)

A claim for reimbursement for increased interest payments with respect to a replacement farm property is properly denied on the basis that the Act and implementing regulations did not provide for such payments.

Uniform Relocation Assistance Appeal of S. R. Jennings, 1 OHA 218 (Sept. 19, 1975)

UNIFORM RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION POLICIES ACT OF 1970--Continued

GENERALLY--Continued

Where appellants moved from acquired property prior to the effective date of the Act they are not displaced persons within the meaning of the Act and they are not eligible to receive relocation assistance benefits under the Act.

Uniform Relocation Assistance Appeal of Harold W. and Willomene Olsen, 1 OHA 221 (Sept. 24, 1975)

A claim for reimbursement for the cost of a survey of the remainder of appellant's land after acquisition by United States of part of appellant's land is properly denied on the basis that the Act and implementing regulations do not provide for such payment.

Uniform Relocation Assistance Appeal of Carl A. Lundberg, 1 OHA 226 (Oct. 14, 1975)

A claim for reimbursement for travel time and legal expenses incurred in perfecting the appellants' appeal under the Relocation Assistance and Real Property Acquisition Policies Act of 1970 is properly denied on the basis that the Act and implementing regulations do not provide for such payments.

An appeal case will not be remanded to the Director of the acquiring bureau where there are facts of record sufficient to support a final determination of the case.

Uniform Relocation Assistance Appeal of Edward and Josephine Kobbs, 1 OHA 229 (Nov. 13, 1975)

Under the facts alleged the coal mining operations conducted by Peabody Coal Co. within the Navajo Indian Reservation and Navajo-Hopi Joint Use Area in Arizona were neither acquisitions nor programs or projects undertaken by Federal agency or with Federal financial assistance within the meaning of sec. 101(6) of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, P.L. 91-646 (42 U.S.C. § 4601 *et seq.*), so as to allow the appellants' benefits under the Act.

Uniform Relocation Assistance Appeal of Numerous Navajo Persons Who Reside on Black Mesa in Arizona, 1 OHA 252 (Mar. 15, 1976)

Where act authorizing Department of the Interior to accept donation of real property requires the property to be vacant before acceptance of donation former tenants are not entitled to relocation benefits.

Uniform Relocation Assistance Appeal of Sidney Gelb, 2 OHA 59 (Sept. 22, 1976)

Benefits under the Act and implementing regulations do not include reimbursement for costs of field surveys, property descriptions and maps, pertaining to lands to be retained by the displaced person upon acquisition by the United States of a portion of his lands.

Uniform Relocation Assistance Appeal of Mr. George P. Leonard, 2 OHA 135 (June 22, 1977)

UNIFORM RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION POLICIES ACT OF 1970--Continued

GENERALLY--Continued

Payments and benefits provided by Title II of the Act are made administratively in accordance with regulations and procedures established under provisions of the Act and are transactions separate and apart from land purchase contracts involving negotiations and agreement between the parties; accordingly, the amounts payable for relocation assistance benefits and for property acquisitions are not affected one by the other.

Uniform Relocation Assistance Appeal of Mr. Barry Wayne Martin, 2 OHA 169 (Mar. 30, 1978)

Uniform Relocation Assistance Appeal of Mr. and Mrs. Robert L. Burnett, Jr., 3 OHA 1 (Nov. 6, 1978)

Payments and benefits provided by Title II of the Act are made administratively by the acquiring agencies in accordance with administrative regulations and procedures established under provisions of the Act and are transactions separate and apart from land purchase contracts involving negotiations and agreement between the parties; accordingly, the amounts payable for relocation assistance benefits and for property acquisitions are not affected one by the other.

Uniform Relocation Assistance Appeal of Iolyn J. and Ruth J. Hinkle, 2 OHA 206 (Sept. 6, 1978)

To the extent that any information given by Park Service representatives may have suggested to the claimants that relocation assistance benefits would be awarded them in the amount of $10,000, such advice was erroneous and cannot serve as a basis for creating any rights in the claimants which are not authorized by law.

Uniform Relocation Assistance Appeal of Charlie F. and Jimmy W. Sanders, 3 OHA 73 (May 24, 1979)

ADMINISTRATIVE REVIEW AND APPEALS

Protestants will not be denied benefits to which they may be entitled under the Relocation Act for failure to meet procedural requirements in submitting their protest on appeal where the issue of their eligibility is inextricably a part of the determination on appeal concerning the eligibility for such benefits of other persons who have appealed properly.

Uniform Relocation Assistance Appeal of Marvin L. Nunes & Co. (A Partnership of Mrs. Tessie D. Nunes Brazil and Mr. Marvin L. Nunes); Appeal of Mr. Marvin L. and Mrs. Vivian H. Nunes (Tenants); and Protest of Mr. Domingos and Mrs. Navare Machado (Tenants), 2 OHA 35 (Sept. 9, 1976)

UNIFORM REAL PROPERTY ACQUISITION POLICY

Expenses Incidental to Transfer of Title to the United States

Real property taxes referred to in sec. 303(3) of the Act and implementing regulations refer only to the pro rata portion of real property taxes allocable to a period subsequent to the date of vesting title in the United States, or the effective date of possession of such real property by the United States, whichever is earlier.

The Uniform Relocation Assistance Appeal of Mrs. Eve I. Rich, 1 OHA 121 (June 5, 1975)

UNIFORM RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION POLICIES ACT OF 1970--Continued

UNIFORM REAL PROPERTY ACQUISITION POLICY--Continued

Expenses Incidental to Transfer of Title to the United States--Continued

Expenses incidental to transfer of title to the United States, reimbursable under § 303(1) of the Act and implementing regulations, do not include attorneys' fees and costs in establishing guardianship for the purpose of effecting transfer of title to the United States of lands owned by minor children.

Uniform Relocation Assistance Appeal of Mrs. Joyce B. Borsellino, Guardian for Leroy Albert Borsellino, Salvadore Anthony Borsellino, and Ruthellyn Borsellino, Minor Children, 2 OHA 8 (May 11, 1976)

Deferred leasing brokerage commission, payable out of monthly rentals for the unexpired term of a lease of a building on acquired lands, are not reimbursable as expenses incidental to transfer of title to the United States. Such expenses being related to the business use of the property are properly borne by the owners of the property as business related expenses.

Uniform Relocation Assistance Appeal of H. Park Solomon and Louis Silverman, 2 OHA 21 (June 14, 1976)

A claim for closing cost is properly denied as to that portion of the claim which is determined to be a finance charge under the Truth and Lending Act (Pub. Law 90-321).

Uniform Relocation Assistance Appeal of Mr. and Mrs. Frank Matney, 2 OHA 92 (Oct. 4, 1976)

Where the record shows reimbursement was allowed by the National Park Service to the condemnees for the pro rata portion of real property taxes allocable to the period of the calendar year remaining after vesting of title to the lands in the United States, such condemnees having been obligated by court order to pay all of the real property taxes for the year concerned out of the condemnation award for the lands, the allowance being fair and reasonable for expenses necessarily incurred incidental to transfer of title to the real property to the United States will be affirmed.

Uniform Relocation Assistance Appeal of Mr. and Mrs. Timothy G. Lewis, 3 OHA 79 (June 27, 1979)

Uniform Relocation Assistance Appeal of Mr. and Mrs. Marvin E. Zeller, 3 OHA 82 (June 27, 1979)

A claim under sec. 303(3) of the Act for reimbursement of expenses for a pro rata portion of real property taxes allocable to the period of the calendar year remaining after vesting of title to the lands in the United States will be disallowed where such expenses are not shown to have been necessarily incurred by the condemnee(s) from whom the lands were acquired by the United States, condemnee(s) being obligated by court order to pay taxes on the lands for the portion of the year preceding the Government's acquisition of the property.

Uniform Relocation Assistance Appeal of Ms. Doris V. Brammer, 3 OHA 85 (July 5, 1979)

Uniform Relocation Assistance Appeal of Mr. and Mrs. Ervin P. Landis, 3 OHA 89 (July 5, 1979)

Uniform Relocation Assistance Appeal of Mr. and Mrs. Richard C. Scussel, 3 OHA 93 (July 13, 1979)

UNIFORM RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION POLICIES ACT OF 1970--Continued

UNIFORM REAL PROPERTY ACQUISITION POLICY--Continued

Expenses Incidental to Transfer of Title to the United States--Continued

Where a deferred tax incurred because land was conveyed to the United States was not taken into account in the purchase price, that tax is a reimbursable expense under 42 U.S.C. § 4653(1) (1976).

Uniform Relocation Assistance Appeal of Boise Cascade Corp., 3 OHA 97 (July 31, 1979)

Penalty costs provided for in a land sales contract, assuring that the sellers (mortgagees) would receive the total amount in any premature payment of the indebtedness secured by the mortgage, are not prepayment penalty expenses reimbursable under § 303(2) of the Act as expenses incidental to transfer of title to the United States.

Uniform Relocation Assistance Appeal of Mr. and Mrs. Gerald L. Abercrombie, 3 OHA 104 (Aug. 9, 1979)

Where the record shows reimbursement was allowed by the National Park Service to the condemnee for the pro rata portion of real property taxes allocable to the period of the calendar year remaining after vesting of title to the lands in the United States, the allowance, being fair and reasonable for expenses necessarily incurred incidental to transfer of title to the real property to the United States, will be affirmed.

Uniform Relocation Assistance Appeal of Mr. Robert H. Hosick, 3 OHA 127 (Aug. 23, 1979)

UNIFORM RELOCATION ASSISTANCE

Generally

Persons who had moved from their dwelling on real property acquired by the United States and discontinued farming operations on the lands and who were residing elsewhere at the time negotiations were initiated for the purchase of the lands and had been residing elsewhere for more than 180 days prior to initiation of such negotiations, are not persons who moved or discontinued a farm operation on the acquired lands as a result of the acquisition of the real property by the United States; and, therefore, they are not displaced persons entitled to relocation assistance benefits within the meaning of the law and the implementing regulations.

Uniform Relocation Assistance Appeal of Bobby Wayne Jennings and Helen Jennings, 1 OHA 78 (Jan. 7, 1975)

The purchase price for property acquired by the Government and relocation assistance benefits are separate and independent of each other and in no case should employees of the Government attempt to convince any person to sell his property to the Government for less than it is worth by offering relocation assistance benefits as an added inducement.

Uniform Relocation Assistance Appeal of Mr. and Mrs. Daniel W. Walters, 1 OHA 265 (Jan. 12, 1976)

UNIFORM RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION POLICIES ACT OF 1970--Continued

UNIFORM RELOCATION ASSISTANCE--Continued

Generally--Continued

A person who had moved from her dwelling on real property acquired by the United States and was residing elsewhere at the time negotiations were initiated for the purchase of the lands is not a person who moved from the acquired property as a result of its acquisition by the United States; and, therefore, that person is not a displaced person entitled to relocation assistance benefits within the meaning of the law and the implementing regulations.

Uniform Relocation Assistance Appeal of Elizabeth B. White, M.D., 2 OHA 203 (Aug. 30, 1978)

Tenants who had moved from real property acquired by the United States and were residing elsewhere at the time negotiations were initiated for the purchase of the property are not persons who moved from the acquired property as a result of its acquisition by the United States; and, therefore, they are not displaced persons entitled to relocation assistance benefits within the meaning of the law and implementing regulations.

Uniform Relocation Assistance Appeal of Mr. and Mrs. Scott McDonald, 3 OHA 39 (Feb. 1, 1979)

Moving and Related Expenses

Generally

Benefits under the Act and implementing regulations do not include reimbursement for moving and related expenses in removing a house and a barn from the acquired lands where those structures were purchased as part of the realty acquired by the United States and they were removed under authority of a provision in the deed of conveyance which reserved to the grantor for a certain term the right to the use and occupancy of said buildings and the right to remove said buildings from the land without damage to the land itself.

Uniform Relocation Assistance Appeal of Fritz and Lucille J. Ackley, 1 OHA 163 (Sept. 2, 1975)

For the purposes of determining whether or not appellants are entitled to payment for expenses incurred in searching for a replacement business location, the question of whether one is engaged in a trade or business is one of fact to be determined by the totality of the evidence presented.

A claim by appellant for reimbursement for his own time spent with moving appraisers is properly denied on the basis that the Act and implementing regulations do not provide for such payment.

Claims for reimbursement for time spent disassembling or assembling equipment or supervising movers in loading or unloading where professional mover is paid for such services but appellant gratuitously performs same are properly denied on the basis that the Act and implementing regulations do not provide for such payment.

A claim by appellants for reimbursement for their own time placing their belongings under cover at acquired site is properly allowed where commercial movers quit job without explanation leaving property exposed and it is necessary to cover appellants' property in order to prevent rain or vandalism damage.

A claim by appellant for reimbursement for his own time disassembling wiring, removing electrical hookups, removing water pipes, and removing underground wiring for lights is properly allowed where commercial mover was not hired to do electrical or plumbing work and this work was necessary to move the appellants' personal property.

Claims for the cost of improvements to the replacement dwelling other than those improvements required by law are properly denied on the basis that the regulations implementing the Act prohibit the payment of such claims.

Uniform Relocation Assistance Appeal of William and Mary Danneman, 1 OHA 170 (Sept. 18, 1975)

For the purposes of determining whether or not appellants are entitled to payment for expenses incurred in searching for a replacement farm location, the question of whether the acquired farm operation contributed materially to the appellants' support is one of fact to be determined by the totality of the evidence presented.

Uniform Relocation Assistance Appeal of Edward and Josephine Kobbs, 1 OHA 219 (Nov. 13, 1975)

A claim for moving and related expenses involved in packing and unpacking household furnishings herself, by a displaced person who is not otherwise employed outside her home, is properly reduced to conform with the Federal minimum wage for such work where it appears that the amount claimed exceeds the probable cost of such services by a commercial mover and no evidence has been presented which would justify allowance of a higher amount as actual reasonable expenses incurred by the displaced person in such activity.

Uniform Relocation Assistance Appeal of Sergeant and Mrs. Michael H. Ireland, 1 OHA 256 (Dec. 3, 1975)

A determination of ineligibility for relocation assistance benefits will be reversed and the cases will be remanded for further adjudication of the claims for benefits where the evidence of record, including that assembled in a hearing on appeals in the matter, shows that the claimants are persons eligible for benefits as persons who were displaced from a farm operation and from rental housing on the farm property as a result of acquisition of the real property by the United States, despite the fact that their displacements occurred before the expiration of a reserved term of use and occupancy of a portion of the property.

Uniform Relocation Assistance Appeal of Marvin L. Nunes & Co. (A Partnership of Mrs. Tessie D. Nunes Brazil and Mr. Marvin L. Nunes); Appeal of Mr. Marvin L. and Mrs. Vivian H. Nunes (Tenants); and Protest of Mr. Domingos and Mrs. Navare Machado (Tenants), 2 OHA 35 (Sept. 9, 1976)

A claim for moving and related expenses involved in packing household furnishings, by a displaced person who is otherwise employed outside her home and who seeks reimbursement for time lost from such employment as well as costs involved in hiring substitute workers, will be reduced to an amount representing the claimant's wages, computed at the hourly rate of pay, for such time lost from work as the record indicates was required for the packing services, where it appears that the amount claimed exceeds the probable cost of such services by a commercial mover and no evidence has been presented which would warrant allowance of a higher amount as actual reasonable expenses incurred by the displaced person in such activity.

Uniform Relocation Assistance Appeal of Donald F. and Sharon L. Peters, 2 OHA 97 (Nov. 22, 1976)

A claim for actual moving expenses of farm and sawmill operation will be allowed where claimants prove the actual cost of movement and the cost of moving is not in excess of the reasonable value of the equipment moved.

Uniform Relocation Assistance Appeal of Wayne and Icelene Blackwell, 2 OHA 117 (May 3, 1977)

A claim under sec. 202(a)(1) of the Act, for reimbursement of actual costs incurred in moving timber from acquired lands, will be reduced to the amount estimated by the claimant as reasonable costs for such moving of personal property where the actual costs are shown by the record to be in excess of reasonable costs for such moving.

Where the evidence shows timber was cut for present marketing purposes immediately prior to the acquisition of the lands by the United States, and was marketed within a few months thereafter, it is not to be regarded as a stockpile item similar to those referred to in sec. 114-50.601-1(b)(3).

A claim for reimbursement for the fair market value of residual timber abandoned on acquired lands upon discontinuance of a logging business will be allowed under sec. 202(a)(2) of the Act where the record evidence shows the cost of moving the timber would be uneconomical.

Uniform Relocation Assistance Appeal of Mr. Alden E. Allen, 2 OHA 123 (June 13, 1977)

A claim for moving and related expenses under sec. 202(a) of the Act, involving personalty removed from an apartment rental business on acquired lands by the displaced owners of the business themselves, is properly limited to probable costs involved in a commercial move of such property to the location to which it was first moved, in the absence of evidence which would justify allowance of a higher amount as actual reasonable expenses incurred by the displaced persons as moving and related expenses with respect to such property.

Uniform Relocation Assistance Appeals of Bernard W. and Ruth W. Bowman, 2 OHA 142 (Aug. 8, 1977)

A claim for reimbursement for the cost of meals on the day of moving a mobile home trailer from a rental site on acquired lands to a replacement rental site elsewhere is properly denied on the basis that the Act and the Department's implementing regulations do not provide for such payment.

Uniform Relocation Assistance Appeal of Mrs. Lona Halles, 2 OHA 156 (Oct. 17, 1977)

UNIFORM RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION POLICIES ACT OF 1970--Continued

UNIFORM RELOCATION ASSISTANCE--Continued

Moving and Related Expenses--Continued

Generally--Continued

A person who entered into occupancy of a dwelling or real property after its ownership had passed to the United States is properly held to be ineligible for reimbursement of moving costs and related expenses under sec. 202 of the Act.

Uniform Relocation Assistance Appeal of Mr. James Dearing, 2 OHA 181 (June 21, 1978)

Uniform Relocation Assistance Appeal of Virginia Whitlock, 3 OHA 77 (June 18, 1979)

Where the record shows the claimant's move from a rented apartment dwelling on property acquired by the United States occurred prior to the date when negotiations were initiated by the United States with the owners of the property for its acquisition, the claimant is properly held to be ineligible for reimbursement of moving expenses under sec. 202 of the Act.

Uniform Relocation Assistance Appeal of Mr. Dennis F. Neuschwanger, 2 OHA 183 (June 22, 1978)

Where the record shows expenses for electrician and plumber services were incurred as costs for adding facilities to the replacement dwelling rather than as costs for reestablishment and reconnection of facilities, they are not reimbursable as actual reasonable expenses incurred in relocating personal property under sec. 202(a) of the Act and the Department's implementing regulations.

Withdrawal, at the hearing, of a claim for cost of meals on the day of moving to the replacement dwelling will be accepted since the Act and the Department's implementing regulations do not provide for reimbursement of such expenses.

Reimbursement for time lost from work to supervise commercial movers is not allowable under the Act and Department's implementing regulations in the absence of evidence establishing the necessity for allowing a higher amount than that involved in the commercial move of the personal property concerned.

Uniform Relocation Assistance Appeal of Mr. and Mrs. John C. Muldowney, 3 OHA 47 (Mar. 16, 1979)

A displaced person is entitled to reimbursement for property lost in the process of moving only to the extent the loss did not occur through his own fault or neglect.

Uniform Relocation Assistance Appeal of James S. Johnson, 3 OHA 131 (Aug. 29, 1979)

Sec. 114-50.601-2 of Title 41 CFR requires the Government to reimburse a dairy farm operation displaced under the Act for improvements constructed on the replacement site if they are required by law, regardless of whether construction of similar improvements on the acquired site would have been required in the absence of acquisition.

As used as a modifier for "improvements" in 41 CFR 114-50.601-2, the term "required by law" can include

UNIFORM RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION POLICIES ACT OF 1970--Continued

UNIFORM RELOCATION ASSISTANCE--Continued

Moving and Related Expenses--Continued

Generally--Continued

the most practicable and efficacious of alternative systems for complying with the law so long as the price therefor is not clearly unreasonable.

If the State requires certain improvements on property and will subject the property's owner to injunctive, civil, or criminal penalties in their absence regardless of injury, then those improvements are "required by law" as that phrase is used in 41 CFR 114-50.601-2; improvements designed only to limit the owner's speculative tort liability are not.

Uniform Relocation Assistance Appeal of H. L. Hynes Co., et al., 3 OHA 152 (Nov. 9, 1979)

Moving Expense Allowance

Generally

Allowances for moving expenses and for dislocation, under § 202(b) of the Act, are authorized only to persons whose occupancy on the acquired lands was lawful.

Uniform Relocation Assistance Appeal of Mr. Frank Wright, 3 OHA 121 (Aug. 14, 1979)

Payment for Moving Expenses

Generally

A claim for the cost of moving nursery stock consisting of unsevered plants and trees is properly denied under regulation which precludes expense of moving improvements to real property where, under applicable State law, nursery stock is considered real property until it is severed.

Uniform Relocation Assistance Appeal of William and Mary Danneman, 1 OHA 170 (Sept. 18, 1975)

A claim for personal property lost, stolen or damaged (not caused by the fault or neglect of the displaced person, his agent or employees) in the process of moving where insurance to cover such loss or damage is not available was properly allowed under Interim Regulation 8.A.(7).

Uniform Relocation Assistance Appeal of Edward and Josephine Kobbs, 1 OHA 229 (Nov. 13, 1975)

A claim for rent for interim housing for a period of time between the dislocation and relocation is properly denied where claimants' interim housing is owned by the claimants.

A claim for storage of personal property is properly denied where claimants continued to store property after they had acquired replacement property and storage was no longer necessary.

Uniform Relocation Assistance Appeal of Mr. and Mrs. Frank Matney, 2 OHA 92 (Oct. 4, 1976)

UNIFORM RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION POLICIES ACT OF 1970--Continued

UNIFORM RELOCATION ASSISTANCE--Continued

Moving and Related Expenses--Continued

Payments in Lieu of Moving and Related Expenses

Fixed Payment(s)

Generally

In determining average annual net earnings regulations state that net earnings shall not be reduced by compensation paid by business or farm operations to the owner, his spouse, or his dependents means compensation actually paid and not the value of services rendered without paid compensation.

Uniform Relocation Assistance Appeal of Mr. and Mrs. Harold T. Hall, 2 OHA 102 (Nov. 22, 1976)

Partial Taking of Farm Operation

A claim for a fixed payment in lieu of actual moving and related expenses is properly disallowed in the case of a partial acquisition of a farm operation where the farm met the definition of a farm operation prior to the acquisition and the property remaining after the acquisition also meets that definition.

Uniform Relocation Assistance Appeal of David Martin Grantham, 1 OHA 130 (July 2, 1975)

Uniform Relocation Assistance Appeal of S. H. Jennings, 1 OHA 218 (Sept. 19, 1975)

A claim for a fixed payment under sec. 202(c) of the Act, in lieu of moving and related expenses under sec. 202(a) of the Act, is properly disallowed in the case of a partial acquisition of a farm operation where the farm met the definition of a farm operation prior to the acquisition and the property remaining after the acquisition also meets that definition.

Uniform Relocation Assistance Appeal of Mr. Johnny H. Thorp, 2 OHA 24 (July 2, 1976)

Taking of Business Operation

Displaced business owner may claim reimbursement for property abandoned because of the uneconomical cost of moving or property sold because the business is discontinued under sec. 202(a) of the Act or a fixed payment in lieu thereof under sec. 202(c) of the Act but not both.

In computing average annual net earnings of business operation for purposes of determining the amount of fixed relocation payment to which the claimant is entitled under sec. 202(c) of the Act by reason of displacement from the business operation, the utilization of the last 1-year period of operation, rather than the last 2 years, should be used for establishing such earnings where there is a wide disparity between the earnings of the last year of operation of the business and the year preceding if it is further shown that the business has been very recently expanded in capacity and to use the earnings for the last year would result in more equitable treatment for the displaced owner of the business.

Uniform Relocation Assistance Appeal of S. S. Shedd, 1 OHA 125 (June 20, 1975)

UNIFORM RELOCATION ASSISTANCE--Continued

Moving and Related Expenses--Continued

Payments in Lieu of Moving and Related Expenses --Continued

Fixed Payment(s)--Continued

Taking of Business Operation--Continued

A claim for a fixed relocation business payment in lieu of actual moving and related expenses is properly disallowed where the record shows the property did not qualify as an ongoing business operation at the time of its acquisition nor for a period of approximately 15 years prior to that time.

Uniform Relocation Assistance Appeal of John E. Houston, 1 OHA 157 (Aug. 8, 1975)

Where the record indicates that an apartment rental business, comprised of two apartment buildings, was operated as a single business, the displaced owner of such business is properly limited to one loss of business claim in lieu of moving and related expenses in connection with displacement from the business.

Uniform Relocation Assistance Appeal of Ms. Dorothea C. Lennox, 2 OHA 18 (June 14, 1976)

Determinations of eligibility for fixed payments under sec. 202(c) of the Act, in lieu of moving and related expenses under sec. 202(a) of the Act, will be reversed and the cases will be remanded for further appropriate action, including repayment of benefits already allowed the claimant under sec. 202(c) of the Act, where the record evidence is insufficient to establish the claimant's entitlement to such benefits, and the claimant, on appeal, has failed to furnish the evidence required for a determination of the proper amount, if any, to which he may be entitled under the law and implementing regulations, after due notice of such requirement.

Uniform Relocation Assistance Appeal of Mr. Richard P. Grummon, 2 OHA 113 (Apr. 29, 1977)

A claim for a fixed payment under sec. 202(c) of the Act, for loss of an apartment rental business on acquired lands, in lieu of moving and related expenses under sec. 202(a) of the Act, is properly disallowed where the record shows the displaced owners of the business also owned and operated other rental properties, including another apartment rental building, in the same business.

Uniform Relocation Assistance Appeals of Bernard W. and Ruth W. Bowman, 2 OHA 142 (Aug. 8, 1977)

A fixed payment in lieu of actual reasonable moving and related expenses is properly allowed for the minimum sum of $2,500, specified in the Act, where the record shows the business was operated at a loss for the 2 taxable years immediately preceding the year in which the Government acquired the property, all else being regular.

Uniform Relocation Assistance Appeal of Iolyn J. and Ruth J. Hinkle, 2 OHA 206 (Sept. 6, 1978)

UNIFORM RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION POLICIES ACT OF 1970--Continued

UNIFORM RELOCATION ASSISTANCE--Continued

Moving and Related Expenses--Continued

Payments in Lieu of Moving and Related Expenses --Continued

Fixed Payment(s)--Continued

Taking of Business Operation--Continued

A claim for the minimum fixed payment provided under sec. 202(c) of the Act for displacement from a business, in lieu of actual reasonable moving and related expenses under sec. 202(a) of the Act, is properly denied where the record shows the business was essentially discontinued and not an on-going business operation during the 2 taxable years preceding the year in which the United States acquired the leasehold interest of the claimant in the real property on which the business had been conducted previously.

Uniform Relocation Assistance Appeal of Mr. Clair J. Bird, 3 OHA 69 (Apr. 20, 1979)

A claim for a fixed payment under § 202(c) of the Act for loss of a business on acquired lands, in lieu of moving and related expenses under § 202(a) of the Act, was properly determined on the basis of average annual net earnings as shown in the claimants' Federal income tax returns for the 2 years immediately preceding the year in which the lands were acquired.

Net income shown on Federal income tax returns, resulting from use of an accelerated method of depreciation for such purposes, cannot be established in a higher amount for purposes of a benefits claim under § 202(c) of the Act by separate book or straight line life depreciation accounting records of the claimant.

Net income shown on Federal income tax returns will not be changed for purposes of a benefits claim for displacement from a business where the evidence presented, with respect to personal expense deductions disallowed for 1973 by IRS audit, and assumed by the claimants to be disallowable for 1972, is lacking in probity and generally insufficient to establish any upwards revision of the net income shown on the tax returns as filed for those years.

Uniform Relocation Assistance Appeal of Mr. and Mrs. Gerald L. Abercrombie, 3 OHA 104 (Aug. 9, 1979)

Taking of Farm Operation

Appellants are not eligible to receive fixed payment in lieu of moving and related expenses where the alleged tree farm operation did not customarily produce such products or commodities, *i.e.*, timber or wood products, in sufficient quantity to be capable of contributing materially to the appellants' support.

Uniform Relocation Assistance Appeal of Harold W. and Willodene Olson, 1 OHA 273 (Jan. 15, 1976)

A claim for a fixed payment under sec. 202(c) of the Act, in lieu of moving and related expenses under sec. 202(a) of the Act, is properly disallowed where the record shows the acquired property was not part of a farm operation of the claimant at the time of its acquisition within the meaning of the Act and the Department's implementing regulations.

Fixed Payment(s)--Continued

Taking of Farm Operation--Continued

Although it was not legally incumbent upon the Park Service to use a consecutive 2-year period in calculating average annual net earnings under subsection 202(c) of the Act, claimants bear the burden of proving that it would have been more equitable in establishing such earnings to use some other period.

Uniform Relocation Assistance Appeal of Charlie F. and Jimmy W. Sanders, 3 OHA 73 (May 24, 1979)

Payments in Lieu of Moving and Related Expenses

A claim by a church for a fixed payment in lieu of actual reasonable moving and related expenses is properly allowed on the same basis as provided in sec. 202(c) of the Act and implementing regulations for displacement from other nonprofit organizations and businesses.

Uniform Relocation Assistance Appeal of South Cold Springs Friends Band Church, 1 OHA 110 (Apr. 14, 1975)

Replacement Housing Payment for Homeowners

Generally

A claim by a church for a relocation housing supplement payment is properly denied where the land acquisition did not involve displacement from residential housing as provided in sec. 203 of the Act.

Uniform Relocation Assistance Appeal of South Cold Springs Friends Band Church, 1 OHA 110 (Apr. 14, 1975)

When it appears that the replacement housing cost differential payment authorized by the Bureau under subsec. 203(a)(1)(A) of the Act represents an amount which, when added to the acquisition cost of the dwelling acquired, meets the reasonable cost of a comparable replacement dwelling which is decent, safe and sanitary, and adequate to accommodate the displaced person, the Bureau determination will be affirmed.

Uniform Relocation Assistance Appeal of Clyde L. and Eva G. Stark, 1 OHA 115 (June 3, 1975)

Where it is indicated that the Duluth Land Acquisition Officer of the National Park Service agreed to use of the schedule method for determining replacement housing supplement benefits under sec. 203(a)(1)(A) of the Act, in purchase negotiations and upon acceptance of the offer to sell and acquisition of the property for the Park Service, prior to transfer of functions of that office to the Chesterton, Indiana, office of the Park Service, subsequent action of the Chesterton Land Acquisition Officer to review the previous decision and to recompute the allowable replacement housing supplement payment under the comparative method will not prevail, even though the claim for benefits was filed in the Chesterton Office after the transfer of functions was accomplished; and the claim will be allowed on the basis first agreed upon, all else being regular.

Where the reasonable acquisition cost for a comparable replacement dwelling, computed under the schedule method, exceeds the acquisition cost of the acquired dwelling in an amount over $15,000, allowable benefits will be limited to the maximum housing cost differential of $15,000 provided in sec. 203(a)(1) of the Act.

Uniform Relocation Assistance Appeal of Mr. and Mrs. Alden W. Wilkin, Sr., 1 OHA 137 (July 15, 1975)

Replacement housing benefits are properly denied where the dwelling on the acquired property was not occupied by the owner for the minimum period of 180 days immediately prior to the initiation of negotiations for acquisition of the property.

Uniform Relocation Assistance Appeal of John E. Houston, 1 OHA 157 (Aug. 8, 1975)

Appellants' cost differential entitlement is properly increased to include cost of repairs necessary to make replacement dwelling decent, safe and sanitary so long as the total cost differential payment does not exceed the stautory limitation of $15,000.

Uniform Relocation Assistance Appeal of William and Mary Danneman, 1 OHA 170 (Sept. 18, 1975)

A claim for a dwelling differential payment was properly allowed under Interim Regulation 3.G. where the acquired dwelling is a mobile home if the mobile home was the permanent abode of the displaced person, was real property under State law, or could not be moved without substantial damage or without unreasonable cost and was actually owned and occupied by the displaced person not less than 180 days prior to the initiation of negotiations.

Uniform Relocation Assistance Appeal of Edward and Josephine Kobbs, 1 OHA 229 (Nov. 13, 1975)

Where the record shows replacement housing supplement benefits allowed by the National Park Service under § 203(a) of the Act represent an amount which, when added to the acquisition cost of the dwelling acquired, equals the reasonable cost of a comparable replacement dwelling which is decent, safe and sanitary, and adequate to accommodate the displaced persons, but does not include reimbursement of reasonable expenses incurred by the displaced persons for closing costs incident to the purchase of the replacement dwelling, the determination of the National Park Service will be affirmed with modification to include payment of the allowable closing costs.

Uniform Relocation Assistance Appeal of Earl A. and Carol J. Karow, 1 OHA 259 (Jan. 7, 1976)

Where the comparative method is used for determining replacement housing supplemental benefits under sec. 203(a)(1)(A) of the Act the determination made by the Government appraiser will not be allowed to stand where the appellants show by competent evidence that the Government appraiser has relied on selected dwellings which were not equivalent or substantially the same as the acquired dwelling.

The appellants' claim for additional replacement housing supplemental payment will be sustained within the statutory limits where the appellants prove by a preponderance of the credible evidence the additional

cost of purchasing an adequate replacement dwelling in excess of the cost estimated by the Government.

Uniform Relocation Assistance Appeal of Mr. and Mrs. Daniel W. Walters, 1 OHA 265 (Jan. 12, 1976)

A determination of replacement housing supplement benefits under sec. 203(a) of the Act, which is based upon housing survey data which is shown to be inadequate because the Government appraiser relied upon selected dwellings which were not equivalent or substantially the same as the acquired dwelling and he was unwilling to consider newly constructed dwellings despite the admitted scarcity of available, comparable replacement dwellings, will be modified to increase the allowable benefits in accordance with housing study data first reported in the case by another Government appraiser and which was of record and relied upon by the displaced homeowners in contracting for construction of the replacement dwelling.

The acquisition cost of an acquired dwelling is determined at the time of purchase of the property by the United States, and it is not subject to reevaluation on the basis of a subsequent housing study made for the purpose of determining the reasonable acquisition cost of a comparable replacement dwelling at a later date.

Uniform Relocation Assistance Appeal of Ethel (Bill) and Lelah Cooley, 1 OHA 280 (Feb. 11, 1976)

Where it is shown by a preponderance of the competent evidence presented that the appellant has been paid the difference between the cost of a comparable replacement trailer site and the cost of the acquired trailer site the appellant's claim over and above the amount he has been paid is properly denied.

Uniform Relocation Assistance Appeal of Lutcher D. Hines, 2 OHA 12 (June 3, 1976)

A claim for relocation supplemental housing benefits against the National Park Service is properly denied where appellants sold their property to the Government reserving a right of use for a period of years and before appellants moved from the property Congress eliminated replacement housing supplemental benefits as to this class of claimants.

Uniform Relocation and Assistance Appeal of Eugene J. and Barbara E. Hawkes, 2 OHA 28 (July 7, 1976)

A claim for replacement supplemental housing benefit is properly denied where claimants were able to purchase replacement property which was decent, safe, and sanitary at a price less than they were paid for the acquired property.

Uniform Relocation Assistance Appeal of Mr. and Mrs. Frank Matney, 2 OHA 92 (Oct. 4, 1976)

UNIFORM RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION POLICIES ACT OF 1970--Continued

UNIFORM RELOCATION ASSISTANCE--Continued

Replacement Housing Payment for Homeowners--Continued

Generally--Continued

In determining what is a comparable replacement dwelling market value is but one element to be considered and is not necessarily controlling as to whether or not a replacement dwelling is comparable.

Uniform Relocation Assistance Appeal of Mr. and Mrs. Harold T. Hall, 2 OHA 102 (Nov. 22, 1976)

A claim for $184.64 for repair of floor of replacement dwelling and for closet doors to be used in replacement dwelling where necessary to make replacement dwelling decent, safe and sanitary as defined by the Act will be sustained.

Uniform Relocation Assistance Appeal of Mr. Ole Hanson, 2 OHA 106 (Nov. 29, 1976)

A claim for replacement supplemental housing benefits is properly denied where a comparable housing survey of the area within a 50-mile radius of the acquired property shows that the claimant could have purchased comparable replacement property which was decent, safe and sanitary at a price less than was paid for the acquired property.

The amount paid by the Government for the acquired property and relocation assistance benefits are separate and distinct entitlements and a promise made by a Government employee to pay relocation assistance benefits as a part of the purchase price of the acquired property would be invalid and an allegation by the appellant that such a promise had been made would not constitute grounds for administrative relief from the Secretary.

Uniform Relocation Assistance Appeal of Illys M. Busacker, 2 OHA 109 (Apr. 21, 1977)

Even though a dwelling and homesite may be located on a larger tract of acquired lands whose value is based upon uses higher and better than residential, namely, commerical uses, sec. 203(a) of the Act requires that any replacement housing payment for the homeowner shall be based on the acquisition cost of the dwelling; hence, a portion of the purchase price paid for the entire property must be attributed to the dwelling and homesite. The appraised valuation of the dwelling and homesite must reflect the fair market value of such property for residential purposes; and where the purchase price of the entire property exceeds the Government's appraised value, a proportionate share of the increase should be applied to the acquisition cost of the dwelling and homesite.

In computing allowable replacement housing benefits for a homeowner displaced by Government acquisition from a tract which is larger than the average residential lot in the area and which has been appraised and purchased as valuable for commercial uses, a determination of lot size for the homesite which is consistent with standard lots for residential purposes in the vicinity of the acquired lands will be affirmed.

Uniform Relocation Assistance Appeal of Mrs. Virginia J. Rhule, 2 OHA 138 (June 29, 1977)

Where the record shows replacement housing supplement benefits were allowed upon a relocation assistance claim in error under a mistake of law, the claimants are properly required to repay to the United States the sum so paid to them erroneously.

Uniform Relocation Assistance Appeal of Mr. and Mrs. Frederick W. Morrison, 2 OHA 147 (Aug. 9, 1977)

Where it is indicated on appeal that a determination of replacement housing supplement benefits under sec. 203 of the Act may be erroneous because it was based on selected dwellings challenged by the claimant as not equivalent or substantially the same as the acquired dwelling, the case will be remanded for further appropriate action to ascertain and allow the proper amount of replacement housing supplement benefits under the Act and the Department's implementing regulations.

Uniform Relocation Assistance Appeal of Mr. and Mrs. Norton W. Stanford, 2 OHA 160 (Oct. 19, 1977)

A claim for replacement housing supplement benefits is properly disallowed where it is shown by a preponderance of the competent evidence presented that the acquired property was not the place of permanent abode of the appellants.

Uniform Relocation Assistance Appeal of Mr. and Mrs. Maynard Hassett, 2 OHA 164 (Nov. 23, 1977)

Replacement housing benefits under sec. 203 of the Act are properly denied where the owner occupancy of the dwelling on the acquired property was for less than the minimum period of 180 days immediately prior to the initiation of negotiations for acquisition of the property.

Uniform Relocation Assistance Appeal of Mr. Barry Wayne Martin, 2 OHA 169 (Mar. 30, 1978)

In determining the total acquisition cost of an apartment dwelling connected to a restaurant and lounge on acquired property, it is proper to add to the appraisal of the acquired dwelling the proportionate costs for the land on which the dwelling is situated and for the water and sewer system for the unit, as well as the proportionate amount of the total acquisition costs for the entire property in excess of appraised valuation which is allocable to the acquisition cost of the acquired dwelling.

Additional replacement housing supplement benefits will be allowed, within the statutory limitation, where the evidence of record establishes the additional cost of purchasing a comparable replacement dwelling in excess of the cost estimated by the Government.

Replacement housing supplement benefits will be increased, within the statutory limitation, to include reimbursement of reasonable expenses incurred by the displaced person for title insurance incident to the purchase of the replacement dwelling.

Uniform Relocation Assistance Appeal of Mr. Donald P. Stephens, 2 OHA 186 (Aug. 24, 1978)

Where the record evidence shows that the mobile home on the acquired lands was a seasonal or part-time residence and not the permanent or customary and usual abode of the claimants, the claimants are ineligible to receive replacement housing payment benefits under sec. 203 of the Act and the Department's implementing regulations.

Uniform Relocation Assistance Appeal of Mr. and Mrs. Robert L. Burnett, Jr., 3 OHA 1 (Nov. 6, 1978)

Replacement housing supplement benefits will be increased on appeal, within the statutory limitation, to include reasonable costs claimed for keys and lock repair, and reasonable estimated costs for repair of a kitchen range, where such costs are indicated as necessary to make the replacement dwelling decent, safe and sanitary, as provided in sec. 203 of the Act and the Department's implementing regulations. Reimbursement for other items claimed but not indicated by the record evidence as necessary to make the replacement dwelling decent, safe and sanitary, as provided in sec. 203 of the Act and the Department's implementing regulations, is properly denied.

Uniform Relocation Assistance Appeal of Adam M. Strycharz, Anna M. Strycharz, Claire Strycharz and Marie Strycharz, 3 OHA 14 (Nov. 14, 1978)

Additional replacement housing cost differential benefits will be allowed, within the statutory limitation, where the record on appeal shows such additional costs as reasonably necessary for purchase of a comparable replacement dwelling.

Uniform Relocation Assistance Appeal of Mr. and Mrs. Edward W. Kurowski, 3 OHA 19 (Dec. 12, 1978)

A claim for supplemental housing benefits may be withdrawn by the appellant pending the completion of the condemnation proceedings of the subject property.

Uniform Relocation Assistance Appeal of Roy Sagar, 3 OHA 35 (Jan. 15, 1979)

A person who was not the record owner of the dwelling on property acquired by the United States is properly held to be ineligible for homeowner's replacement housing supplement benefits under sec. 203 of the Act and the Department's regulations.

Uniform Relocation Assistance Appeal of Mrs. James L. Bragg, 3 OHA 44 (Feb. 1, 1979)

In determining the total acquisition cost of the acquired dwelling, it is proper to add thereto the proportionate amount of the total acquisition costs for the entire property in excess of appraised valuation which is allocable to the acquisition cost of the acquired dwelling.

Where the dwelling is located on a large tract of acquired land, the acquisition cost of the dwelling properly includes the cost of a homesite for the dwelling which is of a size typical for the structure for

residential purposes in the vicinity of the acquired property.

A determination of replacement housing differential benefits under the comparative method, based upon the average asking price of three selected dwellings which are shown to be comparable to the acquired dwelling and which were available at the time of the claimants' displacement, will be affirmed in the absence of competent evidence by the claimants to challenge such determination.

Where the record shows the usual charge for a residential site survey, such as required by a bank lending money on real estate, is $100, that amount may be allowed to the displaced homeowners as reasonable incidental expenses incurred in the purchase of the residential unit of the replacement property.

Where the acquiring agency shows at a hearing that an overpayment was made on a replacement housing differential claim, as a result of the agency's omission to include in the acquisition cost of the acquired dwelling and homesite the proportionate amount of a 9.24 percent increase in the total acquisition costs for the entire property allocable to the acquisition cost of the acquired residential unit, the displaced homeowners are required to repay to the United States the excess moneys received on their claim.

Uniform Relocation Assistance Appeal of Mr. and Mrs. John C. Muldowney, 3 OHA 47 (Mar. 16, 1979)

Where the record evidence shows that the home on the acquired property was a part-time residence and not the permanent or customary and usual abode of the claimants for 180 days immediately preceding the initiation of negotiations for its aquisition, the claimants are ineligible to receive replacement housing payment benefits under sec. 203 of the Act and the Department's implementing regulations.

Uniform Relocation Assistance Appeal of Harold and Beverly Zagar, 3 OHA 137 (Oct. 10, 1979)

Reimbursement of incidental expenses under § 203 of the Act, for legal fees and for surveys, is properly limited to reasonable costs for such services as required in a closing transaction involving purchase of the replacement dwelling.

Uniform Relocation Assistance Appeal of Mr. and Mrs. William C. Wasley, 3 OHA 141 (Oct. 12, 1979)

For the purpose of a determination of what constitutes a "comparable replacement dwelling," made pursuant to sec. 203(a)(1)(A) of the Act and 41 CFR 114-50.201(d) of the Department's implementing regulations, the characteristics of the land associated with the acquired dwelling should be considered.

Uniform Relocation Assistance Appeal of Mr. and Mrs. Gilbert Schmidt, 3 OHA 145 (Nov. 2, 1979)

UNIFORM RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION POLICIES ACT OF 1970--Continued

UNIFORM RELOCATION ASSISTANCE--Continued

Replacement Housing Payment for Homeowners--Continued

Generally--Continued

Where claimants have not established that they had a right of ownership in a homesite on acquired lands, based upon a written contract of conveyance or a deed executed 180 days prior to the Government's initiation of negotiations to purchase, they are properly determined to be ineligible for homeowners' replacement housing payment benefits under § 203 of the Act and the Department's implementing regulations.

Uniform Relocation Assistance Appeal of Mr. and Mrs. Thomas E. Vines, 3 OHA 161 (Dec. 17, 1979)

Waiver of Benefits

A claim for replacement housing supplement benefits is properly disallowed where the claimants sold their property to the Government, reserving a right of use and occupancy of the dwelling thereon for a term of years, and before the expiration of the reserved term of use and occupancy and the claimants' move from the property the Congress eliminated replacement housing supplement benefits as to this class of claimants.

Uniform Relocation Assistance Appeal of Nicholas J. and Angeline Spirson, 2 OHA 56 (Sept. 16, 1976)

Claimants are ineligible for replacement housing supplement benefits where they sold their property to the Government reserving a right of use and occupancy of a portion thereof for residential use for a term of years and before moving from their dwelling on the portion so reserved Congress eliminated replacement housing supplement benefits as to this class of claimants.

Uniform Relocation Assistance Appeal of Mr. and Mrs. Frederick W. Morrison, 2 OHA 147 (Aug. 9, 1977)

A person is properly held to be ineligible for replacement housing benefits where she sold real property to the Government, reserving a right of use and occupancy of the dwelling on the property for a term of years, and before the expiration of the reserved term of use and occupancy and her move from the property the Congress eliminated replacement housing benefits as to this class of claimants.

Uniform Relocation Assistance Appeal of Mrs. Blanche Schnuck, 3 OHA 65 (Apr. 10, 1979)

Replacement Housing Payment for Tenants and Certain Others

Replacement housing payments allowable under sec. 204(2) of the Act and implementing regulations to enable a displaced tenant to make a downpayment and to cover his reasonable expenses for evidence of title, recording fees, and other closing costs, on the purchase of a decent, safe, and sanitary dwelling of standards adequate to accommodate such person in an area not generally less desirable in regard to public utilities and commercial and public facilities, do not include payments in the form of a building grant or a low interest mortgage, and a claim for such benefits is properly denied.

Uniform Relocation Assistance Appeal of James R. Wilmot, 1 OHA 86 (Feb. 12, 1975)

UNIFORM RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION POLICIES ACT OF 1970--Continued

UNIFORM RELOCATION ASSISTANCE--Continued

Replacement Housing Payment for Tenants and Certain Others--Continued

Sec. 204(2) of the Act, which provides for replacement housing payments to displaced tenants to enable them to make a downpayment and to cover allowable incidental expenses as described in sec. 203(a)(1)(C) of the Act, but not in excess of $4,000, requires that such displaced persons must match any amount in excess of $2,000 by an equal amount of their own funds.

Uniform Relocation Assistance Appeal of Benjamin F. Gallagher, 1 OHA 106 (Feb. 24, 1975)

A determination of ineligibility for relocation assistance benefits will be reversed and the cases will be remanded for further adjudication of the claims for benefits where the evidence of record, including that assembled in a hearing on appeals in the matter, shows that the claimants are persons eligible for benefits as persons who were displaced from a farm operation and from rental housing on the farm property as a result of acquisition of the real property by the United States, despite the fact that their displacements occurred before the expiration of a reserved term of use and occupancy of a portion of the property.

Uniform Relocation Assistance Appeal of Marvin L. Nunes & Co. (A Partnership of Mrs. Tessie D. Nunes Brazil and Mr. Marvin L. Nunes); Appeal of Mr. Marvin L. and Mrs. Vivian H. Nunes (Tenants); and Protest of Mr. Domingos and Mrs. Navare Machado (Tenants), 2 OHA 35 (Sept. 9, 1976)

Incidental expenses as described in sec. 203(a)(1)(C) of the Act are includable in the allowable replacement housing payment under sec. 204(2) of the Act and are not additional thereto.

Uniform Relocation Assistance Appeal of Donald F. and Sharon L. Peters, 2 OHA 97 (Nov. 22, 1976)

A determination of ineligibility for a rental replacement housing payment under sec. 204 of the Act will be affirmed where the evidence shows the dwelling on the acquired land, where the claimant resided, was a single-family dwelling owned by the claimant's parents, from whom the property was acquired, and that the claimant and his parents lived there together as a family unit. In such circumstances the claimant and his parents are properly regarded as one displaced person for the purpose of replacement housing.

Uniform Relocation Assistance Appeal of Larry H. Paysinger, 2 OHA 153 (Sept. 20, 1977)

Where the record shows the monthly rent for a mobile home replacement housing site is less than the rent which was paid for the acquired site on which the mobile home had been situated, no rental replacement housing payment is allowable under sec. 204 of the Act.

Uniform Relocation Assistance Appeal of Mrs. Lona Halles, 2 OHA 156 (Oct. 17, 1977)

UNIFORM RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION POLICIES ACT OF 1970--Continued

UNIFORM RELOCATION ASSISTANCE--Continued

Replacement Housing Payment for Tenants and Certain Others--Continued

A displaced homeowner purchases a replacement dwelling within the intent of sec. 204(2) of the Act when he salvages the dwelling formerly occupied by him on the acquired property, relocates and refurbishes it as a decent, safe, and sanitary dwelling on a replacement site acquired for the purpose, and continues to reside therein to the exclusion of a residence elsewhere.

The allowable replacement housing payment under sec. 204(2) of the Act, to a displaced homeowner who occupied the dwelling on the acquired property as owner for not less than 90 days immediately prior to the initiation of negotiations for acquisition of the property, is that amount which is necessary to enable him to make a downpayment including allowable incidental expenses described in sec. 203(a)(1)(C) of the Act, on the purchase of a decent, safe, and sanitary replacement dwelling, but not in excess of $4,000, provided, if such downpayment amount exceeds $2,000, the displaced person must match any amount in excess of $2,000 by an equal amount of his own funds.

Uniform Relocation Assistance Appeal of Mr. Barry Wayne Martin, 2 OHA 169 (Mar. 30, 1978)

Where the record shows the monthly rent for the most comparable rental replacement housing is $40 more than the reasonable, or economic, rent of the residential unit from which the claimants were displaced, a rental replacement housing differential payment of $1,920, representing the additional rental costs for a period of 4 years, is proper under sec. 204(1) of the Act and the Department's implementing regulations.

Uniform Relocation Assistance Appeal of Mr. and Mrs. Richard Grudosky, 2 OHA 210 (Sept. 18, 1978)

A person who entered into rental occupancy of a dwelling unit after negotiations were initiated by the United States to acquire the property is properly held to be ineligible for a replacement housing payment under sec. 204 of the Act.

Uniform Relocation Assistance Appeal of Mr. Marcel J. Dumonceaux, 3 OHA 63 (Apr. 9, 1979)

UNITED STATES

The authority of the United States to enforce a public right or protect a public interest is not vitiated or lost by acquiescences of its officers or agents, or by their laches, neglect of duty, failure to act, or delays in the performance of their duties.

United States v. Maurice L. Wilson, 38 IBLA 305 (Dec. 14, 1978)

United States is not subject to a defense of laches in an action to enforce a public right. Thus, where BLM took approximately 2 years to declare reversion to United States of title to land patented with reversionary clause under Recreation and Public Purposes Act, appellants may find no relief in equitable doctrine of laches.

Roberta Thompson and Richard Lee Burnham, 38 IBLA 333 (Dec. 20, 1978)

WAIVER

There can be no waiver of the Secretary's right to contest a mining claim believed to be invalid without a showing of an authority to make such a waiver and an intention to do so.

United States v. Bert L. Johnson, 23 IBLA 349 (Jan. 21, 1976)

Cashing of an oil and gas rental check, received more than 20 days after due, does not constitute a waiver which would permit reinstatement of a terminated lease in violation of 30 U.S.C. § 188(c) (1970), despite wording on the check that "by endorsement this check when paid is accepted in full payment."

Edward Malz, 24 IBLA 251 (Mar. 26, 1976) 83 I.D. 106

BLM does not waive its right to declare a lease expired by cashing an advance annual rental check and placing funds in an unearned account.

Richard P. Smoot, 39 IBLA 1 (Jan. 8, 1979)

The failure of BLM to readjust a coal lease issued pursuant to the terms of sec. 7, Mineral Leasing Act, 30 U.S.C. § 207 (1970), prior to or immediately after expiration of its 20-year period does not constitute a waiver of BLM's right to readjust said lease.

California Portland Cement Co., Rosebud Coal Sales Co., 40 IBLA 339 (May 10, 1979)

WATER AND WATER RIGHTS

GENERALLY

One challenging the accuracy of an appraisal of water based on fair market value must show by substantial evidence the nature of the alleged error; where the appraisal has been conducted in accordance with generally accepted appraisal principles, allegations of error unsupported by evidence will be given little weight.

An attempted adjudication of Federal water rights will not be recognized where the State court 1) lacked jurisdiction over the United States for failure to serve process upon the Attorney General of the United States or his designated representative pursuant to 43 U.S.C. § 666(b) (1970); and 2) lacked jurisdiction over the subject matter for failure of the litigation to conform to the requirements of a general litigation of all water rights pursuant to 43 U.S.C. § 666(a) (1970).

A lessee of the water from a well owned by the Federal Government, who agrees that his use of the water will not be used as a basis for obtaining a permanent water right and who nevertheless proceeds to try to obtain a water right in State court based on that use, will be estopped from asserting any resulting decree of the State court for any purpose.

Park Center Water District and The Canon Heights Irrigation and Reservoir Co., 28 IBLA 368 (Feb. 3, 1977) 84 I.D. 87

By acquisition of the lands now comprising the Western States, the United States acquired all rights appurtenant to such lands, including water rights.

Under the Property Clause, Congress has the power to control the disposition and use of water on, under, or appurtenant to original public domain lands, and it is not lightly inferred that this power has been exercised.

To the extent Congress has not clearly granted authority to the States over waters which are in, on, under or appurtenant to Federal lands comprising the public domain and reserved public domain, the Federal Government maintains its sovereign rights in such waters and may put them to use irrespective of State law.

Federal control over the disposition and use of water in, on, under or appurtenant to Federal land ultimately rests on the Supremacy Clause, which permits the Federal Government to exercise its constitutional prerogatives without regard to State law.

The admission of a State into the Union and the "equal footing" doctrine did not divest the United States of its plenary control over waters which are in, on, under or appurtenant to Federal lands comprising the public domain and reserved public domain.

Federal control over its needed water rights, unhampered by compliance with procedural and substantive State law, is supported by the Supremacy Clause and the doctrine that Federal activities are immune from State regulation unless there is specific congressional action providing for State control.

Originally, the common law riparian rules of natural flow applied to the public lands; these riparian rules could be changed by State legislatures only if such changes did not impair the right of the United States to the continued flow of water bordering its lands needed for the beneficial use of Government property, or if the Congress expressly consented.

Three Federal statutes provide the general basis for State regulatory authority over water rights: Act of July 26, 1866, § 9, 14 Stat. 253; Act of July 9, 1870, § 17, 16 Stat. 218, 43 U.S.C. § 661 (1976); and the Desert Land Act of 1877, 19 Stat. 377, 43 U.S.C. § 321 *et seq.* (1976).

The Act of July 26, 1866, § 9, 14 Stat. 253, and the Act of July 9, 1870, § 17, 16 Stat. 218, 43 U.S.C. § 661 (1976), sanctioned private possessory rights to water on the public lands asserted under local laws and customs; Congress in effect waived its proprietary and riparian rights to water on the public domain to the extent water is appropriated by members of the public under State law in conformance with the grant of authority found in these two Acts, and Congress thereby confined the assertion of inchoate Federal water rights to unappropriated waters that exist at any point in time.

Supreme Court *dicta* concerning the effect of the Desert Land Act of 1877, 19 Stat. 377, 43 U.S.C. § 321 *et seq.* (1976), on Federal water rights are somewhat at war with each other; but Supreme Court decisions upholding Federal reserved water rights must mean that the Desert Land Act of 1877 did not divest the United States of its authority, as sovereign, to use the unappropriated waters on the public lands for governmental purposes.

Since the Federal Government has never granted away its right to make use of unappropriated waters on Federal lands, the United States retains the power to vest in itself water rights in unappropriated waters on, in, under, or appurtenant to Federal lands, and it may exercise such power independent of substantive State law.

For purposes of the Executive Order of Apr. 17, 1926, the term "spring" means a discrete natural flow of water emerging from the earth at a reasonably distinct location, whether or not such flow constitutes a source of or is tributary to a water course, pond, or other body of surface water. The term "waterhole" means a dip or hole in the earth's surface where surface or groundwater collects and which may serve as a watering place for man or animals.

The Executive Order withdrew, as of Apr. 17, 1926, all lands containing important springs and waterholes that existed as of that date on unappropriated, unreserved public lands.

The Executive Order does not affect a valid, private right to use some or all of the waters of such a source that vested under the applicable State laws, custom or usage prior to Apr. 17, 1926.

The Executive Order does not withdraw artifically developed sources of water or manmade structures for collection of water on the public domain. However, any interest held in those artificially developed or constructed sources or structures passes to the United States upon abandonment by the developer or his successor in interest by virtue of the United States' ownership of the land.

The Executive Order withdraws, by operation of law, lands which become of the character contemplated in the Order subsequent to the date of the Order; *i.e.*, vacant, unappropriated, unreserved public lands upon which springs or waterholes come into existence after Apr. 17, 1926.

The Executive Order withdraws, by operation of law, any vacant, unappropriated, unreserved public land upon which is located a spring or waterhole and for which a private vested right to use all of such water under applicable State law, custom and usage has previously existed upon abandonment or forfeiture of that State water right under the terms of the applicable State law, custom or usage.

The Executive Order withdraws all lands containing springs or waterholes as defined and subject to the limitations set forth above, regardless of whether the water source has been the subject of an official finding as to its existence and location.

The priority date for the public right to use the waters of a spring or waterhole withdrawn under the Order is Apr. 17, 1926, for all public springs and waterholes existing on that date. Those public springs and waterholes that naturally come into existence at a later date are withdrawn when they come into existence.

Any action taken by private party who did not have a vested State water right prior to Apr. 17, 1926, or had not received appropriate permission from the United States subsequent to that date to make use of the public waterhole or spring withdrawn by the Order is a nullity and of no force and effect. Any entry onto the reserved land for such purpose constitutes a trespass.

The purposes for which water is reserved under the 1926 Order are (a) stockwatering, (b) human consumption, (c) agriculture and irrigation, including sustaining fish, wildlife and plants as a food and forage source, and (d) flood, soil, fire and erosion control.

Because the Federal Land Policy and Management Act of 1976, 43 U.S.C. § 1701 *et seq.* (1976), repealed both authorizing statutes under which the Apr. 17, 1926, Order was issued, springs and waterholes on the public domain coming into existence after Oct. 21, 1976, are not withdrawn by the Apr. 17, 1926, Order but must be withdrawn under other, still existing legislative authority to be effective.

Sec. 701(g) of FLPMA, 43 U.S.C. § 1701 notes (1976), maintains the status quo in the relationship between the States and the Federal Government on water, and allows for (a) the continued appropriation of unappropriated nonnavigable waters on the public domain by private persons pursuant to State law as authorized by the Desert Land Act; (b) the right of the United

WATER AND WATER RIGHTS--Continued

GENERALLY--Continued

States to use unappropriated water for the congressionally recognized and mandated purposes set forth in legislation providing for the management of the public domain; and (c) application by the United States to secure water rights pursuant to State law for these purposes.

The National Park Service and Fish and Wildlife Service may appropriate water to fulfill any congressionally authorized function for areas under their administration.

Federal Water Rights of the National Park Service, Fish and Wildlife Service, Bureau of Reclamation and the Bureau of Land Management, M-36914 (June 25, 1979)
86 I.D. 553

Water is not a locatable mineral and sales thereof cannot be considered in determining whether there has been a valuable discovery.

United States v. Ted G. Ax, 43 IBLA 146 (Sept. 28, 1979)

FEDERAL APPROPRIATION

The United States has the right to appropriate water on its own property for congressionally authorized uses, which right arises from actual use of unappropriated water by the United States to carry out congressionally authorized management objectives on Federal lands, but may not predate in priority the date action is taken leading to an actual use, and it may not adversely affect other rights previously established under State law.

The appropriation of water by the Federal Government for authorized Federal purposes cannot be strictly limited by State substantive law; for example, by what State law says is a "diversion" of water or a "beneficial use" for which water can be appropriated.

The management programs mandated by Congress in such Acts as the Taylor Grazing Act and FLPMA require the appropriation of water by the United States in order to assure the success of the programs and carry out the objectives established by Congress.

FLPMA, the Taylor Grazing Act, the O&C Act, and other statutes permit the United States to appropriate water for the diverse purposes found in the various statutes.

FLPMA authorizes the BLM to appropriate water for such uses as fish and wildlife maintenance and protection, scenic value preservation, and human consumption, and protection of areas of critical environmental concern.

Federal Water Rights of the National Park Service, Fish and Wildlife Service, Bureau of Reclamation and the Bureau of Land Management, M-36914 (June 25, 1979)
86 I.D. 553

FEDERALLY RESERVED WATER RIGHTS

Where a waterhole and the surrounding land were withdrawn pursuant to both an Executive Order and an Act of Congress and reserved exclusively for use by the public before the water had been appropriated by others, the Federally reserved water right is superior to and precludes any acquisition of rights to the water by others.

Park Center Water District and The Canon Heights Irrigation and Reservoir Co., 28 IBLA 368 (Feb. 3, 1977)
84 I.D. 87

WATER AND WATER RIGHTS--Continued

FEDERALLY RESERVED WATER RIGHTS--Continued

When the Federal Government withdraws land from the public domain and reserves it for a Federal purpose, by implication, it reserves appurtenant water then unappropriated to the extent needed to accomplish the purpose of the reservation, and the reserved water right vests on the date of the reservation and is superior to the rights of future appropriators.

The intent to reserve water is inferred if previously unappropriated water is necessary to accomplish the purposes for which the land reservation is created, but where water is only valuable for a secondary use of the reservation there arises a contrary inference that the United States would acquire water in the same manner as other public or private appropriators.

The priority date of the Federal reserved water right for purposes of determining seniority of water rights relative to those obtained under State or other Federal law is the date of the Federal reservation or withdrawal action initiated towards a reservation.

The volume and scope of particular reserved water rights are Federal questions calling for the application of Federal law; State law requirements such as notice of application to beneficial use and restrictions on beneficial use are not applicable to reserved water rights.

Reserved water rights encompass both existing and reasonably foreseeable future water uses necessary to fulfill the purposes of the reservation.

While persuasive arguments can be made for and against the application of reserved water rights on acquired lands, it is the policy of this Department to obtain water rights for acquired lands through means other than the assertion of a reserved water right.

The Act of June 16, 1934, 30 U.S.C. § 229a (1976), creates a reserved right when an oil and gas prospecting permittee or lessee strikes water "of such quality and quantity as to be valuable and usable at a reasonable cost for agriculture, domestic, or other purposes" as found by the Secretary.

The withdrawals of lands for powersites under 43 U.S.C. § 141 (1970) do not carry with them reserved water rights for purposes under the administration of the Department of the Interior, simply because of their reservation as a powersite.

Water sources located within stock driveways and reserved pursuant to sec. 10 of the Act of Dec. 29, 1916, 43 U.S.C. § 300 (1970), are reserved to the extent necessary to provide for stockwatering during the process of moving livestock through these reserved access corridors.

Oil shale withdrawals administered by the Department of the Interior have reserved water rights for the purposes of investigation, examination and classification of those lands. Water is not reserved for actual oil shale development.

The Taylor Grazing Act created no reserved water rights.

There are no reserved water rights on the revested Oregon and California Railroad lands and the Coos Bay Wagon Road lands, the "O&C" lands.

Classification of lands under the Classification and Multiple Use Act of 1964, 43 U.S.C. § 1411 et seq. (1970), does not create reserved water rights.

Designation of lands as sanctuaries for wild, free-roaming horses and burros under the Act of Dec. 15, 1971, 16 U.S.C. § 1333 *et seq.* (1976), does not reserve water for the purposes of wild horse and burro drinking.

Rivers administered by BLM that have been designated as components of the Wild and Scenic Rivers System under 16 U.S.C. §§ 1271-1287 (1976) carry with them reserved water rights sufficient to fulfill the purposes of the Act.

The Federal Land Policy and Management Act, 43 U.S.C. § 1701 *et seq.* (1976), does not establish any reserved rights in BLM lands.

Sec. 8 of the 1902 Reclamation Act, 43 U.S.C. § 372 *et seq.* (1976), prohibits the Bureau of Reclamation from claiming any reserved water rights for any reclamation project unless the terms of any project authorization subsequent to 1902 can fairly be read to provide for a reservation of water.

The particular reserved water rights for national park and national monument areas include water required for scenic, natural, and historic conservation uses; wildlife conservation uses; sustained public enjoyment uses; and National Park Service personnel uses; all of which are intimately related to the fundamental purpose for park and monument reservation, as articulated in 16 U.S.C. § 1 (1976).

Among other reserved water rights for national parks and national monuments, 16 U.S.C. § 1 (1976) encompasses reserved water rights for concession uses to provide sustained public enjoyment and reserved water rights for water-borne public enjoyment and recreation.

Congress has taken no action subsequent to the National Park Service Organic Act of Aug. 25, 1916, 39 Stat. 535, 16 U.S.C. § 1 (1976), to negate the implied intent contained in the Organic Act that all unappropriated waters necessary to fulfill the purposes of park areas are reserved as of the date of the enabling legislation.

The discretionary authority contained in the Act of Aug. 7, 1946, 60 Stat. 885, 16 U.S.C. § 17j-2(g) (1976), authorizing the National Park Service to acquire water rights in accordance with local laws, is not inconsistent with the assertion of the reserved water rights principle and is readily distinguishable from Acts requiring deference to State water law.

As a general rule, the above-developed reserved water rights apply to components of the National Park System other than national parks and national monuments, though the extent of particular reserved water rights must be determined on a case-by-case basis, involving an interpretation of 16 U.S.C. § 1 (1976) and the establishing legislation.

Executive branch reservations for native bird preserves, migratory bird refuges, game ranges, fish hatcheries, elk refuges and similar refuges and preserves reserved sufficient water needed for the maintenance of the species (*e.g.*, ecosystem food supply, breeding habitat, fire protection, domestic needs of Fish and Wildlife Service personnel) mentioned in the executive orders establishing the individual reservations.

Executive branch refuge reservations superimposed on areas previously withdrawn for powersites, reclamation or other purposes obtain reserved water rights necessary to fulfill the specific purposes for the refuge reservations.

Wildlife Refuge uses authorized by the Refuge Receipts Act of 1935, 49 Stat. 383, 16 U.S.C. § 715s(f) (1976); the Refuge Recreation Act of 1962, 76 Stat. 653, 16 U.S.C. §§ 460k-460k-4 (1976); and the National Wildlife Refuge Administration Act of 1966, 80 Stat. 927, 16 U.S.C. §§ 668dd-668ee (1976), such as public recreational uses, do not obtain reserved water rights under existing precedent.

The Wild and Scenic Rivers Act, 82 Stat. 917, 16 U.S.C. § 1284(c) (1976), contains an express, though negatively phrased, assertion of Federal reserved water rights.

The extent of the water reserved for wild and scenic rivers is the amount of unappropriated water necessary to protect the particular aesthetic, recreational, scientific, biotic or historical features which led to the river's inclusion as a component of the National Wild and Scenic Rivers System, and to provide public enjoyment of such values.

Designation of wild and scenic rivers does not automatically reserve the entire unappropriated flow of the river and an examination of the individual features which led to each component river's designation must be conducted to determine the extent of the reserved water right.

Areas which are congressionally designated as wilderness under the Wilderness Act of Sept. 3, 1964, 78 Stat. 890, 16 U.S.C. § 1131 *et seq.* (1976), obtain reserved water rights for the maintenance of minimum stream flows and lake levels (*e.g.*, for science appreciation and primitive water-borne recreation) and for ecological maintenance (*e.g.*, evapotranspiration for natural communities, wildlife watering, firefighting).

Federal Water Rights of the National Park Service, Fish and Wildlife Service, Bureau of Reclamation and the Bureau of Land Management, M-36914 (June 25, 1979)
86 I.D. 553

STATE LAWS

An attempted adjudication of Federal water rights will not be recognized where the State court 1) lacked jurisdiction over the United States for failure to serve process upon the Attorney General of the United States or his designated representative pursuant to 43 U.S.C. § 666(b) (1970); and 2) lacked jurisdiction over the subject matter for failure of the litigation to conform to the requirements of a general litigation of all water rights pursuant to 43 U.S.C. § 666(a) (1970).

Where a waterhole and the surrounding land were withdrawn pursuant to both an Executive Order and an Act of Congress and reserved exclusively for use by the public before the water had been appropriated by others, the Federally reserved water right is superior to and precludes any acquisition of rights to the water by others.

Park Center Water District and The Canon Heights Irrigation and Reservoir Co., 28 IBLA 368 (Feb. 3, 1977)
84 I.D. 87

When considering an application for determination of right-of-way privileges, the Department of the Interior has no power to determine questions of control and appropriation of water rights between private parties which is a matter of State law. An application for a water pipeline right-of-way will not be approved where the applicant has no existing right to the water which he proposes to convey.

Broken H. Ranch Co., 33 IBLA 386 (Jan. 26, 1978)

WATER AND WATER RIGHTS--Continued

STATE LAWS--Continued

Since Congress has not generally directed the Federal Government to comply with State water law, such compliance is required only in those specific instances where Congress has so provided, but in the converse, Congress has not prohibited the United States from voluntarily complying with such State water laws.

State law should be followed to the greatest practicable extent in acquiring Federal water rights. This includes following State procedural law in all cases involving appropriation of non-reserved water rights and State substantive law where that law recognizes the Federal appropriative right in all pertinent respects.

Federal Water Rights of the National Park Service, Fish and Wildlife Service, Bureau of Reclamation and the Bureau of Land Management, M-36914 (June 25, 1979) 86 I.D. 553

WATER POLLUTION CONTROL

FEDERAL WATER POLLUTION CONTROL ACT

Generally

The requirement for a permit under sec. 404 of the Federal Water Pollution Control Act applies to the Bureau of Reclamation to the same extent as any other person, and with certain exceptions the Bureau must obtain a permit from the Corps of Engineers prior to any discharge of dredged or fill material into the navigable waters.

Activities "affirmatively authorized by Congress," which are excepted from sec. 10 of the Rivers and Harbors Act of 1899, are not excepted from sec. 404 of the Federal Water Pollution Control Act. Notwithstanding the exception of a discharge of dredged or fill material under sec. 10 of the Rivers and Harbors Act, compliance with sec. 404 is required.

A permit under sec. 404 of the Federal Water Pollution Control Act is required for the discharge of dredged or fill material whenever: (a) the "discharge" constitutes any addition of any pollutant to navigable waters from any discernible, confined and discrete conveyance, including the placement of fill and the building of any structure or impoundment; and (b) the "dredged material" is dredged spoil that is excavated or dredged from the waters of the United States; or (c) the "fill material" includes any material used for the primary purpose of replacing an aquatic area with dry land or of changing the bottom elevation of a water body, including any structure which requires rock, sand, dirt or other material for its construction; and (d) the discharge is made into "waters of the United States," which extend beyond those waters meeting the traditional tests of navigability to those encompassed by the broadest possible constitutional interpretation.

To secure the exemption under sec. 404(r) of the Federal Water Pollution Control Act for projects described in an environmental statement, compliance with seven specific conditions is required. The exemption does not apply to the maintenance of existing Federal projects, but only to new construction. While the exemption provides an alternative procedure to achieve compliance with sec. 404 of the Act for a limited category of Federal projects under very specific conditions, it does not lessen the substantive requirements that apply to the discharge of dredged or fill material.

To secure the exemption under sec. 404(f)(1) of the Federal Water Pollution Control Act for the maintenance of currently serviceable structures, compliance with four specific conditions is required. The exemption does not apply to the discharge of dredged material incident to maintenance dredging, or to new construction.

Permit Requirements for Discharge of Dredged or Fill Material Under Section 404 of the Federal Water Pollution Control Act, 33 U.S.C. § 1344, M-36915 (Aug. 27, 1979) 86 I.D. 400

WILD AND SCENIC RIVERS ACT

Oil and gas lease offers embracing lands within an area under consideration as a potential wild and scenic river area under sec. 5(d) of the Wild and Scenic Rivers Act, 16 U.S.C. § 1276(d) (1970), or within adjacent areas having special resource values which might be damaged by oil and gas leasing may be properly rejected in the exercise of the Secretary's discretion in leasing.

John Oakason, Heard Oil Co., 19 IBLA 191 (Mar. 18, 1975)

Rosita Trujillo, 21 IBLA 289 (Aug. 11, 1975)

A public sale application, filed pursuant to the Unintentional Trespass Act of Sept. 26, 1968, 43 U.S.C. §§ 1431-1435 (1970), and 43 CFR Part 2785 (1971), embracing lands which the records show to be withdrawn by Public Land Order No. 5490 on Feb. 12, 1975, and withdrawn under the Wild and Scenic Rivers Act on Oct. 2, 1968, is properly rejected.

T. E. Markham, 24 IBLA 5 (Feb. 4, 1976)

The Wild and Scenic Rivers Act withdrew from appropriation under the mining laws the minerals in Federal lands which constitute the bed or bank or are situated within one-quarter mile of the bank of any river listed as a potential addition to the Wild and Scenic River System. This withdrawal does not extend to minerals in lands near tributaries of designated rivers unless the tributaries were expressly included.

Where a statute designates the Illinois River as a potential addition to the river system, and similarly designates other rivers and their tributaries, the tributaries of the Illinois River are not included as potential additions, under the principle *inclusio unius alterius exclusio est*.

Walter D. Freeman et al., 25 IBLA 150 (June 10, 1976)

It is not necessary to reject an application filed pursuant to the Act of Feb. 15, 1901, for a right-of-way in an area adjacent to but outside of the boundaries of an area designated as a potential addition to the Wild and Scenic Rivers System, unless it is determined that the project would invade the area or diminish the scenic, recreational, and fish and wildlife values present within the potential wild, scenic, or recreational river area, or there are other justifiable grounds for rejection.

Van Rietmann, 25 IBLA 171 (June 14, 1976)

WILD AND SCENIC RIVERS ACT--Continued

Public land within one-quarter mile of the banks of a river designated by Act of Congress for potential addition to the national wild and scenic rivers system is withdrawn by statute from entry, sale, or other disposition under the public land laws of the United States for a designated period to allow a study of the suitability of the river for inclusion in the system and a report to Congress thereon. This withdrawal, however, does not preclude a right-of-way grant which does not involve a conveyance of title or rights leading thereto.

The Secretary has the discretionary authority to grant a right-of-way application which includes an area designated for potential addition to the national wild and scenic rivers system where it is determined to be in the public interest. In the exercise of that discretion it is appropriate to consider the suitability of the subject area for inclusion in the system, classification of the characteristics (wild, scenic, or recreational) of the river area, and whether such a land use will unreasonably interfere with the values disclosed.

Lower Valley Power & Light, Inc., 29 IBLA 107 (Feb. 23, 1977)

The decision to issue an oil and gas lease to the first-qualified offeror is within the discretion of the Secretary of the Interior, and offers within proposed wild and scenic river areas may be rejected to protect such areas.

The Bureau of Land Management may require the execution of special stipulations, including a no-surface-occupancy stipulation, to protect environmental and other land use values, as a condition for issuing an oil and gas lease. Where the Bureau of Land Management, in a decision requiring a no-surface-occupancy stipulation along a proposed wild and scenic river corridor, has considered all information available to it, has adequately weighed the factors involved, and the appellant has not shown sufficient reason to change the result, the decision will be upheld.

Questa Petroleum Co., 33 IBLA 116 (Dec. 16, 1977)

The Bureau of Land Management may require the execution of special stipulations, including a no-surface occupancy stipulation, to protect environmental and other land use values, as a condition for issuing an oil and gas lease. Where the Bureau of Land Management, in a decision requiring a no-surface-occupancy stipulation in a scenic area, has considered all information available to it, has adequately weighed the factors involved, and the appellant has not shown sufficient reason to change the result, the decision will be upheld.

Robert L. Healy, 35 IBLA 66 (May 12, 1978)

A stipulation prohibiting drilling and storage of oil on a portion of an oil and gas lease of 160 acres in order to protect an area of a river which is in a study section of the Wild and Scenic Rivers Act is reasonable, without consideration of other factors, where it leaves three-quarters of the lease open to regular activity.

Duncan Miller, 35 IBLA 108 (May 15, 1978)

WILD AND SCENIC RIVERS ACT--Continued

The Wild and Scenic Rivers Act withdrew from appropriation under the mining laws the minerals in Federal lands which constitute the bed or bank or are situated within one-quarter mile of the bank of any river listed as a potential addition to the Wild and Scenic River System. Land within one-quarter mile of the bank of the Illinois River, Oregon, a river designated in sec. 5(a) of the Act as a potential addition to the system, is withdrawn from mineral entry and therefore, not available for mining claims.

Robert Corbett, 36 IBLA 84 (July 12, 1978)

The Secretary of the Interior may require execution of special stipulations reasonably designed to protect environmental and other land use values as a condition precedent to the issuance of an oil and gas lease. Oil and gas lease offers within area proposed for inclusion in the wild and scenic river system may be rejected to protect such areas.

The Bureau of Land Management may require the execution of special stipulations, including a no-surface-occupancy stipulation, to protect environmental and other land use values, as a condition for issuing an oil and gas lease. Where the Bureau of Land Management, in a decision requiring a no-surface-occupancy stipulation along a proposed wild and scenic river corridor, has considered all information available to it, has adequately weighed the factors involved, and the appellant has not shown sufficient reason to change the result, the decision will be upheld.

Dean W. Rowell, 37 IBLA 387 (Nov. 6, 1978)

Designation of a river for potential addition to the national wild and scenic rivers system, pursuant to the Wild and Scenic Rivers Act of 1968, *as amended*, 16 U.S.C. § 1271 *et seq.* (1976), withdraws Federal lands constituting the bed or bank or within one-quarter mile of the bank of such river from all forms of appropriation under the mining laws, and on appeal the mining claimant bears the burden of showing by survey or other evidence that his claim is outside the withdrawn area.

Barry C. Binning, 39 IBLA 390 (Feb. 28, 1979)

Rivers administered by BLM that have been designated as components of the Wild and Scenic Rivers System under 16 U.S.C. §§ 1271-1287 (1976) carry with them reserved water rights sufficient to fulfill the purposes of the Act.

The Wild and Scenic Rivers Act, 82 Stat. 917, 16 U.S.C. § 1284(c) (1976), contains an express, though negatively phrased, assertion of Federal reserved water rights.

The extent of the water reserved for wild and scenic rivers is the amount of unappropriated water necessary to protect the particular aesthetic, recreational, scientific, biotic or historical features which led to the river's inclusion as a component of the National Wild and Scenic Rivers System, and to provide public enjoyment of such values.

Designation of wild and scenic rivers does not automatically reserve the entire unappropriated flow of the river and an examination of the individual features which led to each component river's designation must be conducted to determine the extent of the reserved water right.

Federal Water Rights of the National Park Service, Fish and Wildlife Service, Bureau of Reclamation and the Bureau of Land Management, M-36914 (June 25, 1979) 86 I.D. 553

WILD FREE-ROAMING HORSES AND BURROS ACT

A district manager's decision denying a grazing permit for 10 domestic horses, based on the fact that such a denial was required for proper range management and for protection of wild horses under the Wild Free-Roaming Horses and Burros Act, 85 Stat. 649-651, will be overruled where evidence presented at a hearing shows that granting the permit will not interfere with BLM's management of the wild horses under the Act.

Chester Baker, 26 IBLA 257 (Aug. 18, 1976)

Where claimants have filed claims to horses on the public lands under sec. 5 of the Wild Horses and Burros Act, 16 U.S.C. § 1335 (Supp. IV 1976), and pursuant to the regulations in 43 CFR Subpart 4713, and failed to recover them within a reasonable period of time as provided in gathering authorizations issued by the Bureau of Land Management, the Department has no authority to nullify their claims of ownership; the regulations allow more than one authorization to be obtained; claimants in proper circumstances may obtain further authorizations; and upon compliance with legal requirements may gather and claim their horses and burros.

George B. Shaffner et al., 26 IBLA 310 (Aug. 30, 1976)

One who has laid claim, pursuant to the Wild Free-Roaming Horses and Burros Act, to horses on the public lands and who does not remove them within a reasonable period, is subject to having the renewal of his grazing lease denied.

Truman and Velma Cross, 29 IBLA 4 (Feb. 7, 1977)

A district office decision denying an amended claim for ownership of horses under sec. 5 of the Wild Free-Roaming Horses and Burros Act of Dec. 15, 1971, 16 U.S.C. § 1335 (1976), will be reversed where appellant shows that due to the vastness and nature of the terrain involved the original claim was only an estimate of the number of horses within the allotment, that the additional horses claimed are progeny of the original horses gathered as authorized by BLM, that the allotment on which these horses are located is fenced, that appellant applied to amend its claim, and that appellant has never conceded ownership of these horses.

Salmon River Cattlemen's Ass'n, Inc., 39 IBLA 381 (Feb. 28, 1979)

Designation of lands as sanctuaries for wild, free-roaming horses and burros under the Act of Dec. 15, 1971, 16 U.S.C. § 1333 *et seq.* (1976), does not reserve water for the purposes of wild horse and burro drinking.

Federal Water Rights of the National Park Service, Fish and Wildlife Service, Bureau of Reclamation and the Bureau of Land Management, M-36914 (June 25, 1979)
86 I.D. 553

WILDERNESS ACT

National forest public lands which have not been withdrawn from oil and gas leasing but are under study by the Forest Service as a proposed wilderness area are available for leasing in the discretion of, and under conditions imposed by, the Secretary of the Interior. Such discretion is not properly exercised when the Bureau of Land Management rejects an offer solely upon the recommendation of the Forest Service that land is a "candidate" for a proposed wilderness area without making an independent determination that leasing, with

WILDERNESS ACT--Continued

appropriate protective stipulations, is or is not in the public interest.

Eudora E. Hartley, 23 IBLA 102 (Dec. 23, 1975)

Public lands in national forests are presently open to oil and gas leasing regardless of whether they are part of an officially designated wilderness area. However, where the land is within such an established wilderness area, the Secretary of Agriculture has the statutory authority to prescribe reasonable stipulations for the protection of the wilderness character of the land consistent with the use of the land for the purpose of the lease, although only the Secretary of the Interior may close the land to leasing or prohibit the issuance of a lease.

Stanley M. Edwards, 24 IBLA 12 (Feb. 6, 1976)
83 I.D. 33

Areas which are congressionally designated as wilderness under the Wilderness Act of Sept. 3, 1964, 78 Stat. 890, 16 U.S.C. § 1131 *et seq.* (1976), obtain reserved water rights for the maintenance of minimum stream flows and lake levels (*e.g.*, for science appreciation and primitive water-borne recreation) and for ecological maintenance (*e.g.*, evapotranspiration for natural communities, wildlife watering, firefighting).

Federal Water Rights of the National Park Service, Fish and Wildlife Service, Bureau of Reclamation and the Bureau of Land Management, M-36914 (June 25, 1979)
86 I.D. 553

WILDLIFE REFUGES AND PROJECTS

GENERALLY

The general prohibition against oil and gas leasing in wildlife refuges contained in 43 CFR 3101.3-3 (unless there is drainage) is a formal exercise of the Secretary's discretion under sec. 17 of the Mineral Leasing Act of 1920, *as amended*.

"Waterfowl production areas" are within the meaning of "wildlife refuge lands" in 43 CFR 3101.3-3(a) and, therefore, are subject to the prohibition against oil and gas leasing (except where drainage is involved) contained in 43 CFR 3101.3-3(a)(1).

T. R. Young, Jr., 20 IBLA 333 (June 11, 1975)

The prohibition in 43 CFR 3101.3-3(a)(1) against leasing for oil and gas in wildlife refuge lands, except where there is drainage, applies to areas withdrawn for waterfowl production, even though the withdrawal order did not prohibit leasing. Offers for such lands and lakebeds riparian thereto are properly rejected.

A. G. Golden, 21 IBLA 76 (June 25, 1975)

An application for lease of geothermal resources within a wildlife refuge is properly rejected because leasing of such areas is specifically prohibited by the Geothermal Resources Act and 43 CFR 3201.1-6.

Antoinette Carter, 37 IBLA 222 (Oct. 12, 1978)

WILDLIFE REFUGES AND PROJECTS--Continued

GENERALLY--Continued

The National Park Service and Fish and Wildlife Service may appropriate water to fulfill any congressionally authorized function for areas under their administration.

Federal Water Rights of the National Park Service, Fish and Wildlife Service, Bureau of Reclamation and the Bureau of Land Management, M-36914 (June 25, 1979)
86 I.D. 553

Land within the National Desert Wildlife Range is not subject to noncompetitive oil and gas leasing.

Kenneth F. Cummings, 43 IBLA 110 (Sept. 28, 1979)

The general prohibition against oil and gas leasing in wildlife refuges contained in 43 CFR 3101.3-1 (unless there is drainage) is a formal exercise of the Secretary's discretion under sec. 17 of the Mineral Leasing Act of 1920, *as amended*, 30 U.S.C. § 226 (1976).

Tucker and Snyder Exploration, Inc., 43 IBLA 235 (Oct. 10, 1979)

LEASES AND PERMITS

The drawing of an offer for a noncompetitive lease in a simultaneous oil and gas lease drawing creates no vested rights in the offeror, and the offeror cannot compel the issuance of a lease before an environmental analysis has been made where the Bureau of Land Management has determined that the environmental analysis is necessary for the protection of the resources of the particular area.

Paula J. Jones, 24 IBLA 76 (Feb. 24, 1976)

The issuance of sodium prospecting permits is discretionary with the Secretary of the Interior, and the Secretary may refuse to issue permits for lands withdrawn for wildlife purposes if the use of the lands for mineral prospecting and development activities would adversely affect the wildlife habitat.

Where the regulations and Departmental and BLM Manuals do not specifically state how disputes between the Fish and Wildlife Service and the Bureau of Land Management over issuing sodium prospecting permits for lands within wildlife refuge areas are to be resolved, but the Departmental manuals indicate that such decisions are to be made by the Secretary and the BLM Manual directs that such applications be forwarded to the Washington Office, a decision of a State Office rejecting an application for a sodium prospecting permit will be set aside and the case remanded for processing in accordance with the Departmental and BLM Manuals.

Vernal E. Ross et al., 27 IBLA 4 (Sept. 17, 1976)

The Bureau of Land Management may issue a sodium prospecting permit for lands adjacent to areas withdrawn for wildlife conservation purposes subject to a stipulation which provides that, in the event of discovery of an exploitable sodium deposit, no preference right lease will be issued unless hydrologic and other environmental analyses indicate that sodium ore can be removed without a significant adverse environmental impact on the wildlife habitat within the withdrawn areas.

David E. Hughes, 27 IBLA 46 (Sept. 23, 1976)

WILDLIFE REFUGES AND PROJECTS--Continued

RIPARIAN RIGHTS

Executive branch reservations for native bird preserves, migratory bird refuges, game ranges, fish hatcheries, elk refuges and similar refuges and preserves reserved sufficient water needed for the maintenance of the species (*e.g.*, ecosystem food supply, breeding habitat, fire protection, domestic needs of Fish and Wildlife Service personnel) mentioned in the executive orders establishing the individual reservations.

Executive branch refuge reservations superimposed on areas previously withdrawn for powersites, reclamation or other purposes obtain reserved water rights necessary to fulfill the specific purposes for the refuge reservations.

Wildlife Refuge uses authorized by the Refuge Receipts Act of 1935, 49 Stat. 383, 16 U.S.C. § 715s(f) (1976); the Refuge Recreation Act of 1962, 76 Stat. 653, 16 U.S.C. §§ 460k-460k-4 (1976); and the National Wildlife Refuge Administration Act of 1966, 80 Stat. 927, 16 U.S.C. §§ 668dd-668ee (1976), such as public recreational uses, do not obtain reserved water rights under existing precedent.

Federal Water Rights of the National Park Service, Fish and Wildlife Service, Bureau of Reclamation and the Bureau of Land Management, M-36914 (June 25, 1979)
86 I.D. 553

WITHDRAWALS AND RESERVATIONS

GENERALLY

Settlement on a homestead claim in Alaska 2 days prior to a withdrawal of the land does not except the land from the withdrawal where the claimant failed to file his notice of location within 90 days after settlement as required by the Act of Apr. 29, 1950, 64 Stat. 94, 43 U.S.C. §§ 270, 270-5, 270-6 (1970), and his notice is properly held to be unacceptable for recordation.

Gary Lee Slay, 18 IBLA 345 (Jan. 14, 1975)

A selection application by the State of Alaska must be rejected where all of the applied for land is withdrawn from State selection.

State of Alaska, 18 IBLA 351 (Jan. 15, 1975)

Lands withdrawn under sec. 11 of the Alaska Native Claims Settlement Act, 43 U.S.C. § 1610 (Supp. III 1973), are withdrawn from all forms of appropriation under the public land laws, including, without limitation, the Recreation and Public Purposes Act, *as amended*, 43 U.S.C. §§ 869 to 869-3 (1970), and an application under the latter Act for such withdrawn lands is properly rejected.

Alaska Department of Fish and Game, 20 IBLA 50 (Apr. 23, 1975)

A claimant's occupancy of a headquarters site prior to a withdrawal does not establish a "valid existing right" excepted by the withdrawal where credit for his occupancy prior to the withdrawal cannot be given under the Act of Apr. 29, 1950, because the claimant initiated his occupancy more than 90 days prior to the filing of his notice and did not file a notice of location or purchase application prior to the withdrawal.

Rene P. Lamoureux, 20 IBLA 243 (May 16, 1975)

WITHDRAWALS AND RESERVATIONS--Continued

GENERALLY--Continued

Withdrawn lands and lands closed to nonmineral entry are not open to appropriation under the Alaska Native Allotment Act, 43 U.S.C. §§ 270-1 through 270-3 (1970). No rights may be initiated under the Alaska Native Allotment Act by occupation and use of lands not open to appropriation.

Anna Opheim, Chris Roy Opheim, Philip Katelnikoff, 20 IBLA 290 (May 27, 1975)

Oil and gas lease offers embracing lands withdrawn or reserved for any agency of the Department of Defense may not be granted without the consent of that Department. 43 U.S.C. § 158 (1970). Such lease offers must be rejected where such consent is withheld as inconsistent with the military use, and the offers may not be suspended to await the possible availability of the lands for leasing.

Mobil Oil Corp., 20 IBLA 296 (May 27, 1975)

The Secretary's authority to withdraw public lands is separate from, and in addition to, the Secretary's discretionary authority under sec. 17 of the Mineral Leasing Act of 1920, *as amended*. Therefore, public lands which are described in a public land order as not withdrawn from leasing under the mineral leasing laws remain subject to an exercise of the Secretary's discretion under sec. 17 of the Mineral Leasing Act of 1920, *as amended*.

T. B. Young, Jr., 20 IBLA 333 (June 11, 1975)

A claimant's occupancy of a homesite prior to a withdrawal does not establish a "valid existing right," excepted by the withdrawal, under the Act of Apr. 29, 1950, where claimant did not file his notice of location within 90 days after occupancy, nor did he file a notice of location or purchase application prior to the withdrawal.

Knute P. Lind, 21 IBLA 81 (June 27, 1975)

The date of the segregation from settlement, caused by the filing of a State selection application in the appropriate office of the Bureau of Land Management, is not tantamount to the "effective date" of "[a] withdrawal or reservation" described in the Secretarial directive of Oct. 18, 1973. Therefore, Native use and occupancy commenced before such segregation may continue, unhampered by such segregation, to gain the requisite 5 years' use and occupancy required under 43 U.S.C. §§ 270-1 to 270-3 (1970).

Victor A. Amahonak, 21 IBLA 387 (Aug. 18, 1975)

An applicant's opinion that a withdrawal has not served, or does not serve, any useful purpose does not vitiate the effect of the withdrawal to bar appropriation of the land. Likewise, the extended period of time that a withdrawal has been in effect does not vitiate such impact.

Serafina Angion, 22 IBLA 104 (Sept. 22, 1975)

WITHDRAWALS AND RESERVATIONS--Continued

GENERALLY--Continued

There can be no "valid existing right" in a claimant of a headquarters site on land withdrawn by Public Land Order No. 4582 unless a notice of location or application to purchase had been filed in accordance with the Act of Apr. 29, 1950. The filing of an application for a survey of omitted land did not by itself create any preference rights to the land.

An application to purchase a headquarters site is subject to rejection if it is filed after the 5-year period from the filing of a notice of location of the claim, or, if no notice had been filed, it was filed more than 90 days after the land has been withdrawn.

Ray W. Ferguson, 22 IBLA 160 (Sept. 30, 1975)

Sec. 4 of the General Allotment Act of Feb. 8, 1887, authorizes the Secretary of the Interior to issue allotments to Indians where the Indians have made settlement upon public lands "not otherwise appropriated." Pending final action on the matter, public lands are not open to Indian allotment settlement and disposition following the filing and noting of an application by the Bureau of Land Management for a proposed withdrawal; regulation 43 CFR 2091.2-5(a) provides that the noting of an application for withdrawal on the official plats maintained in the proper land office shall temporarily segregate the subject land from settlement under the public land laws to the extent that the withdrawal applied for, if effected, would prevent such forms of disposal. Following issuance of a public land order withdrawing the subject land, Indian allotment applications previously held in a suspense status are properly rejected.

Thurman Banks et al., 22 IBLA 205 (Oct. 15, 1975)

Where the claimant of a headquarters site filed his notice of location, occupied the land, and began making improvements thereon prior to the segregation of the land by a withdrawal made subject to valid existing rights, it is error for the Bureau of Land Management to refuse to record the claimant's notice of location, or to cancel the claim without notice and an opportunity for hearing.

Donald J. Thomas, 22 IBLA 210 (Oct. 15, 1975)

Mining claims are properly declared null and void ab initio where they are located on land which, on the date of location, was included in an application for withdrawal which previously had been noted on land office records.

John Boyd Parsons, 22 IBLA 328 (Nov. 10, 1975)

Merrill M. Moore, J. J. Adams, 43 IBLA 357 (Oct. 29, 1979)

Location of a homesite claim without substantial use or occupancy of the land in compliance with the law creates no property interest in the land. Where the claimant under sec. 10 of the Act of May 14, 1898, *as amended*, 43 U.S.C. § 687(a) (1970), has merely marked the boundaries of the claim prior to a withdrawal of the land, such activity does not constitute occupation or possession of the land and the claim will be defeated by that withdrawal.

Edward P. Dooley, 22 IBLA 338 (Nov. 14, 1975)

WITHDRAWALS AND RESERVATIONS--Continued

GENERALLY--Continued

A Native allotment application for lands within a wildlife range withdrawal is properly rejected where the applicant did not initiate and complete substantial use and occupancy for a 5-year period prior to the effective date of withdrawal or segregation.

Medina Flynn, 23 IBLA 288 (Jan. 12, 1976)

A public sale application, filed pursuant to the Unintentional Trespass Act of Sept. 26, 1968, 43 U.S.C. §§ 1431-1435 (1970), and 43 CFR Part 2785 (1971), embracing lands which the records show to be withdrawn by Public Land Order No. 5490 on Feb. 12, 1975, and withdrawn under the Wild and Scenic Rivers Act on Oct. 2, 1968, is properly rejected.

T. E. Markham, 24 IBLA 5 (Feb. 4, 1976)

The filing of a notice of location for a homesite will not prevent a withdrawal from attaching to the land if, prior to the effective date of the withdrawal, the locator of the homesite fails to perform the requisite acts of use, occupancy and development necessary to establish a valid existing right excepted from a withdrawal.

Where the claimant of a homesite filed his notice of location prior to the segregation of the land by a withdrawal made subject to valid existing rights, and alleges that he initiated the development of improvements sufficient to establish a valid existing right prior to the withdrawal, it is error for the Bureau of Land Management to hold that the location notice was unacceptable for recordation, and the claim may only be canceled following notice to the claimant and an opportunity to demonstrate the establishment of a valid existing homesite claim prior to the withdrawal.

Steven P. [illegible], 24 IBLA 23 (Feb. 11, 1976)

National forest lands, some of which are in a wilderness area, a roadless area, or a memorial parkway, which have not been withdrawn from oil and gas leasing, are subject to leasing in the discretion of and under conditions imposed by the Secretary of the Interior. However, where the Secretary of the Interior has specifically determined by formal publication of a memorandum that lands in a certain section of a national forest are to be withheld from leasing, he has exercised his plenary discretion to refuse to issue leases, and subsequent offers for lands in this designated area restricted from leasing are properly rejected.

James Donoghue et al., 24 IBLA 210 (Mar. 23, 1976)

Applications filed by the State of Idaho under the Act of Mar. 15, 1910, for temporary withdrawals of land for proposed development under the Carey Act of 1894, must be rejected where the lands have been previously withdrawn for reclamation, stock-driveway, agricultural research or military purposes.

In the absence of pertinent statutory directives or regulatory criteria for the processing of temporary withdrawal applications for unreserved lands filed by a State under the Act of Mar. 15, 1910, for proposed development under the Carey Act, the Bureau of Land Management should suspend consideration of the applications pending Departmental action to revise and recodify previously deleted regulations which provide guidance for the administration of the Carey Act and the Act of Mar. 15, 1910.

Idaho Department of Water Resources, 25 IBLA 27 (May 5, 1976)

A request for a hearing pursuant to 43 CFR 4.415 for the purpose of taking testimony on the Bureau of Land Management's "continued refusal" to restore land in a reclamation withdrawal to entry will be denied. An appeal from a decision declaring mining claims and millsites null and void ab initio because the lands are in the withdrawal may not serve as the vehicle for petitioning the Secretary of the Interior to revoke the withdrawal. Furthermore, even if the withdrawal were revoked and the lands opened to entry, this action could not revive mining claims which were void when located while the withdrawal was in effect and the land closed to entry under the mining laws.

J. P. Hinds et al., 25 IBLA 67 (June 1, 1976)
83 I.D. 275

Where the claimant of a homesite filed his notice of location prior to the segregation of the land by a withdrawal made subject to valid existing rights, and he alleges, and the field reports so indicate, that he initiated the development of improvements sufficient to establish a valid existing right prior to the withdrawal, it is error for the State Office to hold that the withdrawal terminated the claimant's rights.

Sandra L. Lough, Damon M. Blackburn, 25 IBLA 96 (June 3, 1976)

The issuance of sodium prospecting permits is discretionary with the Secretary of the Interior, and the Secretary may refuse to issue permits for lands withdrawn for wildlife purposes if the use of the lands for mineral prospecting and development activities would adversely affect the wildlife habitat.

Where the regulations and Departmental and BLM Manuals do not specifically state how disputes between the Fish and Wildlife Service and the Bureau of Land Management over issuing sodium prospecting permits for lands within wildlife refuge areas are to be resolved, but the Departmental manuals indicate that such decisions are to be made by the Secretary and the BLM Manual directs that such applications be forwarded to the Washington Office, a decision of a State Office rejecting an application for a sodium prospecting permit will be set aside and the case remanded for processing in accordance with the Departmental and BLM Manuals.

Vernal E. Ross et al., 27 IBLA 4 (Sept. 17, 1976)

The Bureau of Land Management may issue a sodium prospecting permit for lands adjacent to areas withdrawn for wildlife conservation purposes subject to a stipulation which provides that, in the event of discovery of an exploitable sodium deposit, no preference right lease will be issued unless hydrologic and other environmental analyses indicate that sodium ore can be removed without a significant adverse environmental impact on the wildlife habitat within the withdrawn areas.

David E. Hughes, 27 IBLA 46 (Sept. 23, 1976)

WITHDRAWALS AND RESERVATIONS--Continued

GENERALLY--Continued

Sec. 5(b) of the Act of May 25, 1948 (62 Stat. 269) is not applicable to those tribal lands upon which the Flathead Irrigation Project's Kerr Substation and Switchyard are located.

Relocation of Flathead Irrigation Project's Kerr Substation and Switchyard, M-36735 (Supp.) (Sept. 24, 1976)
83 I.D. 346

Applications filed by the State of Idaho under the Act of Mar. 15, 1910, for temporary withdrawals of land for proposed development under the Carey Act of 1894, must be rejected where the lands have been previously withdrawn for reclamation purposes.

In the absence of pertinent statutory directives or regulatory criteria for the processing of temporary withdrawal applications for unreserved lands filed by a State under the Act of Mar. 15, 1910, for proposed development under the Carey Act, the Bureau of Land Management should suspend consideration of the applications pending Departmental action to revise and recodify previously deleted regulations which provide guidance for the administration of the Carey Act and the Act of Mar. 15, 1910.

Idaho Department of Water Resources, 27 IBLA 303 (Oct. 26, 1976)

The Secretary in the exercise of his discretionary authority, may refuse to lease public lands for oil and gas, even though the lands are not withdrawn from oil and gas leasing.

Pinnacle Mining and Exploration Co., Inc., 28 IBLA 249 (Dec. 20, 1976)

The Agreement of Dec. 4, 1893, between the Yuma (now Quechan) Indians and the United States, ratified in sec. 17 of the Act of Aug. 15, 1894, was an absolute, present cession of any and all interests of the Indians to the nonirrigable lands in the Fort Yuma Indian Reservation created by Executive Order of Jan. 9, 1884.

Assuming that the Act of Aug. 15, 1894, was a conditional rather than an absolute cession by the Yuma (now Quechan) Indians of their rights to the nonirrigable lands in the Fort Yuma Indian Reservation, all material conditions on the part of the United States were met, and the cession has occurred.

Title to Certain Land within the Boundaries of the Fort Yuma Indian Reservation as Established by the Executive Order of Jan. 9, 1884, M-36886 (Jan. 18, 1977)
84 I.D. 1

Public land within one-quarter mile of the banks of a river designated by Act of Congress for potential addition to the national wild and scenic rivers system is withdrawn by statute from entry, sale, or other disposition under the public land laws of the United States for a designated period to allow a study of the suitability of the river for inclusion in the system and a report to Congress thereon. This withdrawal, however, does not preclude a right-of-way grant which does not involve a conveyance of title or rights leading thereto.

Lower Valley Power & Light, Inc., 29 IBLA 107 (Feb. 23, 1977)

WITHDRAWALS AND RESERVATIONS--Continued

GENERALLY--Continued

Lands withdrawn for the protection of Alaska Natives' selection rights are not available for oil and gas leasing under the Mineral Leasing Act. 43 U.S.C. § 1621(i) (Supp. III 1973).

James W. Canon et al., 1 SEC. 1 (Apr. 15, 1977)
84 I.D. 176

A withdrawal order is considered to be valid notice of its contents and becomes effective by its filing with the Federal Register, despite any asserted failure to properly note it on the land records.

Rod Knight, 30 IBLA 224 (May 26, 1977)

A description of lands withdrawn by a powersite classification must be interpreted according to its plain meaning when this meaning is consistent with descriptive maps attached to it, with the interpretation of its promulgator, and with the purpose of the classification.

Henry E. Reeves, 31 IBLA 242 (July 18, 1977)

It is improper for a District Office to find a notice of location for a homesite unacceptable for recordation when the location notice is regular on its face and the land was open to location at the time the notice was filed.

The filing of a notice of location for a homesite does not create any rights in the land, and the filing of a notice will not prevent a withdrawal from attaching to the land if, prior to the effective date of the withdrawal, the locator fails to perform the requisite acts of use, occupancy and development necessary to establish a valid existing right in the claim. Marking of boundaries of the claim does not constitute use and development.

George T. Beck, 31 IBLA 363 (July 28, 1977)

A mining claim located before Aug. 11, 1955, on land within an existing highway material site withdrawal is properly declared null and void as the land was then closed to mineral entry. Void claims located prior to that date were not given life by the Mining Claims Rights Restoration Act of 1955.

Treva L. Berger, 31 IBLA 389 (Aug. 19, 1977)

Applications filed for temporary withdrawals of land for proposed development under the Carey Act of 1894 must be rejected where the lands have been previously withdrawn for other purposes.

The Bureau of Land Management should suspend consideration of the applications under the Carey Act pending Departmental action to revise and recodify previously deleted regulations which provide guidance for the administration of the Carey Act.

Idaho Department of Water Resources, 32 IBLA 89 (Sept. 2, 1977)

WITHDRAWALS AND RESERVATIONS--Continued

GENERALLY--Continued

The filing of a notice of location for a headquarters site or a homesite does not create any rights in the land, and the filing of a notice will not prevent a withdrawal from attaching to the land if, prior to the effective date of the withdrawal, the locator fails to perform the requisite acts of use, occupancy and development necessary to establish a valid existing right in the claim. Marking of boundaries of the claim does not constitute use and development.

John D. Ketscher, Alfred L. DeCicco, 32 IBLA 235 (Sept. 21, 1977)

A mining claim located on land at a time when the land is segregated from mining location by a proposed withdrawal is properly declared null and void ab initio. Where the official records of the Department reflect such proposed withdrawal, a hearing is not required to establish the invalidity of the claim.

Mark W. Boone and John L. Dutra, 33 IBLA 32 (Nov. 25, 1977)

The authority of the Government to proceed wit: the withdrawal of public lands, after a Federal agency has filed an application for such action, which withdraws that land from mineral location, will not be barred by laches because of lapse of time.

Once public land is segregated from mineral entry by notation on the official records of the BLM, objection to the merits of the withdrawal will not vitiate the effect of the withdrawal with respect to the appropriation of the land.

William J. Smith, Sr., et al., 33 IBLA 47 (Nov. 25, 1977)

Under 43 CFR 2091.6-4 and 2627.4(b), the filing of a State's application to select lands segregates these lands from all subsequent appropriation, including locations under the mining laws.

Janelle R. Deeter, Gary D. Deeter, Verna B. Lyons, Harry D. Lyons, 34 IBLA 81 (Feb. 22, 1978)

Joe D. Denson, 43 IBLA 136 (Sept. 28, 1979)

A mining claim or millsite located on land at a time when the land is withdrawn from mineral location is properly declared null and void.

Floyd G. Brown, 35 IBLA 110 (May 15, 1978)

"Subject to valid existing rights." The Secretary of the Interior in making withdrawals "subject to valid existing rights" in PLO 5179 and PLO 5250 intended exceptions to withdrawal to apply in behalf of only those claimants who themselves held such valid rights at time of withdrawal. The Secretary did not intend existence of another's valid rights on withdrawal date to restrain withdrawal so as to allow a topfiling claimant to enter pertinent lands after withdrawal date and independently establish rights under mining laws.

Harry E. Wilson, 35 IBLA 349 (June 19, 1978)

WITHDRAWALS AND RESERVATIONS--Continued

GENERALLY--Continued

Withdrawal of public lands for the use of a Federal agency is within the discretion of the Secretary. An application for withdrawal conveys no vested right, unlike an entry under the Public Land Laws which entitles the entrant to issuance of patent upon satisfaction of statutory requirements.

The words "withdrawn" and "reserved" are frequently used interchangeably and in conjunction with each other, and cannot be distinguished with separate precise meanings.

Withdrawals and reservations under the authority of the Pickett Act, 43 U.S.C. § 141 *et seq.* (1970), are of a permanent, continuing nature in that they remain in effect until revoked by the President or by Act of Congress.

There is a legal distinction between the administrative segregation of land under application for withdrawal, pending action on the application, and the completed withdrawal itself.

Appeal of Paug-Vik, Inc., Ltd., 3 ANCAB 49 (July 5, 1978) 85 I.D. 229

A mining claim located on land at a time when the land is segregated from mining location by a proposed withdrawal is properly declared null and void ab initio.

Wilbur G. Hallauer, 36 IBLA 144 (July 26, 1978)

Objections raised on appeal to the Interior Board of Land Appeals to the merits of withdrawal of public lands in order to protect recreational, historical, and geological values in public lands along the North Platte River, will not vitiate its effect as a bar to the availability of the lands under the desert land laws, as it is not within the Board's function or authority to take the steps necessary to revoke the withdrawal, restore the lands to the operation of the public land laws, and classify it as suitable for disposition as a desert land entry.

Cecilia J. Cain, 36 IBLA 250 (Aug. 15, 1978)

Where a decision rejects an application for an Alaska grazing lease because of an asserted Secretarial policy against granting such applications for land withdrawn pursuant to sec. 17(d)(2) of the Alaska Native Claims Settlement Act, 43 U.S.C. § 1616(d)(2) (Supp. V 1975), but the record on appeal is incomplete with respect to the existence of such policy, the record should be remanded for further documentation.

Kenneth E. Busch, 37 IBLA 346 (Oct. 27, 1978)

The inherent authority of the president to withdraw land from all forms of appropriation under the public land laws, including the mining laws, for the use of the War Department for military purposes was not limited by the Act of June 25, 1910 (the Pickett Act), which was also authority for the withdrawal, but which refers only to temporary withdrawals.

10 U.S.C. § 2669 (1976) authorized the Secretary of a military department to grant an easement for a right-of-way over land permanently withdrawn or reserved for the use of that department and other land under his control. This language was all-inclusive and permitted the Secretary of the Army to issue a revocable permit

for a pipeline over land withdrawn for the use of the Army regardless of whether the withdrawal be permanent or temporary.

Under the procedures in effect prior to the passage of the Federal Land Policy and Management Act of 1976, 90 Stat. 2744, 43 U.S.C. § 1701 *et seq*. (1977 Supp.), the revocation of a withdrawal or the restoration of withdrawn land to the public domain requires publication of a duly authorized Public Land Order. However, relinquishment of administrative jurisdiction by an administering agency to the BLM does not, in and of itself, result in either a revocation or restoration, and acceptance by BLM of accountability and responsibility is controlled by the procedures outlined in 43 CFR Subpart 2370.

Where, pursuant to 43 CFR Subpart 2370, BLM has assumed administrative jurisdiction over lands formerly within the jurisdiction of another agency, the provisions of 43 CFR 2802.3-2 become applicable, and BLM acquires administrative jurisdiction over any rights-of-way then outstanding.

Alaska Pipeline Co., 38 IBLA 1 (Nov. 8, 1978)

Mining claims located on lands previously withdrawn from entry under the mining laws are null and void ab initio in the absence of a showing that the claimants had a valid existing right to the claims which predates the withdrawal. Where claimants assert that they have simply filed amended notices of location of claims which were first located prior to the withdrawal, but the record indicates that the claims are in fact not the same as those located prior to the withdrawal, there is no valid existing right to the new claims, and they are properly declared null and void ab initio.

Riter Ekker, Kerry Ekker, 38 IBLA 277 (Dec. 13, 1978)

Lands or minerals in lands were not "withdrawn" and "restored from a withdrawal" as those terms are used in the public land laws merely because an erroneous title opinion that the minerals are not owned by the United States is corrected to reflect that they are owned by the United States, and the oil and gas simultaneous filing procedures are applicable where those minerals were in a lease which expired before the correction of the status of the minerals was made.

David A. Provinse, 38 IBLA 347 (Dec. 22, 1978)

Without adequate proof of a tender of a notice of location or application to purchase a headquarters site which was wrongfully denied by Bureau of Land Management personnel prior to a withdrawal of the land, the mere occupancy of land prior to the withdrawal did not create a "valid existing right" excepted from the effect of the withdrawal, and an application to purchase a headquarters site filed after the withdrawal is properly rejected.

Rene P. Lamoureux d/b/a Frenchy Lamoureux, 39 IBLA 36 (Jan. 15, 1979)

Oil and gas offers, filed for lands withdrawn by PLO No. 5418, must be rejected. The order was issued under the authority of the Pickett Act, 43 U.S.C. §§ 141-142 (1970), repealed by FLPMA, and the order was not arbitrary, capricious, or an abuse of discretion.

Whether the issuance of PLO No. 5418, prohibiting oil and gas leasing in Alaska, without prior proposed rulemaking is violative of the Administrative Procedure Act or of the Alaska Native Claims Settlement Act need not be decided; by such issuance the Secretary has enunciated a policy of rejecting mineral lease applications well within his discretionary authority.

Bristol Bay Native Corp., 41 IBLA 85 (June 4, 1979)

A Native allotment applicant, who was 5 years old at the time when the land was withdrawn from all forms of appropriation, is properly deemed to be incapable as a matter of law of having exerted independent use and occupancy of the land to the exclusion of others prior to the withdrawal and consequently the allotment application is properly rejected.

Floyd L. Anderson, Sr., 41 IBLA 280 (June 28, 1979)
86 I.D. 345

Peter Pasruk, 43 IBLA 69 (Sept. 19, 1979)

Nicky Nickoli, 43 IBLA 296 (Oct. 17, 1979)

The Board adopts the Solicitor's conclusion that Public Land Order No. 82 (Jan. 22, 1943) (8 FR 1599 (Feb. 8, 1943)) constituted an express retention for the United States of submerged lands when Alaska was admitted to the Union, and title to the submerged lands withdrawn by PLO No. 82 did not pass to the State of Alaska with statehood.

Appeal of State of Alaska, 3 ANCAB 297 (July 31, 1979)
86 I.D. 381

Where the land on which the mining claim is located is subsequently withdrawn, the validity of the claim must be determined as of the date of the withdrawal and through the date of the hearing. If there was no discovery as of the date of the withdrawal, the land would not be excepted from the effect of the withdrawal and the claim could not thereafter become valid even though the requirement of discovery was satisfied at a later date.

United States v. William Lavon Chappell et al., 42 IBLA 74 (Aug. 13, 1979)

Withdrawn lands are not open to appropriation under the Native Allotment Act. Appellant's settlement upon a tract of land withdrawn from entry is a trespass, and such settlement does not provide a basis for any claim to the land.

Publication in the Federal Register of PLO No. 3832 withdrawing certain lands in Alaska from all forms of appropriation under the public land laws, except leasing under the mineral leasing laws, gives valid notice of its contents.

Elizabeth J. Martini, 42 IBLA 82 (Aug. 13, 1979)

An allotment right is personal to one who has fully complied with the law and regulations and an applicant for a Native allotment may not tack on ancestral use and occupancy of the land to establish his right thereto. Ancestral use of the land while open to settlement does not create any right that excepts the land from a withdrawal in favor of an applicant who may have initiated use and occupancy subsequent to the withdrawal.

Sam Hanlon, Sr., 42 IBLA 161 (Aug. 17, 1979)

WITHDRAWALS AND RESERVATIONS--Continued

GENERALLY--Continued

A recreation and public purposes classification, issued pursuant to the Recreation Act of 1926, *as amended*, 43 U.S.C. § 869 (1976), segregates Alaskan lands from Native allotment applications until such time as the classification is revoked.

PLO No. 4582, *as amended*, withdraws the land included therein and bars a subsequent Native allotment application.

Under Secretarial Order No. 3040, it is sufficient if the 5 years' use and occupancy, required under the Native Allotment Act, is completed prior to the granting of the allotment, providing applicant either filed for his allotment or commenced use and occupancy prior to the withdrawal.

Betty J. Thompson, 43 IBLA 174 (Sept. 28, 1979)

Although this Department recognizes a fiduciary relationship of the United States to Alaska Natives, this relationship does not authorize the Secretary to ignore the terms of 43 U.S.C. § 270-1 (1970) limiting Native allotments to those lands which are "vacant, unappropriated, and unreserved."

Paul D. Tony, 43 IBLA 245 (Oct. 10, 1979)

AUTHORITY TO MAKE

The Government may withdraw lands occupied by Alaskan Natives under alleged aboriginal possessory rights and thus preclude such lands from disposition under the Native Allotment Act.

Louis P. Simpson et al., 20 IBLA 387 (June 16, 1975)

Since the Bureau of Land Management has no authority to issue a public land order withdrawing land, such authority existing only in the Secretary, the Under Secretary, and the Assistant Secretaries of the Department of the Interior, recommendations by officers of the Bureau of Land Management relating to withdrawals are not subject to review under the provisions of 43 CFR 4.450-2 or 43 CFR 4.410.

City of Kotzebue, 26 IBLA 264 (Aug. 20, 1976)
83 I.D. 313

The President had nonstatutory authority to withdraw public land in addition to authority conferred upon him by Pickett Act, *as amended*, 43 U.S.C. §§ 141, 142 (1970). Such nonstatutory authority was not limited by terms of 43 U.S.C. § 142 (1970) providing that withdrawn lands shall remain open to location for metalliferous minerals.

Because of the President's delegation of his nonstatutory withdrawal authority to the Secretary of the Interior by E.O. 10355, the Secretary was endowed with sufficient authority to withdraw lands in issue without reliance upon secs. 17(d)(1) and 17(d)(2) of Alaska Native Claims Settlement Act. Thus, distinctions between those two sections are not herein dispositive of question of Secretary's authority to withdraw lands in PLO 5250.

Harry M. Wilson, 35 IBLA 349 (June 19, 1978)

WITHDRAWALS AND RESERVATIONS--Continued

AUTHORITY TO MAKE--Continued

The inherent authority of the president to withdraw land from all forms of appropriation under the public land laws, including the mining laws, for the use of the War Department for military purposes was not limited by the Act of June 25, 1910 (the Pickett Act), which was also authority for the withdrawal, but which refers only to temporary withdrawals.

Alaska Pipeline Co., 38 IBLA 1 (Nov. 8, 1978)

Whether the issuance of PLO No. 5488, prohibiting oil and gas leasing in Alaska, without prior proposed rulemaking is violative of the Administrative Procedure Act or of the Alaska Native Claims Settlement Act need not be decided; by such issuance the Secretary has enunciated a policy of rejecting mineral lease applications well within his discretionary authority.

Bristol Bay Native Corp., 41 IBLA 85 (June 8, 1979)

EFFECT OF

On petition for reconsideration, the assertion of rights to a mining claim under an Aug. 1968 location does not demonstrate error in or require reconsideration of this Board's decision, which affirmed that a mining claim located in 1969 for the same land, after the land was withdrawn from mineral location in Oct. 1968, was null and void ab initio. Neither this Board's decision initially or on petition affects petitioner's rights, if any, under such a prior location.

R. C. Jim Townsend (On Reconsideration), 18 IBLA 407 (Feb. 10, 1975)

Lands withdrawn under sec. 11 of the Alaska Native Claims Settlement Act, 43 U.S.C. § 1610 (Supp. III 1973), are withdrawn from all forms of appropriation under the public land laws, including, without limitation, the Recreation and Public Purposes Act, *as amended*, 43 U.S.C. §§ 869 to 869-3 (1970), and an application under the latter Act for such withdrawn lands is properly rejected.

Alaska Department of Fish and Game, 20 IBLA 50 (Apr. 23, 1975)

Under the Act of Apr. 29, 1950, 43 U.S.C. § 687a-1 (1970), a notice of location of a trade and manufacturing site filed after withdrawal of the land is acceptable if it is filed within 90 days of settlement and the settlement occurs prior to a withdrawal of the land. An application to purchase based on such an asserted settlement and filing will be rejected when it is not filed within the statutory life of the asserted claim, but the applicant may be afforded an opportunity to submit a justification for his late filing under the principles of equitable adjudication.

Edwin William Seiler (On Reconsideration), 20 IBLA 221 (May 9, 1975)

Oil and gas lease offers embracing lands withdrawn or reserved for any agency of the Department of Defense may not be granted without the consent of that Department. 43 U.S.C. § 158 (1970). Such lease offers must be rejected where such consent is withheld as inconsistent with the military use, and the offers may not be suspended to await the possible availability of the lands for leasing.

Mobil Oil Corp., 20 IBLA 296 (May 27, 1975)

WITHDRAWALS AND RESERVATIONS--Continued

EFFECT OF--Continued

The inclusion of lands belonging to the United States in a proposed power project pursuant to sec. 24 of the Federal Power Act of 1920, 16 U.S.C. § 818 (1970), has the effect of reserving or withdrawing those lands from entry, location, or other disposal under the public land laws of the United States until otherwise directed by the Federal Power Commission or by Congress and until the withdrawal is revoked by the Seretary of the Interior.

A selection application by the State of Alaska must be rejected with respect to those public lands which are reserved or withdrawn from entry or other form of disposal under the public land laws of the United States and cannot be held open pending a possible future change of the status of the land.

State of Alaska, 20 IBLA 341 (June 11, 1975)

The Color of Title Act, 43 U.S.C. § 1068 (1976), applies only to public land, *i.e.*, vacant, unappropriated, unreserved Federal real property subject to the public land laws. An application under the Act which is based upon color of title initiated when the subject land was withdrawn from the operation of the public land laws and reserved as national forest land must be rejected.

Ben J. Boschetto, 21 IBLA 193 (July 28, 1975)

Frank W. Sharp, 35 IBLA 257 (May 31, 1978)

A trade and manufacturing site location will be defeated where the law has not been substantially complied with before the land is withdrawn under statutory authority.

Elden L. Besse, 21 IBLA 251 (Aug. 11, 1975)

The date of the segregation from settlement, caused by the filing of a State selection application in the appropriate office of the Bureau of Land Management, is not tantamount to the "effective date" of "[a] withdrawal or reservation" described in the Secretarial directive of Oct. 18, 1973. Therefore, Native use and occupancy commenced before such segregation may continue, unhampered by such segregation, to gain the requisite 5 years' use and occupancy required under 43 U.S.C. §§ 270-1 to 270-3 (1970).

Victor A. Anahonak, 21 IBLA 347 (Aug. 18, 1975)

Withdrawn lands are not open to appropriation under the Native Allotment Act. An Alaska Native Allotment application is properly rejected where the applicant fails to show substantial use and occupancy at least potentially to the exclusion of others and not mere intermittent use.

An applicant's opinion that a withdrawal has not served, or does not serve, any useful purpose does not vitiate the effect of the withdrawal to bar appropriation of the land. Likewise, the extended period of time that a withdrawal has been in effect does not vitiate such impact.

Serafina Anelon, 22 IBLA 104 (Sept. 22, 1975)

WITHDRAWALS AND RESERVATIONS--Continued

EFFECT OF--Continued

Where land within a trade and manufacturing site is withdrawn from appropriation prior to its occupancy and use for purposes of trade or manufacture under 43 U.S.C. § 687a (1970) and 43 CFR Subpart 2562, the invalid claim cannot be perfected.

Allan D. Hodge, 22 IBLA 150 (Sept. 30, 1975)

In the absence of a timely appeal from a decision rejecting the State of Alaska's selection application for certain lands, the lands are no longer segregated from other disposition and a withdrawal of those lands may attach, precluding subsequent selection by the State.

State of Alaska, 22 IBLA 229 (Oct. 16, 1975)

A homestead notice of location filed for lands open to location is acceptable for recordation. Where a homestead settler has marked the corners of his claim by posts prior to a withdrawal subject to valid existing rights, the claim survives the withdrawal if the location notice requirements have been satisfied.

Robert A. Rice, Jr., 22 IBLA 291 (Nov. 3, 1975)

Under the Alaska Grazing Act, 43 U.S.C. § 316 *et seq.* (1970), issuance of a grazing lease appropriates the lands and segregates them from public domain, barring them from use and occupancy for Native allotment purposes until the Department takes action to exclude lands from lease.

Edward F. Naughton, 23 IBLA 134 (Dec. 23, 1975)

An allotment right is personal to one who has fully complied with the law and the regulations. An applicant for a Native allotment may not tack on use and occupancy of the land by his ancestors to establish the right. The applicant must have completed the 5-year period of use and occupancy prior to withdrawal of the land to qualify.

Sarah F. Lindgren, Emery V. Showalter, 23 IBLA 174 (Dec. 31, 1975)

An Alaska Native allotment applicant may not use the occupancy of public land by forebears to qualify herself for an allotment, nor does the use and occupancy of public land by a forebear, while the land was open to settlement, create any right that excepts the land from a withdrawal in favor of an applicant who initiated independent use and occupancy subsequent to the withdrawal.

Sandra M. Pestrikoff, 23 IBLA 197 (Jan. 6, 1976)

Myrtle M. Jensen Shanigan, 29 IBLA 255 (Mar. 25, 1977)

Secretarial guideline of Oct. 18, 1973, established that an applicant for an Alaska Native allotment must have completed a 5-year period of substantially continuous use and occupancy prior to withdrawal of the land. This guideline is not subject to the rulemaking provisions of the Administrative Procedure Act, 5 U.S.C. § 553 (1970).

Stanley P. McCormick, 23 IBLA 304 (Jan. 16, 1976)

WITHDRAWALS AND RESERVATIONS--Continued

EFFECT OF--Continued

An allotment right is personal to one who has fully complied with the law and the regulations. An applicant for a Native allotment on land withdrawn from appropriation and reserved for lighthouse purposes by Executive Order, subject to valid existing rights, must have completed the 5-year period of substantially continuous use and occupancy prior to the withdrawal in order to be eligible for an allotment.

Rachael Toopekok, 23 IBLA 314 (Jan. 16, 1976)

A color of title application for land which has been withdrawn for a stock-driveway prior to any conveyance in a color of title applicant's chain of title is properly rejected as to such land.

Jeanne Pierresteguy, 23 IBLA 358 (Jan. 23, 1976)
83 I.D. 23

A public sale application, filed pursuant to the Unintentional Trespass Act of Sept. 26, 1968, 43 U.S.C. §§ 1431-1435 (1970), and 43 CFR Part 2785 (1971), embracing lands which the records show to be withdrawn by Public Land Order No. 5490 on Feb. 12, 1975, and withdrawn under the Wild and Scenic Rivers Act on Oct. 2, 1968, is properly rejected.

The inclusion of lands belonging to the United States in a proposed power project pursuant to sec. 24 of the Federal Power Act of 1920, 16 U.S.C. § 818 (1970), has the effect of reserving or withdrawing those lands from entry, location, or other disposal under the public land laws of the United States until otherwise directed by the Federal Power Commission or by Congress and until the withdrawal is revoked by the Secretary of the Interior.

T. E. Markham, 24 IBLA 5 (Feb. 4, 1976)

A notice of location filed under the Alaska settlement law, 43 U.S.C. § 687a (1970), regular on its face, for land which is open to such settlement and location, is acceptable for recordation. If a withdrawal follows the filing of a notice of location, the proper inquiry is into the validity of the claim, *i.e.*, whether the locator has by acts of settlement and improvement established a valid existing right protected from the effect of the withdrawal.

Mary C. Dolan, 24 IBLA 100 (Mar. 1, 1976)

Lands within national parks are not subject to mining location except where specifically authorized by law. 43 CFR 3811.2-2. However, lands within a national forest remain open to location and entry under the mining laws. 16 U.S.C. § 478 (1970). Where mining claims occupy land which has subsequently been withdrawn from the operation of the mining laws, the validity of the claim must be tested by the value of the mineral deposit as of the date of the withdrawal, as well as the date of determination. If the claim was not supported at the date of withdrawal for the national park by such a discovery, the land within the claims located in the park would not be excepted from the effect of the withdrawal.

United States v. Wallace W. Vaux, 24 IBLA 289 (Apr. 1, 1976)

WITHDRAWALS AND RESERVATIONS--Continued

EFFECT OF--Continued

Mining claims located on land withdrawn from all forms of entry are null and void from the beginning.

Robert L. Beery et al., 25 IBLA 287 (June 28, 1976)
83 I.D. 249

The filing by a qualified applicant of a homestead application to enter unappropriated surveyed lands in Alaska segregates the land covered by the application from appropriation. Such an application will be considered to have created a valid existing right which is protected from the effect of a subsequent withdrawal which is subject to valid existing rights.

Albert A. Howe, 26 IBLA 386 (Sept. 15, 1976)

The filing by a qualified applicant of an application for an allowed homestead entry of land which is open and available to such entry at the time of filing will operate to segregate the land from subsequent appropriation and invest the applicant with sufficient interest therein to preserve the land from the effect of a subsequent withdrawal which is made subject to valid existing rights.

Richard T. Pope, 27 IBLA 33 (Sept. 20, 1976)

A mining claim located on land at a time when such land was withdrawn from mineral entry is properly declared null and void ab initio. The finding that appellants have no rights under Sept. 1974 locations does not affect any rights which may have been deeded to them by the holder of a 1952 claim located prior to the time the land was withdrawn from mineral locations.

W. R. and G. B. Strickler, 27 IBLA 267 (Oct. 26, 1976)

A mining claim located on land at a time when such land was withdrawn from mineral entry is properly declared null and void ab initio.

H. A. Todd, A. D. Johnson, 28 IBLA 180 (Dec. 1, 1976)

Sally Lester et al., 31 IBLA 43 (June 21, 1977)

J. R. Nesmith, 38 IBLA 357 (Dec. 22, 1978)

Mining claims located when the land has been withdrawn from all public entry by a first-form reclamation withdrawal are properly declared null and void ab initio. Subsequent restoration of the land to mineral entry does not revive the invalid locations.

Floyd W. McCarty, 28 IBLA 246 (Dec. 20, 1976)

A mining claim is properly declared null and void ab initio to the extent it has been located, prior to the enactment of the Mining Claims Rights Restoration Act of Aug. 11, 1955, 30 U.S.C. §§ 621-5 (1970), on lands withdrawn from mineral location by a power project classification.

Earl D. Roberts, 28 IBLA 286 (Dec. 27, 1976)

WITHDRAWALS AND RESERVATIONS--Continued

EFFECT OF--Continued

Public land within one-quarter mile of the banks of a river designated by Act of Congress for potential addition to the national wild and scenic rivers system is withdrawn by statute from entry, sale, or other disposition under the public land laws of the United States for a designated period to allow a study of the suitability of the river for inclusion in the system and a report to Congress thereon. This withdrawal, however, does not preclude a right-of-way grant which does not involve a conveyance of title or rights leading thereto.

Lower Valley Power & Light, Inc., 29 IBLA 107 (Feb. 23, 1977)

The notation on public records of the Bureau of Land Management of a request for withdrawal has a segregative effect on land included in a mining location, so that in a contest proceeding, the claimants must show that they had made a discovery of a valuable mineral deposit before the time of posting of the withdrawal application.

United States v. John L. Maley and James F. Pagel, 29 IBLA 201 (Mar. 22, 1977)

Where a mining claim is located on lands at a time when the official records of the Bureau of Land Management showed such lands to be subject to a proposed withdrawal from operation of the mining laws, that mining claim is null and void ab initio.

Jack D. Canon et al., 30 IBLA 112 (May 2, 1977)

Where a homestead entry has been located on land later included within a withdrawal "subject to valid existing rights," the withdrawal attaches to the land within the homestead upon cancellation of the entry. An amendment of a homestead entry cannot include lands within a canceled adjoining entry to which a withdrawal has attached.

Pekka E. Merikallio, 30 IBLA 157 (May 18, 1977)

A mining claim located for a nonmetalliferous mineral on land at a time when such land was withdrawn from mineral entry for nonmetalliferous minerals is properly declared null and void ab initio.

David Budinski et al., 31 IBLA 139 (June 30, 1977)

A powersite classification effects withdrawal of lands to the full extent described therein as of publication in the *Federal Register*, even if the extent of the land withdrawn by it is not accurately entered subsequently on land-status maps, and, notwithstanding this error, lands classified by it are withdrawn under sec. 24 of the Federal Power Act from settlement under the homestead laws, so that a notice of location settlement claim and final proof concerning these lands is properly rejected.

Henry E. Reeves, 31 IBLA 242 (July 18, 1977)

WITHDRAWALS AND RESERVATIONS--Continued

EFFECT OF--Continued

Land reserved for a reservoir site by executive order under authority of the Pickett Act of June 25, 1910, to conserve water for irrigation purposes, remained open to the location of mining claims for metalliferous minerals, and the provisions of the Federal Power Act of June 10, 1920, would not operate to bar the location of such claims unless and until a powersite classification was subsequently imposed.

Henry Stagnaro, 31 IBLA 357 (July 25, 1977)

When land is withdrawn from the operation of the mining laws subject to valid existing rights, such as by the creation of the North Cascades National Park on Oct. 2, 1968, the validity of a mining claim located prior to the withdrawal must be established as of the date of the withdrawal as well as of the date of the hearing.

United States v. Robert A. Bukke (Registered Agent), Valumines, Inc., et al., 32 IBLA 155 (Sept. 12, 1977)

Land is segregated from entry under the mining laws when a proposed withdrawal of the lands from mineral entry is noted on the official records of the Bureau of Land Management and a mining claim located after that time is null and void ab initio.

The segregative effect of an application by a Federal agency for withdrawal of land from mineral entry is not affected by the provision in the published proposal that further hearings and investigations may be held.

Once public land is segregated from mineral entry by notation on the official records of the BLM, objection to the merits of the withdrawal will not vitiate the effect of the withdrawal with respect to the appropriation of the land.

William J. Smith, Sr., et al., 33 IBLA 47 (Nov. 25, 1977)

When land is withdrawn from the operation of the mining laws subject to valid existing rights, such as the Organ Pipe Cactus National Monument on Sept. 28, 1976, the validity of a mining claim located prior to the withdrawal must be established as of the date of the withdrawal as well as of the date of the hearing.

United States v. Lewis L. Wetherlin, Gabriele Wetherlin, 33 IBLA 86 (Dec. 8, 1977)

A mining claim located on land which is not subject to mineral entry at the time of location is null and void from its inception. Where a mining claimant states in his notice of location that his mining claims were located on dates subsequent to a withdrawal which included the land encompassed by the mining claim, but indicates in his application for survey that the claims were located prior to the withdrawal, it is proper for the State Office to declare the mining claims null and void on the basis of the information in the notice of location where the claimant failed to submit evidence that the claims were in fact located prior to the withdrawal.

The purpose of an amended location is to cure imperfections and correct errors, which in the absence of intervening rights relates back to the date of original location. An amended location made while land is withdrawn from mineral entry is ineffectual.

Ray L. Virgin, 33 IBLA 354 (Jan. 18, 1978)

WITHDRAWALS AND RESERVATIONS--Continued

EFFECT OF--Continued

A mining claim located on land which was then segregated and closed to mineral entry is properly declared null and void ab initio.

Janelle R. Deeter, Gary R. Deeter, Verna D. Lyons, Harry D. Lyons, 34 IBLA 81 (Feb. 22, 1978)

Victor A. G. Schmidt, 36 IBLA 394 (Sept. 5, 1978)

Joe D. Denson, 43 IBLA 136 (Sept. 28, 1979)

A mining claim located on land in Alaska at a time when such land was withdrawn from mineral entry is properly declared null and void ab initio.

Where the Bureau of Land Management records reveal that lands in Alaska have been withdrawn under PLO 5250 and certain of those lands have not been recommended, pursuant to sec. 17(d)(2)(C), Alaska Native Claims Settlement Act of Dec. 18, 1971, 43 U.S.C. § 1616(d)(2)(C) (Supp. IV 1974), for addition to or creation as units of the National Park, Forest, Wildlife Refuge, and Wild and Scenic Rivers Systems within 2 years of the date of the Act, such lands do not nevertheless become available for appropriation under the mining laws. This conclusion is compelled by the reason that PLO 5250 is based upon E.O. 10355, which not only invokes 43 U.S.C. §§ 141-142 (1970), but also the President's general or inherent authority to withdraw public lands completely from mining location.

Sally Lester et al. (On Reconsideration), 35 IBLA 61 (May 10, 1978)

Where land on which a valid settlement has been made and maintained according to the law under which it was made, was excepted from the effect of the withdrawal or reservation, occupancy of the land prior to reservation or withdrawal is insufficient to show exception where no filing has been made on the prior occupancy and the prior occupancy was not for homestead purposes.

Roland and Marie Oswald, 35 IBLA 79 (May 12, 1978)

A mining claim, located at a time when the land is withdrawn from mineral entry, may be properly declared null and void ab initio without a hearing.

Edward L. Macauley, Martha D. Macauley, 35 IBLA 202 (May 24, 1978)

Federal-American Partners, 37 IBLA 330 (Oct. 26, 1978)

Where land is withdrawn from the operation of the mining laws subsequent to the location of a mining claim, the validity of the claim cannot be recognized unless the claim was supported by a valid discovery at the time of the withdrawal. In addition, even though there may have been a proper discovery at the time of a withdrawal or at some other time in the past, a mining claim cannot be considered valid unless the claim is at present supported by a sufficient discovery. The loss of the discovery, either through exhaustion of the minerals, changes in economic conditions, or other circumstances, results in the loss of the location.

Lands which have been withdrawn from entry under some or all of the public land laws remain so withdrawn until there is a formal revocation or modification of the order of withdrawal, and it is immaterial whether the lands are presently being used for the purpose for which they were withdrawn.

United States v. Milton Wickner, 35 IBLA 240 (May 30, 1978)

"Subject to valid existing rights." The Secretary of the Interior in making withdrawals "subject to valid existing rights" in PLO 5179 and PLO 5250 intended exceptions to withdrawal to apply in behalf of only those claimants who themselves held such valid rights at time of withdrawal. The Secretary did not intend existence of another's valid rights on withdrawal date to restrain withdrawal so as to allow a topfiling claimant to enter pertinent lands after withdrawal date and independently establish rights under mining laws.

The President had nonstatutory authority to withdraw public land in addition to authority conferred upon him by Pickett Act, _as amended_, 43 U.S.C. §§ 141, 142 (1970). Such nonstatutory authority was not limited by terms of 43 U.S.C. § 142 providing that withdrawn lands shall remain open to location for metalliferous minerals.

Because of the President's delegation of his nonstatutory withdrawal authority to the Secretary of the Interior by E.O. 10355, the Secretary was endowed with sufficient authority to withdraw lands in issue without reliance upon secs. 17(d)(1) and 17(d)(2) of Alaska Native Claims Settlement Act. Thus, distinctions between those two sections are not herein dispositive of question of Secretary's authority to withdraw lands in PLO 5250.

Appellant may not use appeal to Board or request for hearing under 43 CFR 4.415 as vehicle for petitioning Secretary of the Interior to have withdrawal revoked and land restored to entry.

Mining claims located on lands previously withdrawn from entry under the mining laws are null and void ab initio.

Harry H. Wilson, 35 IBLA 349 (June 19, 1978)

Mining claims located on land withdrawn from such entry are null and void ab initio and will not be validated by the modification or revocation of the order of withdrawal to open the land thereafter to mineral entry.

James Messano, 35 IBLA 383 (June 23, 1978)

Mining claims located on lands within a withdrawal which were not open to mineral entry are properly declared null and void ab initio.

Robert Cornett, 36 IBLA 84 (July 12, 1978)

A mining claim located on land which is not subject to mineral entry at the time of location is null and void from its inception. Where a mining claimant states in his notice of location that his mining claims were located on dates subsequent to the filing of an application for withdrawal which included the land encompassed by the mining claim, but indicates on appeal that the claims designated in the notice were merely a "regrouping," of identical claims filed prior to the segregation of the lands, it is nevertheless proper for the State Office to declare the mining claims null and void since mining claims located on withdrawn land are not subject to recordation.

Wilbur G. Hallauer, 36 IBLA 144 (July 26, 1978)

WITHDRAWALS AND RESERVATIONS--Continued

EFFECT OF--Continued

A desert land entry petition-application is properly rejected where the lands applied for therein have been withdrawn by a public land order to protect recreational, historical, and geological values in public lands along the North Platte River.

Cecilia J. Cain, 36 IBLA 250 (Aug. 15, 1978)

A geothermal lease offer filed for lands which are withdrawn for the Department of Defense from all forms of appropriation under the public land laws, including the mining and mineral leasing laws, is properly rejected. Where an offer to lease lands for geothermal resources cannot be accepted because the lands are withdrawn and not available for leasing, the offer will be rejected and may not be held in suspense until the land may become available for such leasing.

Sulphur River Exploration, Inc., 36 IBLA 307 (Aug. 21, 1978)

Where land within a trade and manufacturing site is withdrawn from appropriation prior to cognizable occupancy and use for purposes of trade or manufacture under 43 U.S.C. § 687a (1970) and 43 CFR Subpart 2562, an invalid claim cannot be perfected, and appellant has not shown wherein she is entitled to equitable adjudication under 43 CFR 1871.1.

Sandy Pondy, 37 IBLA 48 (Sept. 18, 1978)

Lands withdrawn for a powersite reservation, with certain exceptions, are open to entry for location and patent of mining claims with a reservation of power rights in the lands to the United States and subject to the conditions in the Mining Claims Rights Restoration Act. Where the BLM decision declaring mining claims null and void did not consider the effect of this Act on the withdrawal, the decision will be set aside and remanded for appropriate action.

Robert D. Upton and William C. Neils, 38 IBLA 90 (Nov. 15, 1978)

Public Land Order 82, issued in 1943, which withdrew from "sale, location, selection, and entry" certain described "public lands" in the Territory of Alaska, could include coastal and inland submerged lands, if such were the intent of the Order.

Where the language of a withdrawal order is unclear as to whether submerged lands were included in the order which withdrew certain lands in the Territory of Alaska from "sale, location, or entry," the withdrawal should be construed to carry out its intent and purpose.

Where the description in the withdrawal order affecting lands in the Territory of Alaska is ambiguous, but can be interpreted to exclude coastal submerged lands, and where other evidence exists which tends to indicate that coastal submerged lands were not intended to be included in the order, the order will be construed to exclude coastal submerged lands.

Where evidence exists that a withdrawal of certain lands in the Territory of Alaska intended to include inland submerged lands, and such submerged lands are not specifically excepted from the withdrawal, the withdrawal will be construed to include inland submerged lands.

Where submerged lands were included in a withdrawal order in Alaska, which was in effect at the time the State entered the Union, even though such submerged lands were not specifically described in the withdrawal order, such submerged lands would not pass to the State at statehood pursuant to sec. 5(a) of the Submerged Lands Act.

The subsequent revocation of a withdrawal of submerged lands which prevented the State from acquiring title to such lands at statehood pursuant to sec. 5(a) of the Submerged Lands Act, has no effect on the ownership of the lands contained in the withdrawal.

Where the coastal submerged lands in the Arctic National Wildlife Refuge were segregated by an application for a withdrawal filed by the Fish and Wildlife Service in Jan. 1958, 1 year before Alaska statehood, such application operated as an express retention of the lands at statehood under the Submerged Lands Act, and prevented passage of title of the coastal submerged lands to the State.

The Effect of Public Land Order 82 on the Ownership of Coastal Submerged Lands in Northern Alaska, M-36911 (Dec. 12, 1978) 86 I.D. 151 (1979)

A mining claim located on land which has been previously withdrawn from location under the mining laws may be properly declared null and void ab initio without a hearing. Such a claim confers no rights on the locator or a subsequent grantee and will not be validated by the modification or revocation of the order of withdrawal to open the land thereafter to mineral entry. It is immaterial whether the lands are presently being, or have ever been, used for the purpose for which they were withdrawn.

Wendell L. Garrett d.b.a. Garrett Industries, 39 IBLA 85 (Jan. 24, 1979)

Lands which are withdrawn from entry remain withdrawn and are not open under the public land laws until there is formal revocation or modification of order of withdrawal and a restoration order opening the lands. Mere passage of time or accomplishment of avowed purpose cannot serve as substitute for formal revocation and restoration.

Erroneous issuance by BLM of oil and gas lease on other withdrawn land in area of tract for which appellant submitted lease offer does not effect restoration to leasing of latter withdrawn tract.

F. M. Tully, 39 IBLA 137 (Jan. 29, 1979)

Portions of mining claims located on lands within a withdrawal and not open to mineral entry are properly declared null and void ab initio.

Barry C. Pipping, 39 IBLA 390 (Feb. 28, 1979)

Lands segregated on the public records by a proposed withdrawal posted Apr. 6, 1973, or a Recreational and Public Purposes Classification filed Nov. 13, 1956, were not available for the location of mining claims, and claims thereafter located are null and void ab initio.

Neither a Recreation and Public Purposes Act classification nor a withdrawal is a rule or regulation within the ambit of the Secretarial policy of Apr. 27, 1971, which provides for utilization of the public participation procedures of 5 U.S.C. § 553 (1976).

Mining claims purportedly located on land not available for such location confer no property right upon the

WITHDRAWALS AND RESERVATIONS--Continued

EFFECT OF--Continued

locator, and may be declared null and void ab initio without a hearing under 5 U.S.C. § 554 *et seq*. (1976).

The notation on public records on Apr. 6, 1973, of an application for withdrawal, even though the application did not contain a reference to authority for the withdrawal, as required in 43 CFR 2351.2(b) (1972), was sufficient to temporarily segregate the land under secs. 2091.2-5 (1972) and 2351.3 (1972) from subsequent inclusion in a mining location.

Delmer McLean et al., 40 IBLA 34 (Mar. 15, 1979)

A mining claim located on land previously withdrawn from appropriation under the mining laws is null and void ab initio.

Gerald Byron Bannon, 40 IBLA 162 (Mar. 30, 1979)

Tilden Holloway, Roland Wright, 43 IBLA 134 (Sept. 28, 1979)

Oil and gas offers, filed for lands withdrawn by PLO No. 5418, must be rejected. The order was issued under the authority of the Pickett Act, 43 U.S.C. §§ 141-142 (1970), repealed by FLPMA, and the order was not arbitrary, capricious, or an abuse of discretion.

Bristol Bay Native Corp., 41 IBLA 85 (June 4, 1979)

A Native allotment applicant, who was 5 years old at the time when the land was withdrawn from all forms of appropriation, is properly deemed to be incapable as a matter of law of having exerted independent use and occupancy of the land to the exclusion of others prior to the withdrawal and consequently the allotment application is properly rejected.

Floyd L. Anderson, Sr., 41 IBLA 280 (June 28, 1979)
86 I.D. 345

Peter Pagruk, 43 IBLA 69 (Sept. 19, 1979)

Nicky Nickoli, 43 IBLA 296 (Oct. 17, 1979)

A grazing lease issued under the Alaska Grazing Act, 43 U.S.C. § 316 *et seq*. (1970), appropriates the lands and segregates them from the public domain, barring them from use and occupancy for Native allotment purposes until the Department takes action to exclude lands from the lease.

Herman Anderson, Jr., Nicholas Pestrikoff, Anthony Drabek, 41 IBLA 296 (June 29, 1979)

Where the land on which the mining claim is located is subsequently withdrawn, the validity of the claim must be determined as of the date of the withdrawal and through the date of the hearing. If there was no discovery as of the date of the withdrawal, the land would not be excepted from the effect of the withdrawal and the claim could not thereafter become valid even though the requirement of discovery was satisfied at a later date.

United States v. William Lavon Chappell et al., 42 IBLA 74 (Aug. 13, 1979)

WITHDRAWALS AND RESERVATIONS--Continued

EFFECT OF--Continued

Where a trade and manufacturing site is located on land that is withdrawn from appropriation prior to its occupancy and use, an application to purchase is properly denied despite the fact that applicant entered the land as a special use permittee.

Mardelle M. Smith, Sherman C. Smith, 42 IBLA 136 (Aug. 16, 1979)

A recreation and public purposes classification, issued pursuant to the Recreation Act of 1926, *as amended*, 43 U.S.C. § 869 (1976), segregates Alaskan lands from Native allotment applications until such time as the classification is revoked.

PLO No. 4582, *as amended*, withdraws the land included therein and bars a subsequent Native allotment application.

Under Secretarial Order No. 3040, it is sufficient if the 5 years' use and occupancy, required under the Native Allotment Act, is completed prior to the granting of the allotment, providing applicant either filed for his allotment or commenced use and occupancy prior to the withdrawal.

Betty J. Thompson, 43 IBLA 174 (Sept. 28, 1979)

When land is withdrawn from mining location after a mining claim has been located thereon, the claimant must show that discovery of a valuable mineral deposit occurred *prior* to the withdrawal in order to establish rights against the Government.

United States v. Ralph Page et al., 43 IBLA 390 (Oct. 31, 1979)

POWERSITES

In connection with a mining claim located on land withdrawn for reclamation and power purposes, where (1) no notice of location was filed during a later period in which the land was open for entry subject to 30 U.S.C §§ 621, 623-24 (1970), (2) there are no intervening rights, (3) a claimant alleges that he held and worked the land, while open to entry, for the requisite number of years under 30 U.S.C. § 38 (1970) and the applicable State statute of limitations, and (4) he alleges that a discovery of a valuable mineral deposit has been made, it is necessary to consider the effect of sec. 621 *et seq.*, and to hold a hearing if required to resolve questions of fact.

Ralph Page, 19 IBLA 255 (Mar. 31, 1975)

The inclusion of lands belonging to the United States in a proposed power project pursuant to sec. 24 of the Federal Power Act of 1920, 16 U.S.C. § 818 (1970), has the effect of reserving or withdrawing those lands from entry, location, or other disposal under the public land laws of the United States until otherwise directed by the Federal Power Commission or by Congress and until the withdrawal is revoked by the Secretary of the Interior.

A selection application by the State of Alaska must be rejected with respect to those public lands which are reserved or withdrawn from entry or other form of disposal under the public land laws of the United States and cannot be held open pending a possible future change of the status of the land.

State of Alaska, 20 IBLA 341 (June 11, 1975)

WITHDRAWALS AND RESERVATIONS--Continued

POWERSITES--Continued

Where an applicant for a Native allotment asserts use and occupancy of the land in 1959 and the land is included in an application for powersite withdrawal of the lands in 1963, and is withdrawn in 1965 for such purposes, the applicant has failed to demonstrate the 5 years' use and occupancy prior to the effective date of the withdrawal as required by the Secretarial directive of Oct. 18, 1973. This is based upon the finding that an application for power purposes, upon its filing, immediately withdraws the land pursuant to sec. 24 of the Federal Power Act, *as amended*, 16 U.S.C. § 818 (1970).

Herman Joseph, 21 IBLA 199 (July 30, 1975)

An Alaska Native allotment application is properly rejected where applicant fails to show 5 years' substantially continuous use and occupancy prior to the closing of the land to Native allotments. An allotment application is properly rejected when the land applied for is within a powersite withdrawal and initiation of use and occupancy was less than 5 years prior to the time the lands were closed.

Heirs of Charles E. Frank et al., 21 IBLA 248 (Aug. 11, 1975)

Leah Druck, 22 IBLA 253 (Oct. 22, 1975)

An Alaska Native allotment application is properly rejected where the applicant fails to demonstrate completion of 5 years of substantially continuous use and occupancy prior to an application for withdrawal of the land for power purposes.

Wayne C. Williams, 23 IBLA 88 (Dec. 16, 1975)

A Native allotment may not be approved where the land applied for has been within a powersite withdrawal long prior to the initiation of applicant's use and occupancy.

Davis Hobson, 23 IBLA 159 (Dec. 23, 1975)

The inclusion of lands belonging to the United States in a proposed power project pursuant to sec. 24 of the Federal Power Act of 1920, 16 U.S.C. § 818 (1970), has the effect of reserving or withdrawing those lands from entry, location, or other disposal under the public land laws of the United States until otherwise directed by the Federal Power Commission or by Congress and until the withdrawal is revoked by the Secretary of the Interior.

T. E. Markham, 24 IBLA 5 (Feb. 4, 1976)

A mining claim located before Aug. 11, 1955, on land within an existing powersite withdrawal is properly declared null and void as the land was then closed to mineral entry. Claims located prior to that date were not resuscitated by the Mining Claims Rights Restoration Act of 1955.

Beverly Trull, 25 IBLA 157 (June 10, 1976)

WITHDRAWALS AND RESERVATIONS--Continued

POWERSITES--Continued

A mining claim located before Aug. 11, 1955, on land within an existing powersite withdrawal is properly declared null and void as the land was then closed to mineral entry. Void claims located prior to that date were not given life by the Mining Claims Rights Restoration Act of 1955.

David Loring Gamble, Darrel Houglum, 26 IBLA 249 (Aug. 18, 1976)

A description of lands withdrawn by a powersite classification must be interpreted according to its plain meaning when this meaning is consistent with descriptive maps attached to it, with the interpretation of its promulgator, and with the purpose of the classification.

A powersite classification effects withdrawal of lands to the full extent described therein as of publication in the *Federal Register*, even if the extent of the land withdrawn by it is not accurately entered subsequently on land-status maps, and, notwithstanding this error, lands classified by it are withdrawn under sec. 24 of the Federal Power Act from settlement under the homestead laws, so that a notice of location settlement claim and final proof concerning these lands is properly rejected.

Henry E. Reeves, 31 IBLA 242 (July 18, 1977)

Where prior to 1920 a powersite withdrawal was created by executive order under authority of the Act of June 25, 1910, the withdrawn land remained open to the location of mining claims for metalliferous minerals until passage of the Federal Power Act on June 10, 1920, which closed powersites to all entry, location or disposal. Any mining claim located thereafter on powersite lands is void ab initio unless the land has been restored to such entry in accordance with sec. 24 of the Federal Power Act or the location of the claim has been made in accordance with the Act of Aug. 11, 1955, 30 U.S.C. § 621 (1970). The latter Act did not operate retroactively to validate void claims.

Henry Stagnaro, 31 IBLA 357 (July 25, 1977)

Lands which are covered by a license for a power project issued by the Federal Power Commission are not open to mineral location.

Raymond C. Gardner et al., 34 IBLA 179 (Mar. 14, 1978)

Lands withdrawn for a powersite reservation, with certain exceptions, are open to entry for location and patent of mining claims with a reservation of power rights in the lands to the United States and subject to the conditions in the Mining Claims Rights Restoration Act. Where the BLM decision declaring mining claims null and void did not consider the effect of this Act on the withdrawal, the decision will be set aside and remanded for appropriate action.

Robert D. Urton and William C. Wells, 38 IBLA 90 (Nov. 15, 1978)

Where a mining claim has been located pursuant to the Mining Claims Rights Restoration Act, 30 U.S.C. §§ 621-625 (1970), on land withdrawn for powersite, it is

WITHDRAWALS AND RESERVATIONS--Continued

POWERSITES--Continued

proper to prohibit placer mining if there is a likelihood of substantial interference with the use of the land for fishing, hunting, recreation, and the recovery of archaeological values.

The Mining and Minerals Policy Act of 1970, 30 U.S.C. § 21a (1970), does not require the granting of permission for placer mining operations on land within a powersite withdrawal where such operations would probably interfere with other uses of the land.

United States v. Edward J. Connolly, Jr., Idaho Fish and Game Department (Intervenor), 40 IBLA 30 (Mar. 15, 1979)

The withdrawals of lands for powersites under 43 U.S.C. § 141 (1970) do not carry with them reserved water rights for purposes under the administration of the Department of the Interior, simply because of their reservation as a powersite.

Federal Water Rights of the National Park Service, Fish and Wildlife Service, Bureau of Reclamation and the Bureau of Land Management, M-36914 (June 25, 1979)
86 I.D. 553

Where an applicant for a Native allotment alleges use and occupancy of lands which had previously been withdrawn in accordance with sec. 24, Federal Water Power Act of June 10, 1920, an application is properly denied despite the fact that a public land order designating the area a powersite classification is issued subsequent to the applicant's commencement of use and occupancy. Lands included in an application for powersite development under the Act shall from the date of filing of the application be reserved from entry, location, or other disposal under the laws of the United States, unless otherwise directed by the Federal Power Commission or by Congress.

Lindberg Alexander, 41 IBLA 382 (July 23, 1979)

Lands included in an application for powersite development under the Federal Power Act of June 10, 1920, 16 U.S.C. § 818 (1976), shall from the date of filing of the application be reserved from entry, location, or other disposal under the laws of the United States, unless otherwise directed by the Federal Power Commission or by Congress.

Charles L. John, 42 IBLA 260 (Aug. 27, 1979)

Settlement upon a tract of land withdrawn from entry is a trespass and provides no basis for any claim to the land under the Alaska Native Allotment Act of May 17, 1906, 34 Stat. 197. Any subsequent revocation or modification of the withdrawal and the restoration of the land to entry will not validate an application for a Native allotment. An application for land withdrawn from entry is nugatory and cannot be given life, even by restoration of land during the pendency of an appeal from its rejection.

Paul D. Tony, 43 IBLA 245 (Oct. 10, 1979)

A mining claim located prior to Aug. 11, 1955, on lands withdrawn for a powersite is null and void ab initio. The passage of the Mining Claims Rights Restoration Act of Aug. 11, 1955, 30 U.S.C. § 621 (1976), did not give

WITHDRAWALS AND RESERVATIONS--Continued

POWERSITES--Continued

life to void claims which had been located on withdrawn lands prior to the date of the Act.

United States v. Elbert Gassaway, 43 IBLA 382 (Oct. 31, 1979)

When land is withdrawn from mining location after a mining claim has been located thereon, the claimant must show that discovery of a valuable mineral deposit occurred prior to the withdrawal in order to establish rights against the Government.

United States v. Ralph Page et al., 43 IBLA 390 (Oct. 31, 1979)

RECLAMATION WITHDRAWALS

An application to make homestead entry on land embraced in a first-form reclamation withdrawal is properly rejected.

Richard F. Crill et al., 18 IBLA 428 (Feb. 14, 1975)

Clifford Prisbrey, 24 IBLA 108 (Mar. 1, 1976)

Lewis M. Eslick, 24 IBLA 237 (Mar. 24, 1976)

Dallas C. Qualman et al., 36 IBLA 119 (July 25, 1978)

Applications filed by the State of Idaho under the Act of Mar. 15, 1910, for temporary withdrawals of land for proposed development under the Carey Act of 1894, must be rejected where the lands have been previously withdrawn for reclamation, stock-driveway, agricultural research or military purposes.

Idaho Department of Water Resources, 25 IBLA 27 (May 5, 1976)

Mining claims and millsites located upon land which has been previously withdrawn from entry under the mining laws by a first-form reclamation withdrawal are void ab initio. Because Departmental Order No. 2515 delegated authority to revoke such a withdrawal to the Bureau of Reclamation with the concurrence of the Bureau of Land Management, the land remains withdrawn from mining locations when the Bureau of Land Management does not concur with the recommendation of the Bureau of Reclamation to revoke the withdrawal and restore the land to entry.

A request for a hearing pursuant to 43 CFR 4.415 for the purpose of taking testimony on the Bureau of Land Management's "continued refusal" to restore land in a reclamation withdrawal to entry will be denied. An appeal from a decision declaring mining claims and millsites null and void ab initio because the lands are in the withdrawal may not serve as the vehicle for petitioning the Secretary of the Interior to revoke the withdrawal. Furthermore, even if the withdrawal were revoked and the land opened to entry, this action could not revive mining claims which were void when located while the withdrawal was in effect and the land closed to entry under the mining laws.

J. P. Hinds et al., 25 IBLA 67 (June 1, 1976)
83 I.D. 275

WITHDRAWALS AND RESERVATIONS--Continued

RECLAMATION WITHDRAWALS--Continued

The rejection of an application under the Act of Apr. 23, 1932, 43 U.S.C. § 154 (1970), to open lands in a reclamation withdrawal to mineral location will be affirmed when the applicant fails to submit facts to show the basis for his knowledge or belief that the lands contain valuable mineral deposits. Merely to state the lands contain such deposits is not sufficient.

Joe Ashburn, 27 IBLA 227 (Oct. 12, 1976)

Applications filed by the State of Idaho under the Act of Mar. 15, 1910, for temporary withdrawals of land for proposed development under the Carey Act of 1894, must be rejected where the lands have been previously withdrawn for reclamation purposes.

Idaho Department of Water Resources, 27 IBLA 303 (Oct. 26, 1976)

Applications filed for temporary withdrawals of land for proposed development under the Carey Act of 1894 must be rejected where the lands have been previously withdrawn for other purposes.

Idaho Department of Water Resources, 32 IBLA 89 (Sept. 2, 1977)

Ordinarily an application to restore lands within a reclamation withdrawal to mineral entry pursuant to the Act of Apr. 23, 1932, 43 U.S.C. § 154 (1970), will be rejected by the Bureau of Land Management where the Bureau of Reclamation recommends against restoration; however, on appeal a case may be remanded for further consideration by the appropriate agencies, including preparation of a mineral report, where it appears warranted by the appellant's showings and willingness to propose terms and conditions to protect the Government's interest.

G. W. Daily, 34 IBLA 176 (Mar. 14, 1978)

Where a reclamation withdrawal is revoked as to certain land but that land is not restored to entry, the land remains closed to mineral entry and a mining claim located on it is null and void.

Raymond C. Gardner et al., 34 IBLA 179 (Mar. 14, 1978)

An application under the Act of Apr. 23, 1932, 43 U.S.C. § 154 (1970), for restoration to mineral entry and location of lands within a reclamation withdrawal will ordinarily be rejected when the Bureau of Reclamation has recommended against it, the recommendation is premised upon the requirements of the public interest, and the reasons offered in support of the recommendation are cogent.

Edward J. Connolly, Jr., 34 IBLA 233 (Mar. 27, 1978)

When land is withdrawn from mining location after a mining claim has been located thereon, the claimant must show that discovery of a valuable mineral deposit occurred *prior* to the withdrawal in order to establish rights against the Government.

United States v. Ralph Page et al., 43 IBLA 390 (Oct. 31, 1979)

WITHDRAWALS AND RESERVATIONS--Continued

REVOCATION AND RESTORATION

In connection with a mining claim located on land withdrawn for reclamation and power purposes, where (1) no notice of location was filed during a later period in which the land was open for entry subject to 30 U.S.C. §§ 621, 623-24 (1970), (2) there are no intervening rights, (3) a claimant alleges that he held and worked the land, while open to entry, for the requisite number of years under 30 U.S.C. § 38 (1970) and the applicable State statute of limitations, and (4) he alleges that a discovery of a valuable mineral deposit has been made, it is necessary to consider the effect of sec. 621 *et seq.*, and to hold a hearing if required to resolve questions of fact.

Ralph Page, 19 IBLA 255 (Mar. 31, 1975)

The inclusion of lands belonging to the United States in a proposed power project pursuant to sec. 24 of the Federal Power Act of 1920, 16 U.S.C. § 818 (1970), has the effect of reserving or withdrawing those lands from entry, location, or other disposal under the public land laws of the United States until otherwise directed by the Federal Power Commission or by Congress and until the withdrawal is revoked by the Secretary of the Interior.

State of Alaska, 20 IBLA 341 (June 11, 1975)

The Secretary of the Interior is without authority to withdraw or reserve lands or to revoke withdrawals and reservations affecting land under the administrative jurisdiction of any executive department or agency of the Government other than the Department of the Interior without the prior approval or concurrence, so far as the order affects such land, of the head of the department or agency concerned.

Robert D. Hughes, 22 IBLA 121 (Sept. 26, 1975)

A request for a hearing pursuant to 43 CFR 4.415 for the purpose of taking testimony on the Bureau of Land Management's "continued refusal" to restore land in a reclamation withdrawal to entry will be denied. An appeal from a decision declaring mining claims and millsites null and void ab initio because the lands are in the withdrawal may not serve as the vehicle for petitioning the Secretary of the Interior to revoke the withdrawal. Furthermore, even if the withdrawal were revoked and the lands opened to entry, this action could not revive mining claims which were void when located while the withdrawal was in effect and the land closed to entry under the mining laws.

J. P. Hinds et al., 25 IBLA 67 (June 1, 1976)
83 I.D. 275

Mining claims are properly declared null and void ab initio when the locations were not perfected by performance of the condition precedent to the opening of withdrawn land to location, entry and patent under the mining laws.

Floyd W. McCarty, 28 IBLA 246 (Dec. 20, 1976)

Where, in the public interest, the Secretary decides not to reopen land to settlement, a would-be settler on this land is denied no rights by this decision.

Henry F. Reeves, 31 IBLA 242 (July 18, 1977)

WITHDRAWALS AND RESERVATIONS--Continued

REVOCATION AND RESTORATION--Continued

Ordinarily an application to restore lands within a reclamation withdrawal to mineral entry pursuant to the Act of Apr. 23, 1932, 43 U.S.C. § 154 (1970), will be rejected by the Bureau of Land Management where the Bureau of Reclamation recommends against restoration; however, on appeal a case may be remanded for further consideration by the appropriate agencies, including preparation of a mineral report, where it appears warranted by the appellant's showings and willingness to propose terms and conditions to protect the Government's interest.

G. W. Daily, 34 IBLA 176 (Mar. 14, 1978)

Where a reclamation withdrawal is revoked as to certain land but that land is not restored to entry, the land remains closed to mineral entry and a mining claim located on it is null and void.

Raymond C. Gardner et al., 34 IBLA 179 (Mar. 14, 1978)

An application under the Act of Apr. 23, 1932, 43 U.S.C. § 154 (1970), for restoration to mineral entry and location of lands within a reclamation withdrawal will ordinarily be rejected when the Bureau of Reclamation has recommended against it, the recommendation is premised upon the requirements of the public interest, and the reasons offered in support of the recommendation are cogent.

Edward J. Connolly, Jr., 34 IBLA 233 (Mar. 27, 1978)

Appellant may not use appeal to Board or request for hearing under 43 CFR 4.415 as vehicle for petitioning Secretary of the Interior to have withdrawal revoked and land restored to entry.

Harry H. Wilson, 35 IBLA 349 (June 19, 1978)

Under the procedures in effect prior to the passage of the Federal Land Policy and Management Act of 1976, 90 Stat. 2744, 43 U.S.C. § 1701 et seq. (1977 Supp.), the revocation of a withdrawal or the restoration of withdrawn land to the public domain requires publication of a duly authorized Public Land Order. However, relinquishment of administrative jurisdiction by an administering agency to the BLM does not, in and of itself, result in either a revocation or restoration, and acceptance by BLM of accountability and responsibility is controlled by the procedures outlined in 43 CFR Subpart 2370.

Alaska Pipeline Co., 38 IBLA 1 (Nov. 8, 1978)

Regardless of whether lands have been withdrawn from leasing and later restored, or were not withdrawn, an over-the-counter oil and gas lease offer must be rejected where the land involved was formerly embraced in an oil and gas lease which has expired by operation of law and has not been placed on the list of lands available for the filing of simultaneous oil and gas lease offers under 43 CFR Subpart 3112.

David A. Provinse, 38 IBLA 347 (Dec. 22, 1978)

WITHDRAWALS AND RESERVATIONS--Continued

REVOCATION AND RESTORATION--Continued

A mining claim located on land which has been previously withdrawn from location under the mining laws may be properly declared null and void ab initio without a hearing. Such a claim confers no rights on the locator or a subsequent grantee and will not be validated by the modification or revocation of the order of withdrawal to open the land thereafter to mineral entry. It is immaterial whether the lands are presently being, or have ever been, used for the purpose for which they were withdrawn.

Wendell L. Garrett d.b.a. Garrett Industries, 39 IBLA 85 (Jan. 24, 1979)

Lands which are withdrawn from entry remain withdrawn and are not open under the public land laws until there is formal revocation or modification of order of withdrawal and a restoration order opening the lands. Mere passage of time or accomplishment of avowed purpose cannot serve as substitute for formal revocation and restoration.

Erroneous issuance by BLM of oil and gas lease on other withdrawn land in area of tract for which appellant submitted lease offer does not effect restoration to leasing of latter withdrawn tract.

F. M. Tully, 39 IBLA 137 (Jan. 29, 1979)

Settlement upon a tract of land withdrawn from entry is a trespass and provides no basis for any claim to the land under the Alaska Native Allotment Act of May 17, 1906, 34 Stat. 197. Any subsequent revocation or modification of the withdrawal and the restoration of the land to entry will not validate an application for a Native allotment. An application for land withdrawn from entry is nugatory and cannot be given life, even by restoration of land during the pendency of an appeal from its rejection.

Paul D. Tony, 43 IBLA 245 (Oct. 10, 1979)

SPRINGS AND WATERHOLES

Even though springs and waterholes withdrawn from mineral entry by Executive Order No. 107 may not be in use, they nevertheless remain withdrawn so long as they provide sufficient water for public watering purposes.

Robert L. Beery et al., 25 IBLA 287 (June 28, 1976)
83 I.D. 249

Where a waterhole and the surrounding land were withdrawn pursuant to both an Executive Order and an Act of Congress and reserved exclusively for use by the public before the water had been appropriated by others, the Federally reserved water right is superior to and precludes any acquisition of rights to the water by others.

Park Center Water District and The Canon Heights Irrigation and Reservoir Co., 28 IBLA 368 (Feb. 3, 1977)
84 I.D. 87

Executive Order No. 107 of Apr. 17, 1926, withdrew from appropriation all waterholes on public lands, and a purported right to appropriate water from the spring that postdates the withdrawal is without effect.

Broken H. Ranch Co., 33 IBLA 386 (Jan. 26, 1978)

WITHDRAWALS AND RESERVATIONS--Continued

SPRINGS AND WATERHOLES--Continued

Generally

For purposes of the Executive Order of Apr. 17, 1926, the term "spring" means a discrete natural flow of water emerging from the earth at a reasonably distinct location, whether or not such flow constitutes a source of or is tributary to a water course, pond, or other body of surface water. The term "waterhole" means a dip or hole in the earth's surface where surface or groundwater collects and which may serve as a watering place for man or animals.

The Executive Order withdrew, as of Apr. 17, 1926, all lands containing important springs and waterholes that existed as of that date on unappropriated, unreserved public lands.

The Executive Order does not withdraw artifically developed sources of water or manmade structures for collection of water on the public domain. However, any interest held in those artificially developed or constructed sources or structures passes to the United States upon abandonment by the developer or his successor in interest by virtue of the United States' ownership of the land.

The Executive Order withdraws, by operation of law, lands which become of the character contemplated in the Order subsequent to the date of the Order; *i.e.*, vacant, unappropriated, unreserved public lands upon which springs or waterholes come into existence after Apr. 17, 1926.

The Executive Order withdraws all lands containing springs or waterholes as defined and subject to the limitations set forth above, regardless of whether the water source has been the subject of an official finding as to its existence and location.

The priority date for the public right to use the waters of a spring or waterhole withdrawn under the Order is Apr. 17, 1926, for all public springs and waterholes existing on that date. Those public springs and waterholes that naturally come into existence at a later date are withdrawn when they come into existence.

The purposes for which water is reserved under the 1926 Order are (a) stockwatering, (b) human consumption, (c) agriculture and irrigation, including sustaining fish, wildlife and plants as a food and forage source, and (d) flood, soil, fire and erosion control.

Because the Federal Land Policy and Management Act of 1976, 43 U.S.C. § 1701 *et seq.* (1976), repealed both authorizing statutes under which the Apr. 17, 1926, Order was issued, springs and waterholes on the public domain coming into existence after Oct. 21, 1976, are not withdrawn by the Apr. 17, 1926, Order but must be withdrawn under other, still existing legislative authority to be effective.

Federal Water Rights of the National Park Service, Fish and Wildlife Service, Bureau of Reclamation and the Bureau of Land Management, M-36914 (June 25, 1979)
86 I.D. 553

Rights-of-Way

Any action taken by private party who did not have a vested State water right prior to Apr. 17, 1926, or had not received appropriate permission from the United States subsequent to that date to make use of the public waterhole or spring withdrawn by the Order is a nullity and of no force and effect. Any entry onto the reserved land for such purpose constitutes a trespass.

Federal Water Rights of the National Park Service, Fish and Wildlife Service, Bureau of Reclamation and the Bureau of Land Management, M-36914 (June 25, 1979)
86 I.D. 553

WITHDRAWALS AND RESERVATIONS--Continued

SPRINGS AND WATERHOLES--Continued

State Laws

The Executive Order does not affect a valid, private right to use some or all of the waters of such a source that vested under the applicable State laws, custom or usage prior to Apr. 17, 1926.

The Executive Order withdraws, by operation of law, any vacant, unappropriated, unreserved public land upon which is located a spring or waterhole and for which a private vested right to use all of such water under applicable State law, custom and usage has previously existed upon abandonment or forfeiture of that State water right under the terms of the applicable State law, custom or usage.

Federal Water Rights of the National Park Service, Fish and Wildlife Service, Bureau of Reclamation and the Bureau of Land Management, M-36914 (June 25, 1979)
86 I.D. 553

STOCK-DRIVEWAY WITHDRAWALS

An application filed by a State under the Act of Mar. 15, 1910, for a temporary withdrawal of lands to aid in the selection of the lands for proposed development under the Carey Act of 1894 must be rejected where the lands are withdrawn for stock-driveway purposes, and cannot be suspended pending consideration of a petition for reclassification of the lands as suitable for selection under the Carey Act.

A grant of lands to a State under the Carey Act of 1894 is not a grant *in praesenti*, vesting title to any particular lands as of the time of passage of the Act or by relation back upon fulfillment of the conditions imposed by the Act, but the allowance or rejection of an application by a State under the Act of Mar. 15, 1910, for a temporary withdrawal of lands to aid in the selection of the lands for proposed development under the Carey Act is a matter wholly within the discretion of the Department; and where the lands sought to be selected by the State are embraced within a stock-driveway withdrawal made by the Secretary of the Interior under authority of law, they are not, so long as such withdrawal remains in force, subject to any claim of the State under the Carey Act.

Idaho Department of Water Resources, 21 IBLA 210 (July 31, 1975)

A color of title application for land which has been withdrawn for a stock-driveway prior to any conveyance in a color of title applicant's chain of title is properly rejected as to such land.

Jeanne Pierresteguy, 23 IBLA 358 (Jan. 23, 1976)
83 I.D. 23

Applications filed by the State of Idaho under the Act of Mar. 15, 1910, for temporary withdrawals of land for proposed development under the Carey Act of 1894, must be rejected where the lands have been previously withdrawn for reclamation, stock-driveway, agricultural research or military purposes.

Idaho Department of Water Resources, 25 IBLA 27 (May 5, 1976)

Water sources located within stock driveways and reserved pursuant to sec. 10 of the Act of Dec. 29, 1916, 43 U.S.C. § 300 (1970), are reserved to the extent necessary to provide for stockwatering during the process of moving livestock through these reserved access corridors.

Federal Water Rights of the National Park Service, Fish and Wildlife Service, Bureau of Reclamation and the Bureau of Land Management, M-36914 (June 25, 1979)
86 I.D. 553

TEMPORARY WITHDRAWALS

In the absence of pertinent statutory directives or regulatory criteria mandating such action, it is improper for the Bureau of Land Management to reject applications filed by a State under the Act of Mar. 15, 1910, for temporary withdrawals of lands for proposed development under the Carey Act, on the basis of the Bureau's determination that the Carey Act does not permit acceptance of a temporary withdrawal application: (1) for the establishment of residence and settlement on noncontiguous tracts of land; (2) if the acreage applied for, when added to desert land entry acreage previously patented to the State's Carey Act project proposer, exceeds the maximum 320 acres permitted to be acquired by one person under 43 U.S.C. § 212 (1970); and (3) when the preliminary plan of development submitted by the State fails to provide adequate assurance of water transmission to the proposed project. Under these circumstances, the Bureau should suspend action on the applications pending Departmental action to revise and recodify previously deleted regulations which provide guidance for the administration of the Carey Act and the Act of Mar. 15, 1910.

Idaho Department of Water Resources, 24 IBLA 314 (Apr. 20, 1976)

It is improper for the Bureau of Land Management to reject desert land applications on the basis of directives within a deleted regulation which required that such applications be rejected when the lands described therein were included within a previously filed State application for a temporary withdrawal under the Act of Mar. 15, 1910, which permits the Secretary to temporarily withdraw lands in furtherance of the purposes of the Carey Act. In the absence of a recodification of the directives in the deleted regulation, the bureau should suspend action on all applications filed subsequent to the withdrawal application pending final action on the application for withdrawal.

Kevin D. Ellis, Sylvia D. Ellis, 24 IBLA 387 (May 3, 1976)

Applications filed by the State of Idaho under the Act of Mar. 15, 1910, for temporary withdrawals of land for proposed development under the Carey Act of 1894, must be rejected where the lands have been previously withdrawn for reclamation, stock-driveway, agricultural research or military purposes.

In the absence of pertinent statutory directives or regulatory criteria for the processing of temporary withdrawal applications for unreserved lands filed by a State under the Act of Mar. 15, 1910, for proposed development under the Carey Act, the Bureau of Land Management should suspend consideration of the applications pending Departmental action to revise and recodify previously deleted regulations which provide guidance for the administration of the Carey Act and the Act of Mar. 15, 1910.

Idaho Department of Water Resources, 25 IBLA 27 (May 5, 1976)

Applications filed by the State of Idaho under the Act of Mar. 15, 1910, for temporary withdrawals of land for proposed development under the Carey Act of 1894, must be rejected where the lands have been previously withdrawn for reclamation purposes.

In the absence of pertinent statutory directives or regulatory criteria for the processing of temporary withdrawal applications for unreserved lands filed by a State under the Act of Mar. 15, 1910, for proposed development under the Carey Act, the Bureau of Land Management should suspend consideration of the applications pending Departmental action to revise and recodify previously deleted regulations which provide guidance for the administration of the Carey Act and the Act of Mar. 15, 1910.

Idaho Department of Water Resources, 27 IBLA 303 (Oct. 26, 1976)

A recreation and public purposes application must be rejected for lands temporarily withdrawn for an irrigation project to benefit Indians. Such a withdrawal is effective until specifically revoked, even though it is made on a temporary basis and has been in effect for more than 50 years.

Elko County Board of County Supervisors, 29 IBLA 220 (Mar. 23, 1977)

Applications filed for temporary withdrawals of land for proposed development under the Carey Act of 1894 must be rejected where the lands have been previously withdrawn for other purposes.

Idaho Department of Water Resources, 32 IBLA 89 (Sept. 2, 1977)

Lands segregated on the public records by a proposed withdrawal posted Apr. 6, 1973, or a Recreational and Public Purposes Classification filed Nov. 13, 1956, were not available for the location of mining claims, and claims thereafter located are null and void ab initio.

Neither a Recreation and Public Purposes Act classification nor a withdrawal is a rule or regulation within the ambit of the Secretarial policy of Apr. 27, 1971, which provides for utilization of the public participation procedures of 5 U.S.C. § 553 (1976).

Mining claims purportedly located on land not available for such location confer no property right upon the locator, and may be declared null and void ab initio without a hearing under 5 U.S.C. § 554 *et seq.* (1976).

The notation on public records on Apr. 6, 1973, of an application for withdrawal, even though the application did not contain a reference to authority for the withdrawal, as required in 43 CFR 2351.2(b) (1972), was sufficient to temporarily segregate the land under secs. 2091.2-5 (1972) and 2351.3 (1972) from subsequent inclusion in a mining location.

Delmer McLean et al., 40 IBLA 34 (Mar. 15, 1979)

WORDS AND PHRASES

"*Agent*." The word "agent," as used in 43 CFR 3102.6-1 requiring statements of authority and disclosure of interests in oil and gas lease offers by agents, does not include an employee who has no discretionary authority and merely acts as the employer's amanuensis in affixing the employer's stamp on a simultaneous oil and gas lease offer entry card, even if it is done outside the actual physical presence of the employer. Any statement required by the Bureau of Land Management to establish the identity of the person who stamped the offeror's name on the card must allow the offeror to provide information to establish whether or not the person was an agent within the meaning of 43 CFR 3102.6-1; merely requiring the offeror to show the stamp was affixed by him or in his presence is not sufficient.

Evelyn Chambers, 27 IBLA 317 (Nov. 4, 1976) 83 I.D. 533

"*Agent*." The word "agent," as used in 43 CFR 3102.6-1 requiring statements of authority and disclosure of interests in oil and gas lease offers by agents, does not include a son who has no discretionary authority and merely acts as his mother's amanuensis in affixing her signature on a simultaneous oil and gas lease offer entry card. Therefore, no further statement is required by the Bureau of Land Management to establish whether or not the son was an agent within the meaning of 43 CFR 3102.6-1.

Rebecca J. Waters, 28 IBLA 381 (Feb. 4, 1977)

"*Agent*." The word "agent," as used in 43 CFR 3102.6-1, requiring statements of authority and disclosure of interests in oil and gas leases by agents, includes all persons or companies having discretionary authority to act on the offeror's behalf concerning the offer or lease.

D. E. Pack, 30 IBLA 166 (May 19, 1977) 84 I.D. 192

"*Amended Location*." An amended location of a mining claim is best defined as one in furtherance of an earlier, valid location, and a subsequent location referring to the same parcel of land, filed by the same party, changing only the name of the claim, will be deemed an amended location.

James C. Haight, 44 IBLA 240 (Dec. 11, 1979)

"*Any other person*." "Any other person" within the context of 43 CFR 4.470 includes one who has standing to protest or appeal a decision of the district manager. An organization which alleges that one or more of its members has been adversely affected by such a decision may be considered "any other person" within the meaning of the regulation.

National Wildlife Federation (Appellant) v. Bolten Ranch, Inc., (Respondent), 24 IBLA 391 (May 3, 1976)

"*Area covered by unit plan*" and "*Lands committed and not committed to unit plan*." When an oil and gas lease is committed to a cooperative or unit plan of development or operation approved by the Secretary, and when such plan unitizes less than all horizons or depths of said lease, the "area covered" by the plan consists only of the unitized depths or horizons and excludes any depths or horizons not unitized. Such a lease necessarily "embraces lands that are in part within and in part outside of the area covered by such plan" and must be "segregated into separate leases as to the lands committed and the lands not committed." "Lands committed" can only refer to all unitized depths or

horizons; "lands not committed" refers to all non-unitized depths. 30 U.S.C. § 226(j) (1970).

Amoco Production Co., 24 IBLA 227 (Mar. 24, 1976)

"*Before and after rule*." In reappraisal of a communication site, the before and after rule is applied by determining the market value of the Government tract including the site at the time of reappraisal, excluding any enhancement to or diminution from the site project, and substracting therefrom the market value of the remaining Government property interest, including enhancement or diminution from the project.

American Telephone and Telegraph Co. et al., 25 IBLA 341 (June 30, 1976)

"*Cancellation*" and "*termination*." The "cancellation" and the "termination" of oil and gas leases are separate, distinct concepts. Cancellation requires a specific act by the Department authorized by various statutes. Termination under 30 U.S.C. § 188(b) (1970) is automatic, occurring by operation of law when the lessee fails to pay his rental timely.

Oil Resources, Inc., 28 IBLA 394 (Feb. 7, 1977)
84 I.D. 91

"*Certified*." Under 43 CFR 1821.3-1(a), additional information submitted by an oil and gas offeror pursuant to a request by BLM need not be in affidavit form. A request for a "certified" copy of an unrecorded document in the possession of its owner connotes the intention that the owner attach an affidavit attesting to its authenticity.

Martha P. Merrill, 44 IBLA 136 (Nov. 30, 1979)

"*Common Clay*." A "common clay" not locatable under the mining laws does not include clay having exceptional qualities which meets refractory and other quality standards for highgrade ceramic products or other products requiring a high refractoriness, or which is useful for certain industrial uses, such as in the oil and oil well drilling industries, outside the manufacture of general clay products. It does include, however, clay usable or used only for structural and other heavy clay products, for pressed or face brick, as well as ordinary brick, and for pottery and ordinary earthenware and stoneware. The fact industrial and technological changes may make a certain clay deposit valuable for a given major manufacturer of brick, tile and other clay products, because it meets its peculiar specifications for blends with other raw materials, does not warrant a change from Departmental precedents and a strong Congressional policy establishing that clay usable only for such purposes is a common clay not locatable under the mining laws.

United States v. Thomas J. Peck et al., 29 IBLA 357 (Mar. 31, 1977) 84 I.D. 137

"*Contest*." A decision declaring claims located on withdrawn lands to be null and void ab initio is not a "contest" and regulations under 43 CFR 4.451 *et seq.*, relating to mining contests, have no application.

Delmer McLean et al., 40 IBLA 34 (Mar. 15, 1979)

WORDS AND PHRASES--Continued

"*Date of location*." Date of location of a mining claim is no later than the date on which the claimant certified he had complied with all requirements of law, as indicated by his signature on the notice and certificate of location. The date of recording the location notice of a mining claim in the county records has no bearing on the "date of location" of the claim, from which the 90-day period for recordation in BLM under FLPMA begins.

Ronald Coulam, 35 IBLA 35 (May 8, 1978)

"*Date of Location*." Under 43 CFR 3833.0-5(h), for claims located in Nevada, "date of location" is the date indicated in the notice of location or discovery posted on an unpatented mining claim.

Jim Spicer, 42 IBLA 288 (Aug. 27, 1979)

"*Ejusdem generis*." The *ejusdem generis* rule of construction may not be invoked to exclude gravel from the scope of a reservation of "all the coal and other minerals" in patents issued under the Stock-Raising Homestead Act, 43 U.S.C. § 299 (1970), because this rule of construction can only be effectively applied where there is a series of specific terms which define a class so that one may construe a general term by reference to that class.

Western Nuclear, Inc., 35 IBLA 146 (May 22, 1978)

"*Fair market value*." As used in 43 CFR 2802.1-7, "fair market value" of a communication site right-of-way is the amount in cash, or on terms reasonably equivalent to cash, for which in all probability the right to use the site would be granted by a knowledgeable owner willing but not obligated to grant to a knowledgeable user who desired but is not obligated to so use.

American Telephone and Telegraph Co. et al., 25 IBLA 341 (June 30, 1976)

Full Circle, Inc., 35 IBLA 325 (June 19, 1978)
85 I.D. 207

Donald H. Clark, C. Reinhart & Son, Inc., Hartwell Excavating Co., 39 IBLA 182 (Jan. 31, 1979)

"*Final entry*." When an amended homestead final proof has been submitted, the term "final entry" in the proviso in sec. 7, Act of Mar. 3, 1891, 26 Stat. 1098, *as amended*, 43 U.S.C. § 1165 (1970) refers to the submission, to the proper officials, of the amended final proof and required fees.

United States v. Joe W. Bryant, 25 IBLA 247 (June 23, 1976)

"*Grazing trespass*." The term "grazing trespass" as used in the context of the Federal Range Code refers to the grazing of livestock on Federal land without an appropriate license or permit or in violation of the terms and conditions of a license or permit, and not to any other special meaning ascribed under other laws and circumstances if inconsistent with this usage.

Eldon Brinkerhoff, 24 IBLA 324 (Apr. 21, 1976)
83 I.D. 185

WORDS AND PHRASES--Continued

"*Gross value at the point of shipment to market*." The royalty rate for products mined and disposed of under sodium and potassium leases must be imposed on the "gross value of the sodium (or potassium) compounds and other related products at the point of shipment to market," which means the gross value of a refined product for sale in an established market, and in general, no deductions may be allowed for costs incurred in developing a product to a marketable condition except for the price of reagents which are chemically combined with the product sold from the lease.

Foote Mineral Co., 34 IBLA 285 (Apr. 17, 1978)
85 I.D. 171

"*Headquarters*." The term "headquarters" as used in the Act of May 14, 1898, *as amended*, 43 U.S.C. § 687a (1970), means the usual place of business, principal office or administrative center used in connection with a trade, manufacture or other productive industry.

David A. Burns, 30 IBLA 359 (June 10, 1977)

"*Highest and best use*." As to the improver of a communication site during the term of his grant, a determination that the highest and best use of property is for communications purposes must be based on evidence showing it is so reasonably likely the site would be chosen for use as a communication site in the absence of improvements made by the improver that the suitability of the land for communications purposes would affect its general market value.

American Telephone and Telegraph Co. et al., 25 IBLA 341 (June 30, 1976)

"*Hold*." Any person or entity which has acquired actual possession and the right thereof to more than 320 acres of desert lands "holds" such acreage within the meaning of the prohibition of sec. 7 of the Act of Mar. 3, 1877, *as amended*.

United States v. G. Patrick Morris et al., 19 IBLA 350 (Apr. 7, 1975)
82 I.D. 146

"*Hold, assignment and otherwise*." Sec. 7 of the Act of Mar. 3, 1891, provides that no person or association of persons shall hold by assignment or otherwise, prior to the issue of patent, more than 320 acres of arid or desert lands; the terms "hold," "assignment" and "otherwise" are words of broad significance and will be defined in such manner to effectuate the purposes of the Act, to wit, to prevent anyone from holding more than 320 acres of desert lands to the exclusion of bona fide settlers or the entrymen of record.

"*Holding*." Any person or association of persons who controls, possesses and receives substantial benefits from desert lands will be regarded as "holding" such lands within the meaning of the Act of Mar. 3, 1891.

United States v. Golden Grigg et al., 19 IBLA 379 (Apr. 7, 1975)
82 I.D. 123

"*Hold by assignment or otherwise*." The purchaser of desert land under an illegal executory contract to convey the land subsequent to patent "holds" that land within the meaning of the acreage limitation of sec. 7 of the Desert Land Act, *as amended*, 43 U.S.C. § 329 (1970).

United States v. Elodymae Zwang, United States v. Darrell Zwang, 26 IBLA 41 (July 9, 1976) 83 I.D. 280

"*Innocent purchaser*." Where the purchaser from the railroad of unpatented land believed at the time of his purchase that the land was mineral, and there was physical evidence of its mineral character, or if conditions were such that the purchaser should have known then that the land was excepted from the grant to the railroad, he was not a purchaser in good faith within the "innocent purchaser" proviso of sec. 321(b) of the Transportation Act of 1940.

Southern Pacific Transportation Co., Jay R. Fogal; Lloyd D. Hayes (Intervenor), 23 IBLA 232 (Jan. 9, 1976)
83 I.D. 1

"*Interest*." Where there is an agreement giving an offeror the option of selling part of an oil and gas lease to his agent leasing service, exercisable solely at the offeror's discretion, the agent has a mere hope or expectancy and *not* an "interest" in the offer, as defined in 43 CFR 3100.0-5(b).

Virginia L. Jones, 34 IBLA 188 (Mar. 21, 1978)

"*Interest*." Where an individual files an oil and gas lease offer drawing entry card through a leasing service under an agreement by which the service is authorized to act as his exclusive representative in the sale of any lease rights obtained by him, and he is required to pay the service a set commission plus a percentage of revenues derived from any retained royalty interests, on any such sale, the leasing service has an enforceable right to share in any profits which may derive or accrue from the lease and, therefore, has an "interest" in the offer, as defined in 43 CFR 3100.0-5(b).

Harry E. Sist, 36 IBLA 374 (Aug. 31, 1978)

"*Interest*." Where an individual files an oil and gas lease offer drawing entry card through a leasing service under an agreement by which the first $8,000 of the proceeds from any sale of a lease goes to the individual, the next $3,500 goes to the leasing service, and the balance of the proceeds goes to the individual, the leasing service has an enforceable right to a defined share in profits which may derive or accrue from the lease, and, therefore, has an "interest" in the offer as defined in 43 CFR 3100.0-5(b).

Gertrude Galauner, 37 IBLA 266 (Oct. 19, 1978)

"*Interest*." Where a partner in a firm, or business associate, or an officer of a corporation which is engaged in the oil and gas business, files an oil and gas lease offer individually in his own name, the partnership/ corporation/association may have a claim to any benefits accruing to the individual from the lease, owing to the partnership agreement, corporate by-laws, or personal contract, due to the partner's/officer's/associate's fiduciary duty to hold any opportunity obtained individually for the exclusive use and benefit of the firm. This claim is an "interest" under 43 CFR 3100.0-5(b), and failure to disclose it within 15 days of the filing of the offer, as required by 43 CFR 3102.7, subjects the offer to rejection.

Johnnie E. Gryder, 38 IBLA 146 (Dec. 5, 1978)

"*Interest*." Where an oil and gas leasing service selects lands, files offers, and advances funds on behalf of its clients for leases which the service is willing to sell on behalf of any successful client, *strictly at the client's option*, in return for a percentage commission on the sale, the service has no enforceable right to any portion of the lease, if issued. In such circumstances, the service does not have an "interest" in the lease, so that the client/offeror is not precluded from stating that he is the sole party in interest to the offer, and the filing of offers for the same parcel by other clients of the service is not disqualifying.

Geosearch, Inc., 39 IBLA 49 (Jan. 16, 1979)

Geosearch, Inc., 40 IBLA 267 (Apr. 18, 1979)

Geosearch, Inc., 40 IBLA 401 (May 14, 1979)

"*Interest*." Where there is an agreement giving an offeror the option of selling part of an oil and gas lease to his agent leasing service, exercisable solely at the offeror's discretion, the agent has a mere hope or expectancy and not an "interest" in the offer, as defined in 43 CFR 3100.0-5(b). A leasing service, which files a simultaneous noncompetitive oil and gas lease offer drawing entry card on behalf of its client, bound by a "put option" does not have a hidden interest in the offer and does not violate 43 CFR 3102.7 by failing to disclose this put option or 43 CFR 3112.5-2 by filing offers for more than one client on a parcel.

Jack Mask, 41 IBLA 147 (June 18, 1979)

Kelley Everette, 41 IBLA 155 (June 18, 1979)

"*Interest in an oil and gas lease or offer*." If an oil and gas lease offeror in an oral agreement gives another person "a claim or any prospective or future claim to an advantage or benefit from a lease," there would be an interest in the lease or lease offer which must be disclosed under 43 CFR 3102.7. That an offeror might raise a technical legal defense against enforcement of such an agreement in a court does not militate against there being a claim or avoid the consequence of the disclosure regulation or 43 CFR 3112.5-2 prohibiting multiple filing in drawing procedures.

"*Interest in an oil and gas lease or offer*." Where affidavits submitted on appeal by an oil and gas lease offeror disclose that prior to the filing of an oil and gas lease offer the offeror orally agreed to give the person filing the offer for him either the opportunity to refuse to purchase the lease under terms and conditions that a third party would make (right of first refusal), or the opportunity to make the first offer before any other offer would be accepted (first right to buy), the offeror has given the person an interest in the offer as defined in the regulations to include a prospective claim to an advantage or benefit from a lease.

R. J. Enevoldsen, 44 IBLA 70 (Nov. 20, 1979)
86 I.D. 643

"*Justifiable*." For a delay in submission of an oil and gas lease rental payment to be justifiable, lessee must show that the delay would not have occurred except for factors outside of his control.

Reid E. Motley, 43 IBLA 360 (Oct. 29, 1979)

"*Justifiable excuse*." The fact that a courtesy rental notice did not come to oil and gas lessee's attention until 1 day prior to rental due date is not a justifiable excuse for late payment of the rental.

Reid E. Motley, 43 IBLA 360 (Oct. 29, 1979)

"*Known geologic structure*." A known geologic structure is technically the trap in which an accumulation of oil or gas has been discovered by drilling and determined to be productive, the limits of which include all acreage that is presumptively productive.

Jack J. Bender, 40 IBLA 26 (Mar. 9, 1979)

"*Lands*." The term "lands" can be construed as covering mineral interests constructively severed from the surface estate.

General Crude Oil Co., 19 IBLA 245 (Mar. 28, 1975)

"*Lands not available for leasing*." Under 43 CFR 3110.1-3(a), lands are deemed to be not available for leasing when they are surrounded by lands contained within patents with no oil and gas rights reserved to the United States, when they are segregated from oil and gas leasing by withdrawal, or are embraced within an outstanding lease with an effective issuance date prior to the filing date of the subject offer.

Helen R. Reid, 39 IBLA 378 (Feb. 28, 1979)

"*Leasing Act minerals*." The Multiple Mineral Development Act, 30 U.S.C. § 524 (1970), reserved all Leasing Act minerals to the United States, and no rights to deposits of Leasing Act minerals are open to location under the mining laws under 30 U.S.C. § 525 (1970). "Leasing Act minerals" is defined as "all minerals which, upon Aug. 13, 1954, are provided in the mineral leasing laws to be disposed of thereunder." 30 U.S.C. § 530 (1970). Because leases for sodium, potassium, and "other related products" are authorized pursuant to 30 U.S.C. §§ 262, 282 (1970), "other related products" along with sodium and potassium fall within the category of Leasing Act minerals which include lithium which is dissolved in a sodium or potassium brine.

Foote Mineral Co., 34 IBLA 285 (Apr. 17, 1978)
85 I.D. 171

"*Lode*" and "*placer*." A placer mining claim has been defined as ground within defined boundaries which contain mineral in its earth, sand, or gravel; ground that includes valuable deposits not in place, that is, not fixed in rock, but which are in a loose state, and may in most cases be collected by washing or amalgamation without milling. Whereas, a lode or vein has been defined as any zone or belt of mineralized rock lying within boundaries clearly separating it from the neighboring rock; a body of mineral or mineral bearing rock within defined boundaries.

When mining claims have been located as placer claims for perlite which lies in a "blanket" or "pancake" in an almost horizontal plane and in its original state is encased between two different types of rock, where in places, the upper rock or layer has been eroded away leaving the perlite exposed at the surface and in other places on the claims the upper layer is still present, and the mining of the perlite is characterized as essentially a hard rock operation, and when it is first extracted from the ground and then processed or, in effect, milled to produce a marketable product, the perlite is properly classified as a lode deposit which will not sustain a placer location.

United States v. Estate of Arthur C. W. Bowen (Deceased), and Superior Perlite Mines, Inc. (Contestees), Harborlite Corp. (Intervenor), 38 IBLA 390 (Jan. 8, 1979)

"*Other related products*." "*Other associated deposits*." When sodium or potassium brines are covered by leases conveying the exclusive right to mine and dispose of sodium compounds and other related products or potassium compounds and other associated deposits, the leases convey the exclusive rights to all minerals dissolved in the brine, including lithium.

Foote Mineral Co., 34 IBLA 285 (Apr. 17, 1978)
85 I.D. 171

"*Otherwise*." As used in sec. 7 of the Act of Mar. 3, 1877, *as amended*, "no person or association of persons shall hold by assignment or otherwise," "otherwise" is not limited to other means equivalent to assignment but rather embraces all mechanisms whereby control of and benefit from an entry or entries are accumulated and transferred.

United States v. G. Patrick Morris et al., 19 IBLA 350 (Apr. 7, 1975)
82 I.D. 146

"*Paying Quantities*." The term "paying quantities," used in the Brady (Deep) Unit Agreement to determine whether or not a participating area of a unit should include additional tracts where the existence of hydrocarbons in paying quantities is disputed, refers to cost of drilling and production plus a reasonable profit.

Amoco Production Co., 41 IBLA 348 (July 11, 1979)

"*Payment*." Placing a check for annual rental for oil and gas leases in the mails does not constitute "payment" of annual rental. Rather, the lessee must cause the rental to be received by the office administering his leases, and, until such time as it is received, no "payment" of annual rental has occurred. Accordingly, where a check is mailed prior to the due date but does not arrive until more than 20 days after this due date, no "payment" was made prior to that time, so that the lease automatically terminated by operation of law, and the Department is without authority to consider a petition for reinstatement of the lease.

Mobil Oil Corp., 35 IBLA 265 (June 2, 1978)

"*Payment*." A noncompetitive oil and gas lease on which there is no well capable of production in paying quantities terminates by operation of law for failure to pay the annual rental on or before the due date. A check for rental does not constitute payment until it is received at the proper office.

Gretchen Capital, Ltd., 37 IBLA 392 (Nov. 8, 1978)

"*Person*." A State is a "person" within the meaning of the Department's private contest regulations.

State of Alaska et al., 41 IBLA 315 (July 11, 1979)
86 I.D. 361

"*Person*." Regulation 43 CFR 4.450-1 specifically gives persons with an adverse interest in land a right to contest the adverse claim. It does not depend on the applicability of the due process clause of the Constitution to either claimant. A State is a "person" within the meaning of this private contest regulation.

State of Alaska, 42 IBLA 1 (July 25, 1979)

WORDS AND PHRASES--Continued

"Practical." Under 43 U.S.C. § 1763 (19__), utilization of a nearby existing communication site is practical where the site is suitable and the expense of utilization would not be unreasonable as compared with environmental damage from a proliferation of sites.

Jicarilla Apache Indian Tribe, 29 IBLA 57 (Feb. 16, 1977)

"Production." "Production" as used in all Federal oil and gas leases includes all oil and gas withdrawn from a reservoir.

Response to Feb. 17, 1976, Request from the General Accounting Office: Interpretation of Mineral Leasing Act of 1920, and Outer Continental Shelf Lands Act Royalty Clause, M-36888 (Oct. 4, 1976) 84 I.D. 54

"Production." Oil or gas that is wasted is in a category by itself, distinctly separable from "production," when it is oil or gas that is lost on the surface or in the subsurface through the negligence of the lessee, i.e., without the specific sanction of the supervisor.

Computation of Moneys Due the United States on Oil and Gas Lost as a Result of Pennzoil's Blowout, M-36888 (Supp.) (Jan. 19, 1977) 84 I.D. 64

"Public Land." The term "public land" can only be defined in context, and is not a term of art having specific legal effect. Usually, however, it means the general public domain, unappropriated land; land belonging to the United States and which is subject to sale or other disposal under the general laws, and not reserved or held back for any special governmental or public purpose.

Ben J. Boschetto, 21 IBLA 193 (July 28, 1975)

"Public lands." "Public lands" are defined in sec. 3(e) of the Alaska Native Claims Settlement Act, as follows: "'Public lands' means all Federal lands and interests therein, located in Alaska except: (1) the smallest practicable tract, as determined by the Secretary, enclosing land actually used in connection with the administration of any Federal installation, and (2) land selections of the State of Alaska which have been patented or tentatively approved under sec. 6(g) of the Alaska Statehood Act, as amended (72 Stat. 341, 77 Stat. 223), or identified for selection by the State prior to Jan. 17, 1969." The "except" clause contained in the definition of public lands in sec. 3(e) of ANCSA must be read as an expression of Congressional intent not to include particular lands rather than as an "exception" from lands included in the general definition of public lands.

Appeal of Seldovia Native Ass'n, Inc., 1 ANCAB 65 (July 1, 1976) 83 I.D. 461

"Public lands." Under 43 CFR 9239.0-7 which defines a trespass, the term "public lands" includes mineral deposits reserved under the Stock-Raising Homestead Act, 43 U.S.C. § 299 (1970).

Western Nuclear, Inc., 35 IBLA 146 (May 22, 1978) 85 I.D. 129

WORDS AND PHRASES--Continued

"Public Lands." Land within an interim conveyance to a Native Corporation is no longer "public land" under the Federal Land Policy and Management Act nor subject to Bureau of Land Management jurisdiction to issue rights-of-way under that Act.

New England Fish Co., 42 IBLA 200 (Aug. 22, 1979)

"Reasonable diligence." Where an oil and gas rental check bearing the due date of the lease is submitted a few days in advance thereof, but the check is returned by the Bureau of Land Management and thereupon a new check is promptly submitted, even if it could be considered that the lease had terminated, it would be eligible for reinstatement under 30 U.S.C. § 188(c) (1976) because there has been reasonable diligence on the part of lessee.

Lillie Belle Higgins, 38 IBLA 254 (Dec. 8, 1978)

"Reasonable diligence." Allowing 1 day for mail delivery of an oil and gas lease rental demonstrates a lack of reasonable diligence, because reasonable diligence normally requires sending or delivering payments sufficiently in advance of the anniversary date to allow for normal delays in the collection, transmittal, and delivery of the payment.

Reid E. Motley, 43 IBLA 360 (Oct. 29, 1979)

"Relocation." A relocation of a mining claim is best defined as a location adverse to the prior locations.

James C. Haight, 44 IBLA 240 (Dec. 11, 1979)

"Rentals." Reasonable diligence in sending a rental payment due on the anniversary date includes transmitting the payment so that it will normally be received in the appropriate office on the anniversary date considering the method of transmission, normal delays in handling, and the distance involved.

"Rentals." Failure to pay advance rentals on or before the anniversary date may be justifiable only if the reason for such failure is proximate in time to the anniversary date and may reasonably be considered to be the proximate cause of the failure to submit the payment on time.

M. J. Harvey, Jr., 19 IBLA 230 (Mar. 25, 1975)

"Rural Electrification Administration projects." A right-of-way holder is not excused from payment of rental under 43 CFR 2802.1-7(c), by virtue of holding an REA loan, where such holder is neither a cooperative or nonprofit organization.

Continental Telephone of the West, 35 IBLA 279 (June 2, 1978) 85 I.D. 186

"Segregation." "Segregation" is an administrative procedure preliminary to favorable or unfavorable action on a withdrawal application by the Secretary of the Interior in the exercise of his delegated authority under the Pickett Act, 43 U.S.C. § 141 et seq. (1970), and is not legally equivalent, in its effect on the status of the land, to a completed withdrawal or reservation.

Appeal of Paug-Vik, Inc., Ltd., 3 ANCAB 49 (July 5, 1978) 85 I.D. 229

WORDS AND PHRASES--Continued

"Shall be subject to cancellation." Where a regulation recites that a right-of-way "shall be subject to cancellation" for violation of its terms and conditions, the authorized officer is invested with the discretion to cancel or not, depending upon the circumstances.

State of Alaska, Department of Highways, 20 IBLA 261 82 I.D. 242
(May 19, 1975)

"Signed and fully executed." The term "signed and fully executed" as used in 43 CFR 3112.2-1(a) does not interdict the use of a rubber stamp to affix a signature to a drawing entry card, provided that it is the applicant's intention that the stamp be his signature.

Robert C. Leary et al., 27 IBLA 296 (Oct. 26, 1976)

Arthur S. Watkins, Robert R. Eckerman, 28 IBLA 79
(Nov. 12, 1976)

"Subject to appropriation by him." The provision in 43 CFR 2511.4-2(a) permitting credit for residence and cultivation by a homestead entryman before the date of entry if during that period the land was "subject to appropriation by him" does not refer to land for which there were prior-filed homestead applications which are subsequently withdrawn or rejected. Therefore, until action is taken on prior-filed applications, final proof filed by a junior homestead applicant should not be rejected merely because the land is subject to the prior applications.

John R. Dean, 34 IBLA 330 (Apr. 26, 1978) 85 I.D. 81

"Subject to valid existing rights." The Secretary of the Interior in making withdrawals "subject to valid existing rights" in PLO 5179 and PLO 5250 intended exceptions to withdrawal to apply in behalf of only those claimants who themselves held such valid rights at time of withdrawal. The Secretary did not intend existence of another's valid rights on withdrawal date to restrain withdrawal so as to allow a topfiling claimant to enter pertinent lands after withdrawal date and independently establish rights under mining laws.

Harry H. Wilson, 35 IBLA 349 (June 19, 1978)

"Such permit." "Such permit" as used in sec. 3 of the Taylor Grazing Act, 43 U.S.C. § 315b (1970), providing for a renewal of a grazing permit does not mean only a permit identical with the terms and provisions of the original.

Hat Ranch, Inc., 27 IBLA 340 (Nov. 4, 1976) 83 I.D. 542

"Tender." Placing a check for annual rental for oil and gas leases in the mails does not constitute a tender of payment of annual rental, within the meaning of 43 CFR 3108.2-1(c). Rather, a lessee makes a tender of payment only when he submits payment to the BLM office administering his leases, and when BLM has the opportunity either to receive or decline it. Accordingly, placing rental in the mails does not constitute a tender of payment which would allow the Department to consider the merits of a petition for reinstatement of an oil and gas lease terminated for failure to make timely payment of annual rental.

Mobil Oil Corp., 35 IBLA 265 (June 2, 1978)

WORDS AND PHRASES--Continued

"Two Consecutive Years." The term "two consecutive years in 43 CFR 4115.2-1(e)(9) means 2 consecutive application years from the date established by a district manager as the deadline for filing grazing applications.

John Hudspeth, 21 IBLA 91 (June 27, 1975)

"Valid Existing Right." An application for modification of a coal lease filed prior to enactment of the Federal Coal Leasing Amendments Act of 1975, 30 U.S.C.A. § 203 (Supp. 1977), is insufficient to establish a "valid existing right" excepted from the acreage limit on lease modifications imposed by the amendment.

Nevada Power Co., 36 IBLA 62 (June 30, 1978)

"Well capable of producing oil or gas in paying quantities." The provision in 30 U.S.C. § 226(f) (1976) referring to a well capable of producing oil or gas in paying quantities refers to a well which is actually in physical condition to produce a sufficient quantity of oil or gas to yield a reasonable profit over and above the costs of operating the well and marketing the product. A satisfactory test of a well to establish its capability as of the termination date is necessary. Evidence which only supports inferences is not sufficient, nor is a showing only of a potential prospect for profitable operation at some future time.

American Resources Management Corp., 40 IBLA 195
(Apr. 5, 1979)

"Will be subject to renewal." Where a regulation recites that a mineral lease "will be subject to renewal" under certain circumstances, the authorized officer is vested with the discretion to renew the lease or not, depending upon the circumstances.

Apache Oro Co., 22 IBLA 331 (Nov. 11, 1975)

"Withdrawn" and "reserved." The words "withdrawn" and "reserved" are frequently used interchangeably and in conjunction with each other, and cannot be distinguished with separate precise meanings.

Appeal of Paug-Vik, Inc., Ltd., 3 ANCAB 49 (July 5, 85 I.D. 229
1978)

"Withdrawn" and "restored from a withdrawal." Lands or minerals in lands were not "withdrawn" and "restored from a withdrawal" as those terms are used in the public land laws merely because an erroneous title opinion that the minerals are not owned by the United States is corrected to reflect that they are owned by the United States, and the oil and gas simultaneous filing procedures are applicable where those minerals were in a lease which expired before the correction of the status of the minerals was made.

David A. Provinse, 38 IBLA 347 (Dec. 22, 1978)

☆ U.S. GOVERNMENT PRINTING OFFICE : 1980 O - 331-055
